Subpart K of the laboratory standards rule (42 CFR part 493, subpart K) § 493.1201 defines general quality control requirements and quality control requirements for laboratory specialties and subspecialties for tests of moderate or high complexity. These requirements are to be phased-in over a 2-year period beginning on the effective date of the regulation (September 1, 1992). For this initial 2-year period, laboratories using instruments, kits or test systems categorized as moderate complexity and cleared by FDA for in vitro diagnostic use must comply with quality control requirements specified in § 493.1202 which set forth compliance with "baseline" quality control requirements including use of existing quality control recommendations of the manufacturers, contained in the device labeling. After the 2-year phase-in period, all laboratories certified to perform moderate or high complexity tests must meet all applicable quality control requirements specified in § 493.1203. However, the revised process permits a manufacturer to provide additional quality control data to FDA (via the 510(k)/premarket approval process) for its device commensurate with the complexity category assigned to its use. Laboratories using testing devices whose quality control procedures have been reviewed and cleared by FDA, can follow the manufacturer's instructions to satisfy much of the regulation's quality control requirements. After the phase-in, laboratories using tests not reviewed and cleared by FDA must follow their own quality control program that complies with all applicable quality control rules of § 493.1203.

Upon development of the above regulatory scheme for implementation of the quality control standard, HHS recognized that technological innovation would likely produce future products which are more accurate, more reliable and simpler to use. Moreover, the level of quality control required to ensure product performance claims would possibly be different than those currently required in Subpart K of Part 493. Thus, HHS believes this enhanced premarket evaluation process will accommodate future technological improvements of laboratory tests for the benefit of both laboratory users and manufacturers of commercial laboratory products. However, HHS also believes that quality control instructions that deviate from, or are proposed as an alternative to CLIA's quality control requirements must be validated as appropriate for laboratories given the complexity level of the test(s) they are certified to perform. This validation requirement will provide assurance that adequate quality control will be maintained in all laboratories, regardless of the complexity level of testing they are authorized to perform.

In order to make manufacturers aware of the technical requirements necessary to obtain FDA's quality control validation assessment clearance, FDA is developing guidance which will be available prior to the effective date (September 1, 1992) of the laboratory standards regulation. FDA is inviting manufacturers, manufacturer's trade associations, and other interested parties in the clinical laboratory community to attend and open public meeting and to share opinions with FDA on appropriate quality control instructions and validation requirements for commercial laboratory tests. In particular, FDA is interested in opinions on the following questions:

What type of data or information should FDA consider as adequate for an in vitro device, given its complexity category assignment, based on the standards described in §§ 493.1217 and 493.1218 (Calibration, calibration verification and control procedures)?

Under what conditions and to what extent is site specific testing necessary to validate quality control instructions as appropriate for the complexity category for the test? To what extent can reliance on manufacturers' internal quality control evaluations be accepted either in conjunction with or as an alternative to quality control validation testing in the (complexity) setting(s) in which the device is intended to be used.

In addition to the questions above, FDA believes that product labeling, as described in § 809.10 (21 CFR 809.10), will play an increasingly important role in the laboratory as an educational tool, and as a source of information to help regulated laboratories comply with all the requirements of Subpart K of Part 493. Therefore, FDA is also interested in comments on how product labeling might be used by laboratories in complying with other requirements such as paragraph (b) of § 493.1213 *Standard; Establishment and verification of method performance specifications.* For example, what information could manufacturers provide to help laboratories "demonstrate" that they "can obtain performance specifications for accuracy, precision, and reportable range of results comparable to those established by the manufacturers" and to "verify that the manufacturer's reference range is appropriate for the laboratory's patient population?"

FDA will notify manufacturers of the availability of the completed guidance document by notice in the **Federal Register**. The notice will also indicate when FDA will begin receiving premarket applications for quality control validation assessment. A separate notice will be published in the **Federal Register** which will describe how to make these submissions.

Interested persons may present data, information, or views, orally or in writing, on matters described above to the contact person listed above. Those desiring to make formal presentations should notify the contact person before April 3, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present and the names and addresses of proposed participants. Oral presentations should be 10 to 15 minutes in length. The planned time schedule will allow for a limited number of oral presentations

Dated: March 19, 1992

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Program Announcement for Scholarships for Disadvantaged Students

The Health Resources and Services Administration (HRSA) announces that applications for fiscal year (FY) 1992 for the Scholarships for Disadvantaged Students (SDS) program are being accepted under the authority of section 760 of the Public Health Service Act (the Act), as amended by the Disadvantaged Minority Health Improvement Act of 1990, Public Law 101–527.

Approximately $17 million is available in FY 1992 for the competing applications for the SDS Program from eligible health professions and nursing schools. Of the funds available, 30 percent shall be made available to schools agreeing to expend the grants only for nursing scholarships. An estimated $5.1 million will support approximately 2,040 scholarships averaging $2,500 for students at schools of nursing. The balance of $11.9 million will support approximately 4,857 scholarships averaging $2,450 for eligible health professions students. The period of fund availability will be for one academic year.

Purpose

The SDS program is a program of grants to health professions and nursing schools for the purpose of assisting such schools in providing scholarships to individuals from disadvantaged backgrounds who are enrolled (or accepted for enrollment) as full-time students in the schools, as well as to undergraduate students who have demonstrated a commitment to pursing a career in health professions. For purposes of the SDS program in FY 1992, an "individual from a disadvantaged background" is defined as in 42 CFR 57.1804, as one who:

(1) Comes from an environment that has inhibited the individual from obtaining the knowledge, skill, and abilities required to enroll in and graduate from a health professions school, or from a program providing education or training in an allied health professions; or

(2) Comes from a family with an annual income below a level based on low income thresholds according to a family size published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index, and adjustment by the Secretary for use in all health professions programs. The Secretary will periodically publish these income levels in the **Federal Register**.

The following income figures determine what constitutes a low income family for purposes of the Scholarships for Disadvantaged Students program for FY 1992.

Size of parents' family [1]	Income level [2]
1	$9,100
2	11,800
3	14,100
4	16,000
5	21,300
6 or more	23,900

[1] Includes only dependents listed on Federal income tax forms.

[2] Adjusted gross income for calendar year 1991, rounded to $100.

Use of Funds

Funds awarded to a school under this program may be used as follows:

(1) To award scholarships to eligible students enrolled in the school, to be expended only for tuition expenses, other reasonable educational expenses, and reasonable living expenses (as defined by the school for all students attending the school) incurred while enrolled in a school as a full-time student. The amount of the scholarship may not, for any year of attendance, exceed the total amount required for the year for the expenses specified above.

(2) To provide financial assistance to undergraduate students who have demonstrated a commitment to pursuing a career in the health professions, in order to facilitate the completion of the educational requirements for such careers, provided that the total amount used for this purpose may not exceed 25 percent of the funds awarded to the school under this program.

Any school receiving SDS funds will be required to maintain separate accountability for these funds.

School Eligibility

Grants under this program will be made available to accredited public or nonprofit private health professions schools. For purposes of the SDS program, the term "health professions schools" means schools of medicine, dentistry, osteopathic medicine, pharmacy, optometry, podiatric medicine, veterinary medicine, and public health, as defined in section 701(4) of the Act, and which are accredited as provided in section 701(5) of the Act; schools of allied health as defined in section 701(10) of the Act, and which are located in States as defined in section 701(11) of the Act, and schools of nursing as defined in section 853 of the Act. The term also includes a "graduate program in clinical psychology" as defined in section 701(4) of the Act.

In accordance with congressional report language, funding of allied health schools or programs will be limited to the following: dental hygiene, medical laboratory technology, occupational therapy, physical therapy and radiologic technology.

As required by statute, to qualify for participation in the SDS program, a school must be:

(1) Carrying out a program for recruiting and retaining students from disadvantaged backgrounds, including racial and ethnic minorities; and

(2) Carrying out a program for recruiting and retaining minority faculty.

If a school has no students from disadvantaged backgrounds, or no full-time minority faculty, or provides no data as required in the application materials, it is not eligible for participation in the SDS program. A school that is able to provide required data will be eligible for participation in the current award cycle.

In addition, each school that received funds in FY 1991 must agree in its fiscal year 1992 application to be carrying out all of the statutory requirements listed below:

(1) Ensure that adequate instruction regarding minority health issues is provided for in the curricula of the school. This does not include normal course work, that by definition includes minority health issues (e.g., sickle cell anemia in a pathology class), but refers to course work reflecting an institutional awareness of the special health needs of minority populations;

(2) Enter into arrangements with one or more health clinics providing services to a significant number of individuals who are from disadvantaged backgrounds, including members of minority groups, for the purpose of providing students of the school with experience in providing clinical services to such individuals;

(3) Enter into arrangements with one or more public or nonprofit private secondary educational institutions and undergraduate institutions of higher education (feeder schools), for the purpose of carrying out programs regarding:

(a) the educational preparation of disadvantaged students, including minority students, to enter the health professions; and

(b) the recruitment of disadvantaged students, including minority students, into the health professions; and

(4) Establish a mentor program for assisting disadvantaged students, including minority students, regarding the completion of the educational requirements for degrees from the school. This program may include the involvement of students, community health professionals, faculty, alumni, past recipients of Health Career Opportunity Program (HCOP) funds,

faculty/staff of feeder schools, etc., in institutionally organized activity (e.g., tutoring, counseling, and summer/bridge programs).

Each school funded for the first time in FY 1992 will also be required to carry out each of the activities specified above by not later than twelve months from receipt of award. Funds awarded to a school under the SDS program may not be used to carry out any of the above activities which the school must be doing, or must agree to do. In addition, a school will be required to continue to carry out all described activities, and also the student/faculty recruitment and retention activities, for as long as the SDS program is in operation in the school.

Evaluation Criteria For Fiscal Year 1992

For FY 1992, applications will be evaluated on the degree to which the schools meet the statutory requirements listed above. Guidance for presenting the information will be provided in the FY 1992 application materials.

Student Eligibility: As required by statute or regulation, to qualify for the SDS program, a student must:

(1) Be a citizen, a U.S. national, an alien lawfully admitted for permanent residency in the U.S., or a citizen of the Commonwealth of the Northern Mariana Islands, a citizen of the Commonwealth of Puerto Rico, a citizen of the Trust Territory of the Pacific Islands (consisting of the Republic of Palau) or a citizen of the Republic of Marshall Islands, the Federated States of Micronesia (both formally part of the Trust Territory of the Pacific Islands);

(2) Meet the definition of an "individual from a disadvantaged background" as defined above; and

(3)(a) Be enrolled in or accepted by an eligible school for enrollment as a full-time student; or

(b) be an undergraduate student who has demonstrated a commitment to pursuing a career in health professions, including nursing.

Statutory Preference

The law requires that in providing SDS scholarships, the school give preference to students for whom the cost of attending an SDS school would constitute a severe financial hardship. Severe financial hardship will be determined by the school in accordance with standard need analysis procedures prescribed by the Department of Education for its Federal student aid programs.

The following Acceptability of Undergraduate Students, Definitions, Funding Preference, Methodology for Implementing the Statutory Special Consideration, the Nonstatutory Special Consideration for Baccalaureate Nursing Programs, and the Procedures for Calculating Scholarship Awards were established in FY 1991 after public comment (at 56 FR 49779) on October 1, 1991, and are being extended in FY 1992.

Acceptability of Undergraduate Students

In the instance of (3)(b) above, it has been established that the undergraduate students eligible for scholarships must be at feeder schools and have signed statements that they are interested in health professions or nursing careers.

Definitions

"Black" means a person having origins in any of the black racial groups of Africa.

"Hispanic" means a person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

"American Indian or Alaskan Native" means a person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Definitions listed above are contained in Directive No. 15 of Office of Management and Budget Circular No. A–46, dated May 3, 1974.

"Native American" as defined in Public Law 101–527, means American Indian, Alaskan Native, Aleut, or Native Hawaiian.

"Minority" with respect to faculty, refers to Blacks, Hispanics, Native Americans, Filipinos, Koreans, Pacific Islanders, and Southeast Asians whose percentage among the total supply of practitioners in the applicable health profession is below that group's percentage in the total population.

Funding Preference

A funding preference means funding of a specific group of approved applications ahead of other categories of applications. In FY 1992 a funding preference will be accorded to schools of medicine, osteopathic medicine and dentistry. This responds to the concern expressed in Congressional committee report language regarding the need to target monies toward programs that are focused on primary care. In FY 1991, SDS awards of $5.7 million were made to 136 schools of medicine, osteopathic medicine and dentistry, which in the aggregate had requested funding of over $100 million. In FY 1992, with an estimated 200 eligible schools of medicine, osteopathic medicine and dentistry, it is anticipated that additional schools will apply. The funding preference will not affect the statutory requirement that 30% of the SDS funds shall be made available to schools agreeing to expend the grants only for nursing scholarships.

Methodology for Implementing the Statutory Special Consideration

In accordance with the statute, a special consideration will be given to eligible schools with an underrepresented minority enrollment that exceeds the national average for its particular discipline.

For purposes of determining eligibility of a school of medicine, osteopathic medicine and dentistry for the special consideration, Asians will not be included in the definition of underrepresented minorities for the school. Although certain Asian subgroups (i.e. Filipinos, Koreans, Pacific Islanders, and Southeast Asians) are considered to be underrepresented in the health professions and are included as minorities for purposes of program requirements relating to faculty recruitment and retention (see above), national data on these subgroups are not available as a basis for establishing national average enrollment of underrepresented minorities for the disciplines of medicine, osteopathic medicine, and dentistry.

For purposes of the FY 1992 award cycle, the national average enrollments of Blacks, Hispanics, and Native Americans (in combination) are: for medicine, 12.7 percent; osteopathic medicine, 6.9 percent; dentistry, 13.5 percent; and nursing, 14.2 percent. Of note, for FY 1991, the nursing percentage included Asians. However, based on more recent data for academic year 1990–91, Asians are not underrepresented in nursing and the 14.2 percent figure cited above does not include Asians.

Nonstatutory Special Consideration for Baccalaureate Nursing Programs

Among schools of nursing, additional special consideration will be given to baccalaureate programs. One of the distinguishing features of baccalaureate education is the substantial focus on preparation for community health practice. Training nurses for community health practice is an integral component of the Department's access strategy.

Procedures for Calculating Scholarship Awards

Awards to eligible schools which have applied will be calculated by comparing the enrollment of disadvantaged students in each eligible school with the total enrollment of the disadvantaged students in all eligible schools. In the case of health professions schools, the calculation will be made first for schools of medicine, osteopathic medicine, and dentistry, with awards limited to the cost of attendance times the number of eligible disadvantaged students at the school. Any remaining funds will be made available to other eligible health professions schools.

A school with an enrollment of underrepresented minority students which is above the national average (for each discipline) will be given double credit (i.e., its enrollment of disadvantaged students would be doubled for awarding purposes). A baccalaureate nursing school will be given double credit. A baccalaureate nursing school with an underrepresented minority enrollment above the national average will be given quadruple credit (i.e., its enrollment of disadvantaged students will be multiplied by four for awarding purposes).

National Health Objectives for the Year 2000

The Public Health Service is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-lead national activity for setting priority areas. The Scholarships for Students from Disadvantaged Backgrounds program is related to the priority area of Educational and Community-Based Programs. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone (202) 783–3238).

Application Requests

The application form and instructions for this program have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. The OMB clearance number is 0915–0149.

Applications will be mailed to all eligible schools of medicine, osteopathic medicine, dentistry and nursing.

Requests for grant application materials and questions regarding business management and program policy should be directed to: Mr. Bruce Baggett, Chief, Student Institutional Support Branch, Division of Student Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8–34, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–4776.

The application deadline date is May 4, 1992. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date, or

(2) Postmarked on or before the deadline and received in time for consideration. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

The *Catalog of Federal Domestic Assistance* Number for the Scholarships for Disadvantaged Students program is 93.925. This program is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: January 28, 1992.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–M

National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Public Health Service, HHS.

ACTION: Notice

SUMMARY: The Public Health Service (PHS) is publishing this notice of petitions received under the National Vaccine Injury Compensation Program ("the Program"), as required by section 2112(b)(2) of the PHS Act, as amended. While the Secretary of Health and Human Services is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Claims Court is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program generally, contact the Clerk, United States Claims Court, 717 Madison Place, NW., Washington, DC 20005, (202) 633–7257. For information on the Public Health Service's role in the Program, contact the Administrator, Vaccine Injury Compensation Program, 6001 Montrose Road, room 702, Rockville, MD 20852, (301) 443–6593.

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of title XXI of the PHS Act, 42 U.S.C. 300aa-10 *et seq.*, provides that those seeking compensation are to file a petition with the U.S. Claims Court and to serve a copy of the petition on the Secretary of Health and Human Services, who is named as the respondent in each proceeding. The Secretary has delegated his responsibility under the Program to PHS. The Claims Court is directed by statute to appoint special masters who take evidence, conduct hearings as appropriate, and make initial decisions as to eligibility for, and amount of, compensation.

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table set forth at section 2114 of the PHS Act. This Table lists for each covered childhood vaccine the conditions which will lead to compensation and, for each condition, the time period for occurrence of the first symptom or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the Table and for conditions that are manifested after the time periods specified in the Table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa–12(b)(2), requires that the Secretary publish in the **Federal Register** a notice of each petition filed. Set forth below is a partial list of petitions received by PHS on October 1, 1990.

Section 2112(b)(2) also provides that the special master "shall afford all interested persons an opportunity to submit relevant, written information" relating to the following:

1. The existence of evidence "that there is not a preponderance of the evidence that the illness, disability, injury, condition, or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition," and

2. Any allegation in a petition that the petitioner either:

(a) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Vaccine Injury Table (see section 2114 of the PHS Act) but which was caused by" one of the vaccines referred to in the table, or

(b) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Vaccine Injury Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine" referred to in the Table.

This notice will also serve as the special master's invitaiton to all interested persons to submit written information relevant to the issues described above in the case of the petitions listed below. Any person choosing to do so should file an original and three (3) copies of the information with the Clerk of the U.S. Claims Court at the address listed above (under the heading "For Further Information Contact"), with a copy to PHS addressed to Director, Bureau of Health Professions, 5600 Fishers Lane, Room 8-05, Rockville, MD 20857. The Court's caption (Petitioner's Name v. Secretary of Health and Human Services) and the docket number asigned to the petition should be used as the caption for the written submission.

Chapter 35 of title 44, United States Code, related to paperwork reduction, does not apply to information required for purposes of carrying out the Program.

List of Petitions

1. Charlene Stocking, Ruislip AFB, England, Claims Court Number 90-2226 V
2. Joan Deming, Pensacola, Florida, Claims Court Number 90-2227 V
3. Mitchell Yergert, La Junta, Colorado, Claims Court Number 90-2228 V
4. Dewain Upton, Roswell, New Mexico, Claims Court Number 90-2229 V
5. Martha Turk on behalf of Kasey Turk, Linwood, New Jersey, Claims Court Number 90-2230 V
6. Lee Ann Cottman, Oklahoma City, Oklahoma, Claims Court Number 90-2231 V
7. Susan Roach on behalf of Dennis Roach, St. Paul, Minnesota, Claims Court Number 90-2232 V
8. Rosanne Daniels on behalf of Brandon Peeples, Denver, Colorado, Claims Court Number 90-2233 V
9. Henrietta Weeks on behalf of Kim Weeks, Kansas City, Missouri, Claims Court Number 90-2234 V
10. Sharon Bogue on behalf of Gareth Bogue, Gales Ferry, Connecticut, Claims Court Number 90-2235 V
11. Jon Love on behalf of Sarah Love, Oklahoma City, Oklahoma, Claims Court Number 90-2236 V
12. Ronald Schneider on behalf of Nicole Schneider, Saginaw, Michigan, Claims Court Number 90-2237 V
13. Young Hee Jun on behalf of Sammy Jun, Deceased, Brookline, Massachusetts, Claims Court Number 90-2238 V
14. Rosalie Williams, Klamath Falls, Oregon, Claims Court Number 90-2239 V
15. Daniel Borremans, Green Bay, Wisconsin, Claims Court Number 90-2240 V
16. Beth Lohse on behalf of Jesse Lohse, Beatrice, Nebraska, Claims Court Number 90-2241 V
17. Mary Rodgers on behalf of Jianessa Bennott, Hollywood, California, Claims Court Number 90-2242 V
18. Larry Rinker on behalf of Mark Rinker, Downieville, California, Claims Court Number 90-2243 V
19. Anna Lucas on behalf of Steven Osborn, Hampton, Virginia, Claims Court Number 90-2244 V
20. John Skeen on behalf of Jacqueline Skeen, Madera, California, Claims Court Number 90-2245 V
21. Lorayn Malek on behalf of Travis Malek, Maui, Hawaii, Claims Court Number 90-2246 V
22. Kathleen Pescetti on behalf of Anthony Pescetti, Rolling Hills, California, Claims Court Number 90-2247 V
23. Roger Hackbarth on behalf of Phillip Hackbarth, Los Alamitos, California, Claims Court Number 90-2248 V
24. Steven Saxton on behalf of Nathaniel Saxton, Sacramento, California, Claims Court Number 90-2249 V
25. Angela Newby on behalf of Amanda Newby, West Sacramento, California, Claims Court Number 90-2250 V
26. William Posey, Sr., on behalf of Willliam Posey, Jr., Baltimore, Maryland, Claims Court Number 90-2251 V
27. Rick Kelsch on behalf of Melisa Kelsch, Salt Lake City, Utah, Claims Court Number 90-2252 V
28. Sue Kitasako on behalf of Clark Kitasako, Seattle, Washington, Claims Court Number 90-2253 V
29. Scott Daniels on behalf of Ashley Daniels, Carlisle, Massachusetts, Claims Court Number 90-2254 V
30. Rhonda Hutcherson on behalf of Travis Hutcherson, Elizabethtown, Kentucky, Claims Court Number 90-2255 V
31. Jerry Fortune on behalf of Melissa Fortune, Deceased, Selmer, Tennessee, Claims Court Number 90-2256 V
32. Rick Parker on behalf of Jessica Parker, Highland Park, Illinois, Claims Court Number 90-2257 V
33. Patricia Bedwell on behalf of Thomas Bedwell, Westland, Michigan, Claims Court Number 90-2258 V
34. Thomas Moore on behalf of Brandon More, Deceased, Senatobia, Mississippi, Claims Court Number 90-2259 V
35. Juanita Forsmark on behalf of Elizabeth Forsmark, Farmerville, Louisiana, Claims Court Number 90-2260 V
36. Tom Akers on behalf of Brian Akers, Jonesboro, Arkansas, Claims Court Number 90-2261 V
37. John Walker on behalf of Gregory Walker, Memphis, Tennessee, Claims Court Number 90-2262 V
38. Herschel Funk on behalf of Tifani Funk, Canon City, Colorado, Claims Court Number 90-2263 V
39. Robert Barnes on behalf of Rebecca Barnes, Waterbury, Connecticut, Claims Court Number 90-2264 V
40. Kathleen Evans on behalf of Jessica Evans, Mattoon, Illinois, Claims Court Number 90-2265V
41. Walter Luttrell on behalf of Phillip Luttrell, Acworth, Georgia, Claims Court Number 90-2266 V
42. Barbara Anderson on behalf of Lori Anderson, Wayzata, Minnesota, Claims Court Number 90-2267 V
43. Williams Cullinane on behalf of Daniel Cullinane, Hackensack, New Jersey, Claims Court Number 90-2268V
44. Arthur Powell on behalf of Chloe Powell, Houston, Texas, Claims Court Number 90-2269 V
45. Douglas Simicsak on behalf of Brant Simicsak, Philadelphia, Pennsylvania, Claims Court Number 90-2270 V
46. Julie Ko on behalf of Bellen Hsieh, Montebello, California, Claims Court Number 90-2271 V
47. Debbie Probes, Lubbock, Texas, Claims Court Number 90-2272 V
48. Katie Carter on behalf of Rachel Baines, Memphis, Tennessee, Claims Court Number 90-2273 V
49. Lisa Miner, Indianapolis, Indiana, Claims Court Number 90-2274 V
50. Edward Deardorff on behalf of Jay Deardorff, Deceased, St. Ignatius, Montana, Claims Court Number 90-2275 V
51. William Walker, Superior, Arizona, Claims Court Number 90-2276V
52. Byron Thomas, Texarkana, Texas, Claims Court Number 90-2277 V
53. Harry Dodson on behalf of David Dodson, Garden City, Michigan, Claims Court Number 90-2278 V
54. Barbara Siemann on behalf of Alexander Siemann, Littleton, Colorado, Claims Court Number 90-2279 V
55. Paul Eimer, Wentworth, Missouri, Claims Court Number 90-2280 V
56. Alexander Hernandez on behalf of Kimberly Hernandez, Deceased, Denver, Colorado, Claims Court Number 90-2281 V
57. Gerald Seib on behalf of Anthony Seib, Evansville, Indiana, Claims Court Number 90-2282 V
58. Gary Hagarty, Solon, Ohio, Claims Court Number 90-2283 V
59. Rebecca Conklin on behalf of Kenneth Conklin, Augusta, Georgia, Claims Court Number 90-2284 VC
60. Cecil Wohlford on behalf of Kersten Wohlford, Washington, D.C., Claims Court Number 90-2285V
61. Amy Garcia on behalf of Maegan Stoddard, New Bedford, Massachusetts, Claims Court Number 90-2286 V
62. Martha Abee on behalf of Rachel Abee, Ft. Pierce, Florida, Claims Court Number 90-2287 V
63. Harold Daniels on behalf of Mark Daniels, Houston, Texas, Claims Court Number 90-2288 V
64. David Flaherty, St. Paul, Minnesota, Claims Court Number 90-2289 V
65. Ryan Kinney, West St. Paul, Minnesota, Claims Court Number 90-2290 V
66. Iris Thornhill on behalf of Anwar Garrett, Flushing, New York, Claims Court Number 90-2291V
67. Dale Watkins on behalf of Christopher Watkins, Phoenix, Arizona, Claims Court Number 90-2292 V
68. Timothy Wilding on behalf of Jason Wilding, Auburn, Maine, Claims Court Number 90-2293 V

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO-030-92-4320-10-1784]

Montrose District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with 43 CFR subpart 1784, that a meeting of the Montrose District Grazing Advisory Board will be held on April 14, 1992 in Montrose, Colorado.

DATES: A meeting is scheduled April 14, 1992.

FOR FURTHER INFORMATION CONTACT: Dave Kauffman, Bureau of Land Management, 2465 South Townsend, Montrose, Colorado, 81401, telephone (303) 249-7791.

SUPPLEMENTARY INFORMATION: The Board will convene at 10 a.m. on April 14, 1992, in the conference room at the Montrose District Office, Montrose, Colorado. Agenda items will include: minutes of the previous meeting, public presentations and requests, wild horse status, range improvement project review, new Board project proposals, updates on current issues, and arrangements for the next meeting. The meeting will adjourn at 5 p.m.

The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager prior to the meeting date. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within thirty (30) days following the meeting.

Dated: March 13, 1992.

Alan L. Kesterke,

District Manager.

National Park Service

Miss Green River Boat Concession, Inc.; Concession Contract Negotiations

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession contract with Miss Green River Boat Concession, Inc., authorizing it to continue to provide sightseeing tour boat facilities and services for the public within Mammoth Cave National Park, for a period of five (5) years from January 1, 1991, through December 31, 1995.

EFFECTIVE DATE: May 25, 1992.

ADDRESSES: Interested parties should contact the Regional Director, Southeast Region, 75 Spring Street SW., Atlanta, Georgia 30303, for information as to the requirements of the proposed contract.

SUPPLEMENTARY INFORMATION: This contract has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1990, and therefore, pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Editorial note: This document was received at the Office of the Federal Register March 18, 1992.

Concession Contract Negotiations; Smokemont Riding Stables of North Carolina, Inc.

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession permit with Smokemont Riding Stables of North Carolina, Inc., authorizing it to continue to provide saddle horse livery and guide services for the public at Great Smoky Mountains National Park, for a period of five (5) years from January 1, 1992, through December 31, 1996.

EFFECTIVE DATE: May 25, 1992.

ADDRESSES: Interested parties should contact the Regional Director, Southeast Region, 75 Spring Street, SW., Atlanta, Georgia 30303, for information as to the requirements of the proposed permit.

SUPPLEMENTARY INFORMATION: This contract has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1991, and therefore, pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Editorial note: This document was received at the Office of the Federal Register, March 18, 1992.

Dated: June 25, 1991.

Concession Contract; Wilderness River Adventures, Inc.

AGENCY: National Park Service.

ACTION: Public notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession contract with Wilderness River Adventures, Incorporated, an affiliate of ARA Leisure Services, Incorporated authorizing it to continue to provide guided-interpretive river float trip services for the public from Glen Canyon Dam to Lees Ferry within Glen Canyon National Recreation Area, Arizona for a period of five (5) years from January 1, 1991, through December 31, 1995.

EFFECTIVE DATE: May 25, 1992.

ADDRESSES: Interested parties should contact the Regional Director, Rocky Mountain Region, P.O. Box 25287, Denver, Colorado 80225, for information as to the requirements of the proposed contract.

SUPPLEMENTARY INFORMATION: This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared. The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1990, and therefore, purusant to the provisions of Section 5 of the Act of October 9, 1965, 79 Stat. 969; 16 U.S.C. 20, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be received by the Secretary no later than the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Dated: November 26, 1991.

BILLING CODE 4310-70-M

Preservation of Jazz Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Commission Preservation of Jazz Advisory Commission will be held from 1 p.m. to 4 p.m. on Friday, April 3, 1992 in room 12 at the Superdome (enter Gate G—near Claiborne and Girod Streets), New Orleans, Louisiana. Publication of this notice will provide less than 15 days advance notification, due to the need to confirm the availability of commission members.

The Preservation of Jazz Advisory Commission was established by Public Law 101-499 to advise the Secretary of the Interior in the preparation of a study of the suitability and feasibility of preserving and interpreting the origins of jazz in New Orleans.

The matters to be discussed at this meeting include:

—Presentation by the Downtown Development District about its Linear Jazz Park Concept
—Discussion about preliminary management alternatives
—Old business
—New business

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come, first-served basis. Any member of the public may file a written statement concerning the matters to be discussed at the commission meeting with the Superintendent, Jean Lafitte National Historical Park and Preserve. The public will also have an opportunity to submit written and oral comments for the record during the meeting.

Persons wishing further information concerning the meeting, or who wish to submit written statements may contact Mr. Robert Belous, Superintendent, Jean Lafitte National Historical Park and Preserve, U.S. Customs House, 423 Canal Street, room 210, New Orleans, Louisiana 70130-2341, telephone 504/589-3882.

Minutes of the Commission meeting will be available for public inspection four weeks after the meeting at the office of Jean Lafitte National Historical Park and Preserve.

Dated: March 19, 1992.

Carol F. Aten,

Chief, Office of Policy.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Renewal of the Advisory Committee of the Malaria Vaccine Program

The Administrator of the Agency for International Development has determined that a two-year renewal of the Advisory Committee of the Malaria Vaccine Program is in the public interest. The Advisory Committee performs necessary and important functions in connection with the formulation of A.I.D. vaccine development strategy and in evaluating and providing necessary advice concerning the progress and potential of Agency-funded research activities.

FOR FURTHER INFORMATION CONTACT: Kirk Miller, Malaria Vaccine Program Development, A.I.D. Office of Health, Washington, DC 20523-1817, (703) 875-5693. Robert L. Wrin, Chief, Communicable Diseases Division, Office of Health, Bureau for Research and Development.

Dated: March 9, 1992.

Jan W. Miller,

Assistant General Counsel, Employees & Public Affairs.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-525 (Final)]

Nepheline Syenite From Canada; Commission Determination to Conduct a Portion of the Hearing in Camera

AGENCY: U.S. International Trade Commission.

ACTION: Closure of a portion of a Commission hearing to the public.

SUMMARY: Upon request of petitioner in the above-captioned final investigation, the Commission has unanimously determined to conduct a portion of its hearing scheduled for March 19, 1992, *in camera*. See Commission rules 207.23(a), 201.13 and 201.35(b)(3) (19 CFR 207.23(a), 201.13 and 201.35(b)(3)). The remainder of the hearing will be open to the public. The Commission unanimously has determined that the 10-day advance notice of the change to a meeting was not possible. See Commission rule 201.35(a),(c)(1) (19 CFR 201.35(a),(c)(1)).

FOR FURTHER INFORMATION CONTACT: Robin L. Turner, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-205-3103. Hearing impaired individuals are advised that information on this matter may be obtained by contacting the Commission's TDD terminal on 202-205-1810.

SUPPLEMENTARY INFORMATION: The Commission believes that good cause exists in this investigation so as to make it appropriate to hold a portion of the hearing *in camera*. The majority of the information collected by the Commission is business proprietary information (BPI) because there is one domestic firm in the region. In light of these facts, the Commission has determined that a full discussion of petitioner's financial condition and of many of the indicators that the Commission examines in assessing material injury by reason of subject imports could only take place if at least part of the hearing was held *in camera*. In making this decision, the Commission nevertheless reaffirms its belief that wherever possible its business should be conducted in public.

The hearing will include the usual public presentations by petitioner and by respondent, with questions from the Commission. In addition the hearing will include *in camera* sessions for questions from the Commission of BPI submitted by petitioner and BPI of respondent, as necessary. For any *in camera* session, the room will be cleared of all persons except: those who have been granted access to business proprietary information under a Commission administrative protective order (APO) and are included on the Commission's APO service list in this investigation. See 19 CFR 201.35(b)(1),(2). In addition, if petitioner's BPI will be discussed in the *in camera* session, personnel of petitioner also may be granted access to the closed session. See 19 CFR 201.35(b)(1),(2). In the alternative, if respondent's BPI will be discussed in the *in camera* session, personnel of respondent also may be granted access to the closed session. See 19 CFR 201.35(b)(1),(2). All those planning to attend the *in camera* portions of the hearing should be prepared to present proper identification.

Authority: The General Counsel has certified, pursuant to Commission Rule 201.39 (19 CFR 201.39) that, in her opinion, a portion of the Commission's hearing in *Nepheline Syenite from Canada*, Inv. No. 731–TA–525 (Final) may be closed to the public to prevent the disclosure of business proprietary information.

Issued: March 18, 1992.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984—Microelectronics and Computer Technology Corp.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Microelectronics and Computer Technology Corporation ("MCC") on February 11, 1992 filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing certain information. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On December 21, 1984, MCC and its shareholders filed their original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on January 17, 1985 (50 FR 2633). MCC and its shareholders filed additional notifications on March 29, 1985, July 30, 1986, November 7, 1986, December 23, 1986, February 25, 1987, December 23, 1987, March 4, 1988, August 16, 1988, September 19, 1989, January 16, 1990, March 7, 1990, April 11, 1990, July 11, 1990, October 2, 1990, January 17, 1991, March 1, 1991, July 30, 1991, and November 12, 1991. The Department published notices in the **Federal Register** in response to these additional notifications on April 23, 1985, (50 FR 15989), September 10, 1986 (51 FR 32263), December 8, 1986 (51 FR 44132), February 3, 1987 (52 FR 3356), March 19, 1987 (52 FR 8661), January 22, 1988 (53 FR 1859), March 29, 1988 (53 FR 10159), September 22, 1988 (53 FR 36910), October 28, 1989 (54 FR 43631), March 8, 1990 (55 FR 8612), April 9, 1990 (55 FR 13200), May 8, 1990 (55 FR 19114), October 24, 1990 (55 FR 42916), December 28, 1990 (55 FR 53367), February 11, 1991 (56 FR 5424), July 1, 1991 (56 FR 29976), August 29, 1991 (56 FR 42757), and January 15, 1992 (57 FR 1760), respectively. On October 21, 1985, MCC filed an additional notification for which a **Federal Register** notice was not required.

MCC disclosed that Amoco Production Company, located in Tulsa, Oklahoma, and Rome Labs, located at Griffiss AFB, New York, have become Associate Members of MCC and participants in its Packaging/Interconnect Technology Program.

MCC also disclosed that AT&T, an existing Associate Member of MCC, has become a participant in its Packaging/Interconnect Technology Program.

Joseph H. Widmar,

Director of Operation, Antitrust Division.

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research Act of 1984—Open Software Foundation, Inc.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Open Software Foundation, Inc. ("OSF") on February 3, 1992, filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The additional notification was filed for the purpose of extending the protections of Section 4 of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On August 8, 1988, OSF and the Open Software Foundation Institute, Inc. (the "Institute") filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 7, 1988 (53 FR 34594). On November 4, 1988, February 2, 1989, May 3, 1989, July 28, 1989, October 26, 1989, January 22, 1990, April 19, 1990, July 24, 1990, October 22, 1990, January 28, 1991, April 25, 1991, July 25, 1991, and October 28, 1991, OSF filed additional written notifications. The Department published notices in the **Federal Register** in response to these additional notifications on November 25, 1988 (53 FR 47773), February 23, 1989 (54 FR 7893), August 25, 1989 (54 FR 35407), August 25, 1989 (54 FR 35408), November 29, 1989 (54 FR 49123), April 18, 1990 (55 FR 14493), May 21, 1990 (55 FR 20861), September 27, 1990 (55 FR 39528), December 28, 1990 (55 FR 53368), March 25, 1991 (56 FR 12367), June 13, 1991 (56 FR 27273), August 29, 1991 (56 FR 42757), and December 23, 1991 (56 FR 66454), respectively.

Additionally, a correction notice to the June 13, 1991 notice was published on July 11, 1991 (56 FR 31675).

The identities of the new, non-voting members of OSF are listed below; no new voting members have been added as of this filing:

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research Act of 1984—The SQL Access Group, Inc.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), The SQL Access Group, Inc. ("the Group") on January 6, 1992, has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing additions to its membership. The additional notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On March 1, 1990, the Group filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on April 5, 1990 (55 FR 12750). On June 5, 1990, August 31, 1990, December 6, 1990, March 21, 1991, June 7, 1991, September 9, 1991 and October 4, 1991, the Group filed additional written notifications. The Department published a notice in the **Federal Register** in response to the additional notifications on July 18, 1990 (55 FR 29277), October 17, 1990 (55 FR 42081), January 7, 1991 (56 FR 536), April 25, 1991 (56 FR 19126), July 19, 1991 (56 FR 33308), October 8, 1991 (56 FR 50729), and November 13, 1991 (56 FR 57665), respectively.

The following companies have become members of the Group:

Revelation Technologies, 181 Harbor Drive, Stanford, CT 06902

Cognos Incorporated, 3755 Riverside Drive, P.O. Box 9707, Ottawa, Ontario, Canada, KIG 3Z4

Computer Associates International, 711 Stewart Avenue, Garden City, NY 11530

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Manufacturer of Controlled Substances; Registration

By notice dated November 14, 1991, and published in the **Federal Register** on November 29, 1991, (56 FR 61052), CIBA–GEIGY Corporation, Pharmaceuticals Division, Regulatory Compliance, 556 Morris Avenue, Summit, New Jersey 07901, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the Schedule II controlled substance methylphenidate (1724).

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substance listed above is granted.

Dated: March 16, 1992.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 92–6716 Filed 3–23–92; 8:45 am]

BILLING CODE 4410–09–M

Frederick Robert Zahn, M.D.; Revocation of Registration

On November 21, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Frederick Robert Zahn, M.D., of #10 Ronnies Plaza, Lindbergh and Baptist Church Road, St. Louis, Missouri 63128, proposing to revoke his DEA Certificate of Registration, BZ0819360, and to deny any pending applications for registration as a practitioner under 21 U.S.C. 823(f). The proposed action was predicated on Dr. Zahn's lack of authorization to handle controlled substances in the State of Missouri. 21 U.S.C. 824(a)(3).

The Order to Show Cause was sent to Dr. Zahn by registered mail. More than thirty days have passed since the Order to Show Cause was received by Dr. Zahn and the Drug Enforcement Administration has received no response thereto. Pursuant to 21 CFR 1301.54(a) and 1301.54(d), Frederick Robert Zahn, M.D. is deemed to have waived his opportunity for a hearing. Accordingly, the Administrator now enters his final order in this matter without a hearing and based on the investigative file. 21 CFR 1301.57.

The Administrator finds that Dr. Zahn had his medical license revoked by the Missouri Department of Health, Bureau of Narcotics and Dangerous Drugs (BNDD) effective November 22, 1989. This revocation was based upon a written notification to Dr. Zahn by the BNDD which informed Dr. Zahn that his state controlled substance license in the State of Missouri had been terminated due to Dr. Zahn's discontinuing his practice and failure to notify the BNDD of a change of professional address. Dr. Zahn is currently ineligible to obtain a state controlled substance license because he is serving a three year prison sentence in the Missouri Department of Corrections, which commenced on September 27, 1991, for state felony convictions. Consequently, Dr. Zahn is no longer authorized to prescribe, dispense, administer or otherwise handle controlled substances in any schedule in the State of Missouri.

The Administrator concludes that the DEA does not have the statutory authority under the Controlled Substances Act to issue or maintain a registration if the applicant or registrant is without state authority to handle controlled substances. See 21 U.S.C. 823(f). The Administrator and his predecessors have consistently so held. See *Howard J. Reuben, M.D.*, 52 FR 8375 (1987); *Ramon Pla, M.D.*, Docket No. 86–54, FR 41168 (1986); *Dale D. Shahan, D.D.S.*, Docket No. 85–57, 51 FR 23481 (1986); and cases cited therein.

No evidence of explanation or mitigating circumstances has offered by Dr. Zahn. Therefore, the Administrator concludes that Dr. Zahn's DEA Certificate of Registration must be revoked.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, BZ0819360, previously issued to Frederick Robert Zahn, M.D., be, and it hereby is, revoked, and any pending applications for the renewal of such registration, be, and they hereby are, denied. This order is effective March 24, 1992.

Dated: March 17, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the office of Management and Budget (OMB) a request for clearance of the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted by April 23, 1992.

ADDRESSES: Send comments to Mr. Dan Chenok, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503; (202-395-7316). In addition, copies of such comments may be sent to Ms. Judith E. O'Brien, National Endowment for the Arts, Administrative Services Division, room 203, 1100 Pennsylvania Avenue, NW., Washingtgon, DC 20506; (202-682-5401).

FOR FURTHER INFORMATION CONTACT: Ms. Judith E. O'Brien, National Endowment for the Arts, Administrative Services Division, room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5401).

SUPPLEMENTARY INFORMATION: The Endowment requests the review of a revision of a currently approved collection of information. This entry is issued by the Endowment and contains the following information:

(1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: FY 93 Presenting and Commissioning Program Application Guidelines.

Frequency of Collection: One time.

Respondents: State or local governments; non-profit organizations.

Use: Guideline instructions and applications elicit relevant information from arts organizations that apply for funding under specific Presenting and Commissioning catagories. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the peer review process.

Estimated Number of Respondents: 435

Average Burden Hours per Response: 31.

Total Estimated Burden: 13,330.

Judith E. O'Brien,

Management Analyst, Administrative Services Division, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Chemical and Thermal Systems; Meetings

In accordance with the Federal Advisory Committee Act (Pub L. 92-463, as amended), the National Science Foundation (NSF) announces the following three meetings:

Name: Special Emphasis Panel in Chemical and Thermal Systems.

Date and Time: April 8, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 536, 1800 G St., NW., Washington, DC.

Agenda: Review and evaluate nominations for the NSF Young Investigator Awards Program.

Contact Person: Drs. Merrill K. King & Michael M. Chen, Program Directors (202) 357-9606.

Date and Time: April 9, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 1133, 1800 G St. NW., Washington, DC.

Agenda: Review and evaluate nominations for the NSF Young Investigator Awards Program.

Contact Persons: Drs. Charles Malderalli & Robert M. Wellek, Program Directors (202) 357-9606.

Date and Time: April 10, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 500-V 1110 Vermont Ave., NW., Washington, DC.

Agenda: Review and evaluate nominations for the NSF Research Initiation Awards Program.

Contact Persons: Drs. Charles Malderalli & Robert M. Wellek, Program Directors (202) 357-9606.

Purpose of Meetings: To provide advice and recommendations to the Division of Chemical and Thermal Systems concerning proposals submitted to the Division for financial support.

Type of Meetings: Closed.

Reason for Closing: The nominations and proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the nominations and proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 18, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 40-7402 and 40-8724]

Chemetron Corp.; Establishment of Local Public Document Room

The Nuclear Regulatory Commission (NRC) has established a local public document room (LPDR) for the Chemetron Corporation decommissioning sites in Ohio.

Members of the public may now inspect and copy documents and correspondence related to the Chemetron Corporation decommissioning sites at the Garfield Heights Branch Library, 5409 Turney Road, Garfield Heights, Ohio 44125. The library is open on the following schedule: Monday and Thursday 1 p.m. to 9 p.m.; Tuesday 9 a.m. to 9 p.m.; Wednesday, Friday and Saturday 9 a.m. to 5:30 p.m.; and Sunday 1 p.m. to 5 p.m., closed on Sunday during the Summer.

For further information, interested parties in the Garfield Heights area may contact the LPDR directly through Mrs. Donnie Potelicki; Branch Manager; telephone number (216) 475-8178. Parties outside the service area of the LPDR may address their requests for records to the NRC's Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555, telephone number (202) 634-3273.

Questions concerning the NRC's local public document room program or the availability of documents should be addressed to Ms. Jona L. Souder, LPDR Program Manager, Freedom of Information/Local Public Document Room Branch, U.S. Nuclear Regulation Commission, Washington, DC 20555, telephone number (301) 492-4344, or Toll-Free (800) 638-8081.

Dated at Bethesda, Maryland; this 18th day of March, 1992.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Freedom of Information and Publications Services, Office of Administration.

[FR Doc. 92-6766 Filed 3-23-92; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-528, 50-529 and 50-530]

Arizona Public Service Co., et al., Palo Verde Nuclear Generating Station; Issuance of Director's Decision (DD-92-01) Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a Director's Decision concerning a letter of June 6, 1991, addressed to the Chairman of the U.S. Nuclear Regulatory Commission filed by Messrs. David K. Colapinto and Stephen M. Kohn. The letter contained 10 allegations regarding plant operation at the Palo Verde Nuclear Generating Station and requested that the three Palo Verde units be shut down until the matters raised in the letter have been resolved. The letter also requested that a special investigative team be appointed to monitor and inspect conditions at the plant. The NRC has treated the letter as a request for action under the NRC regulations contained in 10 CFR 2.206.

The Director of the Office of Nuclear Reactor Regulation has determined that the request should be denied for the reason set forth in the "Director's Decision Under 10 CFR 2.206" (DD-92-01), which is available for inspection and copying in the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004.

A copy of the decision has been filed with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206(c). As provided therein, this decision will become the final action of the Commission 25 days after issuance unless the Commission, on its own motion, institutes review of the decision within that time.

Dated at Rockville, Maryland, this 16th day of March, 1992.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-302]

Florida Power Corporation; Order Approving Transfer of License

I

The Sebring Utilities Commission (Sebring) is the holder of a 0.4473 percent ownership share of the Crystal River Unit No. 3 Nuclear Generating Plant (CR-3). Sebring's interest in CR-3 is governed by License No. DPR-72, issued by the U.S. Nuclear Regulatory Commission (the NRC) pursuant to 10 CFR Part 50 on December 3, 1976, in Docket No. 50-302. Under this license, only the Florida Power Corporation (FPC), the holder of a 90 percent ownership share of CR-3, has the authority to operate CR-3. The facility is located in Crystal River, Florida.

II

FPC requested an amendment to DPR-72 by letter dated August 16, 1991, in which FPC informed the NRC of an agreement between FPC and Sebring under which FPC would purchase Sebring's 0.4473 ownership share of CR-3. The amendment would change DPR-72 by deleting Sebring as a CR-3 licensee, in recognition of FPC's purchase of Sebring's entire ownership interest. FPC has advised the NRC staff that its purchase of Sebring's interest is expected to be completed by mid-March 1992.

The transfer of any right under License No. DPR-72 is subject to the NRC's approval pursuant to 10 CFR 50.80(a). Based on FPC's operation of CR-3 to date, and the small ownership interest being transferred, the staf has determined that the proposed transferee (FPC) remains qualified to be a holder of DPR-72 and that the license transfer is otherwise consistent with applicable provisions of law, regulations and orders issued by the Commission.

III

Accordingly, pursuant to Sections 161b and 161i of the Atomic Energy Act of 1954, as amended, 43 USC 2201, and 10 CFR 50.80, *it is hereby ordered* That transfer of a 0.4473 percent ownership interest in CR-3 under License No. DPR-72 from Sebring to FPC is approved, subject to the following: (1) the amendment deleting Sebring as a licensee from License No. DPR-72 will become effective as of the date the transfer is completed; (2) should the transfer not be completed by May 31, 1992, this Order will be null and void; and (3) on application and for good cause shown, this Order may be extended for a short period of time beyond May 31, 1992.

[Docket No. 50-312]

Sacramento Municipal Utility District; Issuance of Amendment to Facility Operating License and Final Determination of No Significant Hazards Consideration

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Amendment No. 117 to Facility Operating License No. DPR-54 to Sacramento Municipal Utility District (SMUD or the licensee). The amendment removes the licensee's authority to operate the Rancho Seco Nuclear Generating Station (the facility), located in Sacramento County, California, and modifies the license from a full-power operating license to a possession only license. The amendment is published herewith. This license amendment will become effective ten (10) working days after the date of publication in the Federal Register of the Notice of Issuance of this amendment. If during this period a motion for a stay is filed with the U.S. Court of Appeals, the date when this amendment becomes effective will automatically be extended an additional ten (10) working days to provide the court with time to review the matter.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and Commission's rules and regulations in Title 10 of the Code of Federal Regulations (10 CFR) chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was published in the Federal Register on October 10, 1990, [55 FR 41280). On November 8, 1990, the Environmental and Resources Conservation Organization (ECO or the petitioner) filed a petition to intervene and a request for a hearing concerning SMUD's application for a possession only license. SMUD and NRC staff opposed this petition. Pursuant to the

Dated at Rockville, Maryland this 18th day of March, 1992.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 92-6764 Filed 3-23-92; 8:45 am]

BILLING CODE 7590-01-M

Commission's Order of January 30, 1991, the Atomic Safety and Licensing Board (Board) was appointed to rule on the petition. The Board afforded ECO an opportunity to reply to the SMUD and staff opposition filings; ECO did so in its March 4 and April 15, 1991, filings entitled "Further Amendment to Environmental and Resource Conservation Organization Request for Hearing and Petition to Intervene." In a Memorandum and Order dated May 1, 1991, the Board concluded that ECO might be able to demonstrate standing and directed ECO to file contentions by June 3, 1991. ECO filed its contentions on June 3 and June 10, 1991. A prehearing conference about these contentions was held before the Board on June 25, 1991, in Bethesda, Maryland. In a Memorandum and Order dated July 1, 1991, LBP-91-30, the Board denied ECO's petition because the petitioner had failed to satisfy the Commission's regulations for contentions and had not established standing under the National Environmental Policy Act (NEPA) or the Atomic Energy Act (AEA). On July 16, 1991, ECO filed an appeal before the Commission. In a Memorandum and Order dated February 6, 1992, CLI-92-02, the Commission upheld the Board's July 1, 1991, ruling that ECO has failed to demonstrate that it has standing to challenge this possession only license amendment.

Further, the Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration and that the facility can continue to be maintained by the licensee without endangering the health and safety of the public. The basis for this determination is contained in the safety evaluation related to this action.

Additionally, the Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment.

For further details with respect to the action see (1) the application for amendment dated April 26, 1990, (2) Amendment No. 117 to Facility Operating License No. DPR-54, (3) the Commission's related safety evaluation, and (4) Commission Memorandum and Order, CLI-92-02, dated February 6, 1992. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and the Martin Luther King Regional Library, 7340 24th Street Bypass, Sacramento, California 95822. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Acting Associate Director, for Advanced Reactors.

Dated at Rockville, Maryland this 17th day of March 1992.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors, Decommissioning and Environmental Project Directorate Division of Advanced Reactors and Special Projects Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Procurement of Environmentally-Sound and Energy-Efficient Products and Services

AGENCY: Office of Federal Procurement Policy (OFPP), OMB.

ACTION: Solicitation of public comment on a draft OFPP Policy Letter that requires implementation of cost-effective procurement preference programs favoring the purchase of environmentally-sound, energy-efficient products and services.

SUMMARY: The proposed Policy Letter requires the implementation of cost-effective procurement preference programs for the purchase of environmentally-sound, energy-efficient products and services. It applies to Federal executive agencies and State and local government agencies that use appropriated Federal funds for procurement purposes. Specific direction is given in the Policy Letter for developing "affirmative procurement programs" for products containing recovered materials pursuant to subsection 6002(i) of the Resource Conservation and Recovery Act (42 U.S.C. 6962), and for the procurement of paper containing post consumer waste. The letter, in addition, implements specific provisions of the Energy Policy and Conservation Act, as amended (42 U.S.C. 6201 *et seq.*), and of Executive Orders 11912, 12759 and 12780. When issued in final form, the Policy Letter will cancel two existing OFPP Policy Letters: (1) Policy Letter 76-1, Federal Procurement Policy Concerning Energy Conservation, August 6, 1976, and (2) Policy Letter 77-1, Procurement of Products that Contain Recycled Material, February 2, 1977.

COMMENT DATE: Comments must be received on or before April 23, 1992.

ADDRESS AND INFORMATION CONTACT: Comments should be sent to Charles W. Clark, Deputy Associate Administrator, Office of Federal Procurement Policy, Office of Management and Budget, room 9013, 725 17th Street, NW., Washington, DC 20503. Information or questions may be addressed to Mr. Clark on (202) 395-6803.

Dated: March 18, 1992.

Allan V. Burman,

Administrator.

Policy Letter No. 92-xx

To the Heads of Executive Departments and Establishments

Subject: Procurement of Environmentally-Sound and Energy-Efficient Products and Services.

1. *Purpose.* This Policy Letter provides Government-wide policies for the acquisition and use of environmentally-sound, energy-efficient products and services.

2. *Supersession Information.* The Policy Letter supersedes and cancels OFPP Policy Letter 76-1, *Federal Procurement Policy Concerning Energy Conservation*, dated August 6, 1976, and OFPP Policy Letter 77-1 *Procurement of Products that Contain Recycled Material*, dated February 2, 1977

3. *Authority.* The Policy Letter is issued pursuant to section 6(a) of the Office of Federal Procurement Policy (OFPP) Act, as amended, 41 U.S.C. 405, and section 6002 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6962. RCRA, section 6002 requires OFPP to issue coordinated policies to maximize Federal use of recovered material.

4. *Definitions.*

a. *Executive Agency.* The term "Executive agency" means an executive department, and an independent establishment within the meaning of 5 U.S.C. 101, 102, 103(1) and 104(1), respectively.

b. *Procuring Agency.* The term "procuring agency" means any Federal agency, or any State agency or agency of a political subdivision of a State which is using appropriated Federal funds for procurement purposes, or any person contracting with any such agency with respect to work performed under resulting contracts.

c. *Recovered Material.* The term "recovered material" means waste material and by-products which have been recovered or diverted from solid waste.

5. *Background.* In its day-to-day operations, the Federal Government has the opportunity and obligation to be environmentally and energy conscious in its selection and use of needed products and services. The Government, as the largest single consumer in the nation, has many opportunities to conserve and make more efficient use of energy and other resources. Leveraging the Government's $190 billion annual purchasing program toward more energy-efficient and environmentally-sound practices will not only benefit the nation by reducing the cost of Government, but will help make the Government a model citizen and reduce national dependence on foreign resources.

6. *Policy.* It is the policy of the Federal Government that executive and procuring agencies implement cost-effective procurement preference programs favoring the purchase of environmentally-sound, energy-efficient products and services.

a. *Energy Efficiency.* Executive agencies shall consider energy conservation and efficiency factors in the procurement of property and services, pursuant to the Energy Policy and Conservation Act, 42 U.S.C. 6201, *et seq.*; section 3 of Executive Order 11912, as amended, April 13, 1976, and section 5 of Executive Order 12759, April 17, 1991. Energy conservation and efficiency data will be considered, along with price and other relevant cost factors, in the formulation of purchase requests and solicitations, during the evaluation of offers, and in the selection of contractors. In addition, with respect to the procurement of consumer products, as defined under part B, title III of the Energy Policy and Conservation Act, agencies shall consider energy use/efficiency labels (42 U.S.C. 6294) and prescribed energy efficiency standards (42 U.S.C. 6295) in making purchasing decisions.

b. *Environmental Conservation.* Procuring agencies shall give preference in their procurement programs to practices and products that conserve natural resources and protect the environment, pursuant to the Resource Conservation and Recovery Act as amended, 42 U.S.C. 6962 and Executive Order 12780, October 31, 1991. Specific preference shall be given to products that contain "recovered material," along with price and other relevant cost factors, in the formulation of purchase requests and solicitations, during the evaluation of offers, and in the selection of contractors. This policy applies to all transactions exceeding $10,000 or where the quantity of such items, or of functionally equivalent items, acquired in the course of the preceding year was $10,000 or more.

7. *Responsibilities.*

a. *Heads of Executive Agencies.* In implementing the policies in section 6, above, the heads of agencies shall:

(1) Identify and procure needed products and services that, all factors considered, are environmentally-sound and energy-efficient;

(2) Place special emphasis on the procurement of products that contain the highest percentage of recycled or recovered materials, and where applicable, post consumer waste, consistent with technical performance requirements, availability, price reasonableness and cost effectiveness;

(3) Employ life cycle costing techniques, whenever feasible and appropriate, to assist in making product and service selections;

(4) Use product standards and specifications that reflect maximum cost-effective use of recycled products, recovered materials, and energy efficient products, materials and practices, and

(5) Work with industry to (1) develop new applications for environmentally-sound, energy-efficient products, practices and services that meet Federal requirements, and (2) participate in the development of voluntary standards and specifications describing these products, practices and services.

b. *Special Requirements for Paper.* Executive Agencies shall establish special affirmative procurement programs for paper to ensure the maximum cost-effective use of paper containing post consumer recovered materials, as referenced in RCRA, subsection 6002(h)(1). In implementing this policy for paper and paper products acquired through the General Services Administration (GSA) or the Government Printing Office (GPO), Executive agencies shall:

(1) Specify in orders placed with GSA that the paper and paper products identified in the recently issued "GSA Recycled Products Guide" be provided when available in filling such orders;

(2) Specify in orders placed with GPO that paper containing recycled material be provided when available in lieu of paper made from virgin materials and that printing, where cost-effective, be performed on recycled paper; and

(3) Specify in orders with both GSA and GPO that where cost-effective paper containing the highest practicable per cent of post consumer waste be provided, when available, instead of recycled paper without post consumer waste content.

Copies of the GSA "Recycled Products Guide" may be obtained by contacting the GSA Forth Worth office (FTS 334-5215) (Autovon 739-7369).

c. *Heads of Procuring Agencies.* In implementing the policies in paragraph 6, the heads of procuring agencies shall:

(1) Base decisions to waive, or not to procure, items composed of the highest percentage of recovered materials practicable on a determination that such items:

(a) Are not reasonably available within the time required;

(b) Fail to meet the performance standards set forth in applicable specifications or fail to meet the reasonable performance standards of the procuring agencies, or

(c) Are only available at an unreasonable price.

(2) Required vendors to certify the percentage of recovered materials used, when contracts are awarded wholly or in part on the basis of utilization of recovered materials.

(3) Assure, when drafting or reviewing specifications for purchased items, that specifications (a) do not exclude the use of recovered materials; (b) do not require the item to be manufactured from virgin materials; and (c) require the use of recovered materials to the maximum extent practicable without jeopardizing the intended end use of the item.

(4) Arrange for the procurement of solid waste management services in a manner which emphasizes energy and resource recovery. Agencies that generate heat, mechanical, or electrical energy from fossil fuel in systems that have the technical capability of using energy or fuel derived from solid waste as a primary or supplementary fuel shall use such capability where it is cost-effective.

[Note: Any determination under C.(1)(b), above, shall be made on the basis of National Institute of Standards and Technology guidelines when the items being procured are covered by such guidelines)

d. *Affirmative Procurement Programs.* Procuring agencies must develop agency specific affirmative procurement programs for each of the items covered by guidelines developed by the Environmental Protection Agency pursuant to subsection 6002(e) of RCRA. These programs, as a minimum, must comply with RCRA subsection 6002(i) and must:

(1) State a preference for the procurement of the item covered by the guideline;

(2) Promote the procurement of the covered item;

(3) Require estimates of the total amount of the recovered item used in a contract, certification of the minimum amount actually used, and procedures for verifying the estimates and certifications;

(4) Provide for the annual review and monitoring of the effectiveness of the program; and

(5) Include one of the following options, or a substantially equivalent alternative, to insure that contracts are awarded, unless waivers are granted pursuant to paragraph B above, to the vendor offering:

—The item composed of the highest percentage of recovered material, or

—The item containing the maximum amount of recovered material permitted by the specification, standard or other product description used by the procuring agency.

8. *Federal Acquisition Regulation (FAR) Councils.* The Defense Acquisition Regulatory Council and the Civilian Agency Acquisition Council shall conduct a thorough review of the relevant parts of the FAR to (1) assure that no unintended encumbrances to the acquisition of environmentally-sound, energy-efficient products and services are contained therein, and (2) that the policies established by this Policy Letter are fully reflected in the FAR within 210 days of the effective date of this Policy Letter.

9. *Reporting Requirements.* In accordance with section 502, Executive Order 12780 and subsection 6002(i) of RCRA, each Executive agency shall review annually the effectiveness of its affirmative procurement program and shall provide a report regarding its findings to the Environmental Protection Agency and to the OFPP beginning with a report covering Fiscal Year 1992. Such report shall be transmitted by December 15 each year. Reports required by this paragraph may be made available to the public. A format for the FY 1992 report will be provided to all agencies by OFPP prior to October 1, 1992.

10. *Effective Date.* This Policy Letter is effective 30 days after the date of issuance. While full implementation of these policies must await needed change to the FAR, it is expected that agencies will take all appropriate actions in the interim to

implement those aspects of the policy that are not dependent upon regulatory change.

11. *Information.* Questions or inquiries about this Policy Letter should be directed to Linda Mesaros or Cyndi Vallina, Office of Federal Procurement Policy, 725 17th Street, NW., Washington, DC 20503, telephone (202) 395–3501.

Allan V. Burman,

Administrator.

BILLING CODE 3110–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–30497; File No. SR–BSE–92–02]

Self-Regulatory Organizations; Filing of Proposed Rule Change by Boston Stock Exchange, Inc. Adopting Chapter XXXIII, Section 7 Regarding BEACON Liability

March 17, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 28, 1992, the Boston Stock Exchange, Inc. ("BSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comment on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The BSE proposed to amend its rules to provide for the apportionment of liability between its member firms and specialists involving the entry and execution of orders in the BSE Automated Communications and Order-Routing Network ("BEACON") system.[1]

The following is the text of the proposed rule change:

Chapter XXXIII

Sec. 7. In accordance with Article IX, Section 10 of the Exchange Constitution, the Exchange shall not be liable for any loss sustained by a member or member organization resulting from the use of the BEACON System. Generally, a loss pertaining to an order that is entered through the BEACON System and which does not appear on the BEACON System's Member Firm Inerface Safe-Store File will be absorbed by the entering member organization. A loss pertaining to an order that is entered through the BEACON System which was designated for a particular specialist's post and which does appear on the BEACON System's Member Firm Interface Safe-Store File will generally be absorbed by the specialist.

[1] BEACON is the Exchange's electronic order routing and execution system capable of automatically executing all agency market and marketable limit orders of up to 1,299 shares in stocks traded over the Intermarket Trading System ("ITS") as well as agency market and marketable limit orders of up to 2,500 shares in certain, more actively traded issues.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspect of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to establish the liability of parties involved in the order-entry and execution process in the BEACON system. The entering member organization (or broker) will be liable for all orders entered in the system which do not appear on the Member Firm Interface Safe-Store File. The specialist will assume liability for all orders which appear on the Safe-Store File, but which fail to reach the specialist post for execution.

2. Statutory Basis

The basis under the Act for the proposed rule change is section 6(b)(5) in that the rule is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities and is not designed to permit unfair discrimination between customers, issuers, brokers or dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments have neither been solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the BSE. All submissions should refer to File No. SR–BSE–92–02 and should be submitted by April 14, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–6736 Filed 3–23–92; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–30491; File No. SR–MCC–92–02]

Self-Regulatory Organization; Midwest Clearing Corp.; Notice of Filing of a Proposed Rule Change Relating to a Modification to its Participants Fund Formula and Trade Guarantee Policy as They Relate to Options Exercises and Assignments

March 17, 1992.

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b), notice is hereby given that on March 5, 1992, the Midwest Clearing Corporation ("MCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of an amended and restated options exercise settlement agreement and a modification to MCC's participants fund formula and trade guarantee policy to accommodate the revised agreement.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspect of such statement.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Under the terms of the current options exercise settlement agreement between MCC and the Options Clearing Corporation ("OCC"), MCC guarantees the completion of obligations resulting from options exercises and assignments from T+4 until settled for CNS transactions, for members of OCC who are members of MCC. In the event of a participant default on T+4 or T+5 MCC's risk from closing out these positions is the difference between the strike price and current market price.

Under the revised agreement MCC will guarantee the completion of obligations resulting from options exercises and assignments at the same time it guarantees locked in trades received from other self-regulatory organizations, *i.e.* currently 11:59 p.m. of the day the trade is reported to participants as compared (normally T+1). While MCC's risk in the event of participant default will still be the difference between the strike price and current market price, under the revised agreement OCC will pay MCC for any losses it incurs in closing out the guaranteed positions. This guarantee will be limited to an amount not greater than the net of mark-to-market amounts on the exercise and assigned positions.

With the change to MCC's trade guarantee policy participants normally would be required to collateralize their settlement exposure for the same positions at both MCC and OCC. However, OCC is going to continue to collect margin on these positions in order to collect funds to cover its guarantee. Accordingly, MCC will not require the collection of the contract price (strike price) to current market price portion of the participants fund calculation it normally would require for a T+1 guarantee for positions resulting from options exercises and assignments.

MCC believes the proposed rule change is consistent with the purposes and requirements of section 17A of the Act because it enhances the system used to effect settlement of exercises and assignments of equity options.

B. Self-Regulatory Organization's Statement on Burden on Competition

MCC does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of MCC. All submissions should refer to File No. SR–MCC–92–02 and should be submitted by April 14, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–6735 Filed 3–23–92; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–30489; File No. SR–NSCC–91–07]

Self-Regulatory Organizations; National Securities Clearing Corporation; Filing of a Proposed Rule Change Relating to a Revised Options Exercise Settlement Agreement and Revised Clearing Fund Formula

March 17, 1992.

Pursuant to 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 21, 1991, the National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Proposed Rule Change

The proposed rule change consists of an amended and restated options exercise settlement agreement and a modification to NSCC's clearing fund formula to accommodate the revised agreement.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

Under the terms of the current options exercise settlement agreement between NSCC and The Options Clearing Corporation ("OCC"), NSCC guarantees the completion of obligations resulting from options exercises and assignments, from T+4 through T+5 for balance order transactions and from T+4 until settled for CNS transactions, for members of OCC who are members of NSCC and for Canadian broker/dealer members of OCC who settle their transactions at NSCC through the Canadian Depository for Securities Ltd. In the event of a member impairment on T+4 or T+5 NSCC's risk from closing out these positions is the difference between the strike price and current market price.

Under the revised agreement, NSCC will guarantee the completion of obligations resulting from options exercises and assignments at the same time it guarantees locked in trades received from other self-regulatory organizations, *i.e.* currently midnight of the day the trade is reported to members as compared. It will continue to guarantee balance order transactions from T+4 through T+5. While NSCC's risk in the event of member impairment will still be the difference between the strike price and current price, under the revised agreement OCC will pay NSCC for any losses it incurs in closing out the guaranteed positions. This guarantee will be limited to an amount that is equal to but not greater than the net of mark-to-market amounts collected by OCC on the exercised and assigned positions.

Currently members are required to collateralize their settlement exposure for the same positions at both NSCC and OCC. OCC is going to continue to collect margin on these positions in order to collect funds to cover their guarantee. Accordingly, NSCC will eliminate the collection of the contract price (strike price) to current market price portion of the clearing fund calculation for positions resulting from options exercises and assignments.

NSCC estimates that under this revised agreement NSCC's potential exposure to the insolvency of an average large member will decrease by 5%. NSCC thus believes that the proposed rule change is consistent with Section 17A of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments have been solicited or received. NSCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of NSCC. All submissions should refer to File No. SR-NSCC-91-07 and should be submitted by April 13, 1991.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-30482; No. SR-NYSE-92-02]

Self-Regulatory Organizations; Notice of Filing and Order Granting Temporary Accelerated Approval to Proposed Rule Change by New York Stock Exchange, Inc. Relating to a Pilot Program for Stopping Stock

March 16, 1992.

Pursuant to section 19(b)(1) of the Securitites Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 20, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NYSE proposes to extend for one year its existing pilot program under NYSE Rule 116.30 that permits a specialist, upon request, to grant a stop in a minimum variation market for any order of 2,000 shares or less, up to a total of 5,000 shares for all stopped orders.[1] The NYSE received approval, on a pilot basis expiring on March 21, 1992, of amendments to Rule 116.30.[2]

[1] The Exchange seeks accelerated approval of the proposed rule change in order to allow the pilot program, which will expire on March 21, 1992, to continue without interruption. See letter from Brian

Continued

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified on Item III below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

The practice of "stopping" stock by specialists on the Exchange refers to a guarantee by the specialist that an order he or she receives will be executed at no worse a price than the contra side price in the market when the specialists receives the order, with the understanding that the order may in fact receive a better price. For example, assume that the Exchange market in XYZ security is quoted at 20 bid, offered at 20¼, and a specialist receives an order to buy "at the market." If the specialist "stops" the order, he or she guarantees that the order will receive no worse a price than 20¼ (the best then-prevailing price at which a seller is willing to sell stock). The specialist then makes a bid for 20⅛ on behalf of the market order to buy. If a seller subsequently "hits" the 20⅛ bid, the buyer's order has obtained price improvement. If, however, the next trade is at 20¼, the buy order will be executed at 20¼.

Formerly, Exchange Rule 116.30 permitted a specialist to "stop" stock only when the quotation spread was at least twice the minimum variation (*i.e.*, for most stocks, at least a ¼ point), with the specialist then being required to narrow the quotation spread by making a bid or offer, as appropriate, on behalf of the order that is being stopped.

On March 21, 1991, the Commission approved, on a one-year pilot basis, amendments to the rule which permit a specialist to stop stock in a minimum variation market (generally referred to as an ⅛ point market). The Exchange sought these amendments on the grounds that many orders would receive an improved price if stopping stock in ⅛ point markets was permitted. The amendments to Rule 116.30 permit a specialist, upon request, to stop individual orders of 2,000 shares or less, up to an aggregate of 5,000 shares of multiple orders, in an ⅛ point market. A specialist may stop an order of a specified larger order size threshold, or a larger aggregate number of shares, after obtaining Floor Official approval.

The Exchange expects specialists to grant stops in ⅛ point markets only where there is an imbalance on the opposite side of the market from the order being stopped and the imbalance is of sufficient size, given the characteristics of the security, to suggest the likelihood of price improvement. For example, if a market is quoted 30 to 30⅛ with 1,000 shares bid for and 20,000 shares offered, the imbalance of the offer side of the market suggests that it may be appropriate to stop a buy order of 2,000 or less shares.

The Exchange conducted a study of systematized orders stopped in ⅛ point markets for a one month period to determine the effectiveness of the rule changes.[3] The study indicates that 97% of these orders fell within the 2,000 shares or less parameter of the rule. The data also indicate that 44% of orders stopped in ⅛ point markets received price improvement. This 44% represents over 20 million shares of stock.

The Exchange also compared the size of orders stopped to the size of the opposite side of the quote. The study indicates that 96% of orders stopped in ⅛ point markets were less than, or euqal to, 25% of the size of the opposite side quote. This suggests that the imbalances on the opposite side of orders being stopped were of sufficient size to suggest the likelihood of price improvement.

During the pilot, the Exchange also reviewed compliance by specialists in obtaining Floor Official approval to stop orders greater than the threshold levels in the rule. Based on the review, the Exchange issued an information memorandum reminding specialists of the requirements for Floor Official approval and has added Rule 116.30 to its Rule 476A list of rule violations for which summary fines may be issued.[4] The Exchange also is enhancing its automated surveillance of ⅛ point market stops. Additional educational sessions with specialists will be held to emphasize the need for proper approval and documentation by Floor Officials of stops granted to orders which exceed the parameters of the rule.

The Exchange believes that the provisions of Rule 116.30 enable specialists to better serve Exchange customers. Millions of dollars each year can be saved by investors through specialists' use of the rule. The Exchange believes that its study indicates, overall, that the provisions of the rule are not disadvantaging customer orders on specialist books, and that, for the most part, orders are being stopped in markets with significant imbalances on the opposite side of the market.

(b) Statutory Basis

The basis under the Act for this proposed rule change is the requirement under section 6(b)(5) that an exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system, and in general, to protect investors and the public interest. The proposed extension of Rule 116.30 is consistent with these objectives in that it permits the Exchange to better serve its customers by enabling specialists to execute customer orders at improved prices.

B. Self-Regulatory Oroganization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

[4] NYSE Rule 476A, which embodies the NYSE's minor rule violation plan, provides that the Exchange may designate violations of certain rules as minor rule violations and issue summary fines in lieu of commencing a full disciplinary proceeding before a hearing panel. See Securities Exchange Act Release No. 30280 (January 22, 1992), 57 FR 3452 (January 29, 1992) (File No. SR-NYSE-91-38).

III Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR-NYSE-92-02 and should be submitted by April 14, 1992.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, with section 6(b)(5) [5] and section 11(b) [6] of the Act. The Commission believes that the amendments to Rule 116.30 should further the objectives of section 6(b)(5) and section 11(b) through pilot program procedures designed to allow stops, in minimum variation markets, under limited circumstances that provide the possibility of price improvement to customers whose orders are granted stops.[7]

In its order approving the piliot procedures,[8] the Commission asked the NYSE to study the effects of stopped orders in minimum variation markets. Specifically, the Commission expressed interest in the percentage of time stopped orders were executed at the stop price, and the percentage of time such orders receive a price that is better than the stop price. The Commission asked the NYSE to analyze the impact on orders on a specialist's book resulting from the execution of stopped orders at a price that is better than the stop price to determine whether the book orders are being bypassed. The Commission also asked the NYSE to review market depth in a stock when a stop is granted in a minimum variation market and to compare the size of the stopped order to the existing quote size and quote size imbalance, if any. Finally, the Commission expressed interest in specialist compliance with the pilot procedures.

The NYSE submitted a report to the Commission on February 13, 1992 concerning the pilot program procedures.[9] As noted above, this report indicates that 44% of orders stopped in minimum variation markets received price improvement. The Commission, therefore, believes that the pilot procedures provide a benefit to investors by offering the possibility of price improvement to customers whose orders are granted stops in minimum variation markets. The Commission further believes that, because the report indicates that 97% of the stopped orders were 2,000 shares or less, the pilot procedures benefit small public customer orders, which the Commission envisioned could most benefit from the professional handling of their orders by specialists. Accordingly, the Commission believes that it is reasonable to extend the pilot program for an additional twelve months. During the pilot extension, the Commission requests that the NYSE continue to monitor the percentage of time stopped orders were executed at the stop price and the percentage of time such orders receive a price that is better than the stop price. The Commission requests that the NYSE report its findings on this matter to the Commission by September 30, 1992.

The NYSE report also indicates that 96% of orders stopped in a minimum variation market were less than or equal to 25% of the size of the opposite side quote. The NYSE, as a result, concludes that imbalances on the opposite side of orders being stopped were of sufficient size to suggest the likelihood of price improvement. The Commission, however, remains concerned that the pilot procedures should not be implemented unless there is a large imbalance on the opposite side of the market from the order being stopped, and the imbalance is of sufficient size, given the characteristics of the security, to suggest the likelihood of price improvement to a customer. The Commission believes that this is a critical aspect of the pilot, in that it is designed to enable specialists to grant stops in a minimum variation market only when the likelihood of the benefits to the customer's order being stopped far exceed the possibility of harm to customers' orders on the limit order book.

The Commission, therefore, requests that the NYSE continue to review market depth in a stock when a stop is granted in a minimum variation market, to compare the size of the stopped order to the existing quote size and quote size imbalance, and to report its findings to the Commission. In order to demonstrate that stop orders are granted in minimum variation markets only when there is a sufficient imbalance on the opposite side of the market being stopped, and that the imbalance is of sufficient size to suggest the likelihood of price improvement, the NYSE report should include the bid versus offer disparity in a stock when a stop order is granted under the pilot procedures. the Commission requests that the NYSE report its findings on these matters by September 30, 1992.

The Commission also remains concerned, particularly in the absence of a sufficient market imbalance, that unexecuted customer limit orders on a specialist's book may be bypassed by the stopped orders. The Commission believes that, where there is a substantial imbalance on the opposite side of the market from the order being stopped, it is unlikely that orders on the book would not be executed because the stock would probably trade up (or down, as the case may be) due to a large imbalance, resulting in the execution of orders on the book. The NYSE's preliminary review indicates that the pilot procedures are not significantly disadvantaging customer orders on specialists' books. During the pilot extension, the Commission requests that the NYSE continue to analyze the impact on orders on the book resulting from the execution of stopped orders at a price that is better than the stop price. Specifically, the Commission requests that the NYSE report include a one day review of all book orders in the ten stocks which receive the greatest number of stops. The Commission requests that the NYSE report its findings on this subject by September 30, 1992.

Finally, the Commission expects that the NYSE will closely monitor compliance with the rule during the pilot program extension. The Commission believes that the use of automated surveillance programs coupled with the review of Floor Official records should allow the NYSE to determine if the rule's size and aggregate share threshold were complied with and, if not, whether Floor Official approval was obtained by the specialist for larger parameters. The Commission requests that the NYSE submit to the Commission its report with respect to compliance with the pilot program procedures by September 30, 1992.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. This will permit the pilot program to continue on an uninterrupted basis. In addition, the procedures the Exchange proposes to continue using are the identical procedures that were published in the **Federal Register** for the full comment period and were approved by the Commission.[10]

It Therefore Is Ordered, Pursuant to section 19(b)(2) of the Act,[11] that the proposed rule change is approved for a one year period ending on March 21, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[12]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; The Options Clearing Corporation; Filing of a Proposed Rule Change Relating to Options Exercise Settlement Agreements With Stock Clearing Corporations

March 17, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 27, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would permit OCC to put into effect amended and restated agreements providing for the settlement of exercises and assignments of equity options with National Securities Clearing Corporation ("NSCC"), Stock Clearing Corporation of Philadelphia ("SCCP"), and Midwest Clearing Corporation ("MCC") and make related changes in its Rules and By-Laws and certain form agreements used by its clearing members.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Overall Purpose

The overall purpose of the proposed rule change is to make effective an amended and restated options exercise settlement agreement between OCC and each of NSCC, and MCC. (These three agreements are sometimes hereinafter referred to respectively as the "NSCC restated Agreement," the "SCCP restated agreement," and the "MCC restated agreement" and collectively as the "restated agreements.") The restated agreements would replace the options exercise settlement agreements that are currently in effect between OCC and each of NSCC, SCCP, and MCC (sometimes hereinafter referred to collectively as the "original agreements"). NSCC, SCCP, and MCC are sometimes hereinafter collectively referred to as the "correspondent clearing corporations" or the "CCCs."

Each restated agreement provides that it will become effective upon the later to occur of (i) the date on which the restated agreement is executed by both parties thereto or (ii) the date on which the Commission has made effective both OCC's proposed rule change and a proposed rule change filed with the Commission by the other party to the restated agreement that includes the restated agreement as an Exhibit. The restated agreements between OCC and each of MCC, NSCC, and SCCP have been executed. The restated agreements are in substantially the same form, with variations primarily reflecting differences in the respective settlement systems and rules of the CCCs.

OCC is also, in connection with entering into the restated agreements, proposing to: amend the form that OCC requires from each clearing member (an "appointing clearing member") that appoints another clearing member (an "appointed clearing member") to act for it for purposes of settling exercises and assignments of equity options; require clearing members that are organized in Canada and that settle exercises and assignments of equity options through the facilities of The Canadian Depository for Securities ("CDS") to execute a new form (such clearing members are hereinafter sometimes referred to as "Canadian clearing members that settle through CDS"); and make minor amendments to the form on which a clearing member designates a CCC as its "designated clearing corporation" (sometimes hereinafter referred to as its "DCC"). Finally, OCC is also proposing, in connection with entering into the restated agreements, to amend its By-Laws and Rules as set forth in the proposed rule change.

2. The Original Agreements and the Restated Agreements.

(i) *Operation of Broker-to-Broker Settlement Procedures.* Prior to OCC's implementation of the settlement procedures described in the orginial agreements, exercises of equity options were settled "broker-to-broker." In this settlement procedure OCC would, following its receipt of an equity option exercise notice, issue a "delivery advice" to the delivering clearing member (the assigned clearing member, in the case of a call, or the exercising clearing member, in the case of a put) and the receiving clearing member (the exercising clearing member in the case of a call, or the assigned clearing member, in the case of a put). The delivery advice would instruct the delivering clearing member to make delivery directly to the receiving clearing member of the security underlying the exercised option, and specify the address at which delivery was to be made and the exercise settlement amount to be paid by the receiving clearing member to the delivering clearing member.

OCC continues to have rules governing broker-to-broker settlement (Rules 901–912). However, broker-to-broker settlement has been largely replaced by settlement through the facilities of the CCCs, and is now used only on the rare occasions when the CCC designated by a clearing member as its designated clearing corporation is unwilling or unable to effect settlements of transactions in a particular security. (This usually occurs, to the extent that it occurs at all, because a security is depository-ineligible.)

(ii) *Operation of the Original Agreements.* When the original agreements were implemented, OCC began to settle the great majority of equity option exercises through the facilities of the CCCs.[1] Each clearing member was required to designate a CCC for purposes of effecting settlement of exercises of equity options. In this revised system, rather than delivering an underlying security "broker-to-broker," a delivering clearing member delivers the security to, and receives payment of the exercise settlement amount from, its DDC. If the delivering clearing member's DCC is also the DCC for the receiving clearing member, the clearing corporation also delivers the security to, and receives payment from, the receiving clearing member in accordance with the settlement procedures of the clearing corporation. If the delivering clearing member and receiving clearing member have designated different CCCs as their respective DCCs, the DCC for the delivering clearing member delivers the security to, and receives payment from, the DCC for the receiving clearing member in accordance with the interface arrangements of the two DCCs, and the DCC for the receiving clearing member in turn delivers the security to, and receives payment from, the receiving clearing member.

The original agreements provide for a five-day settlement period for settlement of exercises of equity options. The date of the exercise is analogous to the "trade date" for ordinary regular-way stock trades effected on a stock exchange, and accordingly is referred to as "T." OCC reports the exercises and assignments of clearing members to their respective DCCs during the night of T. The DCCs effect settlement on the fifth business day after T, or "T+5."

(iii) *Changes Made by the Restated Agreements.* The restated agreements alter and supplement the provisions of the original agreements in several ways, the most important of which are the following:

(a) *Timing of the Effectiveness of the Guarantee of the Correspondent Clearing Corporations.*—Section 4 of each original agreement provided that, if the CCC did not notify OCC prior to 12:00 Noon Central Time (1:00 p.m. Eastern Time) on T+4 that the CCC had ceased to act for an OCC clearing member which had designated the CCC as the clearing member's DCC, the CCC would be unconditionally obligated as of that time to complete the settlement of the exercise.

These provisions were in accordance with the provisions of the rules of the CCCs as in effect in 1978. However, each CCC has subsequently amended its rules to provide that the CCC would be unconditionally obligated to complete settlement of any "locked-in" trade [2] in a "continuous net settlement security" ("CNS security") commencing at midnight (or, in the case of MCC, 11:59 P.M.) at the end of T+1.

Section 4(a) of each restated agreement provides that each CCC will become unconditionally obligated to "effect settlement in respect of, or to close out or eliminate," each exercise and assignment of equity options as it would in respect of locked-in trades reported to it in the security underlying the option. This revised provision has the effect of according settlements of exercises and assignments of options the benefit of the earlier time at which the CCCs become unconditionally obligated to effect settlement.[3] OCC Rule 913 is amended to state expressly that OCC's direct guarantee to the clearing member acting on behalf of the holder of the option terminates at the time that the DCC designated by each clearing member becomes unconditionally obligated to effect settlement of the transaction. (This is described further below in the discussion of the changes to OCC's Rule 913.)

Section 4(a) of each restated agreement permits the CCC to "eliminate" an exercise transaction from its system, in accordance with its Rules, even after its guarantee has initially attached to the transaction. This could occur only in the extremely unlikely event that a security were to cease to be eligible for settlement through the CCC during the time remaining until actual settlement of the transaction. Elimination would have the effect of causing the CCC's guarantee to cease to be effective, and OCC would be responsible for guaranteeing completion of the transaction.

Section 4(b) of each restated agreement acknowledges that the CCC may, in the event of a default by a participating member [4] for which it is the DCC, voluntarily determine to complete settlement of transactions with respect to which it had not yet become obligated at the time of the default. If the CCC makes such a determination, section 4(b) of each restated agreement provides that the CCC will become unconditionally obligated to complete settlement of all such transactions arising from option exercises, and that such transactions will then be subject to OCC's guarantee to the CCC, which is described below.

(b) *Guarantee by OCC to each CCC.*—Each restated agreement provides that OCC will compensate the CCC for losses incurred by it in closing out the exercises and assignments of a defaulting participating member reported by OCC to the DCC. The amount of the compensation would be the smallest of three quantities, referred to in each restated agreement as the "net options loss," the "net overall loss," and the "maximum guarantee amount." The net options loss is essentially the actual net loss incurred by the CCC in closing out exercises and assignments of options in respect of which the CCC is unconditionally obligated at the time of the default. The net overall loss is essentially the actual net loss incurred by the CCC in closing out all transactions of the defaulting participating member in respect of which the CCC is unconditionally obligated at the time of the default.

The maximum guarantee amount is essentially the sum of the "mark-to-market amounts," positive and negative, for all options exercises and assignments in respect of which the CCC is unconditionally obligated at the time of the default. The term "mark-to-market amount" is defined to mean the difference between the exercise price of an option and the closing price of the underlying stock "on the trading day immediately preceding the then most recently completed regular morning settlement with OCC of the participating member." (Thus, for example, if a participating member defaults prior to the opening of business on the day that is T+4 in respect of the settlement of an option, and the participating member had not made regular morning settlement with OCC on that day but had made regular morning settlement with OCC on T+3, the mark-to-market amount for the stock underlying that option would be determined as of the close of trading on T+2.) The effect of the existence of the maximum guarantee amount prong of the calculation of OCC's obligation to a CCC is to cap OCC's exposure at an amount that should be covered by the margin deposits collected by OCC, but that is at least equal to the net of the "in-the-money amounts," for all exercises and assignments being settled through a CCC at a particular point in time, as of the close of trading on the day or days on which the exercises were effected.

OCC's guarantee in each restated agreement does not cover the exposure of the CCC to loss from exercise settlements that would result if a participating member transfers settlements from its account at the CCC to the account of any other member of the CCC (even another participating member or another member that is an affiliate of the participating member), and that second member defaults on its obligations to the CCC with respect to those settlements. This is so for several reasons, including the following: First, OCC would not be a party to the transfer, and accordingly would have no ability to review the impact of the transfer on the financial condition of the transferee member. Second, the three prongs of the computation of OCC's guarantee obligation are all premised on the assumption that the negative values arising from short positions of a participating member may be offset against the positive values arising from the long positions of the participating member. This assumption may not hold true if, for example, a participating member transfers its short positions, but not the offsetting long positions also carried by the participating member, to the account of another member and that member fails to make settlement.

(c) *Permissible Arrangements for Effecting Settlement Through a Correspondent Clearing Corporation*—Each original agreement contemplated that settlements of exercises and assignments would be effected by "participating members," *i.e.*, entities that are OCC clearing members and also participants in the relevant CCC. The original agreement between OCC and NSCC was amended in 1987 to include Canadian clearing members that settle through CDS within the participating member concept.

Each restated agreement retains the basic participating member concept, and each restated agreement contains expanded provisions addressed to the particular situation of Canadian clearing members that settle through CDS.[5] Each restated agreement also contains a provision stating that, in a case where an OCC clearing member has appointed an appointed clearing member to act on its behalf in effecting settlement of exercises and assignments of equity options, the appointed clearing member is the participating member for purposes of the Agreement.

3. The Revised Form Agreement for Appointing Clearing Members and Appointed Clearing Members

In connection with implementing the restated agreements, OCC is revising the form of the agreement that OCC requires from each appointing clearing member. The most important purpose of the revisions is to cause the appointing clearing member to acknowledge expressly that the obligations of the appointing clearing member to OCC in respect of exercises and assignments are not satisfied until the appointed clearing member appointed by the appointing clearing member has satisfied its obligations to its DCC arising from the exercises and assignments, and that accordingly the uses that OCC may make of the appointing clearing member's margin and clearing fund deposits include use to satisfy any obligation to the DCC incurred by OCC as a result of the DCC's settlement of the appointing clearing member's exercises and assignments.

The appointing clearing member form of agreement is also revised to make various other clarifying, updating and stylistic changes. The "acceptance of appointment as appointed clearing member" portion of the form is also amended to make clarifying, updating and stylistic changes similar to the changes to the appointing clearing member's portion of the form.

4. The New Form Agreement for Canadian Clearing Members That Settle Through CDS

In connection with implementing the restated agreements, OCC will also require Canadian clearing members that settle through CDS to execute a new form of agreement. The primary purpose of the new form is to cause each such clearing member to acknowledge expressly that the obligations of the clearing member to OCC in respect of exercises and assignments are not satisfied until CDS has satisfied its obligations arising from the exercises and assignments to the DCC of the clearing member, and that accordingly the uses that OCC may make of the clearing member's margin and clearing fund deposits include use to satisfy any obligation to the DCC incurred by OCC as a result of the DCC's settlement of exercises and assignments being settled through CDS. The form also causes the clearing member to acknowledge that it will be deemed not have designated a DCC for purposes of OCC's rules if CDS at any time should cease to be a participant in good standing of a CCC.

5. The Revised Form for Designating a Designated Clearing Corporation

In connection with implementing the restated agreements, OCC is revising the form used by clearing members (including Canadian clearing members that settle through (CDS) to designate a DCC. The changes are non-substantive and are primarily intended to conform the language of the form more closely to the language of OCC Rule 913(a).

6. Changes in OCC's By-Laws and Rules

In connection with implementing the restated agreements, OCC is also making various changes, many of which are technical in nature, to its By-Laws

---

[1] OCC had a correspondent relationship with Pacific Clearing Corporation ("PCC") in addition to NSCC, SCCP, and MCC. PCC has ceased to do business.

[2] Locked-in trades are trades executed through automated order routing and trade execution systems. Each of the restated agreements provides that exercises and assignments of options reported by OCC to the CCC will be deemed to be locked-in trades.

[3] The trade guarantee rules of the CCCs described in the text have been approved by the Commission only on a temporary basis. See Securities Exchange Act Release No. 27192 (August 29, 1989), 54 FR 37010, Securities Exchange Act Release No. 28728 (December 31, 1990), 56 FR 717, and Securities Exchange Act Release No. 29386 (June 28, 1991), 56 FR 30051. If the Commission should in the future decline to approve these rules, the restated agreements would provide that settlements of exercises and assignments of options would become guaranteed by the CCCs on the morning of T+4, *i.e.*, at the same time as they are now.

NSCC has a "balance order" settlement system in addition to its CNS system. Balance order securities are essentially those securities that are not eligible for book-entry transfer on the books of The Depository Trust Corporation. With respect to balance order securities, the language of Section 4(a) of the NSCC restated agreement has the effect of causing NSCC to guarantee the settlement of these transactions to the same extent that it guarantees all other balance order transactions, *i.e.*, from the morning of T+4 through the close of business on T+5, unless the defaulting NSCC member is receiving the security and the non-defaulting member could have made delivery on T+5, in which case the transactions would be guaranteed only through T+4. See paragraph 4(2)(A) of Addendum K to NSCC's Rules and Procedures.

[4] A "participating member," in general, is an entity that is an OCC Clearing Member and a member of the CCC that it has designated as its DCC. The definition is refined in the restated agreements, and is discussed further below.

[5] NSCC continues to be the only CCC that has a relationship with CDS. Accordingly, the provisions described in the text relating to Canadian clearing members that settle through CDS will be operative only in the NSCC restated agreement. However, the provisions described in the text are also included in the MCC restated agreement and the SCCP restated agreement, in order to preserve the similarity of the three restated agreements as far as possible, and in order to accommodate the possibility that MCC or SCCP may enter into a relationship with CDS at some time in the future.

and Rules. The substantive changes to OCC's By-Laws and Rules consist of the following:

(i) *Article VIII of the By-Laws.* OCC is amending the provisions of its By-Laws that describe its authority to use the clearing fund deposits of clearing members, primarily to make clear that (1) OCC may apply the clearing fund deposits of clearing members to satisfy any obligation incurred by OCC to a CCC as a result of the failure of a clearing member or CDS to perform an obligation to the CCC arising from exercise settlements, and (2) that the order in which such deposits will be applied is the same as it would be in other circumstances in which OCC is forced to draw on the clearing fund.

(ii) *Rule 212.* Rule 212 is amended to state expressly that any Canadian clearing member that settles through CDS need not itself be a participant in a CCC.

(iii) *Rule 305.* Rule 305(b) is amended to state expressly that OCC's Chairman and President have the same authority to impose restrictions with respect to a clearing member's activities as an appointed clearing member that those officers have with respect to a clearing member's other activities. A new Interpretation is added to the Rule to state expressly that the difficulty of a clearing member or any appointed clearing member appointed by the clearing member in meeting its obligations to its DCC, or, in the case of a Canadian clearing member that settles through CDS, the difficulty of CDS in meeting its obligations to the DCC of the Canadian clearing member, would be grounds for OCC's Chairman or President to impose restrictions on the clearing member pursuant to the Rule.

(iv) *Rule 601.* Rule 601 (OCC's Rule describing its margin requirements for equity options) is amended to provide that exercised and assigned equity options will be treated as a separate product group for the purposes of the Rule, and to state that any margin requirement for the unexercised stock options product group in firm accounts and market-maker's and specialist's accounts will not be reduced by the value of any margin credit for the exercised stock options product group. The effect of these changes is to assure that OCC gives no margin credit for value which would be controlled by a CCC and which OCC might therefore be unable to recover in the event that it suspended a clearing member. The Rule does continue to permit OCC to use any margin credit for the net value of a clearing member's open options positions in firm accounts and market-maker's and specialist's accounts to reduce the clearing member's margin requirement in respect of the exercised stock options product group.

Rule 601 is also amended to permit OCC to hold a clearing member's margin for an extra day if OCC receives a notice from the clearing member's DCC to the effect that the clearing member (or the clearing member's appointed clearing member if the clearing member has one, or CDS in the case of a Canadian clearing member that settles through CDS) has not performed an obligation to the DCC. This change is necessary to enable OCC to comply with the restated agreements, each of which states that, if OCC receives a notice from the DCC prior to 6 a.m. Central Time (7 a.m. Eastern Time) on T+6 to the effect that a participating member (or CDS) has not made settlement with the DCC, the DCC may still call on OCC's guarantee if the DCC notifies OCC prior to 4 p.m. Central Time (5 p.m. Eastern Time) on T+6 that it has ceased to act with respect to the entity.

(v) *Rule 608.* Rule 608 (OCC's Rule describing when margin may be withdrawn) is amended to state expressly that the Chairman or President of OCC may refuse to authorize the withdrawal of margin for any of the same reasons that would cause such officer to require a clearing member to deposit intra-day margin pursuant to OCC's Rule 609. The effect of the change is to eliminate a possible misreading of the two Rules as requiring OCC to permit a withdrawal of assets held by OCC as margin before OCC could require that the assets by re-deposited as intra-day margin pursuant to Rule 609 in circumstances in which OCC believed that it was appropriate to retain the margin assets.

(vi) *Rule 913.* Rule 913 is amended to state that OCC shall be deemed to have made full settlement in respect of an exercise and assignment of an equity option at the time when the DCCs for the concerned clearing members are unconditionally obligated to complete the transaction, and that thereafter OCC will have no obligation in respect of the transaction, other than any obligation OCC may have to either DCC under their respective restated agreements. Rule 913 continues to provide, as it does currently, that the rights and obligations of the two clearing members will be governed by the rules of their respective DCCs after the guarantees of the DCCs become effective.

A new paragraph is added to Rule 913 to state expressly: that the obligations of a clearing member in respect of the settlement of any securities contract arising out of an exercised option contract being settled through a DCC will not be deemed to be completed by or on behalf of the clearing member until settlement is completed in respect of such securities contract with the DCC; that OCC's guarantee to a DCC in respect of the securities contract arising out of an exercised option contract is part of the securities contract; and that any clearing member that fails (or whose appointed clearing member fails or on behalf of which CDS fails, as applicable) to complete performance of its obligations under any such securities contract is obligated to reimburse OCC for any resulting payment made by OCC to the DCC. An essential purpose of the paragraph is to make clear that any payment made by OCC pursuant its guarantee to a CCC would be pursuant to, and for the purpose of liquidating, securities contracts arising out of exercised option contracts and accordingly, under the special provisions of the Bankruptcy Code that protect the close-out activities of securities clearing agencies, not subject to attack by the trustee for a bankrupt clearing member. A second purpose of the paragraph is to make clear that a clearing member that caused OCC to make a guarantee payment to the clearing member's DCC has a continuing obligation to OCC to reimburse OCC for the payment. This provision, in conjunction with the Section of OCC's By-Laws that describes OCC's lien on clearing member assets, makes clear that OCC may satisfy the clearing member's obligation out of the assets of the clearing member that are subject to OCC lien in respect of the clearing member account or accounts in which the obligation originated.

A new Interpretation is added to Rule 913 for the same reason that Rule 305 is amended, namely, to state expressly that a Canadian clearing member that settles through CDS has satisfied its Rule 913 obligation to designate a DCC.

(vii) *Rule 1102.* Rule 1102 is amended to state expressly that OCC may suspend a clearing member if the clearing member appointed by the clearing member or CDS (in the case of a Canadian clearing member that settles through CDS) is in default of any delivery of funds or securities to its DCC.

A phrase in Rule 1102 that currently states that OCC may suspend a clearing member if the suspension is necessary for the protection of OCC, "other clearing members, creditors or investors" is changed to refer to OCC, "other clearing members or the general public" in order to conform to parallel language used elsewhere in OCC's Rules.

(viii) *Rule 1107.* Rule 1107 is amended to state that, following the default of a clearing member, OCC will deliver securities deposited by the clearing member in specific deposits and escrow deposits to the clearing member's DCC. This change is required to enable OCC to comply with the restated agreements, each of which states that OCC will deliver such deposits to the DCC of a suspended clearing member against payment by the DCC of the appropriate exercise settlement amounts.

A new paragraph is added to Rule 1107 to state expressly that OCC may use funds of a suspended clearing member that are in an OCC account and subject to OCC's control to satisfy and obligation to the DCC of the clearing member arising from the exercise and assignment activity in that account.

7. Statutory Basis for the Proposed Rule Change. OCC believes the proposed rule change is consistent with the purposes and requirements of Section 17A of the Act because it enhances the system used by OCC to effect settlement of exercises and assignments of equity options. In particular, the proposed rule change improves the efficiency of the equity option exercise settlement system, by reducing the need for OCC and its correspondent clearing corporations to hold redundant security deposits, in a way that should not increase the risk to which OCC and the stock clearing corporations are exposed in the settlement process.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

C. Self-Regulatory Organization's Statement of Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited by OCC with respect to the proposed rule change and none have been received by OCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR-OCC-92-05 and should be submitted by April 13, 1992.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-30490; File No. SR-SCCP-92-01]

Self-Regulatory Organizations; Stock Clearing Corp. of Philadelphia; Notice of Filing of a Proposed Rule Change Relating to an Amended and Restated Options Exercise Settlement Agreement With the Options Clearing Corp.

March 17, 1992.

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b), notice is hereby given that on February 27, 1992, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of an amended and restated options exercise settlement agreement between SCCP and the Options Clearing Corporation ("OCC").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, SCCP included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. SCCP has prepared summaries, set forth in section (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to reflect amendments to the options exercise settlement agreement between SCCP and OCC. The amendments reflect the fact tha SCCP now provides an enhanced trade guarantee. The proposed rule change also amends SCCP's participants fund formula to accommodate the revised agreement. Furthermore, the amendment provides language in the agreement to accommodate SCCP's association with The Canadian Depository for Securities ("CDS"). Currently, SCCP has no relationship with CDS and does not plan to effect such an association in the near future.[1]

SCCP believes the proposed rule change is consistent with section 17A(b)(3)(A) of the Act in that it enhances SCCP's "capacity to be able to facilitate the prompt and accurate

[1] The National Securities Clearing Corporation ("NSCC") continues to be the only clearing corporation that has a relationship with CDS. Accordingly, the provisions described in the text relating to Canadian clearing members that settle through CDS will be operative only in the NSCC restated agreement. However, the provisions described in the text are also included in the SCCP restated agreement, in order to preserve the similarity of the restated agreements with OCC and in order to accommodate the possibility that SCCP may enter into a relationship with CDS at some time in the future.

clearance and settlement of securities transactions from which it is responsible." The proposal also is consistent with the Congressional objectives of facilitating the development of a national system for clearance and settlement of securities transactions for which it is responsible and, pursuant to section 17A(b)(3)(F), the proposal is formulated "to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible, (and) to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions."

B. Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not believe that the proposed rule change will have an impact on or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No comments on this particular rule change have been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of SCCP. All submissions should refer to File No. SR-SCCP-92-01 and should be submitted by April 14, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margarot H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

March 18, 1992.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder for unlisted trading privileges in the following securities:

Alex Brown, Inc.
Common Stock, $.10 Par Value (File No. 7-8221)
Agricultural Minerals Co., L.P.
Common Units of Limited Partnership, No Par Value (File No. 7-8222)
Hasbro, Inc.
Warrants to Purchase Common Stock, expiring 7/12/94 (File No. 7-8223)
Arrhythmia Research Technology, Inc.
Common Stock, $.01 Par Value (File No. 7-8224)
Pilgrim Prime Rate Trust
Shares of Beneficial Interest, No Par Value (File No. 7-8225)
Sears, Roebuck & Company
8.72% Depositary Shares (each representing ¼ share of Preferred Equity Redemption Cumulative Stock) (File No. 7-8226)
Smith Barney Intermediate Municipal Fund, Inc.
Common Stock, $.001 Par Value (File No. 7-8227)
El Paso Natural Gas Company
Common Stock, $3.00 Par Value (File No. 7-8228)
Valassis Communications, Inc.
Common Stock, $.01 Par Value (File No. 7-8229)
Duff & Phelps Corporation
Common Stock, $.01 Par Value (File No. 7-8230)
First Commonwealth Fund, Inc.
Common Stock, $.001 Par Value (File No. 7-8231)

These securities are listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before April 8, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 500-1]

New Allied Development Corp.; Order Directing Suspension of Trading

March 17, 1992.

It appears to the Securities and Exchange Commission that there is a lack of adequate current information concerning the securities of New Allied Development Corp. and that questions have been raised about the adequacy and accuracy of publicly disseminated information concerning, among other things, its ability to construct and open in May, 1992, "The Tommyknocker Casino" to be located in Black Hawk, Colorado.

Therefore, it is Ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of New Allied Development Corp., over-the-counter or otherwise, is suspended for the period from 9:30 a.m. e.s.t., March 18, 1992 through 11:59 p.m. e.s.t., on March 31, 1992.

By the Commission.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25494; International Series Release No. 373]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 18, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 11, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Northern States Power Company, et al. (70-7890)

Northern States Power Company ("NSP") 414 Nicollet Mall, Minneapolis, Minnesota 55401, a Minnesota combination public-utility holding company exempt from registration by order under section 3(a)(2) of the Act [1], and its wholly owned nonutility subsidiaries, The NRG Group ("NRG") and NRG Energy, Inc. ("NRG-Energy"), 1221 Nicollet Mall, Minneapolis, Minnesota 55401, have filed an application under sections 3(a)(5), 3(b), 9(a)(2) and 10 of the Act.

NSP engages in the generation, transmission and distribution of electricity, and the distribution of natural gas, in Minnesota, North Dakota and South Dakota. NSP's sole public-utility subsidiary company, Northern States Power Company ("Northern States"), a Wisconsin corporation, provides such services in Wisconsin and Michigan.

NRG is a wholly owned direct nonutility Minnesota subsidiary company of NSP. Through its wholly owned indirect Minnesota subsidiary NRG-Energy, NRG has participated with two nonaffiliated public-utility companies not subject to the Act, UtiliCorp United, Inc. ("UtiliCorp"), a United States company, and Empresa Nacional de Electricidad, S.A. ("Endesa"), a Spanish company (together with NRG, the "Group") in the submission of a bid to acquire from Electricidade de Portugal, S.A. ("EDP"), a Portuguese government-owned corporation, the assets of a coal-fired generating station currently under construction by EDP in Portugal ("Pego Station").[2] The bid contemplates that the Group would coordinate and oversee the construction by EDP of Units 1 and 2 of the Pego Station, and act as general contractor for Units 3 and 4.[3] NSP, through its subsidiaries, expects to participate in rendering such services. The electrical output of the Pego Station would be sold to EDP.

If the bid is accepted, the Group will

---

[1] *See Northern States Power Company*, 36 S.E.C. 1 (1954).

[2] EDP is responsible for the generation, transmission and distribution of electricity in Portugal.

[3] The four units comprising the Pego Station will each have a capacity of 300 megawatts. The units are currently scheduled for commercial service in 1993, 1995, 1999 and 2000, respectively.

[4] The application states that a *sociedade anonima* is similar to a United States corporation in that the

Continued

effect the acquisition through Superpego-Electricidade, S.A. or Superpego, a newly formed *sociedade anonima*.[4] NRG would acquire its interest through a to-be-formed wholly owned direct Netherlands subsidiary of NRG–Energy ("NRG Netherlands Subsidiary").[5] Each member of the Group would initially have a one-third voting equity interest. Prior to the commercial operation of Unit No. 1, the members of the Group would each sell approximately one-fourth of their respective voting equity interests in Superpego to a group of Portuguese institutional and industrial investors. Thus, at the time Superpego becomes an electric utility company within the meaning of section 2(a)(3) of the Act, NSP will indirectly own an approximately 25% voting equity interest in Superpego.[6]

EDP's invitation to bid for the PEGO Station required propective bidders to: (1) initially capitalize the entity that would implement their bid in the amount of one billion Portuguese Escudos (approximately U.S. $7 million); (2) commit to make additional equity contributions to that entity sufficient to support the consummation of the purchase of the PEGO Station; and (3) maintain, through on-going equity contributions during construction, a ratio of not less than 15% equity (based on net fixed assets) to not more than 85% secured senior debt. On that basis, Superpego would be initially capitalized with approximately U.S. $7 million, of which NSP would indirectly contribute approximately U.S. $2 ⅓ million.

The total cost to Superpego for all four units of the PEGO Station is estimated to be between U.S. $1.8 billion and U.S. $2.1 billion. The 15% equity required for Superpego on that basis would be approximately U.S. $270 million to U.S. $315 million. Thus NSP's indirect one-third initial interest would require approximately U.S. $90 million to U.S. $105 million. NSP anticipates that the primary financing of the PEGO Sation will be provided by a group of banks and financial institutions through debt instruments issued by Superpego which will be non-recourse to Superpego and its shareholders, other than the obligations of the Group to provide the requisite 15% equity participation in Superpego. However, the applicants state that it may be necessary for NRG-Energy to provide some working capital interim loans to Superpego. NSP anticipates that such loans would not exceed U.S. $70,000,000 in principal amount, would have relatively short-term maturities, and would be funded with equity contributions by NRG to NRG-Energy and/or short-term bank borrowings by NRG-Energy.

As a result of the proposed transactions, Superpego will be a subsidiary company of NSP within the meaning of section 2(a)(8) of the Act, and NRG, NRG-Energy and the NRG Netherlands Subsidiary will be holding companies within the meaning of section 2(a)(7) of the Act. The applicants request an order granting Superpego an unqualified exemption under section 3(b) and an order granting NRG, NRG-Energy and the NRG Netherlands Subsidiary exemptions under section 3(a)(5) of the Act.

With respect to the requested order under section 3(b), the applicants state that Superpego will not derive any material part of its income from sources within the United States. Further, Superpego will not be, nor have any subsidiary company which is a public-utility company operating in the United States. The applicants also state that the NRG Netherlands Subsidiary, NRG-Energy and NRG will qualify for exemption under section 3(a)(5).

NSP believes that its section 3(a)(2) exemption may continue in effect if the NRG Netherlands Subsidiary effects the proposed acquisition. The annual utility revenues of Superpego with all four units in operation are anticipated to be approximately $700 million, of which the equity interest of NRG-Energy therein would be one-quarter, or $175 million. On this basis, the application states that the ratio of the sum of the anticipated revenues of NSP's public-utility subsidiaries, Superpego and Northern States, to the 1991 revenues of NSP alone, would be 27.33%. NSP further states that it believes the acquisition of a foreign public-utility company would not be detrimental to the public interest or the interest of investors and consumers.

For the Commission, by the Division of Investment Management, Pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

---

shareholders' liability is generally limited to their investment.

[4] The Netherlands subsidiary company will be a *besloten vennootschap* or B.V. NSP has selected a Netherlands entity for considerations of currency repatriation, liability limitation, taxation and European Economic Community directives.

[5] UtiliCorp, Endesa and the group of Portuguese investors will also each own an approximate 25% interest at that time.

[Rel. No. IC-18616; 812-7561]

United Investors Life Insurance Co., et al.

March 17, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: United Investors Life Insurance Company ("United Investors"), United Investors Annuity Variable Account ("Variable Account" or "Account"), and Waddell & Reed, Inc. ("W&R").

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) of the 1940 Act for exemptions from sections 2(a)(35), 26(a)(2)(C) and 27(c)(2).

SUMMARY OF APPLICATION: Applicants seek an order to permit a premium-based Sales Expense Charge to be deducted from the assets of the Variable Account in ten equal annual installments.

FILING DATE: Applicants filed the application on January 31, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 13, 1992, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, United Investors Life Insurance Company, 2001 Third Avenue South, Birmingham, Alabama 35233.

FOR FURTHER INFORMATION CONTACT: Thomas E. Bisset, Attorney, at (202) 272-2058, or Wendell Faria, Deputy Chief, at (202) 272-2080, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. United Investors is a stock life insurance company that was incorporated in the State of Missouri on August 17, 1981 as the successor to a company of the same name established in Missouri on September 27, 1961. United Investors is a wholly-owned subsidiary of United Investors Management Company, Inc., which in turn is indirectly owned by Torchmark Corporation. United Investors is principally engaged in offering life insurance and annuity contracts, and is admitted to do business in the District of Columbia and all states except New York.

2. The Variable Account was initially established by United Investors as a segregated asset account on December 8, 1981 and was reactivated on December 5, 1986. The Variable Account has been registered as a unit investment trust under the 1940 Act. The premiums paid under the deferred variable annuity contracts ("Contract" or "Contracts") are allocated to the Variable Account.

3. The Variable Account is currently divided into five investment divisions; the Money Market Division, the Bond Division, the High Income Division, the Growth Division and the Income Division (collectively, "Investment Divisions"). Each Investment Division invests exclusively in shares of a corresponding portfolio of TMK/United Funds, Inc. (the "Fund"), which is registered under the 1940 Act as an open-end management company (File No. 33-11466).

4. W&R is the principal underwriter and distributor of the Contracts. W&R is a wholly-owned subsidiary of United Investors Management Company, Inc.

5. Under the Contract, a person may accumulate funds on a tax-deferred basis based on the investment experience of assets underlying the Contract by allocating premiums to the Variable Account. The Contract also provides for annuity payments on a variable basis after the retirement date.

6. The Contract pays a death benefit to the named beneficiary if the annuitant dies. If the annuitant dies prior to the retirement date, the death benefit will be the greater of (1) the total purchase payments made less any amounts withdrawn, any withdrawal charges on such amounts withdrawn and any transaction charges, or (2) the policy value on the date of death. If the annuitant dies after the retirement date, the amount payable, if any, will be provided in the annuity payment option then in effect.

7. The Contract value is equal to the sum of the values of the Investment Divisions under the Contract. The Contract owner determines in the application how the purchase payments will be allocated among the Investment Divisions of the Variable Account. The Contract value will reflect the investment performance of the Investment Divisions selected.

8. Currently, United Investors imposes an annual deduction at an effective annual rate of .85% of the initial purchase payment in ten equal installments (the "Sales Expense Charge") and a 6% front-end sales charge from each additional purchase payment to compensate United Investors for certain sales and other distribution expenses. In addition, a withdrawal charge is assessed against every purchase payment withdrawn or applied under an annuity payment option within eight years after the payment is received ("Withdrawal Charge"). The Withdrawal Charge equals 6% of purchase payments less than one year old and decreases 1% per year thereafter; it is not assessed against purchase payments that are eight years old or older. The Withdrawal Charge is deducted from the remaining Contract value, or from the amount paid if the remaining value is insufficient, and it serves to compensate United Investors for sales expenses with regard to the Contract that would have been recovered by the Sales Expense Charge had the Contract not been surrendered.

9. Contract owners may surrender the Contract prior to the earlier of the retirement date or the death of the annuitant. After the first year, Contract owners may make a partial withdrawal of up to 10% of cumulative purchase payments without incurring the Withdrawal Charge. A $20 transaction charge will apply to withdrawals after the fourth withdrawal in any one year.

10. A charge for administrative expenses, not to exceed $50 per year, will be deducted from the Contract value or from annuity payments.

11. United Investors deducts a mortality and expense risk charge at an effective annual rate of .90% of the daily net asset value of the Investment Divisions.

12. United Investors seeks to impose a uniform Sales Expense Charge of a maximum of 8.5% of all purchase payments. United Investors intends to accomplish this by eliminating the 6% front-end sales charge on additional premiums and imposing an annual deduction at an effective annual rate of .85% on every purchase payment to be made in ten equal annual installments. Aplplicants represent that the combined total of the new Sales Expense Charge and the Withdrawal Charge will not exceed 8.5% of purchase payments.

Applicants' Legal Analysis

1. Applicants request an order under section 6(c) of the 1940 Act for exemptions from sections 2(a)(35), 26(a)(2) and 27(c)(2) to the extent necessary to permit the deduction of the Sales Expense Charge from the assets of the Variable Account. Applicants do not concede the applicability of these sections to the Sales Expense Charge. However, in order to avoid any possibility that questions may be raised as to the potential applicability of those provisions to the charge, Applicants are seeking exemptive relief.

2. Applicants submit that the imposition of a Sales Expense Charge over ten years is more favorable to Contract owners than an equivalent charge deducted up front from each purchase payment. By spreading the sales charge over a ten year period, more of the investor's money is available for investment. Additionally, Applicants assert that Contract owners who surrender or partially surrender the Contract within eight years of making a purchase payment pay a lower total sales load (the applicable Withdrawal Charge plus the accumulated Sales Expense Charge) than they would if the entire 8.5% were deducted from the purchase payment upon receipt by United Investors.

3. Applicants submit that granting exemptive relief for the periodic Sales Expense Charge is supported by relevant Commission precedent. In Rule 6e-3(T) the Commission specifically authorized sales expense charges to be deducted from the cash value of a flexible premimum life insurance policy. Applicants assert that the same reasoning that justifies the exemption provided in the Rule 6e-3(T) for the deduction of sales loads from cash value for variable life insurance justifies exemptive relief in this instance.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980, as Amended by Public Law 99-591; Information Collection Under Review by the Office of Management and Budget (OMB)

AGENCY: Tennessee Valley Authority.

ACTION: Information Collection Under Review by the Office of Management and Budget (OMB).

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), as amended by Public Law 99-591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be made within 30 days directly to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Telephone: (202) 395-3084.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 1101 Market Street (EB 4B), Chattanooga, TN 37402-2801; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Commercial/Industrial Biomass Energy-Using Facilities in the Southeastern United States.

Frequency of Use: On occasion.

Type of Affected Public: State or local governments, businesses or other for-profit, small businesses or organizations.

Small Businesses or Organizations Affected: Yes.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 1500.

Estimated Total Annual Burden Hours: 750.

Estimated Average Burden Hours Per Response: .5.

Need For and Use of Information: The Southeastern Regional Biomass Energy Program, managed under contract from the Department of Energy by TVA, will use the information to update the Directory of Biomass Installations in 13 Southeast States in order to assess trends in alternate energy usage, match fuel suppliers with fuel users, and to otherwise facilitate the growth of the industry by sharing information and expertise.

Louis S. Grande,

Vice President, Information Services, Senior Agency Official.

[FR Doc. 91-6668 Filed 3-23-92; 8:45 am]

BILLING CODE 8120-08-M

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, section 402, Public Law 101-549, 104 Stat. 2568, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J.W. Dickey, to the TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W.M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 8120-08-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 92-021]

Commercial Fishing Industry Vessel Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Act (Pub. L. 92-463; 5 U.S.C. app. I), notice is hereby given of a meeting of the Commercial Fishing Industry Vessel Advisory Committee [CFIVAC]. The meeting will be held on May 4-5, 1992, in room 4234 at the Department of Transportation, 400 Seventh Street SW., Washington, DC. The meetings will be held daily from 9 a.m. to 5 p.m. Attendance is open to the public.

TOPIC: The Committee will discuss and make recommendations to the Coast Guard on the following subjects:

(1) The plan for licensing operators of uninspected federally documented commercial fishing industry vessels.

(2) The Draft Protocol to the 1977 Torremolinos Convention.

The committee will consider recommendations by the subcommittee regarding the Torremolinos International Convention for the Safety of Fishing Vessels, 1977; the draft Protocol to the 1977 Torremolinos Convention; and the proposed changes to the regulations in the 1977 Torremolinos Convention drafted by the responsible International Maritime Organization (IMO) subcommittees.

(3) The development of standard curriculum and instructional materials for commercial fishing industry vessel safety training.

(4) Interim final rule on immersion suit carriage requirements.

FOR FURTHER INFORMATION CONTACT: LCDR Ed McCauley, Merchant Vessel Inspection and Documentation Division, Fishing Vessel/Offshore Activities Branch (G-MVI-4), room 1405, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, (202) 267-2307.

Dated: March 10, 1992.

A.E. Henn,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

[FR Doc. 92-6701 Filed 3-23-92; 8:45 am]

BILLING CODE 4910-14-M

National Highway Traffic Safety Administration

[Docket No. 91-12, Notice No. 01]

Guidelines for State Observational Surveys of Safety Belt and Motorcycle Helmet Use

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Request for comment on proposed guidelines for state observational surveys of safety belt and motorcycle helmet use.

SUMMARY: This notice announces proposed guidelines and certification procedures for state safety belt and motorcycle helmet use surveys which are to be used in application for an upcoming Federal grant program. Section 153 of title 23, United States Code, authorizes the Secretary of Transportation to award grants to states that have in effect safety belt and motorcycle helmet use laws. To be eligible for second and third year grant funds, states must have also achieved specified rates of compliance with these laws. The Act authorizes the Secretary to issue guidelines for the measurement of these compliance rates. Although notice and opportunity to comment are not required for guidelines issued for a grant program, NHTSA believes that public comment will assist in the development of satisfactory guidelines and is therefore requesting comments on the proposed survey guidelines and certification procedures. Following the close of the comment period, NHTSA will publish a notice announcing the final survey guidelines.

DATES: Comments on this proposal are due no later than April 23, 1992.

ADDRESSES: Written comments should refer to the docket and notice numbers of this document and be submitted (preferably with ten copies) to: Docket Section, room 5109, Nassif Building, 400 Seventh Street SW., Washington DC 20590. (Docket hours are 9:30 a.m. to 4 p.m.).

FOR FURTHER INFORMATION CONTACT: Dr. Jeffrey Michael, Office of Occupant Protection, NTS-11, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590; phone (202) 366-2755.

SUPPLEMENTARY INFORMATION: Section 1031 of the recently passed Intermodal Surface Transportation Efficiency Act of 1991 (the Act) added a new section 153 to title 23 of the United States Code. This section authorizes the Secretary of Transportation to establish a grant program to support states in adopting and implementing safety belt and motorcycle helmet use laws.

To quality for first-year funding in this three-year grant program, a state must have in effect both a law requiring individuals on a motorcycle to wear helmets and a law requiring individuals in the front seat of a passenger vehicle to wear safety belts or be secured in child passenger safety systems. In the two subsequent years, there are also compliance rate requirements. The Act specifies that states must measure compliance by methods which conform to guidelines issued by the Secretary to ensure that these measurements are accurate and representative. After FY 1994, the Act provides penalties for each year that a state does not have both a safety belt and a motorcycle helmet law in effect.

This notice proposes the guidelines for observational surveys of safety belt and motorcycle helmet use that states must use to be eligible for second and third year grant funds. In addition, this notice proposes a procedure by which states would certify compliance with the issued observational survey guidelines.

Rationale for Proposed Guidelines

NHTSA's goal in developing these proposed guidelines is to allow states to employ observational survey procedures that will yield reasonably accurate and representative results without imposing unreasonable burdens. The agency believes that accuracy and representativeness are necessary to administer the grant program equitably and that these goals can be achieved at reasonable costs.

The following are example of specific elements in the guidelines which represent compromises between accuracy and cost:

Combined Motorcycle Helmet and Safety Belt Surveys: NHTSA proposes that, in order to avoid unduly burdening states, a single probability-based survey design be utilized for the collection of observational data on both safety belt and motorcycle helmet use. The proposed guidelines specify that the survey be designed specifically for safety belt observation and that helmet use be collected at the same sites and at the same times.

The agency acknowledges that, for greatest accuracy and representatives, helmet and safety belt use observation surveys would require individual survey designs. For example, a survey designed specifically for helmet use observation may control for weather conditions or for seasonal differences, whereas these controls may not be utilized in a safety belt-specific design.

However, the agency believes that, because helmet use rates have proven to be very high (in the 90-100 percent range) in states with helmet use laws, any bias introduced by the safety belt-specific design will have little effect on the helmet use survey results and no effect on grant program eligibility.

The agency also acknowledges that, prior to the publication of the final guidelines, some states may have initiated or completed a complying safety belt use survey which did not incorporate helmet use observation. NHTSA invites comments concerning potential methods by which these states could demonstrate compliance with their helmet use law without completing an additional statewide probability-based observation survey.

Level of Precision: A precision requirement of 5 percent relative error for the estimate of safety belt use has been proposed in the guidelines. This level of precision has previously been met by states with probability-based sample designs. A more stringent requirement would place a greater burden on the state, in terms of resources to collect the data. A less stringent requirement would jeopardize the usefulness of the estimate. Although the requirement is specific for the estimate of safety belt usage, no specific precision requirement has been set for the estimate of motorcycle helmet use. The agency recognizes that in some states very few motorcycles will be observed. However, as long as the motorcycle data are collected within the constraints of the safety belt sample design, the agency believes that the precision of these data will be acceptable.

Time of Day: The proposed guidelines specify that data collection is to be performed during daylight hours. The agency acknowledges that a sampling system which includes both daytime and nighttime hours would be representative of the driving population. However, observing safety belt use in the dark is not practical.

Geographical Area Covered: To represent the entire population, the sample frame should include every geographical portion of the state. However, the agency recognizes that requiring 100 percent coverage will be impractical for many states, especially those with large, sparsely populated areas. NHTSA believes that by requiring that the sample frame cover a land area which includes at least 85 percent of the state's population, the practicality of the survey can be substantially enhanced without seriously affecting the representativeness of the sample. To minimize any effect that this allowance may have on survey representativeness, the proposed guidelines specify that only those geographical areas (e.g., counties) of the state which rank lowest in population may be eliminated from survey consideration.

Population of Interest: The proposed guidelines specify that drivers and front seat outboard passengers of passenger cars be included in observations of safety belt usage. NHTSA acknowledges

that several state safety belt use laws cover occupants in both the front and rear seats of motor vehicles and that most state laws cover the front middle seat, as well. In addition, many state laws cover vehicles other than passenger cars. However, the agency believes that requiring data collection in only the front outboard seating positions of passenger cars will substantially reduce the burden of data collection without significantly reducing the validity of the estimate. Further, the guidelines would allow a state the option of including in the survey all passengers and vehicles covered by the state law if the state so desires.

Proposed Certification Procedure

NHTSA proposes that states demonstrate compliance with the final survey performance guidelines by submitting to the agency documentation which would include all of the information included in the Documentation section of the proposed guidelines. This information could either be submitted as a survey plan prior to conduct of the survey or as a survey report accompanying the final survey results. Survey plans and final survey reports would be evaluated by the agency for compliance with the final survey guidelines.

The agency recommends that states submit a survey plan prior to conducting the survey to reduce the possibility of completing a noncomplying survey. Survey plans which are judged as being in compliance with the final survey guidelines will be pre-approved by the agency. For grant application, states which have obtained pre-approval for their survey plans, would be required to submit the final result of their safety belt survey (point estimate and 95 percent confidence interval) and a statement certifying that the pre-approved survey plan was followed. States which have not obtained pre-approval would be required to submit a complete survey report including all of the information listed in the Documentation section of the proposed guidelines along with their grant application.

Whether a survey plan is pre-approved or a survey report is submitted along with the survey results, the point estimates of safety belt and motorcycle helmet use, rather than either extreme of the 95 percent confidence intervals, will be used for determination of compliance with the grant eligibility criteria.

NHTSA believes that by allowing this pre-approval and self-certification procedure and thereby distributing the demand on the agency's technical review staff, the grant application process will be facilitated. In addition, the agency believes this process will reduce the risk of states spending the time and effort performing a non-complying survey. Details concerning the schedule for submitting the survey plan and survey results will be provided in application procedures that will later by distributed to each state Governor's Office of Highway Safety.

Written Comments

NHTSA seeks comments from the public on this proposal. Of particular interest to the agency are comments on the balance between level of precision and burden to the states which would be imposed by the proposed guidelines.

It is requested, but not required, that ten copies of each comment be submitted. Comments should not exceed fifteen pages in length. Necessary attachments may be appended without regard to the fifteen-page limit. This limitation is intended to encourage commenters to present their views in a concise manner.

All comments received before the close of business on the comment closing date listed above will be considered and will be available for examination in the docket at the above address both before and after the closing date. To the extent possible, comments filed after the closing date will be considers. However, this action may proceed at any time after that date. The agency will continue to file relevant material in the docket as it becomes available after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments by the docket should include a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 and it has been determined that it has no federalism implication that warrants the preparation of a federalism assessment.

In consideration of the foregoing, the guidelines for state observational surveys of safety belt and motorcycle helmet use would read as follows:

Guidelines for State Observational Surveys of Safety Belt and Motorcycle Helmet Use

1. Probability-Based: The sample identified for the survey must have a probability-based design such that:

- Estimates are representative of safety belt and motorcycle helmet usage for the population of interest in that state, and
- Sampling errors can be calculated for each estimate produced.

2. Observation: The sample data must be collected through direct observation of safety belt usage and motorcycle helmet usage on roadways within the state. Safety belt use shall be determined by observation of the shoulder belt.

3. Required Precision: The relative error (standard error divided by the estimate) for safety belt usage must not exceed 5 percent. As long as the motorcycle data are collected within the constraints of the belt sample design, the precision for these data will be acceptable.

4. Population of Interest: Drivers and front seat outboard passengers must be eligible for observation in the safety belt survey. At a minimum, all passenger cars must be eligible for observation in the safety belt survey. As an option, states may choose to survey all vehicles and/or all passengers covered by their state safety belt law. All motorcycle drivers and passengers must be eligible for the motorcycle helmet use portion of the survey. The following minimum coverage is required:

A. Demographic: Counties, or other primary sampling units, totaling at least 85 percent of the state's population must be eligible for inclusion in the sample. Only the smallest counties, based on population, with a total of 15 percent or less of the state's population may be eliminated from the sampling frame.

B. Time of Day and Day of Week: All daylight hours for all days of the week must be eligible for inclusion in the sample. In addition, the randomly selected observation sites must be randomly assigned to these day of week/time of day time slots.

5. Documentation: All sample design, collection and estimation procedures must be well documentated. The documentation must include, but is not limited to:

A. Sample Design

- Define all sampling units, with their measures of size.
- Define what stratification was used, if any, at each stage of sampling and what methods were used for allocation of the sample units to the strata.
- Explain how the sample size at each stage was determined.
- List all sampled units and their probabilities of selection.
- Describe how observation sites were assigned to observation time periods.

B. Data Collection

- Define an observation period.
- Define an observation site and what procedures were implemented when the observation site was not accessible on the date assigned.
- Describe what vehicles were observed and what procedures were implemented when traffic was too heavy to observe all vehicles.
- Describe the data recording procedures.

C. Estimation:

- Display the raw data and the weighted estimates.
- For each estimate, provide an estimate of one standard error and an approximate 95 percent confidence interval.
- Describe how estimates were calculated and how variances were calculated.

Issued on: March 19, 1992.

Michael B. Brownlee,

Associate Administrator, Traffic Safety Programs.

[FR Doc. 92-6779 Filed 3-23-92; 8:45 am]

BILLING CODE 4910-59-M

Office of Commercial Space Transportation

[Notice 92-4]

Commercial Space Transportation; Evaluation Criteria for Issuance of Vehicle Safety Approval for the COMET Reentry Vehicle System

AGENCY: Office of the Secretary, Office of Commercial Space Transportation, DOT.

ACTION: Notice.

SUMMARY: Pursuant to the Commercial Space Launch Act of 1984, as amended, and the Commercial Space Transportation Licensing Regulations (the regulations), the Department of Transportation (the Department) is evaluating a proposed commercial reentry vehicle system in order to determine whether a vehicle safety approval may be issued. The Department is undertaking this evaluation as part of the first application for a launch license to conduct commercial reentry operations. The purpose of this Notice is to describe the Department's approach to assessing the safety and reliability of the reentry vehicle system, as part of the Safety Review required under the regulations to support a licensing determination.

FOR FURTHER INFORMATION CONTACT: Norman C. Bowles, Associate Director for Licensing Programs Division, Office of Commercial Space Transportation, U.S. Department of Transportation, 400 Seventh Street SW., Washington, DC 20590 (202) 366-2929.

SUPPLEMENTARY INFORMATION:

Background

Under the Commercial Space Launch Act of 1984, as amended, 49 U.S.C. app. 2601-2623 (the Act), the Department of Transportation (the Department) is authorized to license and otherwise regulate commercial space launch activities. In carrying out the Department's regulatory authority, the Secretary of Transportation is responsible for facilitating and promoting commercial space launches and protecting the public health and safety, safety of property, and national security and foreign policy interests of the United States (49 U.S.C. app. 2601). The Department exercises this authority through the Office of Commercial Space Transportation (OCST or the Office).

OCST's Licensing Process

Under the Commercial Space Transportation Licensing Regulations (the regulations) promulgated pursuant to the Act (49 CFR chapter III), a prospective launch licensee's proposal must undergo a Mission Review and Safety Review, and be granted an approval for each. Mission Review is "the procedure for identifying significant issues affecting United States national interests and international obligations that may be associated with a proposed launch" and includes the payload to be launched (49 CFR 415.21). Safety Review is "the procedure for determining whether an applicant can safely conduct the preparation and launch of the proposed launch vehicle and any payload." (49 CFR 415.11) Mission and safety approval determinations are incorporated into and made part of the licensing record.

The Safety Review process focuses on an applicant's safety operations generally. Included in the review process, among other things, are the proposed launch site; user and range operator procedures for control of pre-launch and launch hazards to the public, trajectory flight safety analysis, and safe flight operations; personnel qualifications; and equipment, instrumentation, and vehicle safety systems (49 CFR 415.11). The burden is on the applicant to demonstrate that it fully understands the public safety hazards associated with its proposed launch activity and that its procedures, personnel, and equipment are adequate and appropriate to support safe operations.

The Office approaches license applications on a case-by-case basis in evaluating proposed launch activities under the Office's licensing authority. Under this approach, any public safety-related issues must be reviewed and evaluated to determine whether the launch can be conducted safely by the applicant. Thus, the Office retains the flexibility necessary to accommodate the various launch proposals presented for licensing while carrying out its mandate of assuring that any matters that may affect public safety are adequately addressed.

The COMET Program

Through the COMmercial Experiment Transporter or COMET Program, Space Industries, Inc. (Space Industries) and Westinghouse Electric Corporation (Westinghouse) are each under contract with the Centers for the Commercial Development of Space (CCDS) to provide the services of a reentry vehicle system to carry and return to earth experimental payloads.[1] Presently, the COMET Program calls for three reentry missions with a possibility of two more.

The reentry vehicle system, known as the FreeFlyer, is comprised of a service module, manufactured by Westinghouse, and a reentry vehicle, manufactured by Space Industries. Operation of both components of the reentry vehicle system has a potentially significant impact on public safety.

Under another contract between the CCDS and a commercial launch operator, the FreeFlyer will be launched to low earth orbit using a Conestoga launch vehicle. The launch will be separately licensed by the Office and will be conducted from Wallops Flight Facility, Virginia. After delivery on orbit, the FreeFlyer will be operated by Space Industries.

The FreeFlyer will remain in low earth orbit for a period of approximately 30 days to permit the conduct of long duration microgravity experiments. At the end of this period, and upon command from Space Industries' ground personnel, the reentry vehicle will separate from the service module. Once the reentry vehicle has separated and moved away from the service module, a propulsion system built into the reentry vehicle will be activated and the reentry vehicle will be launched on a suborbital trajectory for its return to earth. At present, the designated landing site for

[1] The CCDS, which promote commercial space research in the private sector, are sponsored jointly by the National Aeronautics and Space Administration's (NASA) Office of Commercial Programs, the academic community, industry, and other state and federal government agencies.

the reentry vehicle is the Utah Test and Training Range, a U.S. Government facility located in a sparsely populated area of Utah.[2] The service module is not designed to reenter with the reentry vehicle and will remain operational for approximately 100 days or more on orbit continuing to support microgravity experiments. Subject to any control exercised by the operator, Space Industries, the service module's orbit will eventually decay to a point where it will reenter the earth's atmosphere and burn up during reentry.

COMET Reentry Vehicle Safety Approval

The launch of a reentry vehicle initiating its return to earth is a suborbital launch subject to the Department's licensing authority. In launches from earth to space utilizing unmanned expendable launch vehicle (ELV) systems, launch safety is typically provided by range safety personnel monitoring the launch, as well as safety systems, such as flight termination systems, built into the vehicle.[3] Because these safety systems are intended to assure that the public will not be exposed to hazards resulting from a launch, there has been no need for the Office to assess independently vehicle design, manufacture, and performance. In contrast to most of the commercial launches licensed to date, the COMET reentry vehicle system, or FreeFlyer, will not rely upon a flight termination system as a primary mechanism for protecting public safety because destruction of the vehicle during reentry, possibly over populated areas, could present safety hazards. Accordingly, the reliability and performance of the reentry vehicle system are highly significant from a public safety perspective.

As part of the licensing Safety Review process described above, Space Industries has applied for vehicle safety approval of the FreeFlyer. The vehicle safety review process is intended to assess the safety of the reentry vehicle system when operated in accordance with certain operating limits. Accordingly, the review encompasses the vehicle's design, engineering analyses, testing, manufacture, and maintenance. The Office commenced the vehicle safety review process during the initial design stage of the reentry vehicle system and will continue the process through the vehicle's operational development.

Vehicle safety approval will be subject to, among other things, demonstration by Space Industries that the integrated reentry vehicle system can be operated safely and reliably. Absent this demonstration, the FreeFlyer will not be approved by the Office. Subject to OCST approval, Space Industries may select the methodology it will use, as part of its vehicle safety demonstration, to identify and address potential hazards and risks to public safety posed by the reentry vehicle system and associated operating system components. As the applicant for vehicle safety approval, Space Industries must address, among other things, engineering and safety analyses, component system tests and checkouts, quality assurance procedures, manufacturing processes, and test plans and results. It must also demonstrate the adequacy and validity of the methodological approaches selected for each of the foregoing as part of its demonstration of the safe operating limits of the reentry vehicle system.

The vehicle safety approval, if issued by the Office, will be limited to the precise design and operating limits presented by Space Industries in its application and considered by the Office in making its determination. Thus, following issuance of the vehicle safety approval and prior to launch, any change proposed by Space Industries in the operation, design or construction of any part of the reentry vehicle system or any of its safety systems must be presented to the Office and is subject to risk analysis, hazard identification, evaluation, and approval. The vehicle safety approval would then be reissued to reflect the approved changes. In addition, the Office may impose conditions on the vehicle safety approval as necessary to protect public safety. The Office's determination will become part of the record used to support the licensing action (49 CFR 415.7, 415.15, and 415.17).[4]

The Office will also conduct an independent evaluation of the reliability and design performance of the reentry vehicle system as they relate to public safety, based upon design information provided by Space Industries. This independent evaluation serves several purposes, including: (1) Providing a means of ensuring that all risks and hazards have been identified by the applicant, Space Industries, and adequately addressed; and (2) providing technical verification of the applicant's analysis of the reliability of the reentry vehicle system.

Under its contract with the CCDS, Space Industries is responsible for obtaining authorization from DOT to launch the reentry vehicle for its return to the designated landing site on earth. Upon receipt of a completed license application from Space Industries, the Office will conduct the licensing Safety and Mission Reviews required under the regulations. Space Industries, as the launch license applicant, will be required to demonstrate, among other things, that it is capable of operating the system safely. Such safety issues as orbital safety will also be addressed during the licensing Safety Review. Because the Office's vehicle safety approval determination is part of the record on which the licensing Safety Review is conducted, absent any changes to the reentry vehicle system, the vehicle safety approval need not be reconsidered.

Vehicle Safety Approval Criteria

In order to obtain a vehicle safety approval from the Office, an applicant must demonstrate that its vehicle can be operated safely. In fulfilling its statutory mandate to protect public safety, the Office has selected three criteria against which the integrated COMET reentry vehicle system, or FreeFlyer, will be evaluated prior to issuing a vehicle safety approval.

The criteria are designed to assess the capability of the COMET reentry vehicle system as it relates to public safety. As noted above, a separate review of the operation of the reentry vehicle system, including safety policies, procedures, personnel, and other equipment, will be conducted upon submission by Space Industries of a completed launch license application.

[2] On August 22, 1991, OCST published in the **Federal Register** a notice of its intent to prepare a programmatic environmental impact statement (EIS) for commercial reentry vehicle programs, and invited public comment (56 FR 41716). In addition, OCST will be involved in developing a site-specific environmental assessment of the COMET reentry vehicle launches.

[3] Until COMET, all license applications submitted to the Office have sought authorization to conduct the launch of an ELV from earth to space.

[4] As noted above, the COMET Program consists of three reentry missions with a possibility of two additional missions. Because the vehicle safety approval for the FreeFlyer would be issued by the Office as part of a specific launch licensing determination on a case-by-case basis, it would be granted subject to review and reissuance by the Office in authorizing each COMET reentry mission. The Office will consider all available data in determining whether the vehicle safety approval may be reissued, including the vehicle's performance and whether Space Industries' demonstration of safety and reliability has been validated by actual flight data. Additionally, following the first COMET mission, any proposed changes to the reentry vehicle system, such as a difference in design or operating characteristics, would be subject to the vehicle safety approval process and may warrant the imposition of additional conditions.

The evaluation criteria are performance-based, rather than design standards, because the Office believes that performance-based criteria allow the maximum flexibility in developing a safe and cost-effective product. The Office further believes that performance-based criteria enhance the public interest by encouraging innovation and technology development. This environment promotes safe space transportation services at lower cost and helps assure that customers' needs are addressed.

The three criteria applicable to the COMET reentry vehicle system, all of which must be satisfied, are as follows:

1. The probability of the reentry vehicle landing outside the designated landing site shall not be greater than three in one thousand missions.

2. The additional risks to the public in the immediate vicinity of the landing site (i.e., the area within 100 miles of the designated landing site) shall not exceed the normal background risks to which those individuals would ordinarily be exposed but for the reentry missions. This normal background risk is characterized as: the probability of any casualty occurring within the 100-mile zone shall not exceed one in a million on an annual basis. In addition, the probability of any casualty occurring within the zone shall not exceed one in a million for a single mission.

3. The additional risks to the general public beyond the 100-mile zone around the designed landing site, and to property on orbit, shall not exceed normal background risks to which the public would ordinarily be exposed but for the reentry missions. This normal background risk is characterized as: The probability of any casualty occurring shall not exceed one in a million on an annual basis. In addition, the probability of any casualty occurring in the area that is both outside of the designated landing site and the 100-mile zone around the site shall not exceed one in a million for a single mission.

Supporting rationale for the criteria and thresholds selected.

The criteria selected acknowledge that some hazards, and therefore risks, accompany the proposed reentry activity. The criteria reflect those hazards reduced to acceptable levels of risk. Accordingly, the three criteria correspond to the following separate, but interrelated safety objectives:

1. Assuring that reentry vehicles land within the designated landing site. The Office believes that public acceptance of commercial space transportation depends upon the reliable, accurate and incident-free conduct of such activities. By requiring that all landings of the reentry vehicle be incident-free, the Office intends that there be no unplanned landing outside of the designated area that could affect public safety. Criterion 1 is thus intended to ensure that virtually all landings occur within a controlled area, the designated landing site, where safety measures are in place and public exposure greatly minimized.

The threshold value of Criterion 1, a three in 1,000 probability of an off-site landing, is based upon the three-sigma dispersion standard commonly used by government and industry for comparably or similarly hazardous activities. The Office has selected this value as a means of ensuring the precision of reentry accuracy.

Criterion 1 assumes nominal pre-launch conditions and addresses factors that affect the accuracy of the vehicle after the command to initiate reentry is issued. Such factors include, but are not limited to, weather and atmospheric density, design tolerances of components related to reentry, and undetected system failures as of initiation of reentry. Abnormal circumstances, such as a system failure, which prevent or preclude the reentry vehicle from operating as intended are accounted for under Criterion 3.

2. Limiting risks to the public within close proximity of the designated landing site. Certain individuals, such as those living immediately adjacent or in close proximity to the designated landing site, are likely to have greater concerns about the proposed reentry activities and believe they hold a greater stake in the safe conduct of such activities than the general public. The Office believes that these concerns should be addressed directly by the evaluation criteria in order to promote the confidence of that segment of the population that is potentially most affected by reentry activities. Criterion 2 reflects the Office's view that the risks to this population segment should not exceed the level of background risks to which they are ordinarily exposed in daily life. In other words, those people living closest to the designated landing site should not be exposed to significant additional risks as a result of the conduct of reentry activities. This criterion would become most relevant in the event of a system error or failure that causes a deviation from the vehicle's planned trajacetory.

The Office has compared the risk threshold established under Criterion 2—the probability of a casualty occurring within a 100-mile radius of the landing site shall not be greater than one in a million on an annual basis and for any single mission—to the risks individuals confront daily or when performing routine activities and determined that the threshold value for Criterion 2 is sufficiently conservative to ensure that the risks to the public residing in the vicinity of the designated landing site as a result of reentry activities are not greater than and are comparable to their usual background risks.

3. Limiting risks to all persons, wherever situated, arising from commercial reentry launch activities. The threshold value of Criterion 3 is equivalent to that of Criterion 2. The Office believes that the general public should not be exposed to significant additional risks as a result of the conduct of commercial reentry activities. Criterion 3 is intended to ensure this result.

Under Criterion 3, the level of risk presented by commercial reentry activities should not exceed the level of background risks to which the public is ordinarily exposed. Thus, the same background risk rationale employed by the Office in selecting the Criterion 2 threshold value is equally applicable to Criterion 3. The two populations are addressed separately by the evaluation criteria because the risks to the public residing within 100 miles of the designated landing site would most likely be attributable to a system error or failure that affects the accuracy of the reentry vehicle. Risks to the general public would be attributable to a major system failure such that the landing site for the reentry vehicle is essentially random. Accordingly, the potential hazards to the two populations must be analyzed separately.

The criteria selected by the Office for evaluating the COMET reentry vehicle system are intended to result in the same level of public safety, regardless of the number of missions conducted under the COMET Program. Thus, the evaluation criteria, which address risk probability on both an annualized and per mission basis, become more stringent as the frequency of COMET missions increases. Under these evaluation criteria, the risks to the public cannot increase as the number of reentry missions conducted increases. Accordingly, the Office believes the three evaluation criteria presented herein are appropriate for evaluating the COMET reentry vehicle system from a public safety standpoint.

Issued in Washington, DC, this 17th day of March, 1992.

Stephanie E. Myers,

Director, Office of Commercial Space Transportation.

BILLING CODE 4910-62-M

DEPARTMENT OF VETERANS AFFAIRS

Loan Guaranty; Percentage To Determine Net Value

AGENCY: Veterans Benefits Administration.

ACTION: Notice.

SUMMARY: This notice provides information to participants in the Department of Veterans Affairs (VA) loan guaranty program concerning the percentage to be used in determining whether the Secretarty will accept conveyance of a foreclosed property. The percentage applicable for Fiscal Year 1992 is 10.94 percent.

EFFECTIVE DATE: This notice is effective March 24, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Leonard A. Levy, Assistant Director for Loan Management (261), Loan Guaranty Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. (202) 233-3668.

SUPPLEMENTARY INFORMATION: VA regulations concerning the payment of loan guaranty claims are set forth at 38 CFR 36.4300, et seq. The formulas for determining whether VA will offer the lender an election to convey the property to VA are set forth at 38 CFR 36.4320. A key component of this is the "net value" of the property to the Government, as defined in 38 CFR 36.4301.

Essentially, "net value" is the fair market value of the property, minus the total of the costs the Secretary estimates would be incurred by VA resulting from the acquisition and disposition of the property for property taxes, assessments, liens, property maintenance, property improvement, administration and resale. Each year VA reviews the average operating expenses incurred for properties acquired under 38 CFR 36.4320 which were sold during the preceding three fiscal years and the average administrative cost to the government associated with the property management activity. VA annually updates the "net value" percentage and publishes a notice of the new percentage in the **Federal Register**. For Fiscal Year 1991, the percentage was 10.19 percent. For Fiscal Year 1992, the percentage will be 10.94 percent, based upon the operating expenses incurred for Fiscal Years 1989, 1990 and 1991. Accordingly, VA will subtract 10.94 percent from the fair market value of the property to be liquidated in order to arrive at the "net value" of the property to VA. This new percentage will be used in "net value" calculations made by VA on or after March 24, 1992.

Approved: March 16, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Sunshine Act Meetings

Federal Register

Vol. 57, No. 57

Tuesday, March 24, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

Notice of Close Meeting

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 552b:

DATE AND TIME: March 25, 1992, 9:00 a.m.

PLACE: 825 North Capitol Street, N.E., Room 9306, Washington, D.C. 20426.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Arizona Corporation Commission v. El Paso Natural Gas Company Docket Nos. CP91-151-000, *et al.*

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208-0400.

Dated: March 18, 1992.

Lois D. Cashell,

Secretary.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 12:00 noon, Monday, March 30, 1992.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED

1. Consideration of office space options for the Federal Reserve Board.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 20, 1992.

Jennifer J. Johnson,
Associate Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [57 FR 9153 March 16, 1992]

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Thursday, March 12, 1992.

CHANGE IN THE MEETING: Additional items.

The following additional items were considered at a closed meeting on Tuesday, March 17, 1992, at 2:30 p.m.

Regulatory matter bearing enforcement implications.

Formal order of investigation.

Commissioner Roberts, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jonathan Gottlieb at (202) 272-2200.

Dated: March 18, 1992.

Jonathan G. Katz,

Secretary.

Corrections

Federal Register

Vol. 57, No. 57

Tuesday, March 24, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

[Social Security Ruling SSR 91-8p]

Evaluation of Human Immunodeficiency Virus Infection

Correction

In notice document 92-30032 beginning on page 65498 in the issue of Tuesday, December 17, 1991, make the following corrections:

1. On page 65498, in the subject heading, the docket number should read as set forth above.

2. On the same page, in the first column, in the **SUMMARY:**, in the fourth line, "91-8P" should read "91-8p".

3. On page 65499, in the third column, in the third paragraph, in the first line, insert "a" after "as".

4. On the same page, in the same column, in the fifth paragraph, in the fifth line, replace the period with a colon; and "Activities" should read "activities".

5. On page 65500, in the first column, in the first line, "selfcare" should read "self-care".

6. On the same page, in the first full paragraph, the last sentence was incomplete. It should read as follows:

"These restrictions could also result from HIV or treatment-induced fatigue or other symptoms or could result from a pattern of exacerbation and remission caused by the illness itself or its treatment."

7. On page 65501, in the second column, between paragraphs 4. and 5. and 6. and 7., insert the heading "*Or*".

8. On the same page, in the third column, between paragraphs 11. and 12., insert the heading "*Or*".

9. On page 65502, in the first column, between paragraphs (11) and d., replace "Or" with "and".

10. On the same page, in the same column, in paragraph d. (1) "market" should read "marked".

11. On the same page, in the same column, in paragraph d. (4) insert "of" after "loss".

12. On the same page, in the second column, paragraph 1 a. should read "A serum specimen that contains HIV antigen; or".

13. On the same page, in the same column, in paragraph 2. c., in the second line, the abbreviation "PRC" should read "PCR".

14. On the same page, in the same column, in paragraph 2. d., in the second line, insert "or" after "than".

15. On the same page, in the third column, in the first full paragraph, in the fifth line, "disease" should read "diseases".

16. On the same page, in the same column, in the fifth full paragraph, in the fourth line, replace the colon with a semicolon.

17. On page 65503, in the second column, in the 1st full paragraph, in the 12th line, "development" should read "developmental".

18. On page 65504, in the second column, in paragraph 10., in the fourth line, "neurological" should read "neurologic".

19. On the same page, in the third column, the first full paragraph should be designated "11.".

March 24, 1992

Part II

Postal Service

39 CFR Part 111
Preparation of Penalty Mail; Proposed Rule

POSTAL SERVICE

39 CFR Part 111

Preparation of Penalty Mail

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The Postal Service proposes revising Domestic Mail Manual sections 137.2 through 137.5 to eliminate sampling as a method of determining equivalent postage for Federal Government penalty mail and to require use of "direct accountability" methods to provide actual, verifiable records of postage use for all penalty mail. This revision also eliminates the "standard penalty indicia" currently used for penalty mail that must be sampled or otherwise counted by the sending agency. Minor editorial revisions have also been proposed in a number of sections.

DATES: Comments on this proposal must be submitted on or before May 26, 1992.

ADDRESSES: Mail or deliver written comments to the General Manager, Official & International Mail Accounting Division, U.S. Postal Service, 475 L'Enfant Plaza SW., room 8800, Washington, DC 20260–5230. Copies of written comments received will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, at the above address.

FOR ADDITIONAL INFORMATION CONTACT: Thomas E. Dale, Jr. (202) 268–3332.

SUPPLEMENTARY INFORMATION: Penalty mail is official mail, other than franked mail sent by Members of Congress and others specified by statute, which is authorized by law to be transmitted in the mail without prepayment of postage. 39 United States Code (U.S.C.) 3201(1). By law, Federal agencies authorized to use penalty mail must pay the Postal Service "the equivalent amount of postage due, as determined by the Postal Service, for matter sent in the mails by or to them as penalty mail * * *" 39 U.S.C. 3206(a). Equivalent postage is the amount an agency would pay if it were prepaying its postage as other Postal Service customers do. Agencies reimburse the Postal Service in excess of $900 million annually for the use of penalty mail.

These statutory provisions do not prescribe the means by which "equivalent postage" is to be determined. In accordance with its statutory duties and responsibilities, the Postal Service currently authorizes four methods for determining the postage incurred by users of penalty mail. See 39 U.S.C. 403(c), 404(a)(2), 404(a)(4), 2601, and 3201–3209.

1. *Direct Accountability.* This method uses a variety of mailing systems and procedures that provide verifiable records of postage either on each mailpiece or separate documentation generated and verified at the time of mailing or delivery. These methods include the penalty mail versions of the mailing systems used by other mailers, e.g., postage meters, stamps, permit imprint, and Business Reply Mail. Unlike the versions of these systems used by other mailers, the penalty mail versions do not require prepayment by cash or check when postage meters are set, stamps are purchased, permit imprint mailings are accepted, or Business Reply Mail is delivered. Instead, agencies are billed for these activities based on transaction data input into the Official Mail Accounting System (OMAS). Currently, 105 agencies use direct accountability as the basis to pay their total postage bill. In addition, the Postal Service requires direct accountability for all agencies when mailings are made at discount rates or by an agency contractor and when an agency wishes to pay postage for a response by using reply mail. Approximately 63 percent of all penalty mail revenue in FY 1991 was determined by direct accountability.

2. *Agency Sampling.* This method requires agencies (1) to count all routine administrative mail for 4 weeks during the year on dates specified by the Postal Service or use other sampling procedures approved by the Postal Service; (2) to maintain daily records of volume and postage throughout the year for other categories of mail such as those using a mailing list with 50 or more addresses, large mailings not made on a daily basis, international mail, and certain special services; and (3) to use direct accountability methods for discount rate mailings, all mailings made by a contractor for the agency, and reply mail. The sample data is adjusted to represent a full year and added to the annual totals of the actual count mailings and direct accountability charges from OMAS to determine total postage due. Postage for 112 agencies is determined by agency sampling. All agencies using this method of sampling are required to use the standard penalty indicia format (as shown in Exhibit 137.272a(1) of the Domestic Mail Manual) on their mail.

3. *Postal Service Sampling.* This method requires the Postal Service to determine equivalent postage through a sampling system used to determine revenue, volume, and weight of all mail by classification. The Postal Service randomly samples standard penalty indicia mail (i.e., mail on which postage cannot be assessed by methods of direct accountability) using a sampling code on envelopes and labels to identify the sending agency. Estimates from this system are developed quarterly for each agency and are used to bill certain agencies for their standard indicia mail. Charges for direct accountability mailings by these agencies are based on data from OMAS. Five agencies are billed based on Postal Service sampling. All agencies using this method of sampling are required to use the standard penalty indicia format (as shown in exhibit 137.272a(1) of the Domestic Mail Manual) on their mail.

4. *Inventory Accounting System.* This method determines equivalent postage through inventory accounting that requires the agency to establish a system for charging postage on envelopes and labels when issued to each using office. System controls, rates to be charged, and procedures for crediting unused envelopes and labels must be approved by the Postal Service. Postage for mailings requiring direct accountability is determined from billings generated by OMAS. Two agencies are currently using envelope inventory systems. All agencies using this method of sampling are required to use the standard penalty indicia format (as shown in exhibit 137.272a(1) of the Domestic Mail Manual) on their mail.

The Postal Service proposes to require the use of direct accountability methods for all penalty mail no later than October 1, 1992, in order to ensure accurate and timely collection of postage for penalty mail of authorized Federal agencies. This action will eliminate methods 2, 3, and 4 described above for determining equivalent postage. As a result of this action, the option to utilize the standard penalty indicia format will be eliminated since postage on such mailpieces can be assessed only through sampling. The reasons for this action are summarized below:

1. *Greater accuracy.* Sampling, even if well designed for the application being measured, typically produces estimates that vary from the true value by five percent or more. However, the procedures used for sampling penalty mail are not designed to provide a high level of precision. This results in estimates that may vary substantially from the correct equivalent postage.

In addition, the Postal Service has found that numerous errors occur in the implementation of sampling procedures. Frequent problems noted during audits of agency records include reporting of identical mailing data for consecutive

years, duplicate reporting of sample results, failure to record required information, extremely large variations in sampled mail volume from period to period, failure to sample all mailing locations, mathematical errors in computing sample results, and failure to maintain records for audit. Many of these problems also apply to envelope inventory systems. The Postal Service bills agencies for an additional $5 to $6 million per year for correction of mathematical errors and omission of reportable items noted during audits. The actual amount by which agencies underestimate postage is significantly higher. However, audits cannot detect many errors, particularly misclassification of mail and erroneous counts or "guesses" during the sample periods.

Based on experience over a number of years, the Postal Service concludes that sampling systems for assessing postage on penalty mail are inherently inaccurate. They are, therefore, unacceptable for determining reimbursement in excess of $350 million annually. Development and operation of a properly designed sampling system for penalty mail to correct these problems is not considered feasible and, in any case, would be prohibitively expensive.

While direct accountability methods are not error free, they provide two important features not available in sampling that are common to other commercial and government financial systems: (1) Verification of accurate compensation by both the agencies and the Postal Service at the time service is provided; and (2) an audit trail that permits both parties to verify postage charges for these services. These essential features are available for penalty mail only when postage is paid by one of the direct accountability methods.

2. *Timely account settlement and management information.* Effective management of any program requires that financial data be timely and accurate. For penalty mail, timeliness and accuracy are rare when sampling and envelope inventory systems are used. Agencies, which make provisional payments during a fiscal year based upon estimates, generally do not know their actual postage expenses as a fiscal year progresses. Final costs are usually not known until at least 6 to 12 months after a year ends. In some cases, final postage expenses may not be known for as long as 3 years.

These delays are caused by two factors that characterize penalty mail sampling and envelope inventory systems: (1) Late submission of sampling results; and (2) required Postal Service audit. For example, over 80 percent of agencies using sampling or envelope inventory systems did not submit their FY 1990 annual documentation to the Postal Service by the required date (December 31 following the close of the fiscal year). Seventeen agencies were more than 6 months late. Recently, there have been instances where the submission of sampling results has been as much as 3 years late. Once received, a Postal Service audit and final settlement may take another 6 months to 1 year, depending upon the extent of the audit and the condition of supporting records.

These delays, in addition to their adverse impact upon the Postal Service's ability to effectively manage the agency penalty mail programs, make it difficult to obtain timely payment of the legal amount of postage. Late settlements can result in substantial additional billings, with the possibility of over-expenditure of appropriated funds. Refunds returned to the agency may also be delayed, with the likelihood that the agency is unable to use the returned funds. These final adjustments have been as high as $9 million for a single agency and averaged 0.5 percent of provisional payments in FY 1989. These adjustments adversely impact the agency budgeting process and Postal Service revenue forecasting. Realistic postage estimates for future years are not possible if the actual postage costs for prior years are unknown. This causes inaccurate yearly estimates, which lead to a future cycle of substantial additional billings or refunds. Thus, when delays in final settlement continue, these problems can be perpetuated for many years. For example, one agency overpaid the Postal Service by amounts ranging from $7.4 to $8.9 million per year for 3 years because delayed settlements failed to disclose significant changes in its annual usage of mail.

In contrast, direct accountability provides data for actual postage costs to agencies on a quarterly basis, permitting them to monitor their penalty mail expense during the year and to adjust provisional payments as necessary. It also provides timely final billings for a fiscal year. For FY 1991, fourth quarter data for agencies on total direct accountability was available in late October 1991, and final bills for these agencies were mailed during November. The comparison with performance for sampling agencies described earlier is significant. With changes the Postal Service is currently developing to produce accurate financial data at the time of the transaction, the Postal Service expects further improvements in the timeliness of billing statements to agencies using direct accountability methods of postage payment.

3. *Less employee confusion.* Some agencies have totally converted to direct accountability, and others use a combination of direct accountability and sampling. Both agency and Postal Service employees, however, are often confused by the requirements for penalty mail because of these multiple and mixed systems. This confusion sometimes causes Postal Service employees to misinform agencies or agency employees about correct mailing procedures. This has led to delays in the delivery of mail or other service problems. In addition, some employees of both the Postal Service and agencies continue to believe the "standard penalty indicia" used with sampling and inventory systems are free because they see no evidence that postage is paid. Consequently, they may not give the mail the service it should have or properly consider the financial consequences of using a particular service.

The use of the direct accountability methods by all agencies will eliminate this confusion and enable the Postal Service to improve service to all Federal Government customers. As they use direct accountability procedures, agency employees will develop an awareness of actual postage costs and become better able to assist their agencies in efficiently using postal services.

4. *Improved mail management.* Effective mail management benefits the Postal Service and Federal agencies. A primary benefit for the Postal Service is the increased use of discounted services such as presort and barcoding, resulting in more efficient mail handling and delivery. The benefit to the agencies is lower postage bills and improved service. At present, penalty mail users are lagging substantially behind commercial mailers in the use of discounted services. For example, only 18 percent of Official First-Class Mail (other than checks) is presorted compared to 30 percent of First-Class Mail deposited by other Postal Service customers. In fact, use of ZIP+4 and ZIP+4 barcode discounts for penalty mail is minimal among agencies.

This comparatively low use of postage-reducing options by penalty mail users may stem from the centralization of budgeting and accountability of penalty mail expenses at the agency Headquarters level. If the local agency offices where mailings are generated are not held accountable for postage costs, managers do not have an incentive to use discounted rates,

particularly if they are not credited with the savings and their efforts to reduce postage may generate other expenses for which they are accountable. Centralized budgeting and accountability are necessitated, in part, by the lack of timely and reliable data from mailing locations to agency headquarters where penalty mail sampling and envelope inventory systems are used. In short, decentralized budgeting and accountability are not feasible with sampling systems.

Implementation of direct accountability will provide agencies a timely and accurate flow of data on postage charges from OMAS. Data from OMAS will permit agencies to budget and track actual costs to the responsible organization within each agency and to monitor and manage the use of penalty mail. Alternatively, agencies may assign postal budgets to specific mailing units, and use the data from OMAS to track performance. In addition, each mailing location will be able to track its postage costs daily to ensure compliance within budgeted targets. These or similar financial control processes, which are not feasible with sampling, will be facilitated by direct accountability.

The Postal Service recognizes the additional equipment costs for agencies associated with direct accountability, particularly where agencies determine to use postage meters. However, the Postal Service believes the experience of the 105 agencies (47 percent) already totally converted to direct accountability, most on a voluntary basis, clearly illustrates that conversion is a cost-effective investment. For example, one department was able to reduce its total postage bill by over nine percent ($5 million) during a 6 year period through improved mail management and greater use of discounted services that were facilitated by the voluntary introduction of direct accountability.

For these reasons, the Postal Service proposes to eliminate the use of sampling methods, including the use of the standard penalty indicia, for the determination of postage on penalty mail. As specified below, this will result in the elimination of some provisions in section 137.2 to 137.5 of the Domestic Mail Manual; the renumbering of others which will not be revised; and the revision of other sections.

The nature of this revision requires a number of minor editorial changes throughout section 137.2 to 137.5. Primarily, segments dealing exclusively with standard penalty indicia have been eliminated from the Domestic Mail Manual. Their elimination resulted in many of the numbering changes throughout this revision. Also, elimination of the standard penalty indicia requires a small number of new segments instructing agencies in new accountability procedures. Finally, since all agencies will be required to use direct accountability methodology, there have been several minor administrative changes included in the body of this revision.

In summary, the Postal Service believes it is essential to place accountability for penalty mail on a financially responsible basis for all agencies. No other approach is acceptable for a segment of the Federal budget totaling $1 billion annually. The methods the Postal Service proposes have proved themselves in many years of commercial use and with almost half of the Federal agencies now using them exclusively. The benefits include accurate, timely, and verifiable bills and improved mail management for the Federal government.

Although exempt from the notice and comment provisions of the Administrative Procedures Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comments on the following proposed revisions to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR part 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a), 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, and 5001.

2. Part 137 of the Domestic Mail Manual is revised to read as follows:

a. The following sections and exhibits are deleted:

c. The following provisions will be revised as follows:

Part 137 Official Mail

* * * * *

137.2 Penalty Mail—Executive and Judicial Officers

* * * * *

137.22 Collection of Postage and Fees

Agencies must reimburse the Postal Service the equivalent amount of postage and fees due for the penalty mail service they receive. As described in 137.27, matter sent as penalty mail must utilize one of the following means to ensure the accurate assessment of postage: penalty mail postage meters, penalty mail permit imprint and second-class imprint, penalty mail stamps, penalty Business Reply Mail, penalty Merchandise Return, and penalty Express Mail Agency Accounts. Instructions governing the manner of reimbursement for penalty mail service are issued and administered by the General Manager, Official and International Mail Accounting Division (OIMAD), at Postal Service Headquarters. Agencies authorized to use penalty mail and any contractors authorized to mail for them must promptly furnish, in the manner and form requested, all information the General Manager considers necessary to ensure accurate measurement of penalty mail use and adequate budgeting for timely payment.

137.23 Prepayment of Postage and Fees

Agencies may choose to prepay postage by using regular postage stamps, commercial postage meters, or any other mailing methods available to private-sector mailers, in addition to or instead of the procedures described in 137.27. Mail prepaid in this manner is not penalty mail and must not contain the phrase describing the penalty for its unlawful use.

137.24 Eligibility for Penalty Mail Privileges

* * * * *

137.242 Special Users of Penalty Mail

* * * * *

137.242b. State Employment Security Offices

All mail prepared in accordance with 137.273 through 137.276 by state employment security offices cooperating with the U.S. Department of Labor may be sent as penalty mail.

* * * * *

137.25 Authorizations

137.251 General

* * * * *

[Delete 137.251e; renumber current 137.251f–g as 137.251e–f.]

137.252 Agency Authorization Codes, Permit Imprint Numbers and BRM Permit Numbers

Agency Authorization Codes, Permit Imprint Numbers, and BRM Permit Numbers are assigned to authorized penalty mail users by the General Manager, OIMAD. These numbers are valid at any post office, and post offices must not assign local numbers for use on penalty mail. The codes and numbers assigned to each agency authorized to use penalty mail are listed in exhibit 137.251a. (Bold type reflects changes effected since the preceding issue of the Domestic Mail Manual.)

* * * * *

[Delete 137.252d; renumber current 137.252e–f as 137.252d–e.]

* * * * *

137.26 Services, Classes, Rates, and Preparation Requirements

* * * * *

137.262 Forwarding, Return, and Address-Correction Services

Penalty mail on which forwarding, return, or address-correction service has been requested must be given that service and rated for billing of postage due through OMAS. Post offices must provide agencies with a Form 3582–A, as a record of forwarding, return and address correction charges and must report amounts due each accounting period on Form 3638–G. Summary totals are included in quarterly OMAS reports sent to each agency.

137.263 Mail Preparation

137.263a. General

* * * * *

(5) Endorsements. All penalty mail must bear the proper endorsement for the class or rate at which it is mailed. (See the requirements for the individual classes of mail; 121.44, 137.284, and chapter 9 for special service endorsements; and 137.274b for penalty permit imprint endorsements.)

* * * * *

137.263b. Discounted Rate Mailings

(1) Penalty Indicia Formats. Discounted rate mailings sent as penalty mail (mailings of any class entitled to a reduced rate based on presort, automation compatibility, walk-sequencing, or destination entry) must be prepared using either penalty postage meters or penalty permit imprints (see 137.273 and 137.274) or, for second-class mail, the penalty second-class imprint (137.277a).

* * * * *

[Delete 137.263c & 137.263c(1)–(4).]

137.264 Special Services

Penalty mail may be endorsed to indicate a special service and is given the indicated service without prepayment of postage and fees, with the following exceptions:

[Delete 137.264a, b, c, and g; renumber current 137.264d–f and h as 137.264a–d.]

* * * * *

137.265 Shortpaid and Unpaid Mail

The procedures in 146 for handling shortpaid and unpaid mail apply to penalty mail, with the following exceptions:

* * * * *

b. Postage due for shortpaid mail, as well as for unpaid mail received in accordance with 137.4, is charged to the receiving agency through OMAS. Post offices will provide agencies with a Form 3582–A, as a record of postage due mail to be charged and must report amounts due each accounting period on Form 3636–G. Summary totals are included in quarterly OMAS reports sent to each agency.

* * * * *

137.267 Mailing List Services

Agencies may obtain mailing list services outlined in 945 and be billed through OMAS. Charges for these services are reported by the providing office on Form 3638–G and are included in OMAS postage due charges for the quarter the service was provided.

137.27 Penalty Mail Indicia Formats

137.271 General

a. Formats and Methods. There are five separate formats and methods of mailing penalty mail: (1) Penalty postage meters, (2) penalty permit imprint, (3) penalty mail stamps, (4) penalty second-class imprint, and (5) penalty reply mail. In addition, there are special procedures for penalty Express Mail and use of INTELPOST services.

Note: The standard penalty indicia format (see Exhibit 137.271a) is NOT an acceptable

method for mailing penalty mail. If used by penalty mailers, any articles deposited using this format are treated as unpaid mail. Exhibit 137.271a is to be used only as a reference.

[Renumber current exhibit 137.272a(1) as exhibit 137.271a.]

137.271b. Items Carried Outside the U.S. Mail

All penalty mail matter must conform to the requirements described in 137.273 through 137.277. Envelopes and labels prepared according to these requirements may be used only to transmit penalty mail, and must not be used on items carried outside the U.S. Mail, except:

* * * * *

137.271c. Postage Prepaid

Agency mail not sent by penalty methods as provided in 137.273 through 137.277 must have postage prepaid in accordance with 137.23.

[Delete current title of 137.272—"Standard Penalty Indicia". Delete 137.272a; delete 137.272a(1) and 137.272a (2) (a)–(c); delete exhibit 137.272a(2); renumber current exhibits 137.272a (3)–(5) as exhibits 137.272 a–c; delete 137.272b (1)–(4); renumber current 137.272b(5) as 137.272; delete 137.272c and 137.272d.]

137.272 [former 137.272b(5)] Postal Service Mail

Postal Service penalty mail must have preprinted in the upper left corner: (a) the name and complete return address (mailing address, including ZIP+4 Code) of the postal facility, (b) the words "OFFICIAL BUSINESS," and (c) the Postal Service symbol immediately to the left of the return address. In the lower left hand corner, the Olympic rings must appear outside the OCR read area, centered below the horizontal bar of the postal symbol in the upper left hand corner. In the upper right corner, the postal indicium must appear with the penalty statement to its left. A facing identification mark (FIM) pattern B must appear on letter-size mail (see Exhibit 137.272a), except prebarcoded ZIP+4 letter-size mail, which must carry a FIM pattern C (see 137.272c). The Postal Service may distribute penalty envelopes, cards, cartons, and labels preaddressed to the Postal Service for use by persons or organizations from whom or through whom official mail is desired (see 137.272b).

137.273 Penalty Meters

* * * * *

137.273c. Meter Indicium Format

Special penalty mail meter stamp designs prescribed for metered penalty mail in 144.4th must be placed in the upper right corner of the mailpieces. Envelopes used with a penalty postage meter must not contain printing, other than the meter indicium, in the area where the meter stamp will be applied. The complete return address (agency name and mailing address) must appear in the upper left corner of each mailpiece. The preprinted words "Official Business" must appear immediately below the return address.

* * * * *

137.273j. Mailings

Penalty meter imprints should indicate the correct postage, including any applicable special service or surcharge for the class and weight of the mailpiece. Penalty metered mail with insufficient postage imprinted must be handled in accordance with 146.13. If envelopes and labels designed for penalty meter use are found in the mail without a penalty meter stamp, they must be handled in accordance with 146.12.

* * * * *

137.274 Penalty Permit Imprint Mail

137.274a. Application

* * * * *

137.274b. Indicium Retirements

The penalty permit imprint indicium must appear in a rectangular box in the upper right corner of the mailpiece. The penalty permit imprint indicium must include the words "Postage and Fees Paid," the agency name, and the agency's assigned penalty permit imprint number in exhibit 137.251a, or another penalty permit imprint number authorized by the General Manager, OIMAD. The permit number must always be preceded by the letter "G." In addition, the class of mail or appropriate rate endorsement must appear either as the first item within the permit imprint (the preferred position) or immediately below or to the left of the permit imprint. (Rate endorsements for certain rate categories may also appear directly above the top line of the address; see the requirements for the individual classes of mail.) The city of mailing, amount of postage, and weight of the piece may be included within the permit imprint but are not required. First-Class penalty permit imprints may also show the date. Examples of the penalty permit imprint indicium are provided in 145.42 b, c, and d. The complete return address (agency name and mailing address) must appear in the upper left corner. The preprinted words "Official Business" and "Penalty for Private Use, $300" must appear immediately below the return address. The penalty statement must not be handwritten or typewritten.

137.274c. Mailings

* * * * *

137.275 Penalty Mail Stamps

a. Use. Penalty mail stamps may be used by agencies to pay postage where penalty mail meters are not available.

* * * * *

[Delete 137.275c; renumber current 137.275d as 137.275c; renumber current 137.275d (1)–(2) as 137.275c (1)–(2); renumber current exhibits 137.275d(1) and 137.275d(2) as exhibits 137.275c(1) and 137.275c(2).]

137.275c. [Former 137.275d] Format

137.275c(1) [Former 137.275d(1)] Adhesive Stamps

Penalty mail adhesive stamps must be firmly affixed in the upper right corner of the address side of the mailpiece. The complete return address of the Government agency (agency name and mailing address) must appear in the upper left corner of the address side of the mailpiece. The preprinted words "Official Business" must appear immediately below the return address (see exhibit 137.275c(1)).

137.275c(2) [Former 137.275d(2)] Stamped Stationery

The complete return address of the Government agency (agency name and mailing address) must appear in the upper left corner of the address side of the mailpiece. The preprinted words "Official Business" and "Penalty for Private Use $300" must appear immediately below the return address (see exhibit 137.275c(2)).

[Delete current Note immediately after 137.275d(2).]

[Delete 137.275e; renumber current 137.275f as 137.275d; renumber current 137.275f(1)–(6) as 137.275d(1)–(6).]

137.275d. [Former 137.275f] Ordering Procedures

Departments and agencies authorized in Exhibit 137.251a to use penalty mail may order penalty mail stamps as follows:

137.275d(1) [Former 137.275f(1)]

Orders for penalty mail stamp stock other than personalized envelopes must be submitted to the stamp distribution office (SDO) serving the ZIP Code area to which the stamp stock is to be shipped on a properly completed Form 17–G. More specific information on ordering penalty mail stamps is available from Publication 350, *How to Order and Use Penalty Mail Stamps and Postal Stationery.* Orders for personalized envelopes must be submitted on Form 17–J, to the Stamped Envelope Unit, U.S. Postal Service (for address, see address list in Appendices).

[Renumber current 137.275g–i as 137.275e–g.]

* * * * *

137.276 Penalty Reply Mail

a. *Restriction to Approved Formats.* Agencies may distribute penalty envelopes, cards, cartons, or labels to any person, concern, or organization from whom or through whom official matter is desired by:

(1) Using the penalty business reply format provided by 137.276e.

(2) Using the penalty metered reply format provided by 137.276c.

(3) Affixing penalty mail adhesive stamps or using penalty mail stamped stationery as provided in 137.276d.

(4) Using the penalty merchandise return label as provided in 137.276f.

[Delete 137.276a(5); delete 137.276b; renumber current 137.276c as 137.276b; renumber current 137.276d as 137.276c; renumber 137.276e as 137.276d; delete 137.276f; delete 137.276f(1)–(3); renumber current 137.276g as 137.276e.]

137.276e. [Former 137.276g] Penalty Business Reply

[Renumber current 137.276g(1)–(5) as 137.276e(1)–(5); renumber current exhibits 137.276g(2), 137.276g(3)d, and 137.276g(3)(e) as exhibits 137.276e(2), 137.276e(3)(d), and 137.276e(3)(e).]

(1) General

(a) *BRM Account.* The agency indicates it wishes to establish a BRM account at a post office and is billed an annual BRM accounting fee through OMAS. The appropriate postage and a handling fee for each piece of BRM returned is reported by post offices on Form 3630–G, and the agency is billed through OMAS. This option minimizes the postage charges when the returned BRM volume is high and must be used when agencies use the Business Reply Mail Accounting System (BRMAS) as provided in 917.14.

(b) *Postage-Due Account.* When an agency indicates it does not wish to establish a BRM account, payment is handled through a penalty mail postage-due account. In this case, no annual fee is required but a higher handling fee per piece is charged. Postage and a handling fee for each piece of BRM returned is reported on Form 3638–G and the agency is billed through OMAS. This option minimizes the postage charges when lower volumes of BRM are returned.

* * * * *

137.276e(5) [Former 137.276g(5)] Paying BRM Postage and Fees

* * * * *

137.276e(5)(b) [Former 137.276g(5)(b)] Postage-Due Account Option

Under this option, the delivering post office must submit Form 3582–A to serve as a record of postage and fees due for returned BRM. Each accounting period, post offices must report summary postage-due account activity through OMAS. Postage activity under this option is included in a quarterly OMAS report as postage-due charges. It does not appear under BRM postage.

137.276f. [Former 137.276h] Penalty Merchandise Return

* * * * *

(2) Application

* * * * *

137.276f(2)(c) [Former 137.276h(2)(c)]

The agency must renew the license by the expiration date of the permit by providing the post office with a renewal request letter that contains up-to-date local contact information for the agency.

137.276f(3) [Former 137.276h(3)] Label Format

The one-part merchandise return labels available for use by Federal Government agencies must bear the address of one of the authorized agencies listed in exhibit 137.251a or one of their components. See exhibit 137.276f(3)(a) for the format required when no special services are requested or when insurance and/or special handling are requested and exhibit 137.276f(3)(b) when registered service without postal insurance is requested. The label must be printed in the format required by 919.5, with the following exceptions:

[Renumber current exhibits 137.276h(3)(a) and 137.276h(3)(b) as 137.276f(3)(a) and 137.276f(3)(b).]

* * * * *

137.276f(4) [Former 137.276h(4)] Special Services—Insurance

137.276f(4)(a) [Former 137.276h(4)(a)]

Only the permit holder may request that the mailpiece be insured. In order to do so, the permit holder must preprint the endorsement specified in 137.276f(4)(c).

* * * * *

137.276f(4)(c) [Former 137.276h(4)(c)]

The format in exhibit 137.276f(3)(a) must be used for the merchandise return label. To request insurance, the agency must preprint the following endorsement to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement:

Insurance Desired by Permit Holder for $_____ (value)

The value portion of the endorsement ($100 or less) may be handwritten by the permit holder. The permit holder must indicate the specific dollar amount of insurance applicable to the article in the value portion of the endorsement.

137.276f(5) [Former 137.276h(5)] Special Services—Registered Mail

137.276f(5)(a) [Former 137.276h(5)(a)]

Only the permit holder may request registered mail service. In order to do so, the permit holder must preprint the endorsement required in 137.276f(5)(c). Registered mail service may be obtained only on articles returned at First-Class or Priority Mail rates.

137.276f(5)(b) [Former 137.276h(5)(b)]

Only registered mail service without postal insurance is available under penalty mail merchandise return procedures. Agencies desiring to register merchandise return articles with postal insurance must follow the procedures in 919 and pay postage and fees through an advance deposit account.

137.276f(5)(c) [Former 137.276h(5)(c)]

When registered mail service is requested for single-piece First-Class (including Priority) Mail, no other special service may be obtained. The format in exhibit 137.276f(3)(b) must be used for the merchandise return label. The following endorsement must be preprinted to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement:

Registered Mail Service Without Postal Insurance Desired by Permit Holder

137.276f(6) [Former 137.276h(6)] Special Services—Special Handling

Only the permit holder may request that the mailpiece receive special handling. The format in exhibit 137.276f(3)(a) must be used for the merchandise return label. Third- or fourth-class items requiring special handling (see 919.41) must have the following endorsement preprinted or rubber-stamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement:

Special Handling Desired by Permit Holder

137.276f(7) [Former 137.276h(7)]

Combining Special Services. Third- and fourth-class parcels may be insured and receive special handling if the mailer so desires and preprints or rubber-stamps the appropriate endorsements and markings for both special services as required in 137.276f (4) and (6).

137.276f(8) [Former 137.276h(8)] Payment of Postage and Fees

137.276f(8)(a) [Former 137.276h(8)(a)]

Agencies are charged the annual merchandise return permit fee for each post office to which merchandise return matter is returned

137.276f(8)(b) [Former 137.276h(8)(b)]

The amount to be paid for penalty mail merchandise return matter is the appropriate postage for the class of service requested, plus the transaction fee prescribed in 919, for each returned item. The registered fee, special handling fee, or insurance fee is additional, where applicable.

137.276f(8)(c) [Former 137.276h(8)(c)]

Postage and fees, including the annual permit fee, will be billed through OMAS on Form 3639–G.

137.276f(9) [Former 137.276h(9)]

Cancellation of Permit. A permit may be canceled by the General Manager, OIMAD, for any violation of postal regulations, including, but not limited to:

* * * * *

137.276f(9)(c) [Former 137.276h(9)(c)]

Failure to renew permit in accordance with 137.276f(2)(c).

* * * * *

137.277 Procedures for Other Categories of Penalty Mail

a. Penalty Second-Class Mail

* * * * *

137.277b. Penalty Express Mail

Agencies have the same service and contract options as other mailers when sending penalty Express Mail. A description of the available services is contained in chapter 2. The procedures for preparing penalty Express Mail service are explained in Handbook DM–201, Express Mail Service, section 620, Federal Government Agency Use of Express Mail Service. Postmasters should be consulted before the start of service. Express Mail may be sent using penalty postage meters, penalty mail stamps, or Express Mail Agency Accounts. Agencies desiring to use Express Mail Agency Accounts must request authorization from the General Manager, OIMAD.

Note: Agencies may also prepay postage for Express Mail (i.e., not use penalty mail procedures) in accordance with 137.23.

* * * * *

137.28 Contractors

137.281 Reimbursement

Agencies authorized in exhibit 137.251a to use penalty mail may authorize contractors to mail for them and must reimburse the Postal Service for contractor use of penalty mail services. Agencies must promptly furnish, in the manner and form requested, all information concerning contractor use of penalty mail services which the General Manager, OIMAD, considers necessary to ensure accurate reimbursement to the Postal Service.

137.282 Use of Penalty Indicia Formats

Contractor mailings must meet the following requirements:

* * * * *

137.282d. Express Mail must be prepared with penalty postage meters, penalty mail stamps, or Express Mail Agency Accounts as described in 137.277b.

* * * * *

137.4 General Instructions

These instructions apply to all official mail.

137.41 Suspected Improper Use of Official Mail

Except as provided in 115.3 and 137.263b(5), official mail must not be detained, even though there are indications that it is not eligible to be sent as official mail. It must be promptly dispatched and delivered to the addressee. Reports of indicated abuses or questionable use must be submitted to the appropriate rates and classification center. The rates and classification center will refer instances of abuse to the affected agency for investigation and appropriate action.

* * * * *

137.5 Postage-Due Mail for Military Units Engaged in Hostile Operations

* * * * *

137.53 Collection of Postage

During periods authorized in accordance with 137.42, post offices collect postage from the addressee for all mail bearing the special postage-due endorsement in exhibit 137.41. Compute postage due based on the class endorsement on each piece or, if no class endorsement is provided, First-Class rates are charged, except that unendorsed mail weighing 16 ounces or over is treated and charged as fourth-class parcel post. Government agencies using penalty mail are billed for this postage due as described in 137.265b. Other addressees must pay in cash or postage-due advance deposit accounts in accordance with 146.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

Department of Labor

Employment and Training Administration

20 CFR Part 660

Clean Air Transition Assistance Program; Proposed Rule

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR PART 660

RIN 1205-AA92

Clean Air Transition Assistance Program

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration of the Department of Labor is publishing a proposed rule carrying out certain provisions of the Clean Air Act Amendments of 1990 (Act). The Act authorizes the establishment of a Clean Air Employment Transition Assistance program as part of Title III of the Job Training Partnership Act (JTPA). The Secretary of Labor may make grants to States, JTPA substate grantees, employers, employer associations, and representatives of employees to provide retraining, readjustment and employment assistance to eligible employees adversely affected by requirements of the Clean Air Act Amendments. Eligible individuals shall be those employees who have been terminated or laid off or have received a notification of termination or layoff as a consequence of a firm's compliance with the Clean Air Act Amendments of 1990.

DATES: Written comments on the proposed rule are invited. Comments shall only be accepted on those portions of the regulations which would be affected by these changes. Those sections which contain changes and/or new requirements are §§ 660.1, 660.2, 660.110, 660.201, 660.210, 660.211, 660.213, 660.214, 660.215, and 660.230. The balance of the regulations are from part 629, and have been revised only to reflect the stand alone nature of these regulations. The copying of part 629 does not necessarily commit DOL to maintaining those regulations in the future. Comments must be received on or before April 23, 1992.

ADDRESSES: Written comments shall be mailed to the Assistant Secretary for Employment and Training, Department of Labor, room N-4703, 200 Constitution Avenue, NW., Washington, DC 20210, attention: Mr. Robert N. Colombo, Director, Office of Worker Retraining and Adjustment Programs. Commenters wishing acknowledgement of receipt of their comments must submit them by certified mail, return receipt requested.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Director, Office of Worker Retraining and Adjustment Programs, Employment and Training Administration, U.S. Department of Labor, room N-4469, 200 Constitution Avenue, NW., Washington, DC 20210, telephone: (202) 535-0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Introduction

Title XI, section 1101 of the Clean Air Act Amendments of 1990, Public Law 101-549, amends part B of title III of the Job Training Partnership Act (JTPA) (29 U.S.C. 1662-1662c) by adding a new section 326 (29 U.S.C. 1662e). Section 326 provides for a new Clean Air Employment Transition Assistance Program to be funded from funds appropriated specifically for services authorized by title III of JTPA to be provided to eligible individuals as defined by the Clean Air Act Amendments of 1990. See 29 U.S.C. 1662e(h).

Discussion of Proposed Rule

The Department of Labor (Department or DOL) is issuing proposed regulations with a request for comments to implement the Clean Air Employment Transition Assistance provisions of the new JTPA section 326.

These regulations implement the Clean Air Employment Transition Program authorized by section 326 of JTPA. Section 326 is designed to assure the establishment of programs to provide assistance to workers dislocated as a result of a firm's compliance with the Clean Air Act.

Programs shall be established by discretionary grants awarded by the Secretary to eligible grantees. The purpose of these programs is to provide readjustment and retraining assistance to eligible workers to enable such workers to return to the active labor force.

It is important to note that these regulations, to appear at 20 CFR part 660, provide for limited modifications of existing Title III requirements. All such modifications are pursuant to section 326 of JTPA, as added by section 1101 of the Clean Air Act Amendments of 1990. The proposed regulations would provide procedures for the operation of worker adjustment programs. These regulations supercede the guidelines contained in part III A., and C and part IV A. 1. and 2. of the "Application Guidelines for Clean Air Employment Transition Assistance Programs" published in the **Federal Register** on February 7, 1992. A section-by-section description of the proposed regulations follows:

Section 660.1 explains the purpose of part 660.

Section 660.2 establishes definitions which apply only to proposals funded under JTPA section 326. There are seven new definitions. Two new definitions, *industrywide project* and *multistate project*, have been included to establish the uniqueness of certain projects that may be funded under the Clean Air Employment Transition Assistance Program and to distinguish between such projects. A third definition, *family*, establishes a consistent definition of this term for the purpose of subpart I projects, especially multistate and industrywide projects that may not be submitted to the Department through the Governor. A fourth definition, *family income*, recognizes family income as defined by the Clean Air Act Amendments of 1990. The final three definitions, *grantee, contractor,"* and *subcontractor*, establish definitions of certain entities that may receive funds for Clean Air Employment Transition Assistance programs in order to clearly identify what procedures and requirements apply to those entities.

Section 660.101 establishes general program requirements and is consistent with existing JTPA title III requirements.

Section 660.102, prohibits public service employment, and is consistent with existing JTPA title III requirements.

Section 660.103, prohibits discrimination and sectarian activities, and is consistent with existing requirements.

Section 660.104, regarding relocation and displacement, is consistent with the new section 326 statutory requirements.

Section 660.110 establishes the rules for qualifying for and receiving needs-related payments. Eligible participants who meet family income requirements must receive needs-related payments while they are in training if they meet certain conditions and do not qualify for or are no longer eligible for unemployment compensation. Section 326 (c)(2) and (f).

Section 660.111, regarding benefits, and working conditions is consistent with existing JTPA title III requirements.

Section 660.120, regarding grant payments, is consistent with standard discretionary award practices.

Section 660.121, regarding program income, is consistent with existing JTPA title III requirements.

Section 660.122, regarding insurance, is consistent with existing JTPA title III requirements.

Section 660.123, regarding procurement, is consistent with existing JTPA title III requirements.

Section 660.124, regarding management systems, reporting and recordkeeping, is consistent with existing JTPA title III requirements.

Section 660.125, regarding required reports, is consistent with existing title III requirements.

Section 660.126, regarding allocable costs, is consistent with existing JTPA title III requirements.

Section 660.127, regarding classification of costs, is consistent with existing JTPA title III requirements.

Section 660.128, regarding limitations of certain costs, is consistent with existing JTPA title III requirements.

Section 660.129, regarding property management, is consistent with existing JTPA title III requirements.

Section 660.130, regarding audits, is consistent with existing JTPA title III requirements.

Section 660.131, regarding oversight and monitoring, is consistent with existing JTPA title III requirements.

Section 660.132, regarding sanctions, is consistent with the existing JTPA title III requirements.

Section 660.140, regarding the scope and purpose of grievances, investigations, and hearings, is consistent with existing JTPA title III requirements.

Section 660.141, regarding complaints, investigations, and penalties, is consistent with existing JTPA title III requirements.

Section 660.142, regarding non-criminal grievance procedures at the employer level, is consistent with existing JTPA title III requirements.

Section 660.143, regarding Federal handling of administrative and civil complaints, is consistent with existing JTPA title III requirements.

Section 660.144, regarding Federal handling of complaints, is consistent with existing JTPA title III requirements.

Section 660.145, regarding opportunity for review, is consistent with existing title III requirements.

Section 660.146, regarding Administrative Law judge hearings, is consistent with existing JTPA title III requirements.

Section 660.147, regarding appeals, is consistent with existing JTPA title III requirements.

Section 660.148, regarding other authority, is consistent with existing JTPA title III requirements.

Section 660.201, regarding the basic program purpose of part 660, clarifies that the program is designed to assist workers dislocated as a result of a firm's compliance with the Clean Air Act.

Section 660.202, regarding approved training, is consistent with existing JTPA title III requirements.

Section 660.210 describes the specific eligibility criteria for eligible dislocated workers under JTPA section 326. Such workers, in addition to meeting the basic JTPA title III eligibility criteria, must be dislocated as a result of their employer's compliance with requirements of the Clean Air Act. Such workers are workers who were performing work directly at or for the facility (for instance, a high sulphur coal mine) impacted by and required to lay off workers as a consequence of compliance with the requirements of the Clean Air Act. JTPA section 326(a)(1).

Section 660.211 describes the entities eligible to submit grant proposals under Part 660. Eligible grantees are defined in JTPA section 326(b). Entities which directly receive awards from DOL shall be grantees. Entities receiving funds from grantees shall be contractors. Entities which receive awards from contractors shall be subcontractors.

Section 660.212 describes how the Secretary shall assure that funds are provided for projects to serve dislocated workers in priority areas of service as required by subsection (c) of JTPA section 326.

Section 660.213 establishes allowable services which may be provided in projects funded pursuant to section 326. As set forth at JTPA section 326(d), these services shall be those allowable under JTPA section 314, except for job search, relocation, and needs-related payments. Job search, relocation and needs-related payments shall be allowable as described in the proposed regulations. See JTPA section 326(d) and (i).

Section 660.214, regarding selection of service providers, is consistent with existing JTPA title III requirements.

Section 660.215, regarding certificates of continuing eligibility, explains that eligible grantees may not issue such certificates pursuant to a discretionary grant, since the grant would not be in operation long enough for the grantee to honor such certificates.

Section 660.216, regarding coordination activities, is consistent with existing JTPA title III requirements.

Section 660.230, regarding application procedures, is consistent with the process currently used to announce the application procedures for existing JTPA title III discretionary/national reserve account grants.

Applicability

The provisions of 20 CFR parts 628, 627, 628, 629, 630 and 631 do not apply to Clean Air Employment Transition Assistance programs funded under title III of the Job Training Partnership Act.

Regulatory Impact

The proposed rule implements certain provisions of the Clean Air Act Amendments of 1990. As it would not have the financial or other impact to make it a major rule, preparation of a regulatory impact analysis is unnecessary. See Executive Order No. 12291. 5 U.S.C. 601 note.

The Department of Labor has certified to the Chief Counsel for Advocacy, Small Business Administration, that pursuant to 5 U.S.C. 605(b), the rule would not have a significant economic impact on a substantial number of small entities. No significant economic impact would be imposed by this rule.

Paperwork Reduction Act

The Clean Air Employment Transition Program shall use the same information collection as is currently used for the basic title III program. Pursuant to the Paperwork Reduction, the information collection requirements imposed for this program, have been submitted to the Office of Management and Budget for approval. The estimate reporting burden averages 30 hours 15 minutes per grantee; the estimated total burden is 18,150 hours. Send comments regarding this burden estimate or any other aspect of this collection to Mr. Robert Colombo, Director, Office of Worker Retraining and Adjustment Programs, room N-4703, 200 Constitution Avenue, NW., Washington, DC 20210 and the Office of Management and Budget, Paperwork Reduction Project, (1205-xxxx), Washington, DC 20503.

Catalog of Federal Domestic Assistance Numbers: These programs are listed in the Catalog of Federal Domestic Assistance at No. 17-246, "Employment and Training Assistance—Dislocated Workers" (JTPA Title III Programs); and No. 17-250 "Job Training Partnership Act (JTPA)" (JTPA Titles I and II Programs).

List of Subjects in 20 CFR Part 660

Grants programs, Labor, Dislocated worker programs, Clean Air.

Proposed Rule

Accordingly, it is proposed that chapter V of title 20, Code of Federal Regulations be amended, by adding a new part 660 to read as follows:

PART 660—CLEAN AIR EMPLOYMENT TRANSITION ASSISTANCE

Subpart A—Introduction

Sec.

660.1 Purpose of Part.
660.2 Definitions.

Subpart B—General Requirements

660.101 General program requirements.

660.102 Public service employment prohibition.
660.103 Nondiscrimination and nonsectarian activities.
660.104 Relocation and displacement.

Subpart C—Payments, Benefits and Working Conditions

660.110 Needs-related payments.
660.111 Benefits and working conditions.

Subpart D—Administrative Standards and Procedures

660.120 Grant payments.
660.121 Program income.
660.122 Insurance.
660.123 Procurement.
660.124 Management systems, reporting and recordkeeping.
660.125 Reports required.
660.126 Allowable costs.
660.127 Classification of costs.
660.128 Limitations on certain costs.
660.129 Property management standards.
660.130 Audits.
660.131 Oversight and monitoring.
660.132 Sanctions for violations of the Act.

Subpart E—Grievances, Investigations, and Hearings

660.140 Scope and purpose of this subpart.
660.141 Complaints and grievances.
660.142 Non-criminal grievance procedure at employer level.
660.143 Federal handling of administrative and civil complaints.
660.144 Federal handling of criminal complaints and reports of fraud, abuse and other criminal activity.
660.145 Opportunity for informal review.
660.146 Hearings before the Office of Administrative Law Judges.
660.147 Other authority.

Subpart F—Approved training

660.200 Approved training rule.

Subpart G—Program design requirements

660.210 Participant eligibility.
660.211 Eligible grantees.
660.212 Priority areas of service.
660.213 Allowable activities.
660.214 Selection of service providers.
660.215 Certificates of continuing eligibility.
660.216 Coordination activities.

Subpart H—Application procedures

660.230 Application procedures.

Authority: 29 U.S.C. 1579(a) and 1662e(i).

Subpart A—Introduction

§ 660.1 Purpose of part.

(a) Part 660 establishes regulations for programs under section 328 of title III of the Job Training Partnership Act. The provisions of 20 CFR parts 628, 627, 628, 629, 630 and 631 do not apply to Clean Air Employment Transition Assistance Programs funded under title III of the Job Training Partnership Act.

(b) The programs under part 660 will be financed by a national discretionary fund. Projects will provide a timely response to dislocations caused by the requirements of the Clean Air Act; foster labor, management, community and government partnerships in addressing worker dislocation; emphasize retraining and reemployment services rather than income support; and target funds to priority areas with the greatest number of workers dislocated as a result of a firm's compliance with the Clean Air Act.

(c) Part 660 applies to programs specifically designed to assist workers dislocated as a result of a firm's compliance with the requirements of the Clean Air Act. Such workers also may be eligible for services under other JTPA programs for dislocated workers funded under title III.

(d) General authority for part 660 is found at sections 169(a) and 328(i) of JTPA. Specific statutory authority other than those sections are noted throughout this part.

§ 660.2 Definitions.

In addition to the definitions contained in sections 4 and 301 of the Job Training Partnership Act, the following definitions apply to programs under this part.

(a) *Act* and *JTPA* mean the Job Training Partnership Act.

(b) *Contractor* means any entity which enters into a contract, grant, or financial agreement with a grantee.

(c) *Department* and *DOL* mean the United States Department of Labor.

(d) *Family* means spouses and dependent children residing in the same domicile. An adult handicapped individual shall be considered a family of one for eligibility purposes. (Section 4(8) of the Act.)

(e) *Family income* means all cash income actually received from all sources by all members of the family for the twelve-month (or six-month, annualized, if twelve-month data are not available) period prior to application. When computing family income, income of a spouse and other family members is counted for the portion of the twelve-month (or six-month, annualized, if twelve-month data are not available) period prior to application that the person was actually a member of the family.

(1) For the purpose of determining an individual's eligibility for participation, family income includes:

(i) Gross wages, including wages from community service employment (CSE), work experience, and on-the-job training (OJT) paid from Job Training Partnership Act funds, and salaries (before deductions);

(ii) Net self-employment income (gross receipts minus operating expenses); and

(iii) Other cash income received from sources such as interest, net rents, OASI (Old Age and Survivors Insurance) social security benefits, pensions, alimony, and periodic income from insurance policy annuities, and other sources of income.

(2) Family income does not include:

(i) Non-cash income such as food stamps or compensation received in the form of food or housing;

(ii) Imputed value of owner-occupied property, *i.e.*, rental value;

(iii) Public assistance payments;

(iv) Cash payments received pursuant to a State plan approved under titles I, IV, X, or XVI of the Social Security Act, or disability insurance payments received under Title II of the Social Security Act;

(v) Federal, State, or local unemployment insurance benefits;

(vi) Capital gains and losses;

(vii) One-time unearned income, such as, but not limited to:

(A) Payments received for a limited fixed term under income maintenance programs and supplemental (private) unemployment benefits plans;

(B) One-time or fixed-term scholarship or fellowship grants;

(C) Accident, health, and casualty insurance proceeds;

(D) Disability and death payments, including fixed-term (but not lifetime) life insurance annuities and death benefits;

(E) One-time awards and gifts;

(F) Inheritance, including fixed-term annuities;

(G) Fixed-term workers' compensation awards;

(H) Soil bank payments; and

(I) Agricultural crop stabilization payments;

(viii) Pay or allowances that were previously received by any veteran while serving on active duty in the Armed Forces;

(ix) Educational assistance and compensation payments to veterans and other eligible persons under 38 U.S.C. chapters 11, 13, 31, 34, 35, and 36;

(x) Payments received under the Trade Act of 1974;

(xi) Payments received under the Black Lung Benefits Act (30 U.S.C. 901 *et seq.*);

(xii) Any income directly or indirectly derived from, or arising out of, any property held by the United States in trust for any Indian tribe, band, or group or any individual; per capita payments; and services, compensation or funds provided by the United States in accordance with, or generated by, the exercise of any right guaranteed or protected by treaty; and any property

distributed or income derived therefrom, or any amounts paid to or for the legatees or next of kin of any member, derived from or arising out of the settlement of an Indian claim; and

(xiii) Child support payments.

(f) *Grantee* means an entity which receives a discretionary Clean Air Employment Transition Assistance grant directly from the Secretary.

(g) *Industrywide project* means services and activities provided by a single grantee to serve workers dislocated from at least three different plants or facilities within a single industry in at least two different areas of a single State or two or more different States.

(h) *Multistate project* means services and activities provided in more than one State by a single grantee to serve workers dislocated from one or more plants or facilities representing different industries.

(i) *OALJ* means the Office of the Administrative Law Judge, U.S. DOL.

(j) *Participant* means any individual who has:

(1) Been determined eligible for participation upon intake; and

(2) Started receiving employment, training, or services (except post-termination services) funded under this Part following intake. Individuals who receive only outreach and/or intake and initial assessment services or post-program follow-up are excluded from this definition.

(k) *PIC* means a Private Industry Council(s) established under title I of JTPA.

(l) *Priority area* means:

(1) A geographic area that has or is projected to have workers dislocated as a result of a firm's compliance with the Clean Air Act as determined annually by the Secretary; or

(2) An area that has a significant number of workers that are or are projected to be dislocated as a result of a firm's compliance with the Clean Air Act, as demonstrated to the satisfaction of the Secretary by an eligible grantee.

(m) *Recipient* means a Governor of a State.

(n) *Secretary* means the Secretary of Labor or the Secretary's designated representative(s).

(o) *SDA* means a Service Delivery Area designated under title I of JTPA.

(p) *Subcontractor* means any entity which enters into a contract, grant or financial agreement with a contractor.

(q) *Subrecipient* means any person, organization or other entity which receives JTPA funds either directly or indirectly from a Governor. Depending on local circumstances, the Private Industry Council (PIC), the local elected official, or administrative entity may be a subrecipient. SDA grant recipients and JTPA title III substate area grantees are particular types of subrecipients.

(r) *Substantial layoff* means any reduction-in-force which is not the result of a plant closing and which results in an employment loss at a single site of employment during any 30-day period for:

(1) (i) At least 33 percent of the employees (excluding employees regularly working less than 20 hours per week); and

(ii) At least 50 employees (excluding employees regularly working less than 20 hours per week); or

(2) At least 500 employees (excluding employees regularly working less than 20 hours per week).

(s) *Substate grantee* means the agency or organization selected to administer programs pursuant to section 312(b) of the Act. The substate grantee is the entity that receives JTPA Title III formula funds for a service delivery area directly from a Governor.

Subpart B—General Requirements

§ 660.101 General program requirements.

(a) The conditions prescribed in sections 141 through 171 of the Act apply to all programs under section 328 of the Act, except as provided in the Act.

(b) Grantees shall ensure that an individual enrolled in a JTPA program meets the requirements of section 167(a)(5) of the Act, section 3 of the Military Selective Service Act (50 U.S.C. App. 453) and other requirements applicable to the program funded under the specific section or title of the Act under which the participant is enrolling (JTPA section 604).

(c) Grantees or contractors, as appropriate, shall ensure that individuals are enrolled within the time frame specified in the application or a modification shall be submitted establishing a new time frame and explaining the reason for the delay.

(d) Programs operated under title III of the Act pursuant to a block grant are not subject to the provisions of 29 CFR part 97, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," except as otherwise explicitly provided in this part. See 29 CFR 97.4(a)(2).

§ 660.102 Public service employment prohibition.

No funds available under title III of the Act may be used for public service employment (sections 141(p) and 314(d)(2) of the Act).

§ 660.103 Nondiscrimination and nonsectarian activities.

(a) Grantees, contractors, and subcontractors shall comply with the nondiscrimination provisions of section 167 of the Act.

(b) Pursuant to section 167(a) of the Act, the employment or training of participants in sectarian activities is prohibited.

§ 660.104 Relocation and displacement.

(a) No funds available under title III of the Act may be used to assist in relocating establishments, or parts thereof, from one area to another unless a determination is made by the Secretary that such relocation will not result in an increase in unemployment in the area of original location or in any other area (section 141(c) of the Act).

(b) No currently employed worker shall be displaced (including partial displacement) by any participant.

(c) No participant shall be employed or job opening filled—

(1) When any other individual is on layoff from the same or any substantially equivalent job, or

(2) When an employer has terminated any regular employee or otherwise reduced its workforce with the intention of filling the vacancy so created by hiring a participant whose wages are subsidized by the Act (section 143(b) of the Act).

(d) The Secretary will promptly review and take appropriate action with regard to alleged violations of the provisions of paragraphs (a), (b), and (c) of this section, by either direct investigation as provided for at § 660.143 or through the grantee or contractor, as appropriate.

Subpart C—Payments, Benefits and Working Conditions

§ 660.110 Needs-related payments.

(a) Needs-related payments shall be an allowable cost for Clean Air Employment Transition Assistance programs. An application for funds to assist workers dislocated as a result of a firm's compliance with requirements of the Clean Air Act shall contain assurances that such funds shall be used to provide needs-related payments to eligible participants to enable such participants to participate in and complete training or education programs provided under this part. In developing a budget, applicants must be aware that the funds available for payment of needs-related payments are limited and that, in projecting the use of budget resources, applicants must take into account those persons who will and will

not be eligible for needs-related payments. For those determined to be eligible, sufficient funds must be set aside to cover any anticipated needs-related payments.

(b) To qualify for needs-related payments, the dislocated worker who meets the eligibility criteria under § 660.210 shall receive, or be the member of a family that receives (at the time of eligibility determination), a total family income that, in relation to family size, does not exceed the lower living standard income level as published annually in the **Federal Register** by DOL.

(c) The eligible participant shall not qualify for or must have ceased to qualify for unemployment compensation. An eligible individual who has ceased to qualify for unemployment compensation shall have been enrolled in a training or education program by the end of the thirteenth week of the worker's initial unemployment compensation benefit period, or, if later, by the end of the eighth week after an employee is informed that a short-term layoff will in fact exceed 6 months.

(d) For purposes of paragraph (c) of this section, the term *enrolled in a training or education program* means that the worker's application for training has been approved and the training institution has furnished written notice that the worker has been accepted in the approved training program beginning within 30 calendar days.

(e) An eligible worker who does not qualify for unemployment compensation must be participating in a training or education program (section 314(e)(1) of the Act).

(f) Needs-related payments shall not be provided to any participant where the program operator determines that the participant is not making satisfactory progress in the training program, nor to any participant receiving trade readjustment allowances, on-the-job training, out-of-area job search allowances, or relocation allowances under chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 *et seq.*) or part 617 of this chapter.

(g) The level of needs-related payments to an eligible dislocated worker in programs under this part shall be equal to the higher of:

(1) The applicable level of unemployment compensation (*i.e.*, the average of the weekly compensation payments made to the dislocated worker during the worker's initial unemployment compensation period); or

(2) The poverty level determined in accordance with criteria published by the Department of Health and Human Services.

(h) (1) The weekly payment level shall be determined at the time of the eligible participant's enrollment into training funded under this part, and shall be provided to all eligible participants whose family income meets the requirements of paragraph (f) of this section.

(2) Every three months from the date of the original determination of eligibility for needs-related payments, the family income for any participant participating in a training or education program shall be redetermined. Such a redetermination shall be based on the family income for the previous three month period using the same criteria that were used in the initial determination process, except that any income from needs-related payments shall not be included. The total revised family income so determined shall be annualized to determine the participant's current eligibility for needs-related payments.

(3) Where the revised family income exceeds the lower living standard income level, the eligible participant shall not be eligible for needs-related payments. Where the revised family income does not exceed the lower living standard income level, the eligible participant shall continue to receive or become eligible for needs-related payments.

(4) An eligible participant may qualify or requalify for needs-related payments during the period of the training or education program.

§ 660.111 Benefits and working conditions.

(a) Where a participant in a program under this part is not covered under a State's workers' compensation law, such participant shall be provided with adequate on-site medical and accident insurance as provided at § 660.122(c).

(b) Where a participant in a program under this part is engaged in activities not covered under the Occupational Safety and Health Act of 1970, the participant shall not be required or permitted to work, be trained, or receive services in buildings or surroundings or under working conditions that are unsanitary, hazardous or dangerous to the participant's health or safety. A participant employed or trained for inherently dangerous occupation(s), *e.g.*, fire or police jobs, shall be assigned to work in accordance with reasonable safety practices (section 143(a)(2) of the Act). Income maintenance coverage is not required for such a participant (section 143(a)(3) of the Act).

Subpart D—Administrative Standards and Procedures

§ 660.120 Grant payments.

(a) For approved proposals funded with or through the State where the State is the grantee, grant payments shall be made to the Governor in accordance with section 203 of the Intergovernmental Cooperation Act (42 U.S.C 4213) and Treasury Circular No. 1075 (31 CFR part 205). The Governor shall establish procedures that will minimize the time elapsing between the receipt of funds and disbursement.

(b) For approved proposals funded directly with private for profit and non-profit entities, the grantee shall establish procedures that assure that the methods and procedures for payments shall minimize the time elapsing between the draw-down and disbursement of funds by the grantee, contractor or subcontractor, in accordance with Treasury regulations at 31 CFR Part 205.

(c) Failure by any grantee to establish acceptable procedures or to take action to correct deficiencies in:

(1) Financial management systems, or

(2) Fund draw-down and advance payment procedures, may result in the approved proposals being funded through reimbursement by Treasury check payment.

§ 660.121 Program income.

Income generated under any program under this part shall be used only to further program objectives and may be retained by that program, unless the grant officer requires that such income be returned to the Department.

§ 660.122 Insurance.

(a) General. Each grantee under this part shall follow its normal insurance procedures, except as otherwise indicated in this section.

(b) DOL assumes no liability with respect to bodily injury, illness, or any other damages or losses, or with respect to any claims arising out of any activity under a grant or agreement under this part, whether concerning persons or property in the organization or any third party.

(c) Each grantee under this part shall secure insurance coverage for injuries suffered by participants who are not covered by existing workers' compensation. Contributions to a reserve fund for a self-insurance program, to the extent that the type and extent of coverage and the rates and premiums would have been allowed had insurance been purchased to cover the risks, are allowable and are chargeable to basic readjustment services.

retraining services, or needs-related payments and supportive services for Title III, as appropriate.

§ 660.123 Procurement.

Subject to the provisions of section 107 of the Act, grantees shall administer procurement systems that reflect applicable Federal, State, and local law, rules, and regulations.

§ 660.124 Management systems, reporting and recordkeeping.

(a) The grantee shall ensure that its financial systems provide fiscal control and accounting procedures sufficient to—

(1) Permit preparation of required reports; and

(2) Permit the tracing of funds to a level of expenditure adequate to establish that funds have not been used in violation of the restrictions on the use of such funds.

(b) The financial management system and the participant data system shall provide federally required records and reports that are uniform in definition, accessible to authorized Federal, State and grantee staff as appropriate, and verifiable for monitoring, reporting, audit and evaluation purposes (sections 165(a)(1), 165(a)(2), and 182 of the Act).

(c) Pursuant to section 165(a) of the Act, the grantee shall ensure that records shall be maintained of each participant's enrollment in a program under this part in sufficient detail to demonstrate compliance with the relevant eligibility criteria attending a particular activity and with the restrictions on the provision and duration of services and specific activities authorized by the Act.

(d) The grantee shall ensure that procedures are developed for retention of all records pertinent to all grants and agreements under this part, including financial, statistical, property and participant records and supporting documentation. Records must be retained for two years following the date on which the annual expenditure report containing the final expenditures charged to the grant/agreement is submitted to the Department of Labor. Records for nonexpendable property shall be retained for a period of three years after final disposition of the property.

(e) The grantee shall ensure that the records referenced in paragraphs (a) through (d) of this section shall be retained beyond the prescribed period, if any litigation or audit is begun or if a claim is instituted involving the grant or agreement covered by the records. In these instances, the grantee shall ensure that the records shall be retained until the litigation, audit, or claim has been finally resolved.

(f) In the event of the termination of the relationship with a contractor, the grantee shall be directly responsible for the maintenance and retention of the records of any contractor and subcontractor unable to retain them. Contractors shall be responsible for the records of any subcontractor in the event of the termination of the relationship between a contractor and a subcontractor.

§ 660.125 Reports required.

Grantees shall report to the Grant Officer pursuant to instructions issued by the Secretary. Financial reports identifying accrued expenditures shall be submitted quarterly, and program reports identifying characteristics and outcomes for participants who have left the program shall be submitted annually. Reports shall be submitted to the Grant Officer within 45 calendar days after the end of the report period (section 165(a)(2) of the Act).

§ 660.126 Allowable costs.

(a) Allowable costs will be determined in accordance with the appropriate provisions of the applicable OMB circular.

(b) Generally, to be allowable, a cost shall be necessary and reasonable for proper and efficient administration of the program, be allowable thereto under these principles, and, except as provided herein, not be a general expense required to carry out the overall responsibilities of the grantee. Costs charged to the program shall be consistent with those normally allowed in like circumstances in nonfederally sponsored activities and with applicable Federal, State, and local law, rules or regulations.

(1) Whether a cost shall be charged as a direct cost or as an indirect cost shall be determined in accordance with the Office of Management and Budget (OMB) Circulars identified at 29 CFR 97.22(b).

(2) The following provisions apply to all grants under this part:

(i) Costs resulting from violations of, or failure to comply with, Federal, State or local laws and regulations are not allowable;

(ii) Entertainment costs are not allowable; and

(iii) Insurance policies offering protection against debts established by the Federal Government are not allowable.

(3) The cost of legal expenses required in the administration of grant programs under this part is allowable. Legal services furnished by the chief legal officer or staff of a grantee solely for the purpose of discharging general responsibilities as a legal officer are unallowable. Legal expenses for the prosecution of claims against the Federal Government are unallowable.

(4) Personal liability insurance for PIC members is allowable.

§ 660.127 Classification of costs.

(a)(1) Allowable costs for programs under this part shall be planned, controlled, and charged against the following cost categories:

(i) basic readjustment services;

(ii) retraining services;

(iii) needs-related payments;

(iv) supportive services; and

(v) administration.

Costs shall be reported to the Grant Officer in accordance with reporting requirements established pursuant to § 660.125.

(2) All costs shall be allocated to a particular cost category to the extent that benefits are received by such category. No costs shall be chargeable to a cost category except to the extent that such benefits are received by such category.

(b) Basic readjustment shall include the cost of basic readjustment services described in sections 314(c) and 326(d) of the Act, except that the cost of supportive services under section 326 (e)(2) and (f) of the Act shall be charged to needs-related payments and supportive services as provided for in paragraph (d) of this section.

(c) Retraining shall include the cost of retraining services described in section 314(d) of the Act.

(d) Needs-related payments and supportive services shall include the cost of needs-related payments identified at section 326 (c)(2) and (f) of the Act, and supportive services identified at section 4(24) of the Act and described in section 314(c)(15) of the Act.

(e) Administration shall include the administrative cost of programs under the application approved under this part and shall be that portion of necessary and allowable costs which is not directly related to the provision of services and otherwise allocable to the cost categories in paragraphs (b) through (d) of this section. Administration does not include the cost of activities under section 314(b) of the Act.

(f) Any single cost which is properly chargeable to training and to one or more other cost categories shall be prorated among training and the other appropriate cost categories in

accordance with the benefit received under each cost category.

§ 660.128 Limitations on certain costs.

(a) Under an application approved under this part, not more than 15 percent of the funds expended may be expended to cover administrative costs.

(b) Of the funds expended under an approved application not more than 25 percent of the funds expended may be expended to provide needs-related payments and other supportive services.

(c) Of the funds expended under an application approved under this part, not less than 50 percent shall be expended for retraining services.

§ 660.129 Property management standards.

(a) Personal or real property procured with JTPA section 326 funds shall be used for purposes authorized by JTPA section 326 and this part. The grantee shall maintain records accounting for property in accordance with the records retention requirements of § 660.124.

(b) The JTPA section 326 program shall be reimbursed the fair market value of any unneeded property retained by the grantee for use in a non-JTPA section 326 program. The proceeds from the sale of any property or transfer of property to a non-JTPA section 326 program shall be used for purposes authorized under JTPA section 326.

§ 660.130 Audits.

(a) The requirements of 29 CFR part 96, which implements Office of Management and Budget Circulars A–128, and A–133, apply to JTPA section 326 programs administered by grantees and contractors under this part.

(b) Within a timely period after the submission of an audit report (conducted pursuant to OMB Circular A–128 or A–133, or by the Secretary) to the appropriate Federal official, the grantee shall submit an audit resolution report documenting the grantee's response and/or disposition of the reported questioned costs, the basis for such response or disposition, and any corrective actions taken.

(c) If the grantee intends to request waivers of liability of disallowed contractor or subcontractor costs, such requests must accompany the audit resolution report along with supporting documentation.

(d) After receiving the audit resolution report(s), the Grant Officer shall review the report(s), the grantee's disposition, and any liability waiver request. If the Grant Officer is in agreement with all aspects of the grantee's disposition of the audit(s), the Grant Officer shall so notify the grantee, constituting final agency action on the audit(s). If the Secretary is in disagreement with the grantee's conclusion on specific points in the audit(s) the Grant Officer shall resolve the audit(s) through the initial and final determination process described in subpart E of this part.

(e) Audits conducted or arranged by the DOL Inspector General generally will supplement rather than duplicate audits of recipients, PICs, SDAs, title III substate grantees, or other subrecipients.

§ 660.131 Oversight and monitoring.

(a) The Secretary is authorized to monitor and investigate pursuant to section 163 of the Act.

(b) The grantee is responsible for oversight of all contractors.

§ 660.132 Sanctions for violations of the Act.

(a) Pursuant to section 164 (b), (d), (e), (f), (g), and (h) of the Act, the Secretary may impose appropriate sanctions and corrective actions for violations of the Act, regulations, or grant terms and conditions. Sanctions may include the following:

(1) Offsetting debts, arising from misexpenditure of grant funds, against amounts to which the grantee is or may be entitled under the Act, except as provided in section 164(e)(1) of the Act. The debt shall be fully satisfied when the Secretary reduces amounts due to the grantee by the amount of the misexpenditure; and

(2) Determining the amount of Federal cash maintained by the grantee in excess of reasonable grant needs, establishing a debt for the amount of such excessive cash, and charging interest on that debt.

(b) Except for actions under sections 164(f) and 167 of the Act, to impose a sanction or corrective action, the Secretary shall utilize initial and final determination procedures outlined in subpart E of this part.

(c) To impose a sanction or corrective action regarding a violation of section 167 of the Act, the Secretary shall utilize the procedures of 29 CFR part 31.

(d)(1) The Secretary shall hold the grantee responsible for all funds under the grant. The grantee shall hold contractors and subcontractors responsible for JTPA funds received through the grant.

(2) The Secretary shall determine the liability of the grantee for misexpenditures of grant funds in accordance with section 164(e) of the Act, including the requirement that the grantee shall have taken prompt and appropriate corrective actions for misexpenditures by contractors and subcontractors.

(3) Prompt, appropriate, and aggressive debt collection action to recover any funds misspent by contractors and subgrantees ordinarily shall be considered a part of the corrective action required by section 164(e)(2)(D) of the Act. In this regard, grantees may request advance approval from the Grant Officer for contemplated corrective actions. Such requests may address debt collection or options which the grantee plans to initiate or to forego. The grantee's request shall include a description and assessment of all actions taken by the contractor or subcontractor to collect the misspent funds.

(4) In making the determination required by section 164(e)(2) of the Act, the Secretary may determine, based on a request from the grantee, that the grantee may forego certain collection actions against a contractor or subcontractor where that contractor was not at fault with respect to the liability criteria set forth in section 164(e)(2)(A) through section 164(e)(2)(D) of the Act. The Grant Officer shall consider such requests in assessing whether the grantee's corrective action was appropriate in light of section 164(e)(2)(D) of the Act. At that time, the Grant Officer shall also consider advance approvals (previously granted pursuant to paragraph (d)(3) of this section) in light of the grantee's demonstrated efforts to undertake the approved course of action.

(5) The grantee shall not be released from liability for misspent funds under the determination required by section 164(e) of the Act until the Grant Officer determines that further collection action, either by the grantee or the contractor or subcontractor, would be inappropriate or would prove futile.

(e) The grantee shall have the authority to reduce awards to contractors and subcontractors if—

(1) The Grant Officer offsets a debt against funds due to the grantee; and

(2) The debt resulted from a misexpenditure by the contractor or subcontractor.

(f) Nothing in this section shall preclude the Secretary from imposing a sanction directly against a contractor or subcontractor as authorized in section 164(e)(3) of the Act. In such a case, the Grant Officer shall inform the grantee of the Secretary's action.

Subpart E—Grievances, Investigations, and Hearings

§ 660.140 Scope and purpose of this subpart.

(a) *General.* This subpart establishes the procedures to receive, investigate and resolve grievances, and conduct hearings to adjudicate disputes under section 326 of the Act. Complaints of discrimination pursuant to section 167(a) of the Act will be handled under 29 CFR parts 31 and 32.

(b) *Non-JTPA remedies.* Whenever any person, organization or agency believes that a grantee, contractor, or subcontractor has engaged in conduct that violates the Act with respect to a program under this part and that such conduct also violates a Federal statute other than JTPA, or a State or local law, that person, organization or agency may, with respect to the non-JTPA cause of action, institute a civil action or pursue other remedies authorized under other Federal, State, or local law against the grantee or contractor without first exhausting the remedies in this part. Nothing in the Act or this part shall:

(1) Allow any person or organization to join or sue the Secretary with respect to the Secretary's responsibilities under JTPA except after exhausting the remedies in this part;

(2) Allow any person or organization to file a suit which alleges a violation of JTPA or this part without first exhausting the administrative remedies described in this part; or

(3) Be construed to create a private right of action with respect to alleged violation of JTPA or this part.

§ 660.141 Complaints and grievances.

Each contractor and grantee under this part shall establish and maintain a grievance procedure for grievances or complaints about its programs and activities from participants, subgrantees, subcontractors, and other interested persons. Hearings on any grievance shall be conducted within 30 days of filing of a grievance and decisions shall be made not later than 60 days after the filing of a grievance. Except for complaints alleging fraud or criminal activity, complaints shall be made within one year of the alleged occurrence.

§ 660.142 Non-criminal grievance procedure at employer level.

(a) Grantees and contractors shall assure that employers, including private-for-profit employers, receiving funds to train participants under this part also have a grievance procedure, relating to the terms and conditions of the training and employment, available to their participants (section 144(b) of the Act).

(b) An employer under paragraph (a) of this section may operate its own grievance system or may utilize the grievance system established by the grantee. The employer shall inform participants of the grievance procedure they are to follow (section 144(b) of the Act).

(c) An employer system shall provide for, upon request by the complainant, a review of an employer's decision by the grantee or the contractor and the Secretary, if necessary, subject to §§ 661.143–661.148 of this chapter.

§ 660.143 Federal handling of administrative and civil complaints.

(a) (1) The Comptroller General's and Inspector General's authority to conduct audits, evaluations and investigations is as specified in § 660.130.

(2) The Secretary may receive allegations of violations of the Act or this part directly or through the Department's incident reporting system.

(b) As a result of the findings or content of any of the activities listed in paragraph (a) of this section, the Secretary may:

(1) Direct the grantee to handle a complaint through its grievance procedures; or

(2) Investigate and determine whether the grantee(s) or contractor(s) are in compliance with the Act and this part (section 163(b) and (c) of the Act).

(c) (1) The Grant Officer shall notify the grantee of the findings of the Secretary's investigation and shall give the grantee a period of time, not to exceed 60 days, depending on the nature of the findings, to comment and to take appropriate corrective actions.

(2) The grantee shall offer an opportunity for a hearing to those contractor(s) or subgrantee(s) adversely affected by the results of an investigation, audit or monitoring activity. The grantee shall inform the Secretary of actions undertaken, including any disposition of an audit to deal with the Secretary's findings, if one was undertaken within the timeframe specified by the Secretary.

(3) The Secretary shall review the complete file of the investigation and the grantee actions. The Secretary's review shall take into account the provisions of § 660.132. If the Secretary is in agreement with the handling of the situation, the Grant Officer shall notify the grantee. This notification shall constitute final agency action.

(d) *Initial and final determination—*(1) *Initial determination.* If the Secretary is dissatisfied with a grantee's disposition of an audit or other resolution of costs, with the grantee response to findings pursuant to paragraph (c) of this section, or if the grantee failed to comply with the Secretary's decision, the Grant Officer shall make an initial determination of the matter in controversy including the allowability of questioned costs or activities. Such determination shall be based upon the requirements of the Act, regulations, grants, contracts or other agreements under the Act.

(2) *Informal resolution.* The Secretary shall not revoke a grantee's grant in whole or in part, nor institute corrective actions or sanctions, without first providing the grantee with an opportunity to present documentation or arguments to resolve informally those matters in controversy contained in the Secretary's initial determination. In the case of an initial determination pursuant to an audit, the informal resolution period shall be at least 60 days from issuance of the initial determination and no more than 170 days from the receipt by the Secretary of the final approved audit report. If the matters are resolved informally, the Secretary shall issue a final determination pursuant to paragraph (d)(3) of this section which notifies the parties in writing of the nature of the resolution and may close the file.

(3) *Final determination.* (i) If the grantee and the Grant Officer do not resolve any matter informally, the Grant Officer shall provide each party with a written final determination by certified mail, return receipt requested. In the case of audits, the final determination shall be issued not later than 180 days after the receipt by the Secretary of the final approved audit report.

(ii) The final determination shall:

(A) Indicate the efforts to informally resolve matters contained in the initial determination have been unsuccessful;

(B) List those matters upon which the parties continue to disagree;

(C) List any modifications to the factual findings and conclusions set forth in the initial determination;

(D) Establish a debt if appropriate;

(E) Determine liability, method of restitution of funds and sanctions; and

(F) In the case of a final determination imposing a sanction or corrective action, offer an opportunity for a hearing in accordance with § 660.146.

(iii) The final determination constitutes the final agency action unless a hearing is requested.

(e) Nothing in this section shall preclude the Secretary from issuing an initial and final determination directly to a contractor or subgrantee in accordance with the authority of section

164(e)(3) of the Act. In such a case, the Grant Officer shall inform the grantee of the Secretary's action.

§ 660.144 Federal handling of criminal complaints and reports of fraud, abuse and other criminal activity.

All information and complaints involving fraud, abuse or other criminal activity shall be reported directly and immediately to the Secretary of Labor.

§ 660.145 Opportunity for informal review.

(a) Parties to a complaint under § 660.146 may choose to waive their rights to an administrative hearing before the Office of Administrative Law Judges (OALJ) by choosing to transfer the settlement of their dispute to an individual acceptable to all parties for the purpose of conducting an informal review of the stipulated facts and rendering a decision in accordance with applicable law. A written decision shall be issued within 60 days after the matter is submitted for informal review.

(b) The waiver of the right to request a hearing before the OALJ shall be revoked automatically if a settlement has not been reached within the 60 days provided in paragraph (a) of this section.

(c) The decision rendered under this informal review process shall be treated as a final decision of an Administrative Law Judge pursuant to section 166(b) of the Act.

§ 660.146 Hearings before the Office of Administrative Law Judges.

(a) *Jurisdiction.* The jurisdiction of the OALJ extends only to those complaints identified in sections 164(f) and 166(a) of the Act. All other disputes arising under the Act shall be adjudicated under the appropriate grantee or contractor or subcontractor grievance procedures or other applicable law.

(b) *Sanctions.* For the purpose of this section, "sanctions" do not include actions required by authority other than this Act. For example, the imposition of interest charges where required by 31 U.S.C. 3717 is not a sanction for the purpose of this section.

(c) *Procedures for filing request for hearing.* (1) Within 21 days of receipt of the determination imposing the sanction or corrective action, or denying financial assistance, the grantee or eligible applicant may transmit by certified mail, return receipt requested, a request for hearing to the Chief Administrative Law Judge, United States Department of Labor, Suite 400, 800 K Street, NW., Washington, DC 20001–8002, with one copy to the departmental official who issued the determination and one copy to the Office of the Deputy Assistant Secretary, room N–4671, Employment and Training Administration, Washington, DC 20210.

(2) The 21-day filing requirement is jurisdictional; failure to timely request a hearing acts as a waiver of the right to hearing.

(3) The request shall state specifically those issues of the determination upon which review is requested. Those provisions of the determination not specified for review, or the entire determination when no hearing has been requested within 21 days, shall be considered resolved and not subject to further review. Only alleged violations of the Act, regulations, grant or other agreements under the Act fairly raised in the determination and request for hearing are subject to review.

(4) The same procedure set forth in paragraphs (c)(1) through (3) of this section applies in the case of a complainant who has not had a dispute adjudicated by the informal review process of § 660.145 within the 60 days, except that the request for hearing before the OALJ must be filed within 15 days of the conclusion of the 60-day period. In addition to including the determination upon which review is requested, the complainant must include a copy of any Stipulation of Facts and a brief summary of proceedings.

(d) *Service and filing.* Copies of all papers required to be served on a party or filed with the OALJ shall be filed simultaneously with the OALJ and served upon the parties of record or their representatives, and shall contain proof of such service.

(e) *Rules of procedure.* The rules of practice and procedure promulgated by the OALJ (29 CFR part 18) shall govern the conduct of hearing under this section, except that:

(1) A request for hearing under this section shall not be considered a complaint to which the filing of an answer by DOL or a DOL agency or official is required; and

(2) Technical rules of evidence, such as the Federal Rules of Evidence and subpart B of the Rules of Practice and Procedure for Administrative Hearings Before the Office of Administrative Law Judges (29 CFR part 18, subpart B), shall not apply to any hearing conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where determined reasonably necessary by the administrative law judge conducting the hearing; the administrative law judge may exclude irrelevant, immaterial, or unduly repetitious evidence; the certified copy of the administrative file (see paragraph (i) of this section) shall be part of the evidentiary record of the case and need not be moved into evidence.

(f) *Prehearing procedures.* In all cases, the OALJ should encourage the use of prehearing procedures to simplify and clarify facts and issues.

(g) *Subpoenas.* Subpoenas necessary to secure the attendance of witnesses and the production of documents or things at hearings shall be obtained from the OALJ and shall be issued pursuant to the authority contained in section 163(c) of the Act, incorporating 15 U.S.C. 49.

(h) *Timely submission of evidence.* The OALJ shall not permit the introduction at the hearing of documentation relating to the allowability of costs if such documentation has not been made available for review either at the time ordered for any prehearing conference, or, in the absence of such an order, at least 3 weeks prior to the hearing date.

(i) *Burden of production.* The Department shall have the burden of production to support the Secretary's decision. To this end, the Grant Officer shall prepare and file an administrative file in support of the decision. Thereafter, the party or parties seeking to overturn the Secretary's decision shall have the burden of persuasion.

(j) *Relief.* In ordering relief, the OALJ shall have the full authority of the Secretary under section 164 of the Act, except with respect to the provisions of section 164(e) of the Act.

(k) *Timing of decisions.* The OALJ should render a written decision not later than 90 days after the closing of the record.

(l) The decision of the administrative law judge shall constitute final action by the Secretary unless, within 20 days after receipt of the decision of the administrative law judge, a party dissatisfied with the decision or any part thereof has filed exceptions with the Secretary specifically identifying the procedure, fact, law, or policy to which exception is taken. Any exception not specifically urged shall be deemed to have been waived. Thereafter the decision of the administrative law judge shall become the final decision of the Secretary unless the Secretary, within 30 days of such filing, has notified the parties that the case has been accepted for review.

§ 660.147 Other authority.

Nothing contained in this part shall be deemed to prejudice the separate exercise of other authorities in pursuit of remedies and sanctions available outside the Act.

Subpart F—Approved Training

§ 660.200 Approved training rule.

Participation by any eligible individual in any of the Clean Air Employment Transition Assistance program activities shall be deemed to be acceptance of training with the approval of the State within the meaning of any other provisions of Federal law relating to unemployment benefits.

Subpart G—Program Design Requirements

§ 660.210 Participant eligibility.

(a) Eligible dislocated workers, as defined in section 301 of the Act, are eligible to participate in Clean Air Employment Transition Assistance Programs under this part, provided they also meet the requirements under paragraph (e) of this section. For the purpose of determining eligibility under the provisions of section 301(a)(1)(A) of the Act, the term "eligible for . . . unemployment compensation" includes any individual whose wages from employment would be considered in determining eligibility for unemployment compensation under applicable Federal or State unemployment compensation laws.

(b) Eligible dislocated workers under this part include individuals who were self-employed and who meet the requirements of paragraph (d) of this section.

(c) An eligible dislocated worker under this part shall remain eligible if such individual:

(1) Remains unemployed; or

(2) Accepts temporary employment for the purpose of income maintenance prior to and/or during participation in a training program under this part with the intention of ending such temporary employment at the completion of the training and entry into permanent unsubsidized employment as a result of the training. Such temporary employment must be with an employer other than that from which the individual was dislocated. This provision applies to eligible individuals both prior to and subsequent to enrollment in a program under this part.

(d) An eligible dislocated worker under this part shall be eligible for participation in activities under this part only if such dislocated worker has been terminated or laid off or has received a notice of termination or layoff as a consequence of a firm's compliance with the Clean Air Act. An eligible dislocated worker who has been terminated or laid off or who has received a notice of termination or layoff as a consequence of compliance with the Clean Air Act is a worker whose termination or layoff is a consequence of a firm's compliance with the requirements of the Clean Air Act. Such workers are workers who were performing work directly at or for the facility impacted by and required to lay off workers as a result of a firm's compliance with the requirements of Clean Air Act Amendments.

(e) An eligible dislocated worker whose termination or layoff, or notice thereof, is not the consequence of a firm's compliance with the Clean Air Act, such as a worker at a facility that may itself experience a closing or layoff as a result of the closing or layoff at the facility impacted by Clean Air Act requirements, may be eligible under the basic JTPA title III dislocated worker program. See part 631 of this chapter.

§ 660.211 Eligible grantees.

(a) Funds available for programs under this part shall be distributed to eligible grantees in accordance with requirements specified in application procedures issued annually in accordance with § 660.230.

(b) Pursuant to section 326(b) of JTPA, eligible grantees under this part are States, JTPA title III substate grantees, employers, employer associations, and representatives of employees. However, a specific eligible grantee may not be an appropriate applicant for a particular project. The nature and extent of the proposed project will be factors in considering an application and the applicant's ability to perform the work.

(c) Employer associations, and representatives of employees may submit applications directly to the Grant Officer. Applications submitted by substate grantees must be submitted to the Grant Officer by the State.

§ 660.212 Priority areas of service.

(a) In funding grants under this part, the Department shall consider priority areas that have, or are projected to have, the greatest number of eligible dislocated workers, as defined in § 660.210.

(b) In reviewing applications for funding under this part, priority shall be given to those applications proposing to provide training, adjustment assistance, and services in priority areas which have the greatest number of workers dislocated as a direct result of a firm's compliance with the Clean Air Act. The Secretary shall give the highest priority to priority areas of service in which compliance with the requirements of the Clean Air Act results in a layoff at one or more facilities which comprise the primary economic base of the community. In considering the level of community impact, the Secretary shall consider:

(1) information on the economic conditions in the State and the geographic area to be served;

(2) the most recent unemployment rates for the State and the community;

(3) an affected firm or industry's proportion of the area's unemployment, or

(4) other information that the Secretary deems necessary.

The Secretary shall continue to consult with the Environmental Protection Agency for the purpose of identifying priority areas, and may publish standards regarding such areas where possible and appropriate.

(c) Applications must provide specific information to demonstrate what compliance with the Clean Air Act requirements resulted in the dislocation of the workers to be served, including, as appropriate, identification of specific contracts cancelled, mines closed, plants closed, total jobs lost, jobs lost attributable to compliance with the Clean Air Act and other relevant information.

(d) Standards which an applicant must meet and document to the satisfaction of the Grant Officer to assure that any dislocated workers served are workers dislocated as a consequence of a firm's compliance with the Clean Air Act shall be annually published by the Secretary.

§ 660.213 Allowable activities.

(a) Allowable activities under this part shall be those activities authorized by section 314 of JTPA, except as provided in this section.

(b)(1) Job search shall be an allowable activity under this part only to assist a dislocated worker who meets the eligibility criteria under § 660.210 in securing a job within the United States, and where it has been determined that the dislocated worker cannot reasonably be expected to secure suitable employment within the commuting area in which the worker resides. Procedures for determining whether a dislocated worker cannot reasonably be expected to secure suitable employment within the commuting area in which the dislocated worker resides shall be described in the grant application and shall be subject to approval by the Secretary.

(2) The cost of job search for an eligible dislocated worker who meets the eligibility criteria under § 660.210 of this part shall be an allowable basic readjustment service cost (see § 660.127(b)), but shall not provide for more than 90 percent of the cost of

necessary job search expenses, and may not exceed a total of $800, unless the need for a greater amount is justified in the grant application and approved by the Secretary.

(3) The restrictions in paragraph (b) of this section shall not apply to regular job search, placement and development activities provided to an eligible participant within the commuting area within which the eligible participant resides.

(c)(1) Relocation shall be an allowable activity under this part only where the eligible dislocated worker cannot reasonably be expected to secure suitable employment in the commuting area in which the worker resides and has obtained suitable employment affording a reasonable expectation of long-term duration in the area in which the worker wishes to relocate, or has obtained a bona fide offer of such employment, provided that the worker is totally separated from employment at the time relocation commences.

(2) The cost of relocation for an eligible dislocated worker shall not exceed an amount which is equal to the sum of 90 percent of the reasonable and necessary expenses incurred in transporting the dislocated worker and the dislocated worker's family, if any, and household effects, and a lump sum relocation allowance, equivalent to three times such worker's average weekly wage. The maximum relocation allowance, however, shall not exceed $800, unless a greater amount is justified to the satisfaction of the Grant Officer in the grant application and is approved by the Secretary. Necessary expenses shall be travel expenses for the dislocated worker and the dislocated worker's family and for the transfer of household effects. Reasonable costs for such travel and transfer expenses shall be by the least expensive, most reasonable form of transportation.

§ 660.214 Selection of service providers.

(a) The grantee may provide authorized JTPA section 326 services directly or through contract or agreement with service providers. For purposes of Clean Air Employment Transition Assistance programs, service providers shall be considered contractors.

(b) The provisions of section 107(a), (b), and (c) of the Act apply to grantee selection of service providers.

§ 660.215 Certificates of continuing eligibility.

Eligible grantees under this part shall not issue certificates of continuing eligibility, since the period of operation under the grant will not be sufficient to honor such certificates.

§ 660.216 Coordination activities.

(a) Services under this part shall be integrated or coordinated with services and payments made available under chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 *et seq.*) and part 617 of this chapter and with programs provided by any State or local agencies designated under section 239 of the Trade Act of 1974 (19 U.S.C. 2311) or part 617 of this chapter, as appropriate.

(b) Services under this part will be, when appropriate, coordinated with dislocated worker services under title III of the Carl D. Perkins Vocational Education Act (20 U.S.C. 2351 *et seq.*)

(c) In accordance with section 402 of the Veterans' Benefits and Programs Improvement Act of 1988, 29 U.S.C. 1731 note, services under this part shall be coordinated with programs administered by the Department of Veterans Affairs, including the Veterans' Job Training Act (29 U.S.C. 1721 note), and by the Assistant Secretary of Labor for Veterans' Employment and Training including title IV–C of the Job Training Partnership Act (29 U.S.C. 1721 *et seq.*) and 20 CFR chapter IX, and other training, employment, and education programs which may have special provisions for veterans, where appropriate.

Subpart H—Application Procedures

§ 660.230 Application procedures.

A State, a JTPA title III substate grantee, an employer, an employer association, or a representative of employees which wishes to receive a grant under this part shall submit an application in accordance with instructions issued annually by the Secretary. Such instructions shall specify application procedures, selection criteria, and the approval process. These instructions may be included with the annual instructions issued by the Secretary for applying for regular JTPA title III discretionary funds.

Signed at Washington, DC, this 5th day of March, 1992.

Roberts T. Jones,

Assistant Secretary of Labor.

Part IV

Department of Defense

Department of the Army
Corps of Engineers

33 CFR Part 207

St. Marys Falls Canal and Locks, Michigan; User Administration and Navigation; Final Rule

DEPARTMENT OF DEFENSE

Department of the Army

Corps of Engineers

33 CFR Part 207

St. Marys Falls Canal and Locks, Michigan; Use, Administration and Navigation

AGENCY: Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: This final rule modifies the annual closing date of the Soo Locks at the St. Marys Falls Canal, Sault Ste. Marie, Michigan by fixing that date at January 15. It also eliminates the provision in the current regulation that permits users of the locks to request extension of the closing date to meet the reasonable needs of commerce. The purpose and effect of this rule are to create an atmosphere of stability and certainty within which Great Lakes shipping interests and industries can plan and conduct their operations, while assuring that no significant adverse environmental effects occur.

EFFECTIVE DATE: April 23, 1992.

ADDRESSES: U.S. Army Corps of Engineers District, Detroit, ATTN: CENCE–CO, P.O. Box 1027, Detroit, Michigan 48231–1027.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Kidby at Corps of Engineers Headquarters in Washington, DC., at (202) 272–8839.

SUPPLEMENTARY INFORMATION:

Classification

The Secretary of the Army has determined that this final rule is not a "major" rule within the meaning of Executive Order (E.O.) 12291. This is because the rule will not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, geographic regions, or Federal, State, or local governmental agencies; or (3) have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of a United States-based enterprise to compete with foreign based enterprise in domestic or export markets.

No increased paperwork burden is imposed by this rule.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by E.O. 12291.

Regulatory Analysis

Under E.O. 12291, the Department of the Army must determine if a regulation is "major" and, therefore, subject to a Regulatory Impact Analysis. Because the Department of the Army believes that this final rule is not "major", it is not subject to such an analysis.

Environmental Analysis

As noted in the Notice of Proposed Rulemaking (NPRM) discussed below, this action was the subject of a Final Environmental Impact Statement (FEIS), September 1989, which concluded that there would be no significant adverse environmental impacts as a result of taking the action. The FEIS also concluded that the action was in compliance with all applicable environmental statutes and other requirements, *viz.*, the Archaeological and Historic Preservation Act; the Clean Air Act; the Clean Water Act; the Coastal Zone Management Act (CZMA); the Endangered Species Act; the Federal Water Project Recreation Act; the Fish and Wildlife Coordination Act; the Land and Water Conservation Fund Act; the National Historic Preservation Act; the National Environmental Policy Act; the Boundary Waters Treaty of June 11, 1909; E.O. 11990, Protection of Wetlands; E.O. 12114, Environmental Effects Abroad of Major Federal Actions; and E.O. 12372, Intergovernmental Review of Federal Programs. Please see, however, the discussion under Background below.

Background

On April 3, 1991, a Notice of Proposed Rulemaking (NPRM) on the St. Marys Falls Canal and Locks, Michigan; use, administration, and navigation, 33 CFR 207.440, was published in the Federal Register (56 FR 13604). A 30-day period for public comments was provided. During this period, 13 comment letters were received. All these letters came from shipping or commercial entities, and all were in favor of adoption of the proposed rule.

After the close of the comment period, the Detroit District of the Corps of Engineers received a letter from the Michigan Department of Natural Resources (MDNR), alleging that the Corps had not provided the MDNR with a determination of consistency with Michigan's coastal zone management plan, as required by the CZMA. Although a specific determination of consistency with the Michigan CZM program had been made in the FEIS, as a matter of comity, the District again reviewed the record and issued a second determination of consistency under the CZMA. In addition, District personnel met with MDNR personnel and representatives of the Lake Carriers' Association, shipping companies, and the iron and steel industry to discuss the concerns raised by the MDNR. As a result of these meetings, the District received letters from the MDNR and the Lake Carriers Association summarizing the positions espoused in the meetings. The Corps of Engineers has determined, in the exercise of its administrative discretion, to treat these letters and the discussions that they summarize as comments on the NPRM received after the close of the comment period, and, consequently, to deal with the issues they raise.

The correspondence from the MDNR refers to previous correspondence on an earlier proposal, which was not implemented by rulemaking, to fix the closing date of the locks at February 15 (see the discussion in the NPRM at 56 FR 13604). The recent correspondence merely reiterates the MDNR's concerns about the February 15 proposal, and fails to specifically address those concerns to the January 15 proposal contained in the NPRM. In addition, the earlier correspondence did not express opposition to the January 15 closing date (subject to fixed weather and ice criteria, which are discussed below). As a result, each of the potential issues raised by the MDNR's earlier correspondence is not dealt with in detail. Nonetheless, the Corps of Engineers has considered the specific areas of concern set out in the most recent MDNR correspondence, and has reached the following conclusions on them.

The potential environmental impacts raised by the MDNR consist of damage to (1) emergent wetlands; (2) shore structures; and (3) fisheries resources (specifically lake herring spawning activities). Each of these potential impacts was addressed during preparation of the 1989 FEIS. During the discussions that preceded the issuance of the NPRM, the Corps of Engineers requested that the State of Michigan provide any scientifically meaningful data that might cast doubt on the conclusions of the environmental studies that addressed the potential damages listed above. No additional data were provided. The environmental studies leading up to the 1989 FEIS indicate that increases or decreases in the amount and composition of emergent wetlands in the St. Marys River ecosystem is primarily related to changes in water levels in the Great Lakes, and is not the result of extended shipping seasons at the Soo Locks. The current available evidence continues to support that conclusion.

The FEIS concluded that damage to shore structures was the natural result of exposure to the rigorous conditions imposed by the northern Michigan winter, but that lock operation to February 15 could increase damage to structures near the navigation channel. With the proposed restriction of lock operation to January 15, any increased damage would be insignificant. The available evidence supports the conclusion that any significant damage to shore structures in the St. Marys River is the result of climatic conditions, and is not caused by extended shipping seasons at the locks.

The other potential environmental impact raised is damage to the fisheries resource, specifically to spawning activities of the lake herring. The environmental studies leading up to the 1989 FEIS indicated that lake herring populations, overall and in terms of specific age groups, were in fact, higher during periods of year-round lock operations. It was concluded that any decline in the lake herring population was not attributable to extended navigation seasons at the Soo Locks, but was, rather, the result of other factors, possibly including over-utilization of the resource. (Recent data, in fact, indicate an increase in lake herring populations in Lake Superior.)

During the discussions that were the subject of recent correspondence, a representative of the MDNR indicated that declines in the lake herring population could not be attributed with any certainty to extended lock operations. At this time, the available evidence continues to support the earlier conclusions regarding any decline in the lake herring population.

One additional issue raised by the MDNR in the discussions leading up to the recent correspondence from that agency and the Lake Carriers' Association was the use of weather and ice criteria to determine the closing date. As noted in the NPRM, it has been concluded that the weather and ice criteria (which were adopted for use during the period that the extended environmental studies preceding the FEIS were being conducted) are not a scientifically sound basis upon which to determine the closing date. During the discussions on this subject, all the parties acknowledged that there are no grounds upon which to conclude that the weather and ice criteria currently in place should be retained. As with the other environmental issues involved in this rulemaking, the State of Michigan was given the opportunity to provide scientifically meaningful data to support an alternate proposal for weather and ice criteria to be employed in determining a closing date. No such data were provided. The available evidence supports the conclusion that the weather and ice criteria used in determining the closing date of the locks should no longer be employed.

The recent correspondence from the MDNR proposes a fixed closing date of December 31, subject to a verification prior to December 1 of each year that there is an economic demand for shipping past December 15, with additional extension of the season to no later than January 15, subject to weather and ice criteria. Industry's need for certainty in planning was brought out in the recent discussions and correspondence, and the ability to meet such a need would clearly be compromised under the MDNR proposal. For this reason, because the MDNR has not shown any objectively supportable basis for this proposal, and because the proposal would require the use of weather and ice criteria which have not proven scientifically defensible, the Corps of Engineers declines to adopt this proposal.

The MDNR has also raised several economic rather than environmental issues. These center around the possibilities of (1) stockpiling iron ore; (2) shipping iron ore by rail; and (3) using the harbor at Escanaba, Michigan, in order to limit the length of the season required by industry at the Soo Locks. Each of the issues was considered during the recent discussions among the Corps, MDNR, and Great Lakes commercial interests. It was brought out that stockpiling of raw materials is inherently uneconomical, logistically complicated, and fundamentally at odds with the need for certainty in planning. Similarly, shipment by rail requires industry to pay substantially higher shipping costs, is logistically complicated, and is subject to the highly uncertain availability of rolling stock. Finally, the harbor at Escanaba has insufficient capacity and, because of climatic conditions and the geography of its location, is more likely to suffer the effects of severe weather than are other harbors on the upper Great Lakes. For these reasons, and because no scientifically meaningful data have been advanced to show why these economically complicated approaches should be required, the Corps of Engineers has determined that these suggestions, taken singly or in concert, do not make it necessary or advisable to modify the rule proposed in the NPRM.

In consideration of the administrative record, the comments received in response to the NPRM, and the findings resulting from study of the additional issues raised and discussed above, the Corps of Engineers will promulgate the final rule exactly as proposed in the NPRM.

List of Subjects in 33 CFR Part 207

Navigation (Water), Water Transportation, Vessels.

For the reasons set forth in the preamble, 33 CFR part 207 is amended as follows:

PART 207—[AMENDED]

1. The authority citation for part 207 continues to read as follows:

Authority: Secs. 4 and 7 of 28 Stat. 362; 40 Stat. 266; 42 Stat. 1043; and 33 U.S.C. 1, 554, and 555 (as amended by Sec. 919 of the Water Resources Development Act of 1986).

2. Section 207.440 is amended by revising paragraph (u) to read as follows:

§ 207.440 St. Marys Falls Canal and Locks, Mich.; use, administration, and navigation.

* * * * *

(u) The locks will be opened and closed to navigation each year as provided in paragraphs (u) (1) and (2) of this section except as may be authorized by the Division Engineer. Consideration will be given to change in these dates in an emergency involving disaster to a vessel or other extraordinary circumstances.

(1) *Opening date.* At least one lock will be placed in operation for the passage of vessels on April 1. Thereafter, additional locks will be placed in operation as traffic density demands.

(2) *Closing date.* The locks will be maintained in operation only for the passage of downbound vessels departing from a Lake Superior port before midnight (2400 hours) of January 14, and of upbound vessels passing Detour before midnight (2400 hours) of January 15. Vessel owners are requested to report in advance to the Engineer in charge at Sault Ste. Marie, the name of vessel and time of departure from a Lake Superior port on January 14 before midnight, and of vessels passing Detour on January 15 before midnight, which may necessitate the continued operation of a lock to permit passage of vessel.

Part V

Department of Education

Technology, Educational Media and Materials for Individuals With Disabilities Program; Inviting Applications for New Awards; Notice

DEPARTMENT OF EDUCATION

[CFDA No.: 84.180]

Technology, Educational Media and Materials for Individuals With Disabilities Program

Notice inviting applications for new awards under the Technology, Educational Media, and Materials for Individuals with Disabilities Program for fiscal year 1992.

Purpose of Program: To support projects and centers for advancing the availability, quality, use, and effectiveness of technology, educational media, and materials in the education of children and youth with disabilities and the provision of related services and early intervention services to infants and toddlers with disabilities.

Eligible Applicants: Institutions of higher education, State and local educational agencies, public agencies, and private nonprofit or for-profit organizations.

Applications Available: March 27, 1992.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 333, as amended on October 22, 1991 at 56 FR 54703–54704.

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 333.3 The Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under this program only applications that meet one of these absolute priorities:

Absolute Priority 1: Technology, Educational Media, and Materials Research Projects That Promote Literacy (CFDA 84.180G)

This priority provides support for research projects that examine how advancing the availability, quality, use, and effectiveness of technology, educational media, and materials can address the problem of illiteracy among individuals with disabilities.

Invitational Priority: Within this Absolute Priority, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority receives no competitive or absolute preference over applications that do not meet the invitational priority.

The Secretary particularly encourages projects that:

(a) Define literacy as to: Read, communicate, compute, make judgments and take appropriate action;

(b) Are rigorously designed and employ clearly explained quantitative and/or qualitative methodologies appropriate to the purpose of project; and

(c) Consider learning and psycho-social factors in examining the availability, quality, and use of specified technology, educational media, and materials, and in examining their effectiveness in providing experiences and opportunities that improve the literacy of children with disabilities.

Absolute Priority 2: Technology, Educational Media, and Materials Demonstration Projects That Promote Literacy (CFDA 84.180H)

This priority provides support for projects that demonstrate the effectiveness and the efficient implementation and use of technology, educational media, and materials in addressing the problem of illiteracy among individuals with disabilities.

Invitational Priority: Within this Absolute Priority, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority receives no competitive or absolute preference over applications that do not meet the invitational priority.

The Secretary particularly encourages projects that:

(a) Define literacy as to: Read, communicate, compute, make judgments and take appropriate action;

(b) Evaluate the process of implementating methods or strategies that use innovative technology, educational media or materials to address illiteracy among children with disabilities in existing and promising, organizational or instructional arrangements;

(c) Examine the extent to which identified contextual variables (e.g., support and training resources and mechanisms, school and classroom organizational characteristics) and student learning and psycho-social characteristics, alone or in combination, impede or facilitate implenetation; and

(d) Are proposed from local educational agencies in collaboration with program evaluators and other appropriate experts.

TECHNOLOGY, EDUCATIONAL MEDIA, AND MATERIALS FOR INDIVIDUALS WITH DISABILITIES PROGRAM

[Application notices for fiscal year 1991]

Title and CFDA No.	Deadline for transmittal of applications	Deadline for intergovernmental review	Available funds	Estimated size of award(s)	Estimated number of awards	Project period in months
Technology, Educational Media, and Materials Research Projects that Promote Literacy (CFDA 84.180G).	05/26/92	02/27/92	$600,000	$150,000 per year [1]	4 grants	Up to 36.
Technology, Educational Media, and Materials Demonstration Projects that Promote Literacy (CFDA 84.180H).	05/26/92	07/27/92	$600,000	$200,000 per year [1]	3 grants	Up to 36.

[1] Amounts listed are the estimated funding levels for the first 12 months of the project(s). Multi-year projects are likely to be level funded unless there are increases in costs attributable to significant changes in activity level.

NOTE: The Department of Education is not bound by any estimates in this notice, except as otherwise provided by statute.

These priorities complement AMERICA 2000, the President's strategy for helping the nation achieve the six National Education Goals, by improving our understanding of how to enable children with disabilities to reach the highest levels of educational performance envisioned by the goals.

For Applications or Information Contact: Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, U.S. Department of Education, 400 Maryland Avenue SW., (Switzer Building, room 3524), Washington, DC 20202.

Telephone: (202) 732–1099. (TDD: (202) 732–6153).

Program Authority: 20 U.S.C. 1461.

Dated: March 19, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Part VI

Department of Commerce

Agency Information Collection Under Review by the Office of Management and Budget; Expedited Review; Notice

DEPARTMENT OF COMMERCE (DOC)

Agency Information Collection Under Review by the Office of Management and Budget (OMB); Expedited Review

DOC has submitted to OMB for expedited clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). The collection is for the International Trade Administration of DOC.

Title: MOSS Motor Vehicle Study in Japan. Survey of (A) Vehicle Consumers. (B) Automotive Franchise Dealers.

Form Number: Agency—N/A; OMB—0625.

Type of Request: New Collection—EXPEDITED REVIEW.

Burden: Estimated (A) 1,400 respondents, 700 burden hours—average response time 30 minutes. (B) 300 respondents, 450 burden hours—average response time is 1.5 hours.

Needs and Uses: This collection will be conducted under the auspices of the MOSS Motor Vehicle Study to support MOSS negotiations by identifying potential barriers to the sale of U.S. vehicles in Japan as well as the needs and expectations of consumers in this market.

Affected Public: Selected automobile consumers and franchise dealers in Japan.

Frequency: Once.

Obligation: Voluntary.

OMB Desk Officer: Gary Waxman, (202) 395–7340.

A copy of the survey is published below. Any questions can be directed to Edward Michals, DOC Clearance Officer, 202–377–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments for the proposed information collection should be sent to Gary Waxman, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: March 20, 1992.

Ed Michals,

Departmental Clearance Officer, Office of Management and Organization.

[OMB No: 0625] Expires:

Package for OMB Survey Clearance

Demand Survey for the Moss Motor Vehicle Study

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Reports Clearance Office, International Trade Administration, rm. 4001, U.S. Dept. of Commerce, Washington, DC 20230, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Paperwork Reduction Project (0625–), Washington, DC 20503

BILLING CODE 3510-22-M

Q2-7. What are the displacements of the cars?
Q2-8 Please indicate which car you use more often by entering 1 and 2

	Car you bought most recently	Car you bought next recently
Q2-1. Manufacturer		
Q2-2 Model		
Q2-3 Type		
Q2-4 Month/Year you bought	Month_____ Year 19__	Month _____ Year 19__
Q2-5 New/used	1. New 2. Used	1. New 2. Used
Q2-6 Replacement/addition	1. Replacement 2. Addition	1. Replacement 2. Addition
Q2-7 Displacement	_____cc	_____cc
Q2-8 Ranking in frequency of use		
Q2-9 From where did the car come	1 Vehicle purchase from dealer's stock(existing inventory) 2 Or special ordered from the factory	1 Vehicle purchase from dealer's stock(existing inventory) 2 Or special ordered from the factory

PLEASE ANSWER Q3 THROUGH Q10 OF THE CAR YOU BOUGHT MOST RECENTLY

Q3 Please fill in the blanks below with information about the car bought most recently. If there was no trade-in for the car, please enter 0 in the blank for trade-in

List Price ¥_____
Reduction ¥_____
Trade-in ¥_____
Price Paid ¥_____

Q3-1 What other incentives did you get from dealer?

Q4. Did you arrange a loan for the payment when you bought the car?
1. Yes 2. No

Q4-1. (TO THOSE WHO ANSWERED 1. YES TO Q4)
What was the annual interest rate of the loan you arranged?
Please check one of the four choices below.

1. Less than 5% 3. 10 to 15%
2. 5 to 10% 4. Over 15%

Q4-2. (TO THOSE WHO ANSWERED 1. YES TO Q4)
What was your reaction to the level of the interest rate?
Please check one.
1. Fair
2. More or less fair
3. Neutral
4. Not very fair
5. Unfair

Q5. Who drives the car most often?
1. Yourself
2. Your spouse
3. Your son
4. your daughter
5 Your parent

Q6. How often do you yourself drive the car?
1. Every day
2. 3 - 4 times a week
3. 1 - 2 times a week
4. 2 - 3 times a month
5. Around once a month
6. Less than often than 5

Q7. For what purpose do you most often use the vehicle yourself? (Rank from 1 to 9)
1. For commuting to place of employment
2. For commuting to school
3. Driving a member(s) of family to from home
4. Shopping
5. Transportation to appointments
6. Pleasure driving
7. Travelling
8. Recreation/leisure activities
9. Others (Specify)

Q8. Please fill the blanks below with approximate figures for the past year.
Total distance driven _____Km
Total gas/oil expense paid ¥_____
Total cost of renting a parking lot * ¥_____
Total cost of required checks ¥_____

* If you are not paying for the parking space, record 0 here.

Q9. What was the motive for buying the car? (Rank from 1 to 5)
1. The old car was up for a safety check (shaken) soon.
2. The old car needed a repair.
3. The old car was getting quite old.
4. Got tired of the old car.
5. Was through paying the installments for the old car.
6. Dealer or salesman talked me into buying a new car
7. Liked the design of the new model or car.

(3) Deliver the repaired car to your home.
(4) Other (Specify)

Q21-2 How satisfied are you with the dealer's reliability?
(1) Very much satisfied
(2) Somewhat satisfied
(3) Neutral
(4) Somewhat dissatisfied
(5) Dissatisfied

Q21-3 How satisfied are you with the salespersons' knowledge of their business
(1) Very much satisfied
(2) Somewhat satisfied
(3) Neutral
(4) Somewhat dissatisfied
(5) Dissatisfied

Q22. Have you had the car repaired since the purchase? (Check one)
1. Yes, within the past year
2. Yes, but not in the past year
3. No, I have not

Q22-1. (TO THOSE WHO ANSWERED 1 TO Q22)
How often have you had the car repaired in the past year?
How much did the repairs cost in total?
____ ____ times.
¥_____ ___

Q22-2. (TO THOSE WHO ANSWERED 1 OR 2 TO Q20)
Which of the following did you go to to have the most recent repair done?
1. Appointed dealer.
2. Non-appointed importer.
3. Leasing/credit company.
4. Auto repair shop.
5. Gas station.
6. Other (Specify)

Q22-3. (TO THOSE WHO ANSWERED 1 OR 2 TO Q22)
How many days did the most recent repair take?
_____ days

IF THE CAR IS A REPLACEMENT, PLEASE ANSWER THE FOLLOWING QUESTIONS.

Q23. Please fill in the blanks below with the information on the car that was replaced. For names of manufacturers and models, please refer the attached list.

Manufacturer (Choose from attached list #1)	
Model (Choose from the attached list #2)	
Bought in	Month , Year 19
Bought	1. New 2. Used

Q23-1. From whom did you buy it?£

1. Same appointed dealer you bought the car in question.
2. Another appointed dealer.
3. Non-appointed importer.
4. Leasing/credit company.
5. Other (Specify)

Q24. Would you want to buy 4WD off-road type vehicle if you are buying another car? (Please check one)

1. Would want to buy.
2. Might.
3. Neutral.
4. Might not.
5. Would not.

Q25. When you buy a car next time, which do you think you will prefer, new or used?

1. New car 2. A used car 3. Not sure.

Q 26. Do you expect to use loan when you buy a car next time? (Please check one)

1. Will use loan. 2. Not sure. 3. Will not use loan. ——> Q28

Please assume you are using loan to buy another car. There are nine choices of combination of terms.

Q27. Which term would you prefer? Please rank them in the order of preference. (Four variables of car grades, amounts of reduction, annual rates of interest, and expected trade-in value in three years, are combined to make up the choices. Please assume all other conditions such as the physical qualities of the cars, dealers, etc. are equal. The loans are for three years.)

Choices:

Car grades:	Low (2.3 mil. yen) Medium (2.5 mil. yen) High (2.7 mil. yen)
Price reductions:	Nil, ¥200,000, ¥400,000
Rate of interest:	5%, 10%, 15%
Trade-in value:	1.10, 1.30 and 1.50 mil. yen

When you find it hard to make up your mind on the ranking, it might help to start first with the first to the third or with the seventh to the ninth rankings.

Rank in the order of your preference	Car Grade	Reduction	Interest	Trade-in Value
( )	Low	Nil	15 %	1.3 million yen
( )	High	200,000 yen	10%	1.3 million yen
( )	Medium	400,000 yen	5 %	1.3 million yen
( )	High	400,000 yen	15%	1.1 million yen
( )	Medium	Nil	10%	1.1 million yen
( )	Low	200,000 yen	5%	1.1 million yen
( )	Medium	200,000 yen	15%	1.5 million yen
( )	Low	400,000 yen	10%	1.5 million yen
( )	High	Nil	5%	1.5 million yen

THE QUESTIONS TO FOLLOW ARE ON FOREIGN CARS.

Q28. When you buy a car next time, do you want to buy a foreign car? (Please check one.)
1. Yes, I would want to buy a foreign car.
2. I might.
3. Not sure.
4. I might not.
5. No, I would not.

Q29. Please answer your experience with foreign cars in the past and within the past year. (Check Yes or No)

	In the past		Within the past year	
	Yes	No	Yes	No
(1) Owned one in the past (Or owns one now)	1	2	1	2
(2) Have driven one	1	2	1	2
(3) Have been in one	1	2	1	2
(4) Have seen one	1	2	1	2
(5) Have read articles about foreign cars.	1	2	1	2

Q30 Within the past year, have you experienced any of the following? (Check Yes or No)

	Yes	No
(1) Have seen in TV ads	1	2
(2) Have seen TV programs	1	2
(3) Have seen ads in papers or magazines	1	2
(4) Have seen one discussed in papers or magazines	1	2
(5) Friends/acquaintance have told me about them	1	2
(6) Street ads or others	1	2

Please tell us about yourself.

F1. In the following list of statements about cars, do you find any that apply to you? If so to what degrees are they applicable? Please check appropriate figures.

5. Not applicable
4. Not quite applicable
3. Neutral
2. Somewhat applicable.
1. Quite applicable.

(1) Driving is part of my leisure.	1 2 3 4 5
(2) When I go out for pleasure I go driving.	1 2 3 4 5
(3) I don't drive much except when I go shopping and so forth.	1 2 3 4 5
(4) If I can get by without driving, I'd rather not.	1 2 3 4 5

1. Not specified -> Go to Q4.
2. Definite term (How long? years)
3. Automatic renewal (By when should you inform cancellation? months)

Q4. Reasons of cancellation in terms of manufacturer
1. Insolvent
2. Dishonest trade
3. Deprivation of sales licence
4. Nonfulfillment of the contract
5. Others (To be listed)

Q5. Is there any exclusive agreement in the contract?
1. Limited to only specified cars in the contract
2. Limited to any car of the manufacturer
3. No limitation
4. Not described specifically

Sub Q1. Condition of trading cars of another manufacturer
1. Need permission from the manufacturer
2. Need notification to the manufacturer
3. Not particular

Q6. The sales volume obligation in the contract
1. Exist
2. Not exist

Q7. Sales volume achievement goal
1. Set by each petname
2. Set by each model
3. Set by the total sales volume
4. Not set -> Go to Q8.

Sub Q1. How is the sales volume achievement goal set ?
1. One-sided indication from the manufacturer
2. Convention between manufacturer and dealer

Sub Q2. What is your benefit when you realize sales volume achievement goal ?
1. Rebate
2. Others (To be listed)

Sub Q3. What does the manufacturer do when you could not achieve the goal?
1. To be listed

Q8. Rebate from the manufacturer
1. Rebate in proportion to the sales volume
2. Rebate for sales of old models
3. Season rebate
4. Rebate for the campaign
5. Rebate for sales of unpopular models

Q9. Actual rebate for last year from the manufacturer
1. Rebate in proportion to the sales volume -> Go to Sub Q1.
2. Rebate for sales of old models
3. Season rebate -> Go to Sub Q2.
4. Rebate for the campaign -> Go to Sub Q3.
5. Rebate for sales of unpopular models

Sub Q1. Details of the rebate
1. (To be filled by the respondent)
2. (To be filled by the respondent)

Sub Q2. When did the manufacturer rebate last year?
1. January
:
:
12. December

Sub Q3. How often did the manufacturer rebate last year?
Times :

Q10. Other issues on the contract
1. Accounting method
2. Accounting procedure
3. Net worth ratio
4. Working capital
5. Inventory level of parts
6. Not especially

Q11 Restriction to your showroom from the manufacturer
1. Exist
2. Not exist -> Go to Q12.

Sub Q1. In detail
1. Color of showroom
2. Floor plan
3. Logotype
4. Uniform of sales person
5. Others (To be listed)

Q12. Restriction to placing other manufacturers' cars in your showroom
1. Exist
2. Not exist -> Go to Q13.

Sub Q1. What is the restriction in detail ?
1. Independent showroom
2. Separation by screens
3. Separation by color

Q13. Promotion costs which shared with the manufacturer
1. Pamphlet
2. Local commercial
3. Country-wide commercial
4. Campaign
5. Uniform
6. CI
7. Others (to be listed)

Q14. Dealer support from the manufacturer except promotion activity
1. Accounting system
2. Inventory management system
3. Order entry system
4. Other information system
5. Education/training program
6. Send the manufacturer's employee
7. Marketing information

Q15. How long does it take to get the manufacturer's response to a user's claim
Days :

Sub Q1. How do you feel about the response time?
1. Quick
2. Somewhat quick
3. Normal
4. Somewhat slow
5. Slow

Q16. How do you feel about quality of the response?
1. Sufficient
2. Somewhat sufficient
3. Normal
4. Somewhat insufficient
5. Insufficient

Q17. Is the sales activity restricted within some area in the contract?
1. Yes
2. No

Sub Q1. Can you sell the manufacturer's car out of the territory?
1. Yes
2. No

Sub Q2. Did you sell the manufacturer's car out of the territory year?
1. Yes
2. No

Sub Q3. Then, do you have to pay a part of profits to the dealer?
1. Yes
2. No, you don't have to

Q18. Is there any restriction to locations of showrooms?
1. Yes
2. No

Q19. Are there any other dealers of same division in the territory?
1. Yes
2. No

Q20. Are there any other dealers of same manufacturer in the territory?
1. Yes
2. No

Q21 to Q25 are asked only to single dealers

Q21. What the benefit for you to be "single" dealer?
1. Instable supply from manufacturer
2. Higher procurement costs
3. Higher inventory costs
4. No utilization of manufacturer's creditability
5. Less timely and insufficient customer service
6. Less margin due to competition
7. Others (To be listed)

Q22. What the demerits of a single dealer?
1. Narrower product line
2. Subject to one manufacturer's strategy and policy
3. Others (To be listed)

Q23. What are problems you feel in dealing U.S. cars?
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9. Others (To be listed)

Q24. Have you ever been a dual dealer?
1. Yes
2. No

Sub Q1. Why did you quit being dual?
Reason :

Q25. Have you ever handled cars without franchised agreement last year?
Name :
Manufacturer :

Q26 to Q32 are asked only to dual dealers

Q26. Have you ever dealt with more than one manufacturer since your inception?
1. Yes
2. No

Q27. What are merits of dual dealership?
1. Broader product line
2. Less subject to one manufacturer's strategy and policy
3. Optimal product portfolio
4. Others (To be listed)

Q29. What are demerits of dual dealership?
1. Instable supply from manufacturer
2. Higher procurement costs
3. Higher inventory costs
4. No utilization of manufacturer's creditability
5. Less timely and insufficient customer service
6. Less margin due to competition

Q29 to Q30 are asked only to dual dealers handling U.S. cars

Q29. What merits do you feel in dealing U.S. cars?
1. Broader product line
2. Niche marketing
3. Financial merit
4. Others (To be listed)

Q30. What are problems you feel in dealing U.S. cars?
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9. Others (To be listed)

Q31 is asked only to dual dealers not handling U.S. cars

Q31. Why do you hesitate to deal U.S. cars
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9. Others (To be listed)

Q32 is asked only to dual dealers not handling imported cars

Q32. Why do you hesitate to deal U.S. cars
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9 Others (To be listed)

Q33. Do you want to increase the number of manufacturers you deal with?
1. On-going negotiation
2. Considering specifically
3. Positive, but not specific
4. Maybe
5. No way

Sub. Why?
1. Nothing wrong with the current situation
2. No extra capacity
3. High initial investment required
4. Higher inventory costs
5. Less margin due to competition
6. Others (To be listed)

Q34. What conditions do you require manufacturer to do business?
1. Better margin
2. Stable supply of parts and maintenance
3. Dealer help
4. Good products
5. Others (To be listed)

Q35. Do you want to deal with foreign vehicle manufacturers?
1. Yes
2. No

Sub. Why not?
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9. Others (To be listed)

Q36. Do you want to deal with U.S. vehicle manufacturers?
1. Yes
2. No

Sub. Why not?
1. Bad communication with manufacturers
2. Different business practice
3. Insufficient financial support from manufacturers
4. Unmet needs of Japanese consumers in style
5. Unmet needs of Japanese consumers in size
6. Unmet needs of Japanese consumers in performance
7. Too many repairs and claims
8. Slow response of manufacturer to inquiries
9. Others (To be listed)

After Q37 are asked to all the respondents

Q37. Do you think the number of dual dealership will increase?
1. Drastically
2. To some extent
3. No change
4. Rather decrease

Q39. Do you think the number of U.S. car dealership will increase?
1. Drastically
2. To some extent
3. No change
4. Rather decrease

* * * * *

F1. Please fill in the following boxes regarding your financial performance last year

Revenue
- New Car
- Used Car
- Service
- Parts
- Fees
- Others

Profits
- New Car
- Used Car
- Service
- Parts
- Fees
- Others

General Selling and Administrative Expenses
- Advertisements
- Labor
- Depreciations
- Others

Current Profits
Net profits
Assets
Equity

F2. Please tell us the ratio of equities held by manufacturers
Manufacturer Percentage

Please tell us the ratio of long-term debts provided by manufacturer
Manufacturer Percentage

Please tell us the ratio of short-term debts provided by manufacturer
Manufacturer Percentage

Do you have debts guaranteed by manufacturer?
Manufacturer Percentage

F3. Please tell us the structure of employees

Sales
Service/maintenance
Other administration

F4. Please tell us your branch structure

New-car branches
Used-car branches
Service Plants
Others

F5. Please tell us the type of duality

One-stop dual
Quasi dual
Single

F6. Please tell us the following information for the whole firm and the top five petnames you sold last year

Petname	Units sold	Value sold	Gross margin

F7. Do you serve as a distributor to other dealers?

F8 Do you serve as a importer?

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

S. 998/P.L. 102–258

To authorize and direct the Secretary of the Interior to terminate a reservation of use and occupancy at the Buffalo National River; and for other purposes. (Mar. 19, 1992; 106 Stat. 76; 2 pages) Price: $1.00

S. 2184/P.L. 102–259

Morris K. Udall Scholarship and Excellence in National Environmental and Native American Public Policy Act of 1992. (Mar. 19, 1992; 106 Stat. 78; 7 pages) Price: $1.00

Last List March 23, 1992

Order Now!

The United States Government Manual 1991/92

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

$23.00 per copy

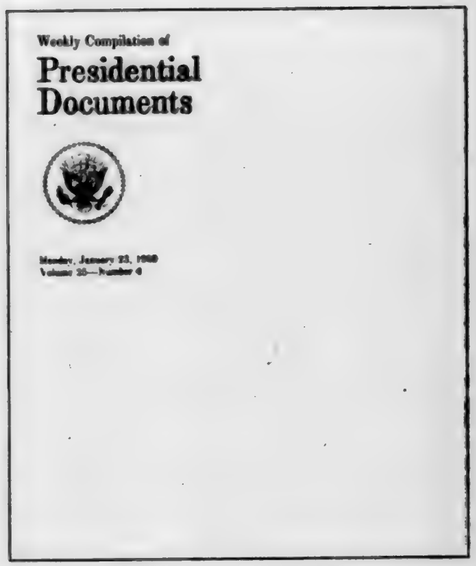
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center
St. Louis: 1-800-366-2998
Missouri (outside St. Louis): 1-800-735-8004

Presidential Documents

Title 3—

The President

Executive Order 12793 of March 20, 1992

Continuing the Presidential Service Certificate and the Presidential Service Badge

By the authority vested in me as President by the Constitution and the laws of the United States of America, and as Commander in Chief of the Armed Forces of the United States, it is ordered as follows:

Section 1. *Presidential Service Certificate.* The Presidential Service Certificate ("Certificate") is hereby continued, the design of which accompanies and is hereby made a part of this order. The Certificate shall be awarded in the name of the President of the United States by the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or, when the Coast Guard is not operating as a service in the Navy, the Secretary of Transportation. It shall be awarded by the appropriate Secretary to members of the Army, Navy, Marine Corps, Air Force, and Coast Guard, respectively, who have been assigned to the White House Office; to military units and support facilities under the administration of the White House Military Office; or to other direct support positions within the Executive Office of the President ("EOP"). The Certificate shall not be issued to any member who is issued a Vice Presidential Certificate, or similar EOP Certificate, for the same period of service. Such assignment must be for a period of at least one year, subsequent to January 21, 1989.

Sec. 2. *Presidential Service Badge.* The Presidential Service Badge ("Badge") is hereby continued, the design of which accompanies and is hereby made a part of this order. The Badge shall be awarded to those members of the Armed Forces who have been granted the Certificate and shall be awarded in the same manner in which the Certificate has been given. The Badge shall be worn as a part of the uniform of those individuals under such regulations as their respective Secretaries may severally prescribe.

Sec. 3. Only one Certificate may be awarded to an individual.

Sec. 4. The Certificate and the Badge may be granted posthumously.

Sec. 5. This order shall supersede Executive Order No. 10879 of June 1, 1960, as amended.

George Bush

THE WHITE HOUSE,
March 20, 1992.

Rules and Regulations

Federal Register
Vol. 57, No. 58
Wednesday, March 25, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-ASW-02; Amdt. 39-8204; AD 92-07-08]

Airworthiness Directives; Bell Helicopter Textron, Inc. (BHTI), Model 204B, 205A, 205A-1, 205B and 212 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Bell Model 204B, 205A, 205A-1, 205B and 212 helicopters. This action requires a review of maintenance records, a one-time inspection, and replacement, if necessary, of certain swashplate support assemblies purchased after June 1990. This amendment is prompted by concern that unapproved and possibly unsafe swashplate support assemblies may have been installed on certain helicopters. The actions specified in this AD are intended to prevent possible loss of main rotor control and possible loss of the helicopter.

DATED: Effective on March 25, 1992.

Comments for inclusion in the Rules Docket must be received by May 11, 1992.

ADDRESSES: The applicable service information may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, Texas 76101. This information may be examined at the FAA, Office of the Assistant Chief Counsel, 4400 Blue Mound Road, room 158, Building 3B, Fort Worth, Texas.

Submit comments in triplicate to the Federal Aviation Administration, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-ASW-02, 4400 Blue Mound Road, Fort Worth, Texas 76193-0007.

FOR FURTHER INFORMATION CONTACT: Mr. Tom K. Henry, Federal Aviation Administration, Rotorcraft Certification Office, ASW-170, Fort Worth, Texas 76193-0170, telephone (817) 624-5168.

SUPPLEMENTARY INFORMATION: The FAA has determined that approximately 156 swashplate support assemblies, part number (P/N) 204-011-404-125, were machined by a vendor with oversize holes in the two outboard lugs. The vendor attempted to repair this mistake by installing oversize bushings in the lugs. This repair method was rejected by the type design owner who declared the swashplate support assemblies unacceptable for use. The vendor was also informed by the FAA in June 1990, that the 156 swashplate support assemblies were unacceptable and not approved for use on the Bell Model 204B, 205A, 205A-1, 205B and 212 helicopters. The FAA received a report on December 10, 1991, that two of the unapproved swashplate support assemblies were discovered in Colombia, South America. On January 7, 1992, two more unapproved swashplate support assemblies were reportedly found in Saudi Arabia. These parts were allegedly shipped from two supply houses in the United States.

Since these swashplate support assemblies may be installed on other helicopters of this same type design, this AD is being issued to identify and, if necessary, to require replacement of unairworthy assemblies to prevent possible failure of the swashplate support assembly and the subsequent loss of main rotor control. This AD requires a review of maintenance records to determine if a swashplate support assembly, P/N 204-011-404-125, installed on a helicopter was purchased after June 1990. This AD also requires a one-time inspection of the swashplate support assembly for oversize bushings on either outboard lug of any assembly purchased after June 1990. Any unapproved assembly must be removed and replaced with an airworthy assembly prior to further flight.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "**ADDRESSES**". All communications received on or before the closing date for comments will be considered, and the rule may be changed in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of the AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this amendment must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-ASW-02." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 20, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive.

AD 92-07-06 Bell Helicopter Textron, Inc., (BHTI): Amendment 39-8204 Docket No. 92-ASW-02.

Applicability: Model 204B, 205A, 205A-1, 205B and 212 helicopters, certificated in any category, equipped with swashplate support assembly, part number (P/N) 204-011-404-125.

Compliance: Required as indicated, unless already accomplished.

To prevent possible failure of the swashplate support assembly that could result in loss of the helicopter, accomplish the following:

(a) Within the next 25 hours' time in service after the effective date of this AD, determine the purchase date of the swashplate support assembly, P/N 204-011-404-125, by reviewing the maintenance records. If the assembly was purchased prior to June 1990, no further action is required. If the swashplate support assembly was purchased after June 1990, accomplish the requirements of paragraph (b).

(b) Perform the following:

(1) Disassemble the swashplate support assembly in accordance with the applicable component overhaul manual to the point necessary to allow an inspection of the outboard gimbal ring support lug and shoulder bushing.

(2) Measure the outside diameters (OD) of the bushing flange on each outboard bushing.

(i) If each outboard bushing has a flange OD of 0.61 to 0.64 inches, no further inspections are required.

(ii) If either bushing has a flange OD in excess of 0.64 inches, replace the swashplate support assembly with an airworthy part before further flight.

Note: Unapproved bushings with OD's of approximately 0.61 inches have been reported.

(c) Prior to the installation of any swashplate support assembly, P/N 204-011-404-125, comply with this AD.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the helicopter to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance times, which provides an acceptable level of safety, may be used when approved by the Manager, Rotorcraft Certification Office, ASW-170, Rotorcraft Directorate, Aircraft Certification Service, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76193-0170. The request shall be forwarded through an FAA Airworthiness Inspector, who may concur or comment and then sent it to the Manager of the Rotorcraft Certification Office.

(f) Bell Helicopter Textron, Inc., Alert Service Bulletins 204-91-32, 205-91-45, 205B-91-10, and 212-91-72, all dated December 13, 1991, provide an acceptable, alternate means of compliance with this AD.

(g) This amendment becomes effective on March 25, 1992.

Issued in Forth Worth, Texas, on March 5, 1992.

Henry A. Armstrong,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[Regulation No. 16]

RIN 0960-AD09

Supplemental Security Income; Determining Disability for a Child Under Age 18; Correction

AGENCY: Social Security Administration, HHS.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to the final regulations which were published Monday, February 11 1991, at 56 FR 5534. The regulations revised the disability evaluation and determination process for supplemental security income (SSI) claims of children based on disability.

EFFECTIVE DATE: February 11, 1991.

FOR FURTHER INFORMATION CONTACT: Martin Sussman, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (410) 965-1758.

SUPPLEMENTARY INFORMATION:

Background

On February 11, 1991, we published in the **Federal Register** a final rule with request for comments which revised the process for determining SSI claims based on disability for a child under age 18. The revisions were designed to comply with the February 20, 1990, U.S. Supreme Court ruling in the case of *Sullivan* v. *Zebley*, 493 U.S. 521, 110 S. Ct. 885 (1990). In *Zebley*, the Supreme Court required the use of an individualized functional assessment of children whose impairments did not meet or equal the severity of listed impairments.

Although the revised regulations were issued as a final rule, we asked for comments concerning these rules from members of the public. We are carefully considering the comments we received in order to determine whether any changes are necessary.

Need for Correction

The final regulations published in the Code of Federal Regulations (April 1, 1991 edition) inadvertently deleted a sentence in § 416.994(b)(4)(ii) which we did not amend when we revised the section effective February 11, 1991. This document corrects the sentence in the regulations.

(Catalog of Federal Domestic Assistance Program No. 93.807 Supplemental Security Income.)

List of Subjects in 20 CFR Part 416

Administrative practice and procedure, Aged, Blind, Disability benefits, Public Assistance programs, Supplemental Security Income.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Accordingly, 20 CFR part 416, subpart I is corrected by making the following correcting amendments:

1. The authority citation for subpart I continues to read as follows:

Authority: Secs. 1102, 1614(a), 1619, 1631(a) and (d)(1), and 1633 of the Social Security Act; 42 U.S.C. 1302, 1382c(a), 1382h, 1383(a) and (d)(1), and 1383b; secs. 2, 5, 6, and 15 of Pub. L. 98-460, 98 Stat. 1794, 1801, 1802, and 1806.

2. Section 416.994(b)(4)(ii) is revised to read as follows:

§ 416.994 How we will decide whether your disability continues or ends, disabled adults.

* * * * *

(b) * * *

(4) * * *

(ii) *You do not cooperate with us.* If there is a question about whether you continue to be disabled and we ask you to give us medical or other evidence or to go for a physical or mental examination by a certain date, we will find that your disability has ended if you fail, without good cause, to do what we ask. Section 416.1411 discusses how we will decide whether you have good cause for failure to cooperate. The month in which your disability ends will be the first month in which you failed to do what we asked.

[Docket No. 91N-0506]

Center for Veterinary Medicine Address Change; Editorial Amendments; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting the final rule that appeared in the **Federal Register** of February 25, 1992 (57 FR 6474), which amended certain regulations to reflect the change of address for the Center for Veterinary Medicine. The document was published with an incorrect docket number "91N-506"; the correct docket number is "91N-0506." Also, the document incorrectly identified the mailing address for the Office of the Commissioner as "7500 Standish Pl., Rockville, MD 20855." The correct mailing address is "5600 Fishers Lane, Rockville, MD 20857," as it is currently listed in 21 CFR 5.100. This document corrects those errors.

EFFECTIVE DATE: February 25, 1992.

FOR FURTHER INFORMATION CONTACT: Robert S. Brigham, Center for Veterinary Medicine (HFV-238), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8737.

In FR Doc. 92-4274, appearing on page 6474, in the **Federal Register** of Tuesday, February 25, 1992, the following corrections are made:

1. On page 6474, in the 3d column, the docket number "91N-506" is removed and "91N-0506" is added in its place.

2. On page 6475, in the 2d column, amendment 2. is corrected to read as follows:

§ 5.100 [Amended]

2. Section 5.100 Headquarters is amended by removing the designation for footnote 1 for the Center for Veterinary Medicine and replacing it with a designation for footnote 5, and footnotes 5 and 6 are revised to read as follows:

[5] 7500 Standish Pl., Rockville MD 20855.

[6] Jefferson, AR 72079-9502.

Dated: March 19, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

---

21 CFR Part 5

Delegations of Authority and Organization

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is revising the regulations to set forth the current organizational structure of the agency as well as the current addresses for Headquarters.

EFFECTIVE DATE: March 25, 1992.

FOR FURTHER INFORMATION CONTACT: Ellen Rawlings, Division of Management Systems and Policy (HFA-340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4976.

SUPPLEMENTARY INFORMATION: The regulations are being amended in 21 CFR 5.100 to reflect the current organizational structure of the agency and provide current addresses for Headquarters offices.

There were major changes in FDA's organizational structure in 1991. The Immediate Office of the Office of the Commissioner, previously composed of seven offices, is now composed of three offices. The remainder of the Office of the Commissioner is composed of four offices, each headed by a Deputy Commissioner. These offices include: (1) Office of External Affairs, including the: Office of Consumer Affairs, Office of Health Affairs, Office of Legislative Affairs, Office of Public Affairs, and Office of Small Business, Scientific, and Trade Affairs; (2) Office of Management and Systems, including the: Office of Planning and Evaluation and the Office of Management (previously called the Office of Management and Operations); (3) Office of Policy, including the: Policy Development and Coordination Staff, Policy Research Staff, and Regulations Policy and Management Staff; and (4) Office of Operations, including the: Office of Aids Coordination, Office of Biotechnology, Office of Orphan Products Development, and Office of Regulatory Affairs, and the six Centers. The Office of Science has been abolished, the offices under it transferred to the Office of Operations.

Five of the six Centers have renamed, added, or deleted a number of divisions and offices, as follows: In the Center for Biologics Evaluation and Research, the Division of Information Management was added to the Office of Management, and the Division of Biostatistics and Epidemiology was added to the Office of Biological Product Review; in the Center for Devices and Radiological Health the Office of Device Evaluation was reorganized from seven divisions into five, and the Office of Science and Technology added the Division of Management, Information, and Support Services; in the Center for Drug Evaluation and Research, the Office of Over-the-Counter Drug Evaluation was added with three staffs; in the Center for Food Safety and Applied Nutrition, the Office of Seafood, with two divisions, was added; and in the Center for Veterinary Medicine, the Office of Management added the Division of Program Communications and Administrative Management and the Division of Program and Information Systems. Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Imports, Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under

authority delegated to the Commissioner of Food and Drugs, 21 CFR part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

1. The authority citation for 21 CFR part 5 is revised to read as follows:

Authority: 5 U.S.C. 504, 552, App. 2; 7 U.S.C. 138a, 2271; 15 U.S.C. 638, 1261–1282, 3701–3711a; secs. 2–12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451–1461); 21 U.S.C. 41–50, 61–63, 141–149, 467f, 679(b), 801–886, 1031–1309; secs. 201–903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321–394); 35 U.S.C. 156; secs. 301, 302, 303, 307, 310, 311, 351, 352, 361, 362, 1701–1706, 2101 of the Public Health Service Act (42 U.S.C. 241, 242, 242a, 242l, 242n, 243, 262, 263, 264, 265, 300u–300u5, 300aa–1); 42 U.S.C. 1395y, 3246b, 4332, 4631(a), 10007–10008; E.O. 11490, 11921, and 12591.

2. Section 5.100 is revised to read as follows:

§ 5.100 Headquarters.

The central organization of the Food and Drug Administration consists of the following:

Certain Cash or Deferred Arrangements and Employee and Matching Contributions Under Employee Plans; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to final regulations published in the Federal Register for Thursday, August 15, 1991, at page 40507 (56 FR 40507). The final regulation relates to certain cash or deferred arrangements (CODAs) and employee and matching contributions under employee plans.

EFFECTIVE DATE: August 15, 1991.

FOR FURTHER INFORMATION CONTACT: Catherine Livingston Fernandez, at 202–377–8372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This final regulation replaces all of the 1988 proposed and final regulations on these subjects, and the amendments to regulations under section 401 (k) and (m) of the Internal Revenue Code of 1986, issued on May 14, 1990.

Need for Correction

As published, the final regulation contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulation which was the subject of FR Doc. 91–19010, is corrected as follows:

1. On page 40510, column 1, in the preamble, in paragraph "3.a.", the ninth line from the top of the column, the language "compensated employers in the ESOP, it" is corrected to read "compensated employees in the ESOP, it".

2. On page 40510, column 2, in the preamble, in paragraph "3.b.", line 6, the language "regulations, the ACP test applies to a" is corrected to read "regulations, ADP test applies to a".

3. On page 40511, column 2, in the preamble, in paragraph "d", the seventh line in the second paragraph, the language "statutory language of sections 401(k)" is corrected to read "statutory language of section 401(k)".

4. On page 40511, column 3, in the preamble, in paragraph "d", the third line from the top of the column, the language "use of restructuring to satisfy sections" is corrected to read "use of restructuring to satisfy section".

5. On page 40511, column 3, in the preamble, in paragraph "d", the seventh line from the top of the column, the language "1, 1992, plans subject to sections 401(k)" is corrected to read "1, 1992, plans subject to section 401(k)".

PART 1—[CORRECTED]

§ 1.401(k)–1 [Corrected]

6. On page 40519, column 3, under § 1.401(k)–1(a)(6)(ii)(B), lines 13 and 14, the date "October 15, 1991," is corrected to read "January 1, 1992,".

7. On page 40520, column 1, § 1.401(k)–1(a)(7)(i), the fifth line from the bottom of the paragraph, the language "contributions for purpose of section" is corrected to read "contributions for purposes of section".

8. On page 40521, column 3, under § 1.401(k)–1(b)(5)(v), line 4, the language "paragraph (b)(4)(i) of this section for the" is corrected to read "paragraph (b)(4)(i)(A) of this section for the".

9. On page 40523, column 2, under § 1.401(k)–1(d)(2)(ii), fourth line from the bottom of the column, the language "contributions. In each case, the" is corrected to read "contributions. The".

10. On page 40523, column 3, under § 1.401(k)–1(d)(2)(ii), line 1, the language "specified in the plan that is no later than" is corrected to read "specified in the plan that is no later than December 31, 1988, or if later,".

11. On page 40524, column 1, under § 1.401(k)–1(d)(2)(iii)(B)(*4*), line 6, the language "on reasonable commercial terms in an" is corrected to read "on reasonable commercial terms, in an".

12. On page 40525, column 2, under § 1.401(k)–1(e)(1), line 17, the language "contributions, or both. See paragraph (e)" is corrected to read "contributions, or both. See paragraph (e)(7)".

13. On page 40527, column 3, following § 1.401(k)–1(f)(3)(ii)(B), in the flush material, lines 5 through 9, from the top of the column, the language "404, 409, 411, 412, 415, 416, and 417 and with respect to recharacterized excess contributions for plan years beginning after December 31, 1988, section

401(k)(2). Thus, for example," is corrected to read "404, 409, 411, 415, 416, and 417.".

14. On page 40528, column 1, under § 1.401(k)–1(f)(3)(v), in line 10 of paragraph (i) of the *Example*, the language "deferred under to the trust on the last day of" is corrected to read "deferred to the trust on the last day of".

15. On page 40529, column 2, under § 1.401(k)–1(f)(5)(i)(B), line 3, the language "§ 1.402(g)–1(d), the amount of excess" is corrected to read "§ 1.402(g)–1(e), the amount of excess".

16. On page 40530, column 1, under § 1.401(k)–1(f)(7), line 6 of paragraph (iii) of *Example 1*, the language "for the group of highly compensated group" is corrected to read "for the group of highly compensated employees".

17. On page 40532, column 1, in the paragraph heading under § 1.401(k)–1(g)(8)(ii), line 2, the language "December 31, 1979 and before January 1," is corrected to read "December 31, 1979, and before January 1,".

18. On page 40532, column 3, under § 1.401(k)–1(g)(11)(iii)(D)(*2*), line 6, the language "collective bargaining unit and the" is corrected to read "collective bargaining unit, and the".

19. On page 40533, column 2, under § 1.401(k)–1(g)(14), line 4, the language "section 401(k)." is corrected to read "section 401(k)(7).".

20. On page 40533, column 2, under § 1.401(k)–1(h)(3)(iii)(A), line 3, the language "of section 401(k) is satisfied for plan" is corrected to read "of section 401(k) are satisfied for plan".

21. On page 40533, column 3, under § 1.401(k)–1(h)(3)(iii)(A), the fourth line from the top of the column, the language "section 401(k) is applied separately with" is corrected to read "section 401(k) are applied separately with".

22. On page 40533, column 3, under § 1.401(k)–1(h)(3)(iii)(B)(*2*), line 15, the language "contributions formula, and attributes" is corrected to read "contribution formula, and attributes".

§ 1.401(m)–1 [Amended]

23. On page 40534, column 3, under § 1.401(m)–1(a)(*1*), line 10, the language "beginning after December 31, 1986, (or" is corrected to read "beginning after December 31, 1986 (or".

24. On page 40541, column 1, under § 1.401(m)–1(f)(1)(ii)(A), the sixth line from the bottom of the paragraph, the language "(f)(2) of the section for rules regarding" is corrected to read "(f)(2) of this section for rules regarding".

25. On page 40542, column 2, under § 1.401(m)–1(f)(12)(ii), line 4, the language "paragraphs (f)(12)(i) of this section," is corrected to read "paragraph (f)(12)(i) of this section.".

26. On page 40542, column 2, under § 1.401(m)–1(f)(12)(ii), line 18, the language "that is described in § 1.402(g)–1(b) is not" is corrected to read "that is intended to be a qualified plan or a plan described in § 1.402(g)–1(b) is not".

27. On page 40543, column 1, under § 1.401(m)–1(g)(5)(ii)(B)(*2*), line 15, the language "contributions formula, and attributes" is corrected to read "contribution formula, and attributes".

§ 1.402(m)–2 [Corrected]

28. On page 40544, column 2, under § 1.402(m)–2(c)(1), the last two lines in the paragraph, the language "with § 1.401(m)–1(b)(5)(F)(1) or § 1.401(k)–1(b)(5) and (e)(1)" is corrected to read "with § 1.401(k)–1 (b)(5) and (f)(1) or § 1.401(m)–1 (b)(5) and (e)(1)".

§ 1.402(a)–1 [Corrected]

29. On page 40545, column 3, under § 1.402(a)–1(d)(3)(iv), lines 5 and 6, the language "arrangement will be treated as a qualified cash or deferred arrangement" is corrected to read "arrangement will be treated as satisfying section 401(k)(3)".

§ 1.415–6 [Corrected]

30. On page 40549, column 3, under § 1.415–6(b)(1)(iii) is corrected to read as follows:

(b) * * *

(1) * * *

(iii) *Certain collectively bargained plans.* In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986, for contributions or benefits pursuant to a collective bargaining agreement, the date specified in this paragraph is:

(A) September 31, 1991, in the case of paragraph (b)(1)(i) of this section; and

(B) October 1, 1991, in the case of paragraph (b)(1)(ii) of this section.

* * * * *

PART 54—[CORRECTED]

§ 54.4979–0 [Corrected]

31. On page 40550, column 2, under § 54.4979–0, line 2, the language "appear in § 54.9479–1." is corrected to read "appear in § 54.4979.".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

26 CFR Part 301

[T.D. 8391]

RIN 1545-AM71

Statute of Limitations on Collection After Assessment and Collection After Commencement of Judicial Proceedings

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to the final regulations (T.D. 8391), which were published Tuesday, February 11, 1992, (57 FR 4937). The regulations contain regulatory amendments regarding the statute of limitations on collection after assessment and collection after the commencement of judicial proceedings.

EFFECTIVE DATE: February 11, 1992.

FOR FURTHER INFORMATION CONTACT: Kevin B. Connelly, (202) 535–9682 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections amend the Procedure and Administration Regulations (26 CFR part 301) under section 6502 of the Internal Revenue Code.

Need for Correction

As published, the final regulations contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulations (T.D. 8391), which was the subject of FR Doc. 92–2026, is corrected as follows:

Paragraph 1. On page 4937, column 2, in the preamble under the heading "Supplementary Information", line 9, the language "101–5080), by section 1015(u)(1) of the" is corrected to read "101–508), by section 1015(u)(1) of the".

Par. 2. On page 4938, column 1, in § 301.6502–1, paragraph (a)(3), line 9, the language "for a judgment against the taxpayer" is corrected to read "a judgment against the taxpayer".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

[FR Doc. 92-6599 Filed 3-24-92; 8:45 am]

BILLING CODE 4830-01-M

Office of Foreign Assets Control

31 CFR Part 555

Soviet Gold Coin Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule, amendments.

SUMMARY: This rule amends the Soviet Gold Coin Regulations, 31 CFR part 555 (the "Regulations"), to authorize the importation of gold coins minted in or offered for sale by the Union of Soviet Socialist Republics, in light of legislation repealing the previous statutory ban on the importation of such coins. In addition, a new section is added to the Regulations containing the control number assigned by the Office of Management and Budget pursuant to the Paperwork Reduction Act.

EFFECTIVE DATE: December 4, 1991.

FOR FURTHER INFORMATION CONTACT: William B. Hoffman, Chief Counsel, tel.: (202) 535–6020, Steven I. Pinter, Chief of Licensing, tel.: (202) 535–9449, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: Pursuant to section 510 of the Comprehensive Anti-Apartheid Act of 1986, 22 U.S.C. 5100, the Office of Foreign Assets Control issued the Soviet Gold Coin Regulations, 31 CFR part 555 (the "Regulations"), implementing the ban on the importation of Soviet gold coins contained in that section. Congress repealed section 510, effective December 4, 1991 (Pub. L. 102–182, 105 Stat. 1234). In light of this action, the Office of Foreign Assets Control is amending the Regulations to permit the importation of Soviet gold coins. This final rule does not affect enforcement actions with respect to prior violations of the Regulations. In addition, the Regulations are being amended to reflect the approval of the Office of Management and Budget for information collection requirements of the Regulations.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) does not apply.

List of Subjects in 31 CFR Part 555

Imports, Gold coins, Soviet Union.

For the reasons set forth in the preamble, 31 CFR part 555 is amended as follows:

PART 555—SOVIET GOLD COIN REGULATIONS

1. The authority citation for part 555 is revised to read as follows:

Authority: Pub. L. 99–440, 100 Stat. 1086; Pub. L. 99–631; E.O. 12571, 51 FR 39505, October 29, 1986; Pub. L. 102–182, 105 Stat. 1234.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

2. Section 555.503 is added to read as follows:

§ 555.503 Authorization of importation of Soviet gold coins.

Notwithstanding the provisions of subpart B of this part, transactions occurring on or after December 4, 1991, otherwise prohibited by §§ 555.201 and 555.203, are hereby authorized.

3. Subpart I, containing § 555.901, is added to read as follows:

Subpart I—Paperwork Reduction Act

§ 555.901 Paperwork Reduction Act Notice.

The information collection requirements in §§ 555.601, 555.602, and 555.801 have been approved by the Office of Management and Budget and assigned control number 1505–0095.

Dated: February 24, 1992.

Steven I. Pinter,

Acting Director, Office of Foreign Assets Control.

Approved: March 2, 1992.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 185

[FAP 6H5505/R1140; FRL–4042–7]

RIN 2070–AB78

Pesticide Tolerances for Chlorpyrifos

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide chlorpyrifos, per se, in or on all food items (other than those already covered by a higher tolerance as a result of use on growing crops) in food service establishments where food and food products are prepared and served, as a result of the application of chlorpyrifos in microencapsulated form as a crack and crevice or spot treatment. The regulation to establish a maximum permissible level for residues of the insecticide was requested in a petition submitted by DowElanco.

EFFECTIVE DATE: This regulation becomes effective March 25, 1992.

ADDRESSES: Written objections, identified by the document control number, (FAP 6H5505/R1140), may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Dennis H. Edwards, Jr., Product Manager (PM) 19, Registration Division (H7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 207, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-6386.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 24, 1991 (56 FR 66832), which announced that DowElanco had submitted a food additive petition (FAP 6H5505) to EPA proposing to amend 21 CFR 193.85 (recodified as 40 CFR 185.1000 in the **Federal Register** of June 29, 1988 (53 FR 24667)), by establishing a food additive regulation for the microencapsulated form of the insecticide chlorpyrifos (O,O-diethyl O-(3,5,6-trichloro-2-pyridyl) phosphorothioate). The petitioner subsequently amended the petition by proposing a tolerance of 0.1 ppm in the food additive regulation for residues of chlorpyrifos, per se, in or on all food items (other than those already covered by a higher tolerance as a result of use on growing crops) in food service establishments where food and food products are prepared and served.

There were no comments or requests for a referral to an advisory committee received in response to the notice of filing. The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered capable of achieving the intended physical or technical effect. The toxicological data considered in support of the proposed tolerance include the following.

1. A 2-year dog feeding study with a no-observed-effect level (NOEL) for systemic effects of 1.0 milligram (mg)/kilogram (kg)/day and lowest effect level (LEL) (increased liver weight) of

3.0 mg/kg/day. The NOELs for cholinesterase (ChE) inhibition were as follows: 0.01 mg/kg/day for plasma, 0.1 mg/kg/day for red blood cells, and 1.0 mg/kg/day for brain cells. Levels tested were 0, 0.01, 0.03, 0.1, 1.0, and 3 mg/kg/day.

2. A voluntary human study with ChE NOEL of 0.03 mg/kg/day (based on 20 days of exposure at this level).

3. A 2-year mouse chronic toxicity/carcinogenicity study with a NOEL of 15 ppm for systemic effects (equivalent to 2.25 mg/kg/day) and no carcinogenic effects observed under the conditions of the study at all levels tested (0, 0.5, 5, and 15 ppm, equivalent to 0.075, 0.75, and 2.25 mg/kg/day).

4. A 2-year rat feeding/carcinogenicity study with ChE NOEL of 0.1 and LEL of 1.0 mg/kg/day (based on decreased plasma and brain ChE activity), and a systemic NOEL of 1.0 mg/kg/day and LEL of 10 mg/kg/day (based on decreased erythrocyte and hemoglobin values and increased platelet count during the first year). There were no observed carcinogenic effects at the levels tested (0.05, 0.1, 1.0, and 10 mg/kg/day) under the conditions of the study.

5. A three-generation reproduction study in rats with no reproductive effects observed at the dietary levels tested (0, 0.1, 0.3, and 1.0 mg/kg/day).

6. Two rat developmental toxicity studies: one negative for developmental toxicity at all dose levels (levels tested were 0.1, 3.0, and 15.0 mg/kg/day); and one with maternal and developmental NOELs of 2.5 mg/kg/day (levels tested, by gavage, were 0, 0.5, 2.5, and 15 mg/kg/day).

7. A mouse developmental toxicity study with a teratogenic NOEL greater than 25 mg/kg/day (highest dose tested) and a developmental fetotoxic NOEL of 10 mg/kg/day and LEL of 25 mg/kg/day (decreased fetal length and increased skeletal variants).

8. A developmental toxicity study in rabbits with maternal and developmental NOELs of 81 mg/kg/day, and maternal and developmental LELs of 140 mg/kg/day (based on maternal decreased food consumption on gestation days 15 to 19, and body weight loss during the dosing period, followed by a compensatory weight gain; and based on a slight reduction in fetal weights and crown-rump lengths, and fetal increased incidence of unossified fifth sternebrae and/or xiphisternum). Levels tested were 0, 1, 9, 81, and 140 mg/kg/day.

9. An acute delayed neurotoxicity study in the hen that was negative at 50 and 100 mg/kg/day.

10. Several mutagenicity studies which were all negative. These include an Ames assay, two Chinese hamster ovary cell mutation assays, a micronucleus assay for chromosomal aberration, an in vitro chromosomal aberration assay with and without enzymatic activation, and an unscheduled DNA synthesis assay.

11. A general metabolism study in rats shows that the major metabolite of chlorpyrifos is TCP. TCP is considered to be less toxic than chlorpyrifos and is not a ChE inhibitor. Several available toxicity studies of TCP are described as follows:

a. A 90-day rat feeding study with a systemic NOEL of 30 mg/kg/day. Levels tested were 0, 10, 30, and 100 mg/kg/day.

b. A rat developmental toxicity study with no developmental toxicity observed at the dosages tested (0, 50, 100, and 150 mg/kg/day).

c. Mutagenicity studies (including an Ames assay and an unscheduled DNA synthesis assay) were negative for mutagenic effects.

Most existing tolerances for chlorpyrifos are established for combined residues of chlorpyrifos and its TCP metabolite. The Agency has concluded that the TCP metabolite is not of toxicological concern and is proposing comprehensive tolerance revisions to remove TCP from the tolerance definition. Accordingly, tolerances can be lowered by reducing them to levels adequate to cover residues of chlorpyrifos per se. The Agency is currently reviewing data that will allow a comprehensive tolerance revision to remove TCP from the tolerance expression. The tolerance for all food items in food service establishments is established for chlorpyrifos per se since the residue data indicate that a tolerance of 0.1 ppm is adequate to cover residues of chlorpyrifos resulting from the use of a microencapsulated form.

The reference dose (RfD) based on the human voluntary ChE study (ChE NOEL of 0.03 mg/kg/day) and using a 10-fold uncertainty factor is calculated to be 0.003 mg/kg of body weight/day. The anticipated residue contribution (ARC) from published tolerances and a pending tolerance on livestock commodities for chlorpyrifos is estimated to be 0.002063 mg/kg of body weight/day for the overall U.S. population. This represents 68.8 percent of the RfD. The addition of tolerances for food items in food service establishments raises the ARC to 0.002069 mg/kg of body weight/day. This represents 69.6 percent of the RfD.

The contribution to exposure from the addition of tolerances for food items in food service establishments is estimated to be 0.000025 mg/kg of body weight/day, calculated to be less than 1 percent of the total estimated exposures, a negligible increase.

These ARCs are probably overestimates of the dietary exposure. Because it cannot be known which specific foods are or are not consumed or prepared at food service establishments, it was assumed that all foods in our data file contain chlorpyrifos at a level of 0.005 ppm, the anticipated residue derived from data obtained at a food service establishment. This scenario is not likely to actually occur, but there is no way to refine the assessment to reflect exposure from only those foods handled in food service establishments. In addition, it is assumed for many food items in this analysis that 100 percent of the crop is treated, when in fact only those foods subject to exposure in the food-handling establishments would actually be "treated."

Adequate gas chromatographic analytical methods are available in the Pesticide Analytical Manual, Vol. II (PAM II), for enforcement purposes. There are currently no actions pending against continued registration of this chemical.

Based on the above information, the Agency concludes that use of the pesticide in accordance with the terms of the proposed amendment of the food additive regulation at 40 CFR 185.1000 will be safe. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 185

Administrative practice and procedure, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 5, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, part 185 of chapter I of title 40 of the Code of Federal Regulations is amended as follows:

PART 185—[AMENDED]

1. The authority citation for part 185 continues to read as follows:

Authority: 21 U.S.C. 348.

2. In § 185.1000, by adding paragraph (c), to read as follows:

§ 185.1000 Chlorpyrifos.

* * * * *

(c) A tolerance of 0.1 part per million is established for residues of chlorpyrifos, per se, in or on all food items (other than those already covered by a higher tolerance as a result of use on growing crops) in food service establishments where food and food products are prepared and served, as a result of the application of chlorpyrifos in microencapsulated form.

(1) Application of a microencapsulated product shall be limited solely to spot and/or crack and crevice treatment in food handling establishments where food and food products are prepared and served. All treatments shall be applied in such a manner as to avoid contamination of food or food contact surfaces.

(2) Spray concentrations shall be limited to a maximum of 0.5 percent of the active ingredient by weight.

(3) For crack and crevice treatment, equipment capable of delivering a pin stream of spray directly into cracks and crevices or capable of applying small amounts of insecticide into cracks and crevices shall be used.

(4) For spot treatment, an individual spot shall not exceed 2 square feet.

(5) To assure safe use of the insecticide, its label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

43 CFR Part 20

Employee Responsibilities and Conduct

AGENCY: United States Department of the Interior.

ACTION: Notice of availability of appendix C.

SUMMARY: This notice announces the availability of appendix C to 43 CFR part 20. This appendix lists positions within the Department of the Interior for which Confidential Statements of Employment and Financial Interests (DI-212) are required to be filed. Appendix C has been updated as of December 1, 1991 and has been printed as a agency document. This appendix will not be published in the **Federal Register** but will be available to the public upon request.

EFFECTIVE DATE: December 1, 1991.

ADDRESS: Copies of appendix C may be obtained from the Deputy Ethics Counselor for each bureau or office within the Department of the Interior. You may address your request to the Deputy Ethics Counselor, (also insert the name of the specific bureau or office), 1849 C Streets, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Gabriele J. Paone or Mr. Mason Tsai, Departmental Ethics and Audit Liaison Staff, U.S. Department of the Interior, Washington, DC 20240, telephone number: (202) 208-5916.

SUPPLEMENTARY INFORMATION: The Department of the Interior has received approval from the U.S. Office of Government Ethics to publish Appendix C to 43 CFR part 20 as an agency document. The availability of this document is hereby announced in the **Federal Register**. The initial notice of this annual process was provided with the publication of 43 CFR part 20 as a proposed rule on October 6, 1980 (45 FR 66370). This arrangement meets administrative requirements which affect only Department of the Interior employees and at the same time defrays the cost of publishing the appendix C listing in the **Federal Register**.

Appendix C lists Department of the Interior positions, in addition to GS (or GM)-15's for which a Confidential Statement of Employment and Financial Interests (Form DI-212) is required to be filed by 43 CFR 20.735-30. Positions identified in appendix C are effective for the February 1, 1992 filing deadline. The appendix C listings of positions have been approved by the U.S. Office of Government Ethics.

List of Subjects in 43 CFR Part 20

Conflicts of interest, Government employees.

Authorities: Appendix C to part 20 of title 43 of the Code of Federal Regulations is published under Executive Order 12731, 30 FR 6459, 3 CFR 1964-65 Comp., as amended (18 U.S.C. 201 Note); 5 CFR 735.104; and 5 U.S.C. 301.

Each appendix C listing of positions was compiled by its respective bureau and office ethics counselor. Consolidation of bureau and office listings into one appendix C document was done by the Departmental Ethics and Audit Liaison Staff.

Dated: February 20, 1992.

Ed Kay,

Designated Agency Ethics Official and Principal Deputy Assistant Secretary—Policy, Management and Budget.

BILLING CODE 4310-10-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-434; RM-6865, RM-6830, RM-7107]

Radio Broadcasting Services; Winter Park, Naples, and Okeechobee, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Pursuant to a settlement agreement among the parties, this document substitutes Channel 276C3 for Channel 276A at Naples, Florida, and modifies the license of Station WSGL-FM, Naples, accordingly. See 54 FR 41-468, published October 10, 1989. This document also substitutes Channel 276C2 for Channel 276A at Okeechobee, Florida, and modifies the license of Station WOKC-FM, Okeechobee, accordingly; and substitutes Channel 276C3 for Channel 276A at Winter Park, Florida, and modifies the license of Station WLOQ-FM, Winter Park, accordingly. The reference coordinates for Channel 276C3 at Naples are 26-01-45 and 81-43-25. The reference coordinates for Channel 276C2 at Okeechobee are 27-12-55 and 80-31-50. The reference coordinates for Channel 276C3 at Winter Park are 28-34-00 and 81-31-00. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89–434, adopted March 10, 1992, and released March 19, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st Street NW., Washington, DC 20036.

47 CFR Part 73

[MM Docket No. 91–350; RM–7835]

Radio Broadcasting Services; Hinesville, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes channel 284C3 for channel 284A at Hinesville, Georgia, and modifies the construction permit for Station WHLV(FM) to specify operation on the higher powered channel, at the request of Bullie Broadcasting Corporation. See 56 FR 65875, December 19, 1991. Channel 284C3 can be allotted to Hinesville in compliance with the Commission's minimum distance separation requirements with a site restriction of 12.8 kilometers (7.9 miles) west, in order to avoid a short-spacing to Station WFYV(FM), channel 283C, Atlantic Beach, Florida. The coordinates are North Latitude 31–52–18 and West Longitude 81–43–46. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

47 CFR Part 73

[MM Docket No. 91–232; RM–7755]

Radio Broadcasting Services; Wilburton and Antlers, OK

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Blue Mountain Broadcasting, substitutes Channel 279C1 for Channel 279A at Wilburton, Oklahoma, modifies Station KZUD's construction permit to specify operation on the higher class channel, and substitutes Channel 284A for unoccupied and unapplied for Channel 281A at Antlers, Oklahoma. See 56 FR 40295, August 14, 1991. Channel 279C1 can be allotted at Wilburton in compliance with the Commission's minimum distance separation requirements with a site restriction of 36.2 kilometers (22.5 miles) west to avoid short-spacings to Channel 276C2 at Atoka, Oklahoma, which is reserved for use by Station KHKC–FM; Station KKYK, Channel 279C, Little Rock, Arkansas; and Station KKIX, Channel 280C1, Fayetteville, Arkansas, at coordinates North Latitude 34–59–06 and West Longitude 95–41–53. Channel 284A can be allotted to Antlers without the imposition of a site restriction, at coordinates 34–13–54 and 95–36–06. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 391

Qualification of Drivers; Waiver Applications; Vision

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent to accept applications for waivers.

SUMMARY: This notice announces the FHWA's intention to accept applications from drivers of commercial motor vehicles for waivers of certain vision requirements contained in the Federal Motor Carrier Safety Regulations (FMCSRs). The waivers will be granted only upon meeting specific preconditions and agreeing to comply with other subsequent requirements. Waivers will be issued pending the resolution of a concurrent rulemaking action, or until the expiration of a stated time period, whichever occurs first. Demographic and work related data will be collected from the waiver drivers and compared to similar data collected from a control group of drivers who meet the current Federal vision requirements. The FHWA is seeking volunteers to participate in the control group. This action will preserve the jobs, at least temporarily, of those drivers who do not meet current Federal vision standards, but have met the qualification standards of State licensing agencies enabling them to obtain a license to operate commercial motor vehicles legally in intrastate commerce. The object of the waiver program is to provide objective data to be considered in relation to a rulemaking exploring the feasibility of relaxing the current absolute vision standards in 49 CFR part 391 in favor of a more individualized standard.

DATES: The FHWA will accept applications for waivers of its vision requirements, found at 49 CFR 391.41(b)(10), until September 21, 1992. The waiver application will be processed as quickly as possible. The waiver will be issued for a period of three years or until the current rulemaking addressing the FHWA's vision requirements is completed, whichever occurs first.

ADDRESSES: Applications for waiver must be submitted in legible form and mailed to the Vision Waiver Program, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Neill L. Thomas of Mrs. Eliane Viner, (202) 366–2981, Office of Motor Carrier Standards, or Mr. Paul L. Brennan, Office of Chief Counsel, (202) 366–0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: The Federal government began regulating vision standards for drivers engaged in interstate commerce in the late 1930's. At that time, the standard was based on a consensus of experts in the fields of vision and driver safety. The vision standard has been amended several times in the direction of requiring more stringent visual capacity.

Current regulations in 49 CFR 391.41 prescribe "absolute" vision standards with virtually no possibility of waivers. Those drivers who are unable to meet those standards are precluded from operating commercial motor vehicles (CMV) in interstate commerce. Many more drivers are now or will be precluded from operating a CMV in instrastate commerce as more and more States adopt the Federal driver qualification requirements, especially as they relate to the issuance of CMV drivers' licenses by the various States. Section 206(f) of the Motor Carrier Safety Act of 1984 (Pub. L. 98–554, 98 Stat. 2832, 2835) authorizes the granting of a waiver from any part of the FMCSRs if it can be determined that "such waiver is not contrary to the public interest and is consistent with the safe operation of commercial motor vehicles."

The purpose of establishing vision standards for drivers of CMV's is to prevent individuals who will present an unreasonable and avoidable safety risk to other users of the highways from being allowed to operate vehicles which, because of their size or cargo, present a grave hazard. It is axiomatic that vision plays an essential role in the driving task. However, specifying a precise level of visual capability necessary for safe driving continues to be problematic because of the lack of empirical evidence on which to base a clearly defensible measure of acceptable visual performance. Furthermore, there has been little meaningful data forthcoming from the medical community that would be helpful in establishing a new vision standard that could embrace the concept of "individual determination" found in the recently enacted Americans With Disabilities Act, and its forerunner, the Rehabilitation Act of 1973 (Pub. L. 93–112, 87 Stat. 355, as amended). Because good vision is such an integral part of safe driving, the FHWA must proceed cautiously in any undertaking which has so obvious a potential for risk.

The FHWA has, therefore, decided to initiate a program which, it believes, will provide the necessary data and avoid any unreasonable enhancement of risk. This action will also preserve the jobs of drivers who are being subjected to more stringent vision standards for the first time and are faced with job loss. In some cases, the earning potential of an intrastate driver could be enhanced by operating under the interstate waiver program. The program will allow the FHWA to conduct a study comparing a group of experienced, visually deficient drivers with a control group of drivers who meet the Federal vision standard for a finite period of time, and perform an in-depth comparative analysis of both groups. It is anticipated that the FHWA will obtain sufficient empirical data, which, when analyzed, will provide a reliable basis for establishing visual requirements that are consistent with the goals of safety, yet provide maximum employment opportunity for those persons covered under the Americans With Disabilities Act and the Rehabilitation Act of 1973. The FHWA intends to use the data from this waiver program to support the rulemaking recently initiated to review the FHWA's driver vision standard (57 FR 6793, February 28, 1992).

In considering waivers, the FHWA believes it has a duty to take every reasonable precaution to avoid any adverse impact on highway safety. Therefore, waivers will only be granted to those persons with visual deficiencies who: (1) Are legally qualified and/or previously licensed to operate a CMV in their State of domicile or were legally qualified and licensed at the time of their last renewal period, but were denied a license solely because the State of license adopted the more stringent Federal vision standard; (2) have or had been operating a CMV for the four years preceding the application; (3) have had a driving record, for the same period of time as (2) above, that contains no conviction for a moving traffic violation involving the operation of a CMV, and no involvement in a reportable accident, from which the applicant received a citation for a moving traffic violation; (4) have at least 20/40 (Snellen), corrected or uncorrected, in the better eye; and (5) have been examined by an ophthalmologist or an optometrist identifying the visual condition, determining that the condition has not worsened since the person's last

required physical examination, and providing an opinion that the person can perform the driving tasks required to operate a CMV. By restricting waivers to drivers who meet those conditions, the FHWA believes it has minimized the risk while still allowing for a substantial number of applicants.

To successfully perform the comparative analysis which will be used to establish a basis for specific rulemaking action, a control group of drivers, the same size as the group of waived drivers, is necessary. The FHWA is, therefore, seeking drivers who meet the current Federal vision requirements as volunteers. These volunteers would be asked to submit the same demographic information required from waiver applicants. The volunteer drivers would also be asked to report the same-work related information required by the waived drivers. The FHWA is seeking the cooperation of all motor carriers, owner-operators, drivers, trade associations, and labor unions to encourage drivers to volunteer for participation in this very important study. The FHWA will pursue further outreach efforts to enlist the necessary support. Those interested persons should submit the information requested below to the address shown below.

The FHWA will accept applications for waivers of its vision requirements, found at 49 CFR 391.41(b)(10), until September 21, 1992. The waiver application will be processed as quickly as possible. The waiver will be issued for a period of three years or until the current rulemaking addressing the FHWA's vision requirements is completed, whichever occurs first. Applications for waiver must be submitted in legible form and mailed to the Vision Waiver Program, 400 Seventh Street, SW., Washington, DC 20590.

The FHWA recognizes that States are already adapting their vision standards to accommodate the more stringent Federal requirement. This is being done because of the condition imposed on the receipt of Motor Carrier Safety Assistance Program funds and the certification required of applicants for the Commercial Driver's License. To date, the States receiving funds under the MCSAP have been allowed to grandfather the medical requirements for intrastate drivers. This could be a lifetime act for a driver as long as the condition for which the driver was waived does not become worse. Due to the pending rulemaking to incorporate the Tolerance Guidelines into 49 CFR part 350, and the medical studies being conducted by the FHWA, the grandfather provision, for new drivers, will be extended for one year to March 31, 1993. The proposed tolerance guidelines will allow States latitude in establishing waiver programs for intrastate drivers and building a data base which should be beneficial to the FHWA in future rulemakings involving medical qualifications. The States will, under the MCSAP, continue to be required to meet the intrastate tolerance guidelines. Some States have already changed to the Federal standard, and may view this waiver program as a backward step. The FHWA hopes that such States are able to allow their qualified licensees to participate in the waiver program by applying the license standard operative in the State on April 1, 1990, even if it means requalifying drivers, who are able to meet the conditions for waivers stated herein, but who have been disqualified by virtue of the State's having adopted the Federal standard. Nothing contained herein is intended to require States to apply the Federal vision standard to drivers who operate wholly in intrastate commerce.

Prerequisites

Waiver applicants must submit the following information with their request for a waiver of the Federal vision requirements for drivers of CMV's operated in interstate commerce. Those persons who volunteer for participation as a control group driver will be expected to furnish the same data, except any information about a vision deficiency.

Name of applicant (first name, middle initial, last name);
Address (Street number and name);
City, State, and Zip Code;
Telephone Number (Area Code and Number);
Sex (Male or Female);
Date of Birth (Month, Day, and Year);
Age;
Social Security Number;
State Driver's License Number (Name of Issuing State and License Number);
Driver's License Classification Code;
Driver's License Date of Issuance (Month, Day, and Year);
Experience:
Number of years driving straight trucks;
Approximate number of miles driving straight trucks;
Number of years driving tractor trailer combinations;
Approximate number of miles driving tractor trailer combinations;
Number of years driving buses;
Approximate number of miles driving buses;
Anticipated Post-Waiver Operations:
Your employer's name, address and telephone number, if applicable;
The type of vehicle you will operate (Straight truck, tractor trailer combination, bus);
The commodities that will be transported (e.g., general freight, liquids in bulk (in cargo tanks), steel, dry bulk, large heavy machinery, refrigerated products);
The States in which you will drive;
The estimated number of miles you will drive per year;
The estimated number of daylight driving hours per week;
The estimated number of nighttime driving hours per week;
Documentation that you possessed a license to operate a CMV as of April 1, 1990 (e.g., photostatic copy of the driver's license; certification from the State licensing agency).

Documentation that you have operated a CMV for the four year period immediately preceding April 1, 1990 (e.g., a signed statement from the applicant's employer or a certified statement from applicant, in the event the applicant was operating as a motor carrier).

Documentation that your driving record for the four year period immediately preceding April 1, 1990 contains (1) no conviction for a moving traffic violation involving the operation of a CMV, and (2) no involvement in a reportable accident, from which the applicant received a citation for a moving traffic violation.

Documentation that you have been examined by an ophthalmologist or an optometrist and that person has: (1) Identified the visual deficiency and defined it, (2) certified that the visual deficiency has not worsened since the last vision examination required by your State's driver licensing agency, (3) certified that your visual acuity is at least 20/40 (Snellen), corrected or uncorrected, in the better eye, and (4) that in his/her opinion you can perform the driving tasks required to operate a CMV.

Waiver Requirements

There will be three special conditions attached to the issuance of any waiver issued to a visually deficient driver. The first two of these three special conditions will also apply to those drivers who voluntarily participate in the control group. Each waived driver will be required to:

(1) Report any conviction for a moving traffic violation involving the operation of a CMV to the FHWA within 15 days following the conviction. (A photostatic copy of the citation issued for which the conviction was declared will meet the reporting requirement.);

(2) Report any accident involvement whatsoever involving the operation of a CMV to the FHWA within 15 days following the accident. (A copy of an accident report prepared by a law enforcement official or the motor carrier will meet the reporting requirement.); and

(3) Submit documentation that you have been examined by an ophthalmologist or an optometrist, each year, within 15 days before the anniversary date of the waiver issuance date and that person has certified that the visual deficiency has not worsened since the last vision examination required by the waiver.

(49 U.S.C. app. 2505; 49 U.S.C. 504 and 3102; 49 CFR 1.48.)

Issued on: March 18, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 911176-2018]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the first quarter's allowance of prohibited species catch (PSC) of Pacific halibut in the Gulf of Alaska (GOA) has been caught. NMFS is prohibiting fishing for groundfish in the GOA with trawl gear other than pelagic trawl gear. This action is necessary to prevent the first quarter PSC allowance of Pacific halibut established for trawl gear from being exceeded. This action is intended to accomplish the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP).

EFFECTIVE DATES: 12 noon, Alaska local time (A.l.t.), March 22, 1992, through 12 midnight, A.l.t., March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, Resource Management Specialist, NMFS, 907-586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the United States exclusive economic zone within the GOA is managed by the Secretary of Commerce according to the FMP prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson Fishery Conservation and Management Act. The FMP is implemented by regulations appearing at 50 CFR 611.92 and parts 620 and 672.

Under 50 CFR 672.20(f)(2), annual Pacific halibut PSC limits are established and apportioned among the GOA regulatory areas and districts for trawl gear for the 1992 fishing year. Further, § 672.20(f)(2)(iii) provides that the PSC limit of Pacific halibut may be apportioned on a seasonal basis. The notice of final specifications of groundfish total allowable catch (TAC) and Pacific halibut bycatch (57 FR 2844, January 24, 1992) establishes the 1992 seasonal apportionments of Pacific halibut for trawl gear as follows: January 1 through March 31, 600 metric tons (mt); April 1 through June 30, 600 mt; July 1 through September 29, 400 mt; and September 30 through December 31, 400 mt.

Under § 672.20(f)(1)(ii), the Regional Director has determined that in the GOA, the domestic annual processing (DAP) trawl groundfish fisheries have reached the 600 mt PSC mortality limit of Pacific halibut apportioned to this gear type for the first quarter of 1992. Therefore, NMFS prohibits fishing by DAP vessels with trawl gear other than pelagic trawl gear in the GOA from 12 noon, A.l.t., March 22, 1992, through 12 midnight, A.l.t., March 31, 1992.

Classification

This action is taken under 50 CFR 672.20, and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 57, No. 58
Wednesday, March 25, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Parts 317, 320, and 381

[Docket No. 91-006N]

RIN 0583-AB34

Intended Implementation Date of Rulemaking for Nutrition Labeling of Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Food Safety and Inspection Service (FSIS) is announcing the intended implementation date of its rulemaking for nutrition labeling of meat and poultry products.

DATES: The intended implementation date will be 18 months from the date of promulgation of the final rule.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Edwards, Director, Product Assessment Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 205-0080.

Background

On November 27, 1991, the Agency published in the **Federal Register** (56 FR 60302-60364) a proposal to amend the Federal meat and poultry products inspection regulations by permitting voluntary nutrition labeling on single-ingredient, raw meat and poultry products, and by establishing mandatory nutrition labeling for all other meat and poultry products, with the exception of products used for further processing. The public comment period on this proposed rule closed on February 25, 1992.

In the proposed rule, the Agency stated that within 6 months of the November 27, 1991, publication date, it would publish a notice in the **Federal Register** announcing the intended implementation date of the rulemaking (56 FR 60322). In the proposed rule, the Agency stated that it has been examining several implementation time frames and specifically requested comments from the public concerning the implementation period for the nutrition labeling regulations. Based upon a careful review of the numerous comments received from the public on the implementation date issue, the Agency has decided that the nutrition labeling regulations concerning meat and poultry products will be implemented 18 months after publication of the final rule in the **Federal Register**. The Agency intends to publish in the **Federal Register** final nutrition labeling regulations on November 8, 1992. The regulations, therefore, would be implemented on May 8, 1994. The Agency believes that such an implementation timeframe is reasonable, based upon all relevant circumstances and upon the numerous comments received on this issued.

Done at Washington, DC, on: March 18, 1992.

H. Russell Cross,

Administrator, Food Safety and Inspection Service.

[Docket No. 91-006S]

RIN 0583-AB34

Nutrition Labeling of Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Supplemental proposed rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is announcing its intent to supplement the proposed rule regarding nutrition labeling of meat and poultry products published in the **Federal Register** on November 27, 1991. The Agency is also publishing a notice announcing the implementation date of the nutrition labeling rulemaking (see elsewhere in the **Federal Register**. This supplemental proposed rule would (1) allow for the use of data bases and recipe analyses using data bases, as well as the proposed laboratory analyses, on which to base the nutrition information on processed meat and poultry product labels, and (2) provide an small business exemption from mandatory nutrition labeling. This action is being taken because of the Agency's concern that its proposed rule not impose undue cost burdens and that its proposal be implemented in the most cost-effective manner possible while providing consumers with the same high quality nutritional information. Given extensive public comments, the Department continues to review other nutrition labeling provisions proposed on November 27, 1991. The Agency will provide for public discussions during the comment period on the small business exemption issues raised in this supplemental proposed rule.

DATES: Comments must be received on or before May 26, 1992.

ADDRESSES: Written comments to: Policy Office, Attn: Linda Carey, FSIS Hearing Clerk, room 3171, South Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Oral comments as provided by the Poultry Products Inspection Act should be directed to: Mr. Charles Edward at (202) 205-0080. (See also "Comments" under "**SUPPLEMENTARY INFORMATION.**")

FOR FURTHER INFORMATION CONTACT: Charles Edwards, Director, Product Assessment Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC (202) 205-0080.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Effect on Small Entities

The proposed rule on which this supplemental proposed rule is based was reviewed under USDA procedures established to implement Executive Order 12291 and was classified as a major rule pursuant to section 1(b)(1) of that order because it is likely to result in an annual effect on the economy of $100 million or more. The review is reported in its Preliminary Regulatory Impact Analysis (PRIA), which was published as an appendix to the proposed rule, and in a supplement to the PRIA which was published on February 18, 1992 (57 FR 5956). The PRIA also satisfies the analysis requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601 *et seq.*), which deals with the effect on small entities.

The PRIA indicates that the required laboratory analysis is a major cost of implementation of the proposed rule, and that the burden of compliance with the proposed rule may be greater for small businesses than for medium or large firms. In order to alleviate some cost burdens associated with the proposed rule, this supplemental proposed rule would permit nutrition information on processed meat and poultry product labels to be based on data bases and recipe analyses using data bases as an alternative to the proposed laboratory analyses and would exempt small businesses from mandatory nutrition labeling.

Executive Order 12778

This supplemental proposed rule has been reviewed pursuant to Executive Order 12778, Civil Justice Reform. This supplement would provide for (1) the use of data bases and recipe analyses using data bases, as well as the previously proposed laboratory analyses, on which to base the nutrition information on processed meat and poultry product labels, and (2) a small business exemption from mandatory nutrition labeling.

This supplemental proposed rule concerns labeling meat and poultry products. States and local jurisdictions are preempted under the Federal Meat Inspection Act (FMIA) and the Poultry Products Inspection Act (PPIA) from imposing any marking, labeling, packaging, or ingredient requirements on federally inspected meat or poultry products that are in addition to, or different than, those imposed under the FMIA or the PPIA. States and local jurisdictions may, however, exercise concurrent jurisdiction over meat and poultry products that are outside official establishments for the purpose of preventing the distribution of meat or poultry products that are misbranded or adulterated under the FMIA or PPIA, or, in the case or imported articles, which are not at such an establishment, after their entry into the United States. Under the FMIA and the PPIA, States that maintain meat and poultry inspection programs must impose requirements on State inspected products and establishments that are at least equal to those required under the FMIA or PPIA. These States may, however, impose more stringent requirements on such State inspected products and establishments.

In the event of its adoption, no retroactive effect would be given to this supplemental proposed rule, and applicable administrative procedures must be exhausted before any judicial challenge to its provisions or their application. Those administrative procedures are set forth in the rules of practice govening proceedings for labeling determinations at 9 CFR parts 335 and 381, subpart W.

Paperwork Requirements

The proposed rule on which this supplemental proposed rule is based would require manufacturers to maintain records supporting the validity of nutrition information on the labels of meat and poultry products, and to make such records available to FSIS upon request. The paperwork requirements contained in that proposed rule were submitted to the Office of Management and Budget (OMB) for approval under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

This supplemental proposed rule would not affect the paperwork requirements. Manufacturers would be required to maintain such records whether the supporting data is obtained through laboratory analysis or data bases and recipe analyses using data bases. Thus, the paperwork requirements on manufacturers using data bases and recipe analyses using data bases would be covered under OMB's approval of paperwork requirements on manufacturers using laboratory analyses as the basis for nutrition information.

Comments

Interested persons are invited to submit written comments concerning this supplemental proposed rule. Written comments should be sent to the Policy Office at the address shown above and should refer to Docket Number 91-006S. Any person desiring an opportunity for oral presentation of views as provided under the Poultry Products Inspection Act must make such request to Mr. Charles Edwards so that arrangements may be made for such views to be presented. A record will be made of all views orally presented. All comments submitted in response to this notice will be available for public inspection in the Policy Office from 8 a.m. to 12:30 p.m. and from 1:30 p.m. to 4 p.m., Monday through Friday. Additionally, FSIS will hold several public discussions during the comment period, at times and locations to be announced, regarding the small business exemption issues raised in this document.

Background

On November 27, 1991, the Food Safety and Inspection Service (FSIS) published a proposed rule that would require nutrition labeling of most processed meat and poultry products, and provide for the voluntary nutrition labeling of single-ingredient, raw meat and poultry products (56 FR 60302). The proposed rule had a comment period of 90 days, ending February 25, 1992. FSIS received approximately 1100 comments on its proposed rule.

FSIS is in the process of analyzing the comments received and intends to issue final rules by November 1992. An initial review of the comments indicates that many commenters, while supporting the need for nutrition labeling of meat and poultry products, have significant concerns about the cost implications of the proposal for producers of meat and poultry products. Two significant concerns are clear: (1) The costs associated with the requirement that producers of meat and poultry products analyze their processed products in order to develop nutrient data for the labeling of those products; and (2) the absence in the proposal of an exemption for small businesses for which the cost impact may be excessive.

Since the previously proposed rule already provides for the use of representative data base values for single-ingredient, raw meat and poultry products, comments on this supplemental proposed rule should be limited to the issue of the use of data base values for processed meat and poultry products. Comments on an exemption for small businesses from mandatory nutrition labeling are also welcome.

As part of the proposed rule, a Preliminary Regulatory Impact Analysis (PRIA) was published on November 27, 1991, and supplemented in a **Federal Register** notice on February 18, 1992 (57 FR 5956). These documents indicate that laboratory analysis of foods is a major cost of implementation, and that the burden of compliance with the proposed regulation may be greater for small businesses that for medium or large firms.

Because of the Agency's review of comments, and concerns that its proposal not impose undue cost burdens and that nutrition labeling be implemented in the most cost-effective manner possible, FSIS has re-examined its position and now proposes to (1) permit companies to base the nutrient information on processed meat and poultry product labels on data bases and on recipe analyses using data bases, as well as on laboratory analyses; and (2) exempt small businesses from the nutrition labeling of meat and poultry products.

FSIS must consider the regulatory objective of providing accurate nutrition information, as well as the need to minimize the economic impact of its regulation. FSIS believes that basing

nutrition information on labels on acceptable data bases or on recipe analyses using data bases will provide consumers with high quality, accurate, and useful nutritional information. However, the Agency seeks input on the criteria for effective use of data bases. Further, FSIS believes that an exemption of small businesses from nutrition labeling can be established so as to affect such a small portion of the meat and poultry part of the diet, that the absence of nutrition information will have only a negligible impact on the ability of consumers to choose a healthy diet. FSIS seeks input on the appropriate criteria for determining such an exemption, such as annual sales by dollars, pounds of product, or units of product, and the relationship between the level of exempted meat and poultry products and the total consumption of meat and poultry products. For example, as required by the Nutrition Labeling and Education Act of 1990 (Pub. L. 101–535; 104 Stat. 2353), the Food and Drug Administration proposes to exempt a food from nutrition labeling if it is offered for sale by a person who has annual gross sales to consumers which are not more than $500,000, or gross sales made or business done in sales of food to consumers of not more than $50,000. USDA is willing to consider exemptions at levels of sales or production greater than $50,000 if warranted.

In order to assist FSIS in the development of a final rule which would permit the use of data bases and recipe analyses using data bases as a basis for nutrition labeling information and which exempts small businesses from nutrition labeling, FSIS is seeking public comment in response to the following questions:

With respect to the use of data bases and recipe analyses on processed product:

(1) What criteria should FSIS establish for the effective use of data bases for nutrition labeling of processed meat and poultry product labels?

(2) What guidelines should FSIS provide to producers who choose to use data bases and/or recipe analyses using data bases for developing nutrition information for processed products?

(3) What commercially available or industry prorietary data bases currently exist that could be used by producers of processed meat and poultry products?

(4) What changes should be made to FSIS's proposed compliance system if data bases are used?

With respect to small business exemptions:

(1) Should an exemption be based on the size of a company as measured by number of employees, or as measured by annual sales by dollars, by pounds of product, by units of products, or by some combination? At what level of dollars, pounds, or units?

(2) Should an exemption be based on the size of the overall business or on the production/sales of meat and poultry products only?

(3) Should FSIS exempt products or businesses, *i.e.*, should an exemption be based on the overall production/sales of a business or implemented on a product-by-product basis?

(4) How should FSIS define a business? Should each official establishment be considered a separate business or should FSIS consider company or corporate size for firms with more than one official establishment?

(5) If an exemption applies to a product, how should "product" be defined?

(6) What data should an establishment or company be required to provide to FSIS to demonstrate that it (or its product) meets the criteria for an exemption?

(7) How should year-to-year variations in sales at the level of the exemption be handled? In other words, how should FSIS define a sales level that exceeds an exemption level? Is it a single year's data, or a 2-year average, etc.?

(8) When an exemption level is exceeded, what period of time should be allowed for implementation of nutrition labeling?

(9) Should an exempt business or product be permitted to make a nutrient content claim (*e.g.*, "low fat") on a label which does not include nutrition information.

(10) What percent of total product would be affected by an exemption under specific criteria?

(11) How many meat and poultry establishments would be affected by the exemption under specific criteria?

Because the potential economic impact of nutritional labeling on small businesses is great and the relevant issues are novel and complex, FSIS will provide a forum for the public to express their views, suggestions, and concerns to officials. FSIS intends to hold public discussions during the comment period, at times and places to be announced, regarding the small business exemption issues raised in this supplemental proposed rule. Those responding to the FSIS announcement will be invited to take an active role in these discussion meetings. All members of the public will be welcome to attend and we especially encourage participation by representatives of interested industry and consumer groups. Agency officials will be involved in the exchange of information and ideas at these meetings. The views expressed will be preserved and included among the comments that the Agency will consider in developing a small business exemption.

Done at Washington, DC, on: March 18, 1992.

H. Russell Cross,

Administrator, Food Safety and Inspection Service.

[Docket No. 92–012ANPR]

Prior Label Approval System

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food Safety and Inspection Service (FSIS) is considering making changes to its current label approval process for labeling of meat and poultry products. At this time, two options are being considered: (1) Revising the current system by significantly reducing the scope review, through expanding the categories of labeling that would be generically approved, and replacing the current general requirement of FSIS approval of final labeling with one for sketch labeling only; and (2) replacing the current system with a system in which all labeling would be generically approved and used without prior submission to FSIS. FSIS is soliciting comments, information, data, and recommendations from consumers, industry, and other interested parties on those two options, as well as any other options that interested parties want to present.

DATES: Comments must be received on or before April 24, 1992.

ADDRESSES: Written comments to: Policy Office, Attn: Linda Carey, FSIS Hearing Clerk, room 3171, South Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Oral comments as provided by the Poultry Products Inspection Act should be directed to Mr. Ashland L. Clemons, (202) 205–0042. (See also "Comments" under "**SUPPLEMENTARY INFORMATION.**")

FOR FURTHER INFORMATION CONTACT: Ashland L. Clemons, Director, Food Labeling Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 205–0042.

SUPPLEMENTARY INFORMATION:

Comments

Interested persons are invited to submit written comments concerning this notice. Written comments should be sent to the Policy Office at the address shown above and should refer to Docket Number 92–012ANPR. Any person desiring an opportunity for an oral presentation of views as provided by the Poultry Products Inspection Act should make such request to Mr. Ashland Clemons so that arrangements can be made for such views to be presented. A transcript will be made of all views orally presented. All comments submitted in response to this notice will be available for public inspection in the Policy Office from 9 a.m. to 12:30 p.m., and from 1:30 p.m. to 4 p.m., Monday through Friday.

Background

Introduction

The Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*) direct the Secretary of Agriculture to maintain inspection programs designed to assure consumers that meat and poultry products are wholesome, not adulterated, and are properly marked, labeled, and packaged. The term "labeling" is defined in the FMIA to mean all labels and other written, printed, or graphic matter (1) upon any article or any of its containers or wrappers, or (2) accompanying such article. The PPIA has a similar definition for labeling.

In order to assure that the labeling of meat and poultry products comply with the FMIA and PPIA and the regulations promulgated thereunder, FSIS, pursuant to section 7 of the FMIA and section 8 of the PPIA (21U.S.C. 607, 457), conducts a prior approval program for labeling as specified in 9 CFR parts 317 and 381 (subpart N). This program is administered by the Food Labeling Division (FLD), FSIS, in Washington, DC.

To apply for labeling approval, meat and poultry processors, or their representatives, must submit final labeling and may submit sketch labeling, accompanied by FSIS Form 7234, "Application for Approval of Labels, Marking or Device," to FLD for reivew. The labeling application and final printed labeling must be submitted to FLD in triplicate. The labeling application must also contain, as required, the processing procedures and handling information.

In 1983, FSIS promulgated regulations granting limited label approval authority to the inspector-in-charge (IIC) of official establishments (48 FR 11410). As a result of these regulations, the IIC has authority to approve certain types of labeling, as set forth in the regulations (9 CFR 317.4(e) and 381.132(c)).

The regulations also permit some generically approved labeling, for use by establishments without prior submission for FSIS approval. Such labeling must previously have been approved, must include all mandatory information in a sufficiently prominent manner, and cannot otherwise be false or misleading in any particular (9 CFR 317.5 and 381.134).

The current prior approval system involves several hindrances to economic growth. Producers of meat and poultry products face direct label application costs. FSIS has estimated that the two options referred to previously would reduce manufacturer's direct application costs by $4 and $5 million, respectively. In addition, delays in the application process slow introduction of new products, imposing added costs on manufacturers. Any delay in product introduction limits consumers' options to buy new products.

The administrative costs of the program impose costs on taxpapers. FLD now receives 170,000 applications per year for prior approval. FSIS has estimated that administrative costs could be reduced by $1 million under both options being considered.

Options Being Considered

At this time, the Agency is seeking comments on two options for a prior label approval system. Comments on other options are also welcomed and encouraged.

Option 1—Prior Approval of Sketches and Expanded Categories of Generically Approved Labeling

This option would revise the current system by expanding the categories of generically approved labeling, and by replacing the current general requirement of FSIS final labeling approval with one for sketch labeling approval only. The FLD in Washington, DC, would only approve labeling sketches when labeling is required to be submitted to FSIS. No final labeling would be required or permitted to be submitted to Washington, DC, for approval. The IIC would not approve any labeling. Labeling that would be generically approved would include: (1) Labeling categories now approved by the IIC (9 CFR 317.4(e) and 381.132(c)); (2) labeling for product which has a standard of identity or composition in 9 CFR part 319 and 381 (subpart P); (3) labeling for product stamped "For Export Only"; and (4) labeling used in more than one plant owned by the same company, that is identical, except for the official establishment number. This would mean approximately 75 percent of all current approvals.

FSIS seeks comments on the issue of whether generic approval should be provided for labeling that includes geographical, quality, health, nutrient content, or negative claims, or guarantees.

Option 2—Generic Approval for All Labeling

Under this option, all labeling would be generically approved under criteria to be adopted and promulgated after appropriate notice and comment by the Agency. FSIS would not provide prior review and specific approval of labeling. Such a labeling approval system would be similar to that used by the Federal Food and Drug Administration for food which it regulates. FLD would review a sufficient number of randomly selected labeling samples to maintain accuracy of labeling information.

FSIS seeks comments on the role of the IIC in any new proposal for review or enforcement of labeling. Under both options, establishments would continue to be responsible for ensuring that labeling, ingredients, formulation, and processing procedures meet FSIS rules and policies, and establishments would be required to continue to provide the IIC with information necessary to monitor compliance.

Done at Washington, DC, on: March 18, 1992.

H. Russell Cross,

Administrator, Food Safety and Inspection Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–29–AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped With General Electric CF6–80C2 Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that currently requires repetitive inspections for damage to the engine fire extinguishing tubes located in the number two and number three engine struts, and replacement or repair, if necessary, of the tubes and/or tube support clamps, and reorienting the clamp. That action was promoted by multiple reports of support clamps in the number two and three engine struts chafing a hole in the engine fire extinguishing tubes. This action would expand the number of affected airplanes and require a modification that would constitute terminating action for the currently required inspections. The actions specified by the proposed AD are intended to prevent inadequate fire extinguishing agent concentration levels within the engine fire zone following engine fire system discharge.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transportation Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-29-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. G. Michael Collins, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S; telephone (206) 227-2689; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, Transportation Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice maybe changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-29-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-29-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On March 25, 1991, the FAA issued AD 91-08-06, Amendment 39-6960 (56 FR 14303, April 9, 1991), to require repetitive inspections for damage to the engine fire extinguishing tubes located in the number two and three engine struts and replacement or repair, if necessary, of the engine fire extinguishing tubes and/or tube support clamps. In addition, the AD action requires reorienting a fire extinguishing tube clamp to clear the adjacent structure. That action was prompted by multiple reports of support clamps in the number two and three engine struts chafing a hole in the engine fire extinguishing tubes. The requirements of that AD are intended to prevent inadequate fire extinguishing agent concentration levels within the engine fire zone following engine fire system discharge.

Since the issuance of that AD, the manufacturer has designed a modification that, if installed, would constitute terminating action for the currently required inspections. Additionally, the manufacturer has advised the FAA that the same design deficiency addressed by the existing AD exists on additional airplanes.

The FAA has reviewed and approved Boeing Alert Service Bulletin 747-26A2179, Revision 2, dated December 18, 1991, that describes procedures for performing inspections to detect damage, chafing, or wear in the engine fire extinguishing system support clamp and tube located in the number two and three engine struts, and replacement, if necessary. The service bulletin also describes procedures for installing a modification that would eliminate the need for those inspections. The modification involves (1) installation of rubber block clamps in place of the loop-type clamps in the number two and number three struts; (2) replacing the support brackets for the clamps in the number two and number three struts; and (3) installing a new fire extinguishing discharge tube in the number two strut. This revision of the service bulletin also includes additional airplanes in its effectivity listing.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 91-08-06 to expand the number of affected airplanes, and require the installation of a modification that would constitute terminating action for the currently required inspection. The actions would be required to be accomplished in accordance with the service bulletin described previously.

There are approximately 69 Boeing Model 747 series airplanes of the affected design in the worldwide fleet, including 16 additional airplanes included in this proposed AD action. Currently, there are no Model 747 series airplanes of the affected design on the U.S. registry. However, should an affected airplane be placed on the U.S. Register in the future, the FAA estimates that it would take approximately 24 work hours per airplane to accomplish the proposed actions, and that the average labor rate would be $55 per work hour. Required parts would be available from the manufacturer at no cost to the operators. Based on these figures, the total cost impact of the proposed AD would be $1,320 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6960 (56 FR 14303, April 9, 1991), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 92-NM-29-AD. Supersedes AD 91-08-06, Amendment 39-6960.

Applicability: Model 747 series airplanes equipped with General Electric CF6-80C2 engines; as listed in Boeing Alert Service Bulletin 747-26A2179, dated February 28, 1991, and Revision 2, dated December 18, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent inadequate fire extinguishing agent concentration levels within the engine fire zone following engine fire system discharge, accomplish the following:

(a) For airplanes listed in Boeing Telegraphic Alert Service Bulletin 747-26A2179, dated February 28, 1991: Within 10 days after April 19, 1991 (the effective date of AD 91-08-06, Amendment 39-6960), accomplish the procedures specified in subparagraphs (a)(1), (a)(2), and (a)(3) of this AD in accordance with that service bulletin; or Revision 1, dated August 6, 1991; or Revision 2, dated December 18, 1991.

(1) Visually inspect the engine number two and number three fire extinguishing tubes and specified tube clamps within the engine strut.

(2) If damage is detected, prior to further flight, replace or repair the damaged engine fire extinguishing tubes, as applicable, in accordance with Boeing Telegraphic Alert Service Bulletin 747-26A2179, dated February 28, 1991; or Revision 1, dated August 6, 1991; or Revision 2, dated December 18, 1991. (The service bulletin specifies three repair procedures, depending upon the amount of chafing damage to the tube.)

(3) Remove the specified tube clamp from the fixed strut structure (the clamp should remain attached to the tube), and reinstall the tube clamp to orient the legs away from any structure.

(b) For airplanes listed in Boeing Alert Service Bulletin 747-26A2179, Revision 2, dated December 18, 1991, and not subject to paragraph (a) of this AD: Within 20 days after the effective date of this AD, accomplish the procedures specified in subparagraphs (b)(1), (b)(2), and (b)(3) of this AD in accordance with "Part I—Inspection" of that service bulletin.

(1) Visually inspect the engine number two and number three fire extinguishing tubes and specified tube clamps within the engine strut.

(2) If damage is detected, prior to further flight, replace or repair the damaged engine fire extinguishing tubes, as applicable, in accordance with the Boeing Alert Service Bulletin 747-26A2179, Revision 2, dated December 18, 1991. (The service bulletin specifies three repair procedures, depending upon the amount of chafing damage to the tube.)

(3) Remove the specified tube clamp from the fixed strut structure (the clamp should remain attached to the tube), and reinstall the tube clamp to orient the legs away from any structure.

(c) Repeat the inspection required by paragraphs (a) or (b) of this AD at the interval specified in subparagraph (c)(1) or (c)(2) below, as applicable:

(1) For airplanes that have not used the extinguishing tube patch repair procedures to repair the tube in accordance with paragraph (a) or (b) of this AD: Repeat the inspection at intervals not to exceed 100 flight cycles or 400 hours time-in-service, whichever occurs first.

(2) For airplanes that have used the extinguishing tube patch repair procedure to repair the tube in accordance with paragraphs (a) or (b) of this AD: Repeat the inspection at intervals not to exceed 50 flight cycles or 175 hours time-in-service, whichever occurs first.

(d) For airplanes listed in Boeing Alert Service Bulletin 747-26A2179, Revision 2, dated December 18, 1991: Within 6 months after the effective date of this AD, accomplish the modification specified in "Part II—Terminating Action" the service bulletin. Accomplishment of this modification constitutes terminating action for the repetitive inspections required by paragraphs (c) of this AD.

(e) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 17, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove a segment of Jet Route J-207 between Savannah, GA, and Miami, FL. Changes in traffic flow which occurred as the result of several other jet route realignments, eliminate the need for this segment of controlled airspace. It is proposed that the unused segment of J-207 be removed to reduce chart clutter.

DATES: Comments must be received on or before May 8, 1992.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASO-500, Docket No. 91-ASO-20, Federal Aviation Administration, P. O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC, weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis

supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.
Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 91-ASO-20." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3485.
Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to remove a segment of Jet Route J-207 between Savannah, GA, and Miami, FL. Changes in traffic flow from northeast airports, which occurred as a result of several other jet route realignments in that area have eliminated the need for J-207 over the segment that would be removed. Since this segment is not being used, it is proposed that this portion of that route be removed. Jet Route J-207 is published in Section 75.100 of Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Jet routes, Incorporation by reference.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 75.100 Jet Routes

14 CFR Part 71

[Airspace Docket No. 91-ASO-18]

Proposed Alteration of Jet Routes; FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the description of Jet Route J-91 located in the vicinity of Cross City, FL. This proposal would create a common crossing for J-75, J-89, and J-91. This action would improve flight planning and reduce land-line telephone coordination.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASO-500 Docket No. 91-ASO-18, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.
Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 91-ASO-18." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3485.
Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the description of J-91 located in the vicinity of Cross City, FL. The aleration would create a common intersection where J-75, J-89, and J-91 cross near the CAWLY, FL, intersection. This action would improve flight planning and reduce land-line telephone coordination. Jet Route J-91 is published in Section 75.100 of Handbook 7400.7 effective November 1, 1991; which is incorporated by reference in 14 CFR 71.1.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 71

[Airspace Docket No. 91-AEA-17]

Proposed Alteration of Jet Route J-37

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the description of Jet Route J-37 located in the states of South Carolina and Virginia. This proposal would modify J-37 by realigning the route between the Spartanburg, SC, VHF omnidirectional range/tactical air navigation (VORTAC) via Lynchburg, VA, VORTAC and Gordonsville, VA, VORTAC. This action is necessary to improve navigation and air traffic procedures, and to expedite the flow of air traffice.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, AEA-500, Docket No. 91-AEA-17, Federal Aviation Administration, JFK International Airport, The Fitzgerald Federal Building, Jamaica, NY 11430.

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC, on weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Patricia P. Crawford, Airspace and Obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.
Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 91-AEA-17." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3485. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71), to alter the description of J-37 between Spartanburg, SC, via the Lynchburg VORTAC to Gordonsville, VA. The proposed realignment would make better use of the Lynchburg VORTAC facility as an intermediate air navigational aid and would increase navigational reliability. Modifying this route would simplify routing and make better use of the airspace in the area. Jet Route J-37 is published in Section 75.100 of Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a signficant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Alteration of VOR Federal Airway V-352; ME

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed rulemaking.

SUMMARY: This notice proposes to alter Federal Airway V-352 by extending the airway between Houlton, ME, and Fredericton, New Brunswick, Canada. This action was requested by the Canadian government to improve and enhance the flow of air traffic in the area. This extension involves approximately 4 nautical miles within the United States airspace.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-10), Airspace Docket No. 91-AWA-5, 800 Independence Avenue, SW., Washington, DC 20591.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Patricia P. Crawford, Airspace and obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9255.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 91-AWA-5."

The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rule making will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267-3485. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisoy Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the description of VOR Federal Airway V-352 between Houlton, ME, and Fredericton, New Brunswick, Canada. This extension to the airway would expedite the flow of traffic in the Canadian airspace. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.7 dated November 1, 1991.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routing amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways, Incorporation by reference.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 40 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 71.123 Domestic VOR Federal Airways.

* * * * *

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Review of Bank Secrecy Act Regulations.

AGENCY: Departmental Offices, Treasury.

ACTION: Request for comment.

SUMMARY: Pursuant to a directive from President Bush to certain Agencies and Departments, Treasury is soliciting public comment to assist it in identifying those Bank Secrecy Act regulations which impose a substantial cost on the economy and which do not: provide and maximize benefits to society that outweigh the costs they impose; set performance standards but rather prescriptive requirements; incorporate market mechanisms to the extent possible; and, provide clarity and certainty to avoid needless litigation.

DATES: Comments should be submitted on or before April 24, 1992.

ADDRESSES: Comments should be sent to Peter G. Djinis, Director, Office of Financial Enforcement, Office of the Assistant Secretary (Enforcement), Department of the Treasury, Annex 5000, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: A. Carlos Correa, Assistant Director Regulations and Rulings, Office of Financial Enforcement, (202) 566-8022.

SUPPLEMENTARY INFORMATION: President Bush issued a Memorandum for Certain Department and Agency Heads on January 28, 1992, on "Reducing the Burden of Government Regulation." The President noted that there was much the Administration can and should do to reduce the burden of regulation, and that a major part of this undertaking must be to weed out unnecessary and burdensome government regulations and programs which impose needless costs on consumers, substantially impede economic growth, and have been rendered obsolete by new technologies and market mechanisms. To this end, the President requested that certain agencies including Treasury set aside a 90-day period to evaluate existing regulations.

Specifically, the President has asked that each agency work with the public and other interested agencies to evaluate existing regulations and programs in light of the following standards:

(1) The expected benefits to society of any regulation should clearly outweigh the expected costs it imposes on society.

(2) Regulations should be fashioned to maximize net benefits to society.

(3) To the maximum extent possible, regulatory agencies should set performance standards instead of prescriptive command-and-control requirements, thereby allowing the regulated community to achieve regulatory goals at the lowest possible costs.

(4) Regulations should incorporate market mechanisms to the maximum extent possible.

(5) Regulations should provide clarity and certainty to the regulated community and should be designed to avoid needless litigation.

At the end of the 90-day review period each agency, including Treasury, will report its findings to the President.

In futherance of the President's regulatory review initiative, the Department of the Treasury hereby invites the public to identify Bank Secrecy Act (BSA) regulations (31 CFR part 103) and programs it feels impose unnecessary or excessive costs or burdens on the public, the regulated industry, or the economy, and what changes can be made to reduce those costs or burdens.

Treasury requests that commenters: (1) Specifically identify the BSA regulation and/or program by name and, if possible, by citation to the Code of Federal Regulations; (2) provide specific data, and examples where appropriate, regarding the costs imposed by the cited regulations and programs; (3) provide specific explanations as to why the costs imposed by the cited regulations and programs are unnecessarily burdensome; (4) identify those regulations and programs which do not incorporate to the maximum extent possible market mechanisms which were not foreseen at the time that the regulation was promulgated, or the program initiated; and (5) provide specific recommendations as to how the cited regulations and programs may be improved. Treasury also welcomes any recommended alternative regulations or

programs that commenters may wish to advance.

The regulatory review which is the subject of this announcement will concentrate exclusively on the Bank Secrecy Act regulations. 31 CFR part 103. Accordingly, commenters are requested to limit their comments to the BSA regulations and to avoid recommending changes to the enabling legislation, Public Law No. 91–508 (codified at 12 U.S.C. 182b, 12 U.S.C. 1951, et seq., and 31 U.S.C. 5311–5326).

Dated: March 19, 1992.

John P. Simpson,

Acting Assistant, Secretary, (Enforcement).

[FR Doc. 92–6929 Filed 3–24–92; 8:45 am]

BILLING CODE 4810–25–M

Coast Guard

33 CFR Parts 100, 110 and 165

[CGD1–01–157]

Temporary Regulations, Port of New York and New Jersey, July 2–5, 1992

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes temporary regulations for the Port of New York and New Jersey for the Operation Sail 1992 (OPSAIL '92) activities of July 2–5, 1992. The temporary regulations, consisting of special local regulations for two "Parades of Sail", anchorage regulations for spectator craft and participating vessels, and a safety zone for a fireworks display, are necessary to conduct these activities in a safe and orderly manner.

The temporary regulations are issued to augment those regulations contained in 33 CFR chapter I which govern navigation in the Port of New York and New Jersey. The temporary regulations will have an impact on navigation during the period from 12 p.m., July 2 to 12 p.m., July 5, 1992, but they are the minimum necessary to ensure safety during the hazardous conditions that will be occasioned by the arrival of a large number of sailing vessels and spectator craft participating in and observing the event, OPSAIL '92.

DATES: Comments must be received on or before April 24, 1992.

ADDRESSES: Comments may be mailed to Commander, Coast Guard Group New York, Bldg. 109/WMO, Governors Island, NY 10004, or may be delivered to the Waterways Management Office at the above address between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Any person wishing to visit the office must contact the Waterways Management Office at (212) 668–7933 to obtain advance clearance because Governors Island is a military installation.

FOR FURTHER INFORMATION CONTACT: Lieutenant C. W. Jennings, Waterways Management Officer for Commander, Coast Guard Forces New York at (212) 668–7737.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested parties to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their name and address, identify this notice (CGD1–91–157) and the specific section of the proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgement of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard does not plan to conduct a public hearing. Persons, however, may request a public hearing by writing to Commander, Coast Guard Group New York at the address under **"ADDRESSES."** If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register.**

Drafting Information

The principal persons involved in drafting this document are LT C. W. Jennings, Project Manager, Coast Guard Group New York and LCDR J. Astley, Project Counsel, First Coast Guard District Legal Office.

Background and Purpose

The Coast Guard is considering establishing temporary regulations for the Port of New York and New Jersey, including the Lower Bay, Upper Bay, East River and Hudson River, for OPSAIL '92. The proposed regulations provide specific guidance on temporary anchorage regulations, vessel movement controls, and safety zones that will be in effect at various times in those waters during the period July 2 through 5, 1992.

The actual OPSAIL '92 celebration will commence with a "Parade of Sail" from Western Long Island Sound to the Lower Bay, via the East Rvier and Upper Bay, on July 3, 1992. This parade will involve approximately 250 class "B" and "C" sailing vessels. After arriving in the Lower Bay these vessels will moor in specially designated anchorages in Gravesend and Sandy Hook Bays.

On the morning of July 4, 1992 a "Parade of Tall Ships" will commence at the Verrazano Bridge and will involve up to 300 class "A" (vessels 175 feet and greater), "B" (vessels greater than 100 feet but less than 175 feet) and "C" (vessels 100 feet or less) sailing vessels proceeding through the Upper Bay and Hudson River to the vicinity of the George Washington Bridge, then returning down the Hudson River to previously assigned berths and moorings. That same evening a fireworks display is planned that will impact all of the waters around the southern tip of Manhattan, from the Brooklyn Bridge on the East River to Battery Park City on the Hudson River.

The purpose of these regulations is to enhance maritime safety and protect the boating public in the Port of New York and New Jersey immediately prior to, during, and after the scheduled events. The regulations will impact the movement of all vessels operating in the Port, maintain clear parade routes for the participating vessels, establish sufficient buffer areas around the planned fireworks display to ensure no one is injured by falling and possibly burning debris, and provide anchorage areas where participants and spectators can safely moor.

All vessel operators and passengers are reminded that, in addition to the safety equipment requirements for all pleasure craft, vessels carrying passengers must comply with certain additional rules and regulations. When a vessel is not being used exclusively for pleasure purposes but rather is engaged in carrying passengers, the vessel operator must possess an appropriate license and the vessel is subject to inspection. While the legal definition of the word "passenger", found in 46 U.S.C. 2101(21), varies depending on type of vessel involved, in general, it means any person who has contributed any consideration (monetary or otherwise) either directly or indirectly for carriage on board the vessel. The same laws provide substantial penalties for any violation. If you have any questions concerning the application of the above laws to your particular case, you should either write the U.S. Coast Guard Marine Inspection Office, Battery Park Building, New York, NY 10004 or telephone (212) 668–7494 for information.

In addition to the safety zone noted in these regulations it may be necessary for Commander, Coast Guard Forces New York to establish security zones to safeguard dignitaries and, possibly, certain vessels participating in the event. If the Coast Guard deems it necessary, at a later date, to establish security zones, the details of those zones will be disseminated separately via the **Federal Register**, Local Notice to Mariners, Safety Voice Broadcasts and any other means available.

It is evident that with the many sailing vessels arriving in the Port of New York and New Jersey for this event, it will be necessary to curtail normal port operations to some extent. This interference will be kept to the minimum considered necessary to ensure safety and to facilitate the success of OPSAIL '92.

It is recommended that vessel operators visiting the Port of New York and New Jersey for this event obtain up to date editions of the following charts of New York Harbor: Nos. 12334, 12335, 12339, 12401, 12402. You are further advised to expect large crowds and significant congestion in the available anchorage space. Also, you must have sufficient facilities on board your vessel to retain all garbage and untreated sewage. Discharge of either in any waters of the United States, which includes all waters addressed in this rule, is strictly forbidden. Violators may be assessed civil penalties up to $25,000.

Discussion of Proposed Amendments

1. Anchorages (see chartlets I, II, V, VI, and VII).

a. Tall Ship Anchorages. The Coast Guard proposes to designate the following anchorage areas as mooring areas for the exclusive use of OPSAIL 92 "Tall Ships": Lower Bay Anchorage No. 25, also known as Gravesend Bay Anchorage, as described in 33 CFR 110.155(e); the Sandy Hook Bay portion of Lower Bay Anchorage No. 26, as described by 33 CFR 110.155(f) but modified by this regulation; and, Anchorage No. 49–F, the special purpose anchorage in Sandy Hook Bay, as described in 33 CFR 110.155(m). The "Tall Ships" are those class "A", "B" and "C" sailing vessels specifically authorized to participate in the OPSAIL '92 event by Commander, First Coast Guard District. These anchorage areas designated for the exclusive use of the "Tall Ships", will be in effect from 6 a.m., July 2, 1991 until 2 p.m., July 4, 1992. This temporary amendment to existing regulations will allow for the safe and coordinated mooring of the OPSAIL '92 "Tall Ships" and establish clearly defined areas for that purpose.

b. Spectator Vessel Anchorages. The Coast Guard proposes to designate the following areas as temporary spectator anchorages in the Upper Bay and Lower Hudson River:

(i) The waters along the shores of New Jersey, south of Liberty Island and north of Robbins Reef; all of Bayridge Flats and Gowanus Flats; a portion of the waters in the Narrows along the shore of Bayridge, Brooklyn; and, a portion of the waters in the Lower Hudson River. This action will require the temporary expansion and/or change in use of the following anchorages: Hudson River Anchorage Nos. 16, 17, 18–A, 18–B and 19, as described in 33 CFR 110.155(c)(1) through (5); Upper Bay Anchorage No. 20–D through 20–G, as described in 33 CFR 110.155(d) (4) through (9); and Upper Bay Anchorage No. 21–A, as described in 33 CFR 110.155(d)(10). These temporary amendments to existing anchorage regulations will be in effect from 12 p.m., July 2, 1992 until 11:59 a.m., July 5, 1992.

(ii) The waters around Liberty Island and Ellis Island. This action will require the temporary expansion of Upper Bay Anchorage Nos. 20–A, 20–B and 20–C, as described in 33 CFR 110.155(d) (1) through (3), respectively. These anchorages are not available to spectator vessels prior to the effective date to prevent hazards to or interference with the normal operation of the Liberty Island and Ellis Island ferries. These anchorages will provide areas where a portion of the expected 30,000 spectator craft, private and commercial, can safely moor during the event on July 4, 1992. This temporary amendment to existing anchorage regulations will be in effect from 3 a.m., July 4, 1992 until 6 a.m., July 5, 1992.

c. Deep Draft Vessels. Anchoring in the waters of Upper Bay Anchorages No. 21–B, 21–C, 23–A, 23–B and 24, as described in 33 CFR 110.155(d) (11) through (15), respectively, will be reserved for those deep draft ocean going commercial spectator vessels that have been authorized by Commander, Coast Guard Forces New York. These anchorages will be in effect from 3 a.m., July 4, 1992 until 6 a.m. on July 5, 1992. This action will provide areas where relatively large ocean going vessels can safely moor, away from the parade route, and out of any safety and security zones that may be established for this event.

2. Special Local Regulations (see chartlets III through VII).

a. July 3rd "Parade of Sail" (see chartlets III & V). The Coast Guard proposes to require special local regulations on all waters of the East River from the Throgs Neck Bridge to the Battery, and on the following waters in the Upper Bay between the Brooklyn Bridge and the Verrazano Bridge: Buttermilk Channel, Red Hook Channel, Bay Ridge Channel and a portion of The Narrows. The regulations will prohibit all vessel traffic on those waterways, except parade and enforcement vessels, unless otherwise exempt. This regulation will be effective from 11:45 a.m., July 3, 1992 until 6 p.m., July 3, 1992 on the East River and from 2 p.m., July 3, 1992 until 6 p.m., July 3, 1992 in the affected portions of the Upper Bay. This action is necessary to maintain a clear parade route for the southbound "Parade of Sail" which will involve approximately 250 vessels. The Parade is scheduled to commence in the East River, near Lawrence Point, at 1 p.m. on that day.

b. July 4th "Parade of Tall Ships" (see chartlets IV, & VI). The Coast Guard proposes to require special local regulations which will restrict and/or control the movement of all vessels operating in the waters of Sandy Hook Bay, Lower Bay, Upper Bay, Hudson River, and lower East River within two areas described by the following limits: Area "C" includes all waters north of the New Jersey Coast and south of the Verrazano Bridge between the following lines of longitude, west of 074°00'00"W, and east of 074°03'12"W; Area "D" includes all waters north of the Verrazano Bridge, south of Spuyten Duyvil Creek, southwest of the Brooklyn Bridge, and east of Constable Hook. This regulation will be effective from 6 a.m., July 4, 1992 until 2 p.m., July 4, 1992 in the Lower Bay and Sandy Hook Bay and from 7:30 a.m., July 4, 1992 until 3 a.m., July 5, 1992 in the Upper Bay and Lower Hudson River. This regulation will facilitate the movement, formation, staging, and parade of all participating OPSAIL '92 vessels and attendant support vessels. This action is deemed necessary due to the inherent hazards with a large number of vessels, approximately 300, maneuvering in confined waters, and will allow the congnizant Group Commanders to have positive control over all vessel movements before, duing and after the events attendant to this celebration.

During the "Parade of Tall Ships" commercial vessels, other than spectator craft, attempting to reach the Kill Van Kull, Newark Bay or Arthur Kill must do so via the Lower Bay and Raritan Bay approaches. Commercial vessel operators, however, may only transit Area "C" after obtaining permission to do so from Coast Guard Group Sandy Hook. Permission may be requested by contacting Group Sandy Hook on channel 16 VHF–FM. Light assist tugs, required by OPSAIL '92 vessels for maneuvering, will be authorized in

Areas "C" and "D" provided their presence has been authorized by Commander, Coast Guard Forces New York. Spectator craft, commercial and recreational, will be authorized to freely transit these areas with the exception of that portion of the Upper Bay and Hudson River defined as the "Main Ship Channels". Spectator craft may not loiter near or interfere with any vessel participants of OPSAIL '92 or any vessel at anchor. All spectator craft, when operating in these regulated areas, will navigate at no wake speed or no faster than 6 knots, whichever is less.

3. July 4th Fireworks Display (see chartlets I and VII). The Coast Guard proposes to require a safety zone in all waters around the southern tip of Manhattan, from the Brooklyn Bridge in the East River to the vicinity of North Cove Yacht Harbor on the Hudson River. This zone will commence at 8 p.m., July 4, 1992 and terminate at 3 a.m., July 5, 1992. While the safety zone is in effect all vessel traffic will be precluded from entering this area. The safety zone is being imposed to protect the mariner from the inherent hazards associated with a fireworks display. No vessel may enter or move within this zone unless permitted to do so by Commander, Coast Guard Forces New York. Also, no vessel may anchor during the display in the areas defined as the "Main Ship Channels". Vessels which need to anchor to maintain position and not hazard navigation will only do so in those areas designated for that purpose. After the display, no vessel is permitted to transit the waters between Governors Island and the Battery in South Manhattan. Vessels needing to cross to or from the East River may only do so by transiting around the southern tip of Governors Island via the Buttermilk Channel.

The Special Local Regulations and Safety Zone, in place during the July 4th celebration, will remain in effect well after the day's events have concluded. This will give Coast Guard enforcement vessels the opportunity to coordinate the orderly movement of spectator craft from or within the regulated area as the Port transitions from one event to the next. In all cases, vessels will be prohibited from transiting the waters between Governors Island and Manhattan, unless specifically permitted to do so by Commander, Coast Guard Forces New York.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a Regulatory Evaluation is unnecessary.

The regulations will be in effect for only portions of a four day period. The most heavily impacted day is July 4, 1992 which is a federal holiday and historically a day in which numerous waterway closures and disruptions occur in the Port because of smaller celebrations. Commercial traffic will be prohibited from operating in Upper New York Bay for only a portion of the affected period. Moreover, at no time will commercial shipping access to Port Newark/Port Elizabeth facilities be prohibited. Access to those areas may be accomplished using the Raritan Bay, Arthur Kill, Kill Van Kull, and Newark Bay as an alternate route. This will allow the majority of the maritime industrial activity in the Port of New York and New Jersey to continue, relatively unaffected. It is also expected that the amount of publication and advertisement about this event and, in particular, these regulations will allow the industry to adjust their schedules so as to minimize expected impacts.

The Staten Island Ferry and other scheduled ferry services which normally operate in the Port will be curtailed for only the minimum amount of time necessary, approximately 5 hours, to ensure safe operation during the increased harbor activities. It is expected that OPSAIL '92 will attract numerous boaters and tourists to the area which would have a favorable economic impact on commercial activities in the Port, as a whole.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

For the reasons already specified in the Regulatory Evaluation section of this proposal the Coast Guard expects the proposed regulation will only have a minimal impact on all entities operating in the area. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will have a significant impact on your business, please submit a comment (see "**ADDRESSES**") explaining why you think your business qualifies and in what way and to what degree this proposal will economically affect your business.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has considered the environmental impact of this proposal and concluded that under section 2.B.2.c. of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket for inspection and copying where indicated under "**ADDRESSES**."

List of Subjects

33 CFR Part 100

Marine safety, Navigation (water).

33 CFR Part 110

Anchorage grounds.

33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

For reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR parts 100, 110 and 165 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Temporary § 100.35T 01–158 is added to read as follows:

§ 100.35T 01–158 Parade of Sail, Port of New York and New Jersey, July 3, 1992.

(a) *Definitions* As used in this section and sections 100.35T 01–159, 110.155, 110.T 01–160, and 165.T 01–161 of this Title.

(1) *Commander, Coast Guard Forces New York* means the Coast Guard officer charged with the overall responsibility for the enforcement and safe conduct of the waterside operations attendant to the OPSAIL '92 event.

(2) *Cognizant Coast Guard Group Commander* means the Coast Guard officer charged with the enforcement of these regulations, in addition to his normal duties, within the waters affected. In all waters north of the Verrazano Bridge this term refers to Commander, Coast Guard Group New York. In all waters south of the Verrazano Bridge this term refers to Commander, Group Sandy Hook.

(3) *Main ship channels* includes all waters of the Anchorage Channel, Buttermilk Channel, and the waters south of the Brooklyn Bridge and north of Governors Island in the Upper Bay, and all waters of the Lower Hudson River north of the Battery and south of Spuyten Duyvil Creek. It does not include any waters described as an anchorage in this regulation.

(4) *OPSAIL '92 Vessels* includes all vessels participating in Operation Sail 1992 under the auspices of the Marine Event Permit submitted by OPERATION SAIL 1992, Inc. and approved by Commander, First Coast Guard District.

(5) *Parade of Sail* is the southbound procession of class "B" and "C" OPSAIL '92 vessels as they navigate designated routes in the Port of New York and New Jersey on July 3, 1992.

(6) *Spectator vessel* includes any vessel, commercial or recreational, being used for pleasure or carrying passengers, that is in the Port of New York and New Jersey to observe part or all of the events attendant to OPSAIL '92.

(7) *Parade of Tall Ships* is the procession of class "A", "B" amd "C" OPSAIL '92 vessels as they navigate designated routes in the Port of New York and New Jersey on July 4, 1992.

(b) *Regulated areas:*

Note: See chartlets III and V in Appendix A to this section.

(1) *Area "A"*. All waters of the East River, shore to shore, west of the Throgs Neck Bridge and north of a line drawn along the 40°42'02" N line of latitude between Brooklyn, New York and Manhattan, New York.

(2) *Area "B"*. All waters of the Upper Bay east of the following line which commences on Pier 9, Manhattan at:

Latitude	Longitude
40°42'02.0" N	74°00'32.0" W
40°41'20.0" N	74°00'45.0" W

thence along the east shore of Governors Island to;

40°41'03.5" N	74°01'33.0" W
40°39'49.5" N	74°01'21.5" W
40°38'44.5" N	74°02'29.0" W
40°37'25.0" N	74°03'03.0" W
40°36'28.0" N	74°02'34.0" W

then east-northeast to the shoreline in Brooklyn, New York.

(c) *Special local regulations.* (1) No vessel, except those specifically exempted, may enter or navigate within these regulated areas unless they are authorized to do so by Commander, Coast Guard Forces New York. Any vessel authorized to enter the regulated area must not, under any circumstances, cross through the "Parade of Sail".

(2) No vessel is permitted to transit Area "A" northbound unless it can be clear of Rikers Island by 12 p.m.

(3) Circle Line ferries are exempt from this regulation during scheduled operations, except, ferries are only authorized to travel southbound on the East River for the duration of this regulation. At no time will a ferry be permitted to cross through the "Parade of Sail" or cross within 500 yards of the lead or last vessel in that parade.

(4) City of New York, Department of Sanitation barges, while engaged in normal sanitation service, are exempt from these regulations when engaged in southbound transits only. At no time will a sanitation barge be permitted to cross through the "Parade of Sail" or cross within 500 yards of the lead or last vessel in that parade.

(5) Seaplane Operations. The operation of seaplanes, including taxiing, landing, and taking off, is prohibited in regulated areas "A" and "B" for the duration of the regulation.

(d) *Effective date.* (1) *Area "A"*. These regulations become effective in area "A" at 11:45 a.m., July 3, 1992. They terminate at 6 p.m., July 3, 1992.

(2) *Area "B"* These regulations become effective in area "B" at 2 p.m., July 3, 1992. They terminate at 6 p.m., July 3, 1992.

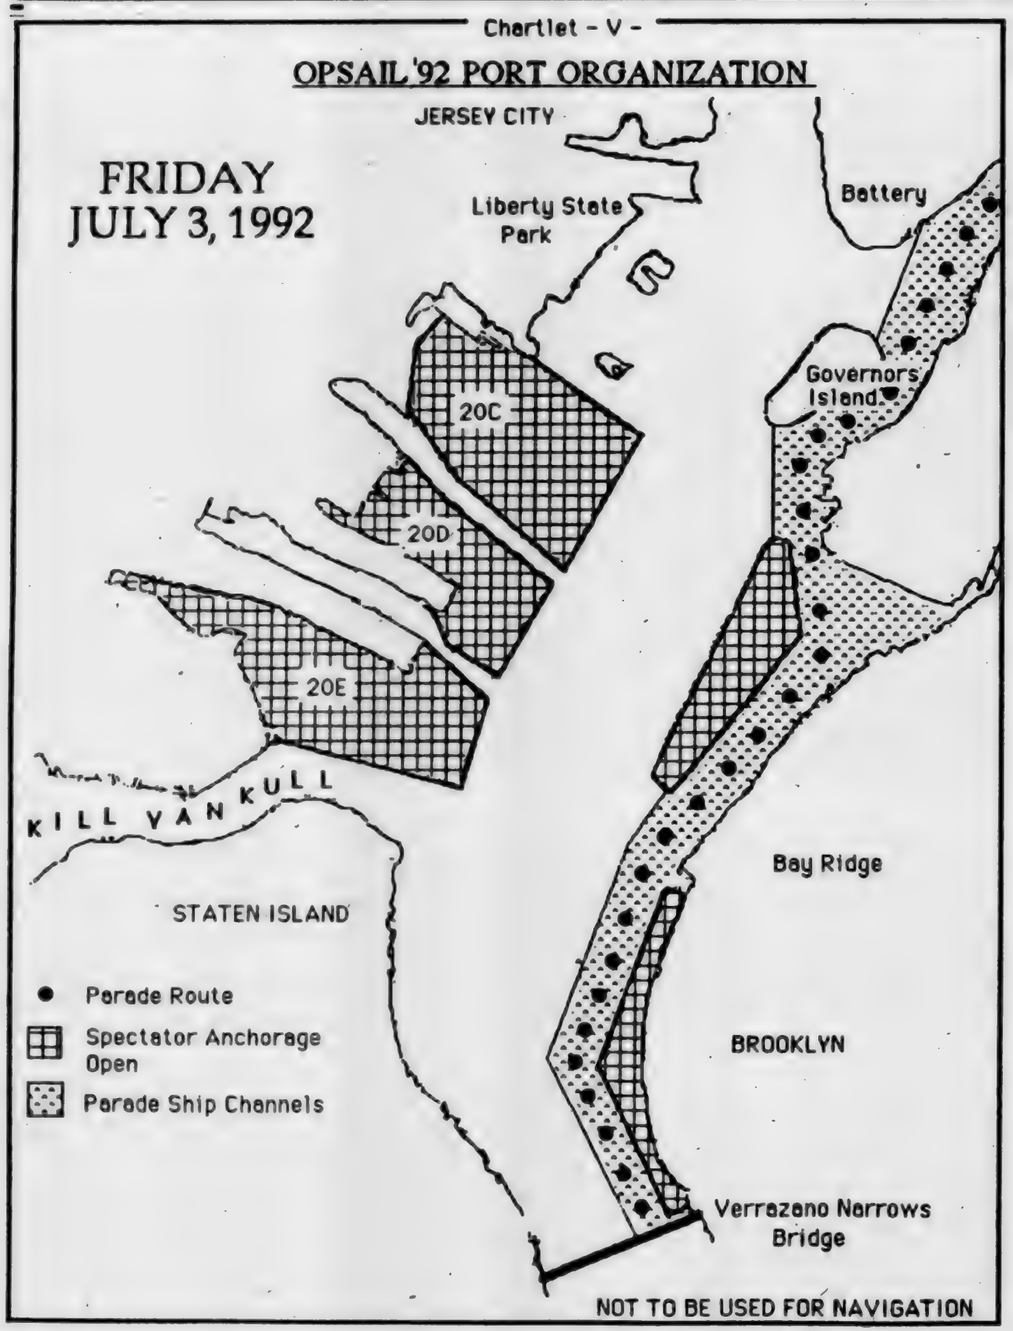
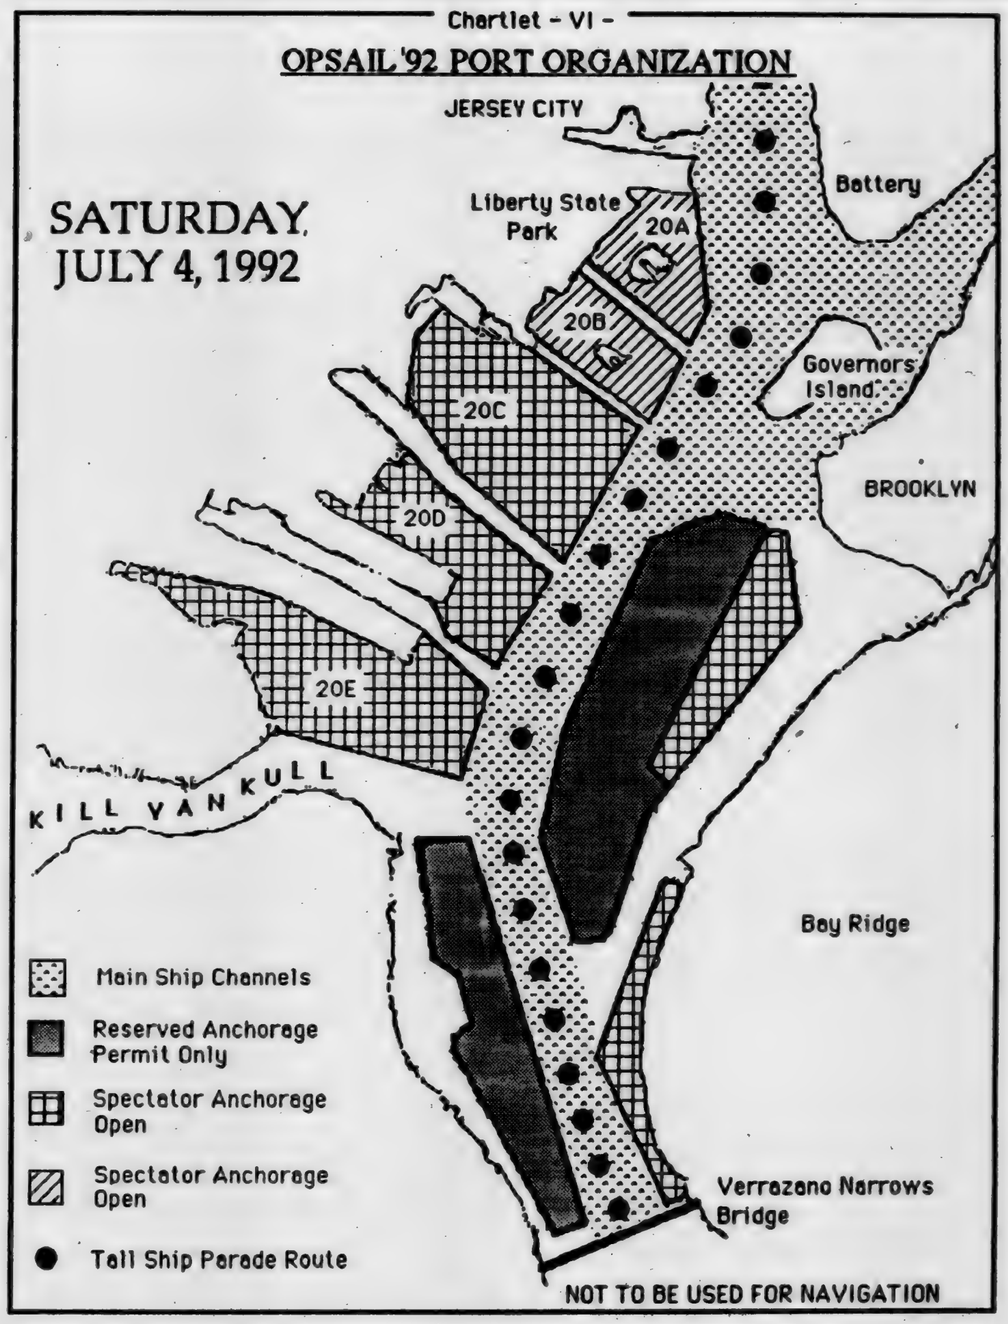
OPSAIL '92 PORT ORGANIZATION



Chartlet - VI -

OPSAIL '92 PORT ORGANIZATION



BILLING CODE 4910-14-C

3. Temporary § 100.35T 01–159 is added to read as follows:

§ 100.35T 01–159 OPSAIL '92 Events, Port of New York and New Jersey, July 4, 1992.

(a) *Regulated Areas:*

Note: See charlets IV and VI in Appendix A to § 100.35T 01–158.

(1) *Area "C"* All waters of the Lower Bay and Sandy Hook Bay within the following boundaries: south of the Verrazano Bridge; west of a line drawn shore to shore along the 074°00'00" W line of longitude between Navesink, New Jersey and Coney Island, New York; and east of a line drawn shore to shore along the 074°03'12" W line of longitude between New Jersey and Staten Island.

(2) *Area "D"* All waters, shore to shore, of the Upper Bay and the Hudson River within the following boundaries: south of a line drawn shore to shore along the 40°52'39.2" N line of latitude between Inwood, New York and Englewood Cliffs, New Jersey; south of a line drawn along the 40°42'02" N line of latitude between Brooklyn, New York and Manhattan, New York; north of the Verrazano Bridge; and east of line drawn shore to shore between Staten Island, New York and Constable Hook, New Jersey along the 074°05'15" W line of longitude.

(b) *Special local regulations* (1) No vessel except "OPSAIL '92 Vessels", their assisting tugs, "Spectator vessels" and those vessels exempt from this regulation may enter or navigate within regulated areas "C" and "D", unless specifically authorized by the cognizant Coast Guard Group Commander or his on-scene representative.

(2) Commercial vessels not defined as "Spectator vessels" which need to transit Area "C' must contact and obtain permission from Commander, Coast Guard Group Sandy Hook or his designated representative on channel 16 VHF–FM, prior to entering that area.

(3) "Spectator vessels" transiting these regulated areas must do so at no wake speed or at speeds not to exceed 6 knots, whichever is less.

(4) Not withstanding paragraph (b)(1) of this section no vessel, other than "OPSAIL '92 Vessels" and their assisting tugboats, may enter or navigate within the boundaries of the "Main ship channels" in regulated area "D" unless they are specifically authorized to do so by Commander, Coast Guard Group New York. Any vessel authorized to enter this area during the "Parade of Tall Ships" must not, under any circumstances, cross through the parade or cross within 500 yards of the lead or last vessel in that parade.

(5) No vessel is permitted to anchor in the "Main Ship Channels" at any time. Vessels which need to anchor to maintain position will only do so in those areas designated for that purpose.

(6) No vessel is permitted to transit the waters between Governors Island and The Battery in South Manhattan. Vessels which must transit to or from the East River may only do so by using the Buttermilk Channel via the southern tip of Governors Island.

(7) The City of New York Staten Island ferries are exempt from these regulations while engaged in scheduled ferry service between St. George Terminal, Staten Island, New York and The Battery in Manhattan, New York except, at no time will a ferry be permitted to cross through the "Parade of Tall Ships" or cross within 500 yards of the lead or last vessel in that parade.

(8) The Port Imperial ferry service, which operates between Weehawken, New Jersey and Pier 76, Manhattan, is exempt from these regulations while engaged in scheduled ferry service between those points, except, at no time will a ferry be permited to cross through the "Parade of Tall Ships" or cross within 500 yards of the lead or last vessel in that parade.

(9) Seaplane Operations. The operation of seaplanes, including taxiing, landing, and taking off, is prohibited in regulated areas "C" and "D" for the duration of the regulation.

(c) *Effective dates*—(1) *Area "C".* These regulations become effective at 6 a.m., July 4, 1992. They terminate at 2 p.m., July 4, 1992.

(2) *Area "D".* These regulations become effective at 7:30 a.m., July 4, 1992. They terminate at 3 a.m., July 5, 1992.

PART 110—ANCHORAGE REGULATIONS

4. The authority citation for part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g). Section 110.1a and each section listed in section 110.1a are also issued under 33 U.S.C. 1223 and 1231.

5. Section 110.155 is temporarily amended by suspending for the period from 12 p.m. on July 2, 1992 until 11:59 on July 5, 1992 paragraphs (d)(6), (d)(7), (d)(8), (d)(9), and (m)(2); by adding Notes 1 and 2 to the beginning of the section and paragraphs (c)(1)(ii), (c)(2)(ii), (c)(3)(ii), (c)(4)(ii), (c)(5)(vi), (d)(11)(iii), (d)(12)(iii), (d)(13)(vi), (d)(14)(iv), (d)(15)(iii), (e)(1)(iii), (e)(1)(iv) and, (f)(4); by revising paragraphs (d)(1), (d)(2), (d)(3), (d)(4), (d)(5), (d)(10)(i). (d)(16), the note to paragraph (f)(1) introductory text, and the first sentence of paragraph (n)(1) to read as follows:

§ 110.155 Port of New York.

Note 1: See chartlets I, II, V, VI and VII in appendix A to § 100.35T 01–158.

Note 2: Mariners are cautioned that the areas designated as anchorage grounds for the purpose of this rule have not been subject to any special survey or inspection and that charts may not show all seabed obstructions or the shallowest depts. In addition, the anchorages are in areas of substantial currents, and not all anchorages are over good holding ground. Mariners are advised to take appropriate precautions when using these temporary anchorages. These are not special anchorage areas. Vessels must display anchor lights, as required by the navigation rules. The anchorages in paragraphs (c) through (d)(10) of this section and the Narrows temporary anchorage established in 110.T01–160 are available to spectator vessels on a first come first served basis. The anchorages in paragraphs (d)(11) through (15) of this section require a permit to anchor, issued by Commander, Coast Guard Forces New York. The anchorages in paragraph (e) and (f)(4) of this section are established for the exclusive use of "OPSAIL '92 Vessels". The definitions set forth in 100.35T 01–158(a) apply to this section.

* * * * *

(c) * * *

(1) * * *

(ii) This anchorage is designated for the exclusive use of recreational and commercial spectator craft, in port to observe OPSAIL '92. This designation will commence at 12 p.m. on July 2, 1992. It will terminate at 11:59 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(2) * * *

(ii) See 33 CFR 110.155(c)(1)(ii).

(3) * * *

(ii) See 33 CFR 110.155(c)(1)(ii).

(4) * * *

(ii) See 33 CFR 110.155(c)(1)(ii).

(5) * * *

(vi) See 33 CFR 110.155(c)(1)(ii).

(d) * * *

(1) *Spectator Anchorage 20–A.* That area enclosed by coordinates connecting the following points:

Latitude	*Longitude*
40°42'21" N	74°02'06" W
40°42'05" N	74°01'57" W
40°41'39" N	74°02'00" W
40°41'30" N	74°02'06" W
40°41'55" N	74°02'56" W

thence along the shoreline to the point of the beginning.

(1) This anchorage is designated for the exclusive use of recreational and commercial spectator craft, in port to observe OPSAIL '92. This designation

will commence at 3 a.m. on July 4, 1992. It will terminate at 6 a.m. on July 5, 1992. Upon termination or when directored by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(2) *Spectator Anchorage 20–B.* That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°41'11" N	74°02'09" W
40°41'25" N	74°02'09" W
40°41'02" N	74°02'24" W
40°41'09" N	74°02'39" W
40°41'31" N	74°03'15" W

thence along the shoreline to the point of the beginning.

(i) This anchorage is designated for the exclusive use of recreational and commercial spectator craft, in port to observe OPSAIL '92. This designation will commence at 3 p.m. on July 4, 1992. It will terminate at 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(3) *Spectator Anchorage 20–C.* That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°41'20" N	74°03'16" W
40°41'00" N	74°02'28" W
40°40'09" N	74°03'00" W
40°40'45" N	74°03'51" W

thence along the shoreline to the point of the beginning.

(i) This anchorage is designated for the exclusive use of recreational and commercial spectator craft, on hand for OPSAIL '92. This designation will commence at 12 p.m. on July 2, 1992. It will terminate at 11:59 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(4) *Spectator Anchorage 20–D.* That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°40'53" N	74°04'15" W
40°40'04" N	74°05'02" W
40°39'34" N	74°03'23" W
40°39'45" N	74°03'50" W
40°39'55" N	74°04'00" W
40°40'09" N	74°03'51" W
40°40'32" N	74°04'38" W

thence along the shoreline to the point of the beginning.

(i) This anchorage is designated for the exclusive use of recreational and commercial spectator craft, on hand for OPSAIL '92. This designation will commence at 12 p.m. on July 2, 1992. It will terminate at 11:59 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(5) *Spectator Anchorage 20–E.* That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°39'50" N	74°04'05" W
40°39'22" N	74°05'28" W
40°38'01" N	74°03'48" W
40°39'18" N	74°05'10" W

thence along the shoreline to the point of the beginning.

(i) This anchorage is designated for the exclusive use of recreational and commerical spectator craft, on hand for OPSAIL '92. This designation will commence at 12 p.m. on July 2, 1992. It will terminate at 11:59 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(10) * * *

(i) This anchorage is designated for the exclusive use of recreational and commerical spectator craft, on hand for OPSAIL '92. This designation will commence at 12 p.m. on July 2, 1992. It will terminate at 11:59 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(11) * * *

(iii) This anchorage is designated for the exclusive use of vessels observing or participating in the OPSAIL '92 festivities and which have been authorized by Commander, Coast Guard Forces New York. No vessel may anchor within this area without authorization to do so. This anchorage designation will remain in effect from 3 a.m. on July 4, 1992 until 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(12) * * *

(iii) This anchorage is designated for the exclusive use by vessels which have been authorized by Commander, Coast Guard Forces New York for the purpose of observing or participating in the OPSAIL '92 festivities. No vessel may anchor within this area without authorization to do so. This anchorage will remain so designated from 3 a.m. on July 4, 1992 until 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(13) * * *

(vi) This anchorage is designated for the exclusive use of vessels which have been authorized by Commander, Coast Guard Forces New York for the purpose of observing or participating in the OPSAIL '92 festivities. No vessel may anchor within this area without authorization to do so. This anchorage will remain so designated from 3 a.m. on July 4, 1992 until 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(14) * * *

(iv) This anchorage is designated for exclusive use by vessels which have been authorized by Commander, Coast Guard Forces New York for the purpose of observing or participating in the OPSAIL '92 festivities. No vessel may anchor within this area without authorization to do so. This anchorage will remain so designated from 3 a.m. on July 4, 1992 until 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(15) * * *

(iii) This anchorage is designated for exclusive use of vessels which have been authorized by Commander, Coast Guard Forces New York for the purpose of observing or participating in the OPSAIL '92 festivities. No vessel may anchor within this area without authorization to do so. This anchorage will remain so designated from 3 a.m. on July 4, 1992 until 6 a.m. on July 5, 1992. Upon termination or when directed by Commander, Coast Guard Forces New York each vessel must vacate this anchorage.

(16) Any vessel anchored in or intending to anchor in Federal Anchorage 20–A through 20–E must comply with requirements in paragraphs (d)(16) (iii), (iv)(v), (vi), and (vii) of this section. Any vessel anchored in or intending to anchor in Federal Anchorage 21–A through 21–C, 23–A and 23–B, 24 or 25 must comply with all of the requirements of this paragraph.

* * * * *

(e) * * *

(1) * * *

(iii) This anchorage is effective from 6 a.m. on July 2, 1992 until 2 p.m. on July 4, 1992.

(iv) No vessel other than OPSAIL '92 Vessels and their designated assist tugs may anchor and/or approach within 100 yards of any OPSAIL '92 Vessel navigating or anchored in this area.

(f) * * *

(1) * * *

Note: Anchorage 49–G in this area is reserved for vessels carrying explosives (see paragraph (m)(3) and (n) of this section) and is excluded from use as a general anchorage.

* * * * *

(4) OPSAIL Vessel Temporary Anchorage. That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°28'30" N	74°01'43" W
40°27'55" N	74°01'35" W
40°27'54" N	74°01'25" W
40°28'00" N	74°00'56" W
40°28'00" N	74°02'00" W
40°28'29" N	74°02'51" W
40°27'29" N	74°02'10" W
40°27'40" N	74°02'36" W
40°28'07" N	74°02'19" W

thence to the point of the beginning.

(i) This anchorage sets aside a portion of Anchorage No. 20, as described in paragraph (f)(1) of this section, for the exclusive use of OPSAIL '92 Vessels.

(ii) This anchorage is effective from 6 a.m. on July 2, 1992 until 2 p.m. on July 4, 1992.

(iii) No vessels other than OPSAIL '92 Vessels, their designated assist tugs, and enforcement vessels may anchor, loiter, or approach within 100 yards of any OPSAIL '92 Vessel when it is navigating or at anchor in this area.

* * * * *

(n) * * *

(1) Anchorage No. 49–G is reserved for vessels carrying explosives. * * *

6. Temporary § 110.160T01–160 is added to subpart B as read as follows:

§ 110.160T01–160 New York Harbor.

Narrows Temporary Anchorage. That area enclosed by coordinates connecting the following points:

Latitude	Longitude
40°38'31" N	74°02'11" W
40°38'28" N	74°02'20" W
40°37'22" N	74°02'45" W
40°38'23" N	74°02'22" W
40°38'21" N	74°02'12" W

thence along the shoreline to the point of the beginning. This anchorage is effective from 12 p.m. on July 2, 1992 until 11:59 a.m. on July 5, 1992.

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

7. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

8. A new § 165.T01–161 is added to read as follows:

§ 165T01–161 Safety Zone: Upper Bay, New York and New Jersey.

Note: See chartlets I and VII in appendix A to § 100.35T01–158.

(a) *Location.* The following area is a safety zone: The waters of the Upper Bay in the vicinity of the Battery in Lower Manhattan including: All waters of the Lower East River, south of the Brooklyn Bridge and north of a line drawn between the Brooklyn Battery Tunnel ventilator on Governors Island and Pier 7, Brooklyn; and, all waters of the Lower Hudson River, south of a line drawn between Battery Park City and Jersey City along the 40°43'N line of latitude and north of a line drawn between Castle William on Governors Island and the southern tip of the New Jersey Railroad Terminal in Liberty State Park.

(b) *Effective date.* This zone becomes effective on July 4, 1992 at 8 p.m. It terminates on July 5, 1992 at 3 a.m.

(c) *Regulations.* In accordance with the general regulations in section 165.23, entry into or movement within this zone is prohibited unless authorized by Commander, Coast Guard Forces New York.

Dated: March 5, 1992.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

[FR Doc. 92–6700 Filed 3–24–92; 8:45 am]

BILLING CODE 4910–14–M

33 CFR Part 117

[CGD1 92–002]

Drawbridge Operation Regulations, Kennebec River, Maine

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of the Bath Iron Works (BIW), the Coast Guard is proposing to change the regulations in § 117.525 paragraph (a)(2), governing the Carlton Bridge over the Kennebec River at mile 14.0 between Bath and Woolwich, Maine, by amending the time periods that the bridge need not open during the morning and evening rush hours. This change was requested because the times that the morning and afternoon production shifts arrive and depart from the Bath Iron Works production plant have changed. This change to the regulations should continue to reduce traffic congestion resulting from the traffic created by the two shift changes at the BIW plant and should still meet the needs of navigation.

DATES: Comments must be received on or before May 11, 1992.

ADDRESSES: Comments should be mailed to Commander (obr), First Coast Guard District, Bldg. 135A, Governors Island, NY 10004–5073. The comments and other materials referenced in this notice will be available for inspection and copying at the above address and room 628 at the John Foster Williams Building, 408 Atlantic Avenue, Boston, Massachusetts.

Normal office hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to these addresses.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, First Coast Guard District, (212) 668–7170.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their name and address, identify the bridge, the specific section of this proposal to which each comment applies, and give reasons for concurrence with or any recommended changes to the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped self-addressed post card or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments. The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Commander (obr), First Coast Guard District at either address under "**ADDRESSES**". If the Coast Guard determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in a **Federal Register**.

Drafting Information

The drafters of this notice are John McDonald, project officer, and Lieutenant Commander John Astley, project attorney.

Background and Purpose

The Bath Iron Works requested a change to § 117.525 paragraph (a)(2) of the regulations for the Carlton Bridge, which presently opens on signal except during the morning and evening rush hours from 6:30 a.m. thru 7:30 a.m. and from 3:45 p.m. thru 5:30 p.m., Monday thru Friday, excluding holidays.

The BIW has requested that the hours the Carlton Bridge need not open during the morning and evening rush hours be expanded to cover the morning and evening rush hours from 6 a.m. thru 7:30 a.m. and from 3:15 p.m. thru 5:30 p.m., Monday thru Friday, excluding holidays.

Discussion of Proposed Amendments

The Carlton Bridge over the Kennebec River between Bath and Woolwich has

vertical clearances of 10' above mean high water (MHW) and 16' above mean low water (MLW). The current regulations for the Carlton Bridge, § 117.525 paragraph (a)(2), which allow the bridge to remain closed during the morning and evening rush hours, 6:30 a.m. to 7:30 a.m. and 3:45 p.m. to 5:30 p.m., were implemented specifically to alleviate traffic congestion created during shift changes at the Bath Iron Works facility located in downtown Bath adjacent to the bridge.

During recent labor negotiations it was agreed that effective September 30, 1991, production shifts at the main plant in Bath would arrive 30 minutes earlier, creating a 7 a.m. to 3:30 p.m. first shift and a second shift from 4:15 p.m. to 12:15 a.m.

Since the original intent of paragraph (a)(2) of the existing regulation was to reduce traffic congestion resulting from shift changes at the BIW plant it has been requested that we keep the regulation in proper alignment with the new hours of operation at the BIW plant, in order to continue to provide a minimum of traffic days in Bath and Woolwich. The proposed change to the regulation will retain the provisions of paragraph (a)(1) for the bridge to open on signal as soon as possible for vessels of the United States, state and local vessels used for public safety, vessels in distress, and inbound loaded commercial fishing vessels.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact to be so minimal that a full regulatory evaluation is unnecessary. This opinion is based upon the fact that there have been only limited openings during the requested closed period and the change is only for a 30 minute adjustment to the existing regulations.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria in Executive Order 12612 and has determined that the proposal does not have sufficient federalism implications to warrant preparation of a federal assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under section 2.B.2. of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under "ADDRESSES".

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 117, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.525 is amended by revising paragraph (a)(2) to read as follows:

§ 117.525 Kennebec River.

(a) * * *

(2) The draw need not open from 6 a.m. to 7:30 a.m. and from 3:15 p.m. to 5:30 p.m. Monday to Friday, excluding holidays except for vessels noted in paragraph (a)(1) of this section.

* * * * *

Dated: March 5, 1992.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

[FR Doc. 92–6900 Filed 3–24–92; 8:45 am]

BILLING CODE 4910-14-M

33 CFR Part 117

[CGD8–92–03]

Drawbridge Operation Regulations; Portage Bayou, Tchoutacabouffa River and Wolf River, Mississippi

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Harrison County Board of Supervisors, Gulfport, Mississippi, the Coast Guard is considering changes to the regulations governing the operations of three Harrison County owned drawbridges, as follows:(1) The Portage Bridge on Hampton Road over Portage Bayou, mile 0.2, near Pass Christian.

(2) The Cedar Lake Road Bridge over the Tchoutacabouffa River, mile 8.0, near Cedar Lake.

(3) The Adams Bridge on Hampton Road over the Wolf River, mile 1.3, near Pass Christian. The proposed changes would require that the draw of the Portage Bridge over Portage Bayou open if at least six hours advance notice is given, and that the Cedar Lake Bridge over the Tchoutacabouffa River and the Adams Bridge over the Wolf River open if at least twenty-four hours advance notice is given. Presently, the draws of the bridges are required to open on signal at all times. This proposal is being made because of infrequent requests to open the draws of the bridges. This action should relieve the bridge owner of the burden of having persons constantly available at the bridges, while still providing for reasonable needs of navigation.

DATES: Comments must be received on or before May 11, 1992.

ADDRESSES: Comments should be mailed to Commander (ob), Eighth Coast Guard District, 501 Magazine Street, New Orleans, Louisiana 70130–3396. The Comments and other materials referenced in this notice will be available for inspection and copying in room 1313 at this address. Normal office hours are between 8 a.m. and 3:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. John Wachter, Bridge Administration Branch, at the address given above, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Eighth Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulation may be changed in the light of comments received.

Drafting Information

The drafters of this regulation are Mr. John Wachter, project officer, and LT J.A. Wilson, project attorney.

Discussion of Proposed Regulation

Vertical clearance of the Portage Bayou Bridge in the closed to navigation position is 11 feet above high tide and 13 feet above low tide. Navigation through the bridge consists mainly of recreational and small fishing craft, and a few tugs with tows that service a commercial enterprise located upstream of the bridge. Data submitted by the applicant show that 232 vessels passed the bridge during the calendar year 1991. The heaviest traffic period was the month of June with 36 vessels passing the bridge. This amounts to an annual average of 0.6 vessels per day with an average of 1.2 vessels per day during the month of June.

Considering the few vessels that pass the bridge, the Coast Guard feels that vessel operators should be able to give the bridge owner six hours advance notice for a bridge opening with little or no inconvenience or added expense to themselves.

Vertical clearance of the Tchoutacabouffa River bridge in the closed to navigation position is 3 feet above high tide and 5 feet above low tide. Navigation through the bridge consists of recreational and small fishing vessels only. Data show that the bridge opened only 85 times for boats during 1991; an average of one boat about every four days.

Vertical clearance of the Wolf River Bridge in the closed to navigation position is 13 feet above high tide and 15 feet above low tide. Navigation through the bridge consists of recreational and small fishing vessels only. Data show that the bridge opened only four times for boats in 1991.

Considering the few vessels that pass the Tchoutacabouffa River and the Wolf River bridges, it is reasonable to expect that vessel operators will be able to give the bridge owner twenty-four hours advance notice for a bridge opening with little or no inconvenience to themselves.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The basis for this conclusion is that there will be very little inconvenience to vessel owners using the waterways. In addition, mariners requiring the bridge openings are repeat users of the waterways and giving advance notice of requests for bridge opening should involve little or no additional expense to them. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Environmental Impact

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.g.5 of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and placed in the rulemaking document.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, part 117 of title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.685 is redesignated as 117.686 and a new section 117.685 is added to read as follows:

§ 117.685 Portage Bayou, Tchoutacabouffa and Wolf Rivers.

(a) The draw of the Portage Bridge over Portage Bayou, mile 2.0, shall open on signal if at least six hours notice is given.

(b) The draws of the Cedar Lake Road Bridge over the Tchoutacabouffa River, mile 8.0, and the Adams Bridge over the Wolf River, mile 1.3, shall open on signal if at least twenty-four hours notice is given.

Dated: February 26, 1992.

J.M. Loy,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 80

[AMS–FRL–4117–2]

Regulation of Fuels and Fuel Additives: Standards for Reformulated Gasoline and Conventional Gasoline

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public workshop.

SUMMARY: This notice announces the time and place for a public workshop related to EPA's development of the complex emissions model for reformulated gasoline.

DATES: The public workshop will be held on April 28, 1992. It will start at 9 a.m. and will continue as long as necessary to complete the agenda.

ADDRESSES: The public workshop will be held at the Best Western Domino's Farms Hotel, 3600 Plymouth Road, Ann Arbor, Michigan 48105 (telephone 313–769–9800). Interested parties may submit written comments (in duplicate if possible) to Public Docket No. A–92–12, at: Air Docket Section (LE–131), U.S. Environmental Protection Agency, Attention: Docket No. A–91–02, First Floor, Waterside Mall, rm. M–1500, 401 M Street, SW., Washington, DC 20460.

Materials related to this rulemaking, including documents distributed at earlier workshops, have been placed in Dockets A–91–02 and A–92–12 by EPA. These dockets are located at the above address and may be inspected between 8:30 a.m. and noon and between 1:30 p.m. and 3:30 p.m., Monday through Friday. EPA may charge a reasonable fee for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Sklar, Standards

Development and Support Branch, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105. Telephone: (313) 741–7817.

SUPPLEMENTARY INFORMATION:

Background

Section 211(k) of the Clean Air Act, as amended (Act), requires that EPA promulgate regulations establishing the requirements for a reformulated gasoline program. EPA is holding a series of workshops to expedite the development and promulgation of a rule establishing a complex emission model for the reformulated gasoline program. All workshops in the series will be open to the public. The first such workshop was held in Ann Arbor, Michigan, on Wednesday, January 22 and Thursday, January 23; the second such workshop was held in Ann Arbor, Michigan, on Tuesday, February 18. The purpose of the workshops and supplementary information regarding the workshops can be found in 57 FR 2068 (January 17, 1992) and 57 FR 5409 (February 14, 1992).

Public Workshop

The April 28 workshop is the third in this series of public workshops. It will include the following topics:

—*Review of current and planned testing programs:* This topic will include a review of results from ongoing or recently completed testing programs obtained since the February 18 workshop. It will also include a review of planned future testing activities. EPA will present the results to date of its Reformulated Gasoline testing program. Other organizations are requested to present their results.

—*Review of existing emission models:* This topic will focus on emission models currently being developed. The methods used to develop each model will be discussed, focusing on the selection of data for inclusion in each model and the specific analytical and statistical methods used to develop each model. Where possible, predicted results from the models presented will be compared to available data; discrepancies between model predictions and test data will be discussed and steps to resolve those discrepancies will be identified.

Other presentations from existing vehicle testing programs and modeling efforts are encouraged. Those interested in making such presentations should notify Michael Sklar at (313) 741–7817 of such intent at least seven days before the workshop. Interested speakers should also provide an estimate of the time required for the presentation of the testimony and any need for audio/visual equipment. Questions will be taken after each presentation.

Public Participation

As in past rulemaking actions, EPA strongly encourages full public participation in the development and assessment of information that will be used in developing a final rule. This workshop will help determine the methods used by the Agency in developing the complex model rule as well as the content of the proposed rule, and EPA welcomes public input regarding the rule and the methods most appropriate for use in developing the model.

EPA suggests that enough copies of the material for presentation be brought to the workshop for distribution to the audience. EPA anticipates attendance of 60 to 90 people. In addition, it will be helpful for EPA to receive an advance copy of any material for presentation before the scheduled workshop date so as to allow EPA staff to give such material full consideration.

Mr. Richard Rykowski, Senior Project Manager for Fuels in the Emission Control Technology Division of EPA's Office of Mobile Sources will chair the workshop. The workshop will be conducted informally, and technical rules of evidence will not apply.

Dated: March 17, 1992.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the insecticide methidathion in or on the raw agricultural commodity sugar apple. The proposed regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number (PP 1E3925/P537), must be received on or before April 24, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (H-7505C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703-305-5310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 1E3925 to EPA on behalf of the IR-4 and the Agricultural Experiment Station of Florida.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), propose the establishment of a tolerance for residues of the insecticide methidathion, *O,O*-dimethyl phosphorodithioate, *S*-ester with 4-(mercaptomethyl-2-methoxy-1,3,4-thiadiazolin-5-one), in or on the raw agricultural commodity sugar apple at 0.2 part per million (ppm). The general commodity term "sugar apple" is defined in 40 CFR 180.1(h) for tolerance purposes to include the raw agricultural commodities *Annona squamosa L.* (sugar apple, sweetsop, anon), its hybrid *A. squamosa L. X A. cherimola M.* (atemoya), and *A. reticulata L.* (true custard apple). The rule establishing a commodity definition for sugar apple was proposed in the **Federal Register** of September 4, 1991 (56 FR 43737). The petitioner proposed that this use of methidathion be limited to Florida based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include:

1. A 2-year chronic feeding study in dogs fed diets containing 4, 16, and 64 ppm with a no-observed-effect-level (NOEL) for systemic effects at 4 ppm (0.1 mg/kg bwt/day). The lowest-effect-level (LEL) of 16 ppm indicated histologic liver alterations including elevated fibrous tissue levels, nodularity, and phlebitis.

2. A two-generation reproduction study in rats fed diets containing 0, 5, 25, and 50 ppm with a reproductive NOEL of 5 ppm (0.25 mg/kg/day) based on a decreased mating index and a generalized indication of the pups failure to thrive while nursing.

3. A rabbit developmental toxicity study with a maternal NOEL of 6 mg/kg/day and a developmental NOEL of greater than 12 mg/kg/day.

4. A rat developmental toxicity study with a maternal NOEL of 2.25 mg/kg/day and a developmental NOEL of greater than 5 mg/kg/day.

5. Mutagenicity studies including gene point mutation, structural chromosome aberration, and other genotoxic effects were negative.

6. A 2-year feeding/carcinogenicity study in rats fed diets containing 0, 4, 40, and 100 ppm with a NOEL of 4 ppm (0.2 mg/kg/day) for systemic effects and no indication of carcinogenic potential at any dose tested.

7. A 2-year chronic feeding/carcinogenicity study in mice with a NOEL for systemic effects at 1.6 mg/kg/day (10 ppm) and a LEL for carcinogenicity (liver tumors observed in male animals) at the 7.5 mg/kg/day (50 ppm) dose level.

Based on the mouse feeding/carcinogenicity study, the Agency has classified methidathion as a possible human carcinogen (Group C). This classification is based on the Agency's Risk Assessment published in the **Federal Register** of September 24, 1986 (51 FR 33992). The evidence as a whole is not considered strong enough to warrant a quantitative estimation of human risk.

In reaching this conclusion the Toxicology Branch Peer Review Committee considered the following information:

1. The positive carcinogenic effects were found in only one species, the mouse, and one sex, the male.

2. Tumors were discovered in animals exposed to very high doses. Adenomas (benign epithelial tumors) were only considered to be biologically significant at 16.1 mg/kg/day (HDT); carcinomas were observed at 7.5 mg/kg/day (50 ppm), but were significant only at 16.1 mg/kg/day; combined adenomas/carcinomas were significantly increased at 7.5 mg/kg/day (50 ppm) and 16.1 mg/kg/day (100 ppm).

3. The rat study was negative for carcinogenic effects at all levels, i.e., 0, 4, 40, and 100 ppm (equivalent to 0, 0.2, 2, and 5 mg/kg/day, respectively).

4. There are no close structural analogs with carcinogenic concerns identified.

5. Methidathion is not mutagenic in several acceptable studies.

The reference dose (RfD), based on the 2-year dog feeding study no-observed-effects-level (NOEL) of 0.1 mg/kg/day and using a 100-fold safety factor, is calculated to be 0.001 mg/kg/day. The anticipated residue contribution (ARC) from existing tolerances for the overall U.S. population is calculated to be 0.000641 mg/kg/day, which is 64 percent of the RfD. The population subgroups for nonnursing infants less than 1 year old and children aged 1 through 6 years have exposure estimates which exceed the RfD. The Agency concludes that dietary exposure to residues of methidathion on sugar apple at 0.2 ppm would pose a negligible incremental risk to the overall U.S. population and to the population subgroups nonnursing infants less than 1 year old and children aged 1 through 6 years.

The Nationwide Food Consumption Survey, from which the food consumption data in the Dietary Risk Exposure System (DRES) is derived, does not report a consumption level for sugar apples. DRES thus utilizes a default consumption value of 0.000001 mg/kg bwt/day for this commodity. When this value is multiplied by the proposed tolerance it results in an exposure estimate below 10^{-6} mg/kg bwt/day which is the level of sensitivity for the analysis.

The nature of the residue is adequately understood, and an adequate analytical method is available for enforcement purposes. An analytical method for enforcing this tolerance has been published in the Pesticide Analytical Manual (PAM), Vol. II. No secondary residues in meat, milk, poultry, or eggs are expected since sugar apple is not considered a livestock feed commodity. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency the tolerance established by amending 40 CFR 180.298 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 1E3925/P537]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 2, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. By amending § 180.298(c) in the table therein by adding and alphabetically inserting the raw agricultural commodity "sugar apple" to read as follows:

§ 180.298 Methidathion; tolerances for residues.

* * * * *

(c) * * *

Commodity	Parts per million
* * * *	
Sugar apple	0.2

[FR Doc. 92-6678 Filed 3-24-92; 8:45 am]

BILLING CODE 6560-50-F

40 CFR Part 721

[OPPTS-50582E; FRL-4051-6]

1-Butene, Polymer with 2-Butene and 2-Methyl-1-propene, Epoxidized; Proposed Revocation of a Significant New Use Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to revoke a significant new use rule (SNUR) promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for a chemical substance based on receipt of new data. The data indicate that the substance will not present an unreasonable risk of injury to human health and further regulation under section 5 of TSCA is not warranted at this time.

DATES: Written comments must be submitted to EPA by April 24, 1992.

ADDRESSES: Since some comments may contain confidential business information (CBI), all comments must be sent in triplicate to: TSCA Document Receipt Office (TS-790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-105, 401 M St., SW., Washington, DC 20460. Comments should include the docket control number. The docket control number for the chemical substance is OPPTS-50582E. Nonconfidential versions of comments on this proposed rule will be placed in the rulemaking record and will be available for public inspection. Unit IV. of this preamble contains additional information on submitting comments containing CBI.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, TSCA Assistance Office (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB-543, 401 M St., SW., Washington, DC 20460. Telephone: (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 15, 1990 (55 FR 33307), EPA issued a SNUR establishing significant new uses for epoxidized polybutene polymer. Because of additional data EPA has received for this substance, EPA is proposing to revoke this SNUR.

I. Rulemaking record

The record for the rule which EPA is proposing to revoke was established at OPPTS-50582 (P-88-217). This record includes information considered by the Agency in developing this rule and includes the test data to which the Agency has responded with this proposal.

II. Background

EPA is proposing to revoke the significant new use and recordkeeping requirements for the following chemical substance under 40 CFR part 721 subpart E. In this unit, EPA provides a brief description of the substance, including its PMN number, chemical name, CAS number, basis for the revocation of the section 5(e) consent order for the substance (including the statutory citation and specific finding), and the CFR citation deleted in the regulatory text section of this rule.

PMN Number P-88-217

Chemical name: 1-Butene, polymer with 2-butene and 2-methyl-1-propene, epoxidized.

CAS Number: 119275-53-5.

Effective date of revocation of section 5(e) consent order: November 6, 1991.

Basis for revocation of section 5(e) consent order: The order was revoked based on the results of certain testing undertaken by the Company under the terms of the consent order. EPA has determined that the test results are valid. Based on the Agency's analysis of the submitted data, EPA found that, for purposes of TSCA section 5, this substance will not present an unreasonable risk of injury to human health and concludes that further regulation under section 5 is not warranted at this time.

Toxicity testing results: An in vivo mouse micronucleus study showed that the chemical substance is not a chromosome mutagen in vivo in the mouse micronucleus test by the intraperitoneal (IP) route. An Ames study showed that the chemical substance is negative with metabolic activation and positive without metabolic activation. A 28-day repeated dose oral study in rats showed a lowest observable adverse effect level (LOAEL) of 250 mg/kg, based on increased liver weights.

CFR citation: 40 CFR 721.1621.

III. Objectives and Rationale of Proposing Revocation of the Rule

During review of the PMN submitted for the chemical substance that is the subject of this proposed revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the human health effects of the substance, and EPA identified the tests considered necessary to evaluate the risks of the substance. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, a section 5(e) consent order was negotiated with the PMN submitter and a SNUR was promulgated. EPA reviewed testing conducted by the PMN submitter for the substance and determined that the information available was sufficient to make a reasoned evaluation of the human health effects of the substance. EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk and subsequently revoked the section 5(e) consent order. The proposed revocation of SNUR provisions for this substance designated herein is consistent with the revocation of the section 5(e) order. In light of the abové, EPA is proposing a revocation of SNUR provisions for this chemical substance. When this revocation becomes final EPA will no longer require notice of any company's intent to manufacture, import, or process this substance.

IV. Comments Containing Confidential Business Information

Any person who submits comments claimed as confidential business information must mark the comments as "confidential," "trade secret," or other appropriate designation. Comments not claimed as confidential at the time of submission will be placed in the public file. Any comments marked as confidential will be treated in accordance with the procedures in 40 CFR part 2. Any party submitting comments claimed to be confidential must prepare and submit a public version of the comments that EPA can place in the public file.

List of Subjects in 40 CFR Part 721

Chemicals, Environmental protection, Hazardous materials, Recordkeeping and reporting requirements, Significant new uses.

Dated: March 13, 1992.

Victor J. Kimm,

Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 will continue to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§ 721.1621 [Removed]

2. By removing § 721.1621.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 91-191, RM-7070]

Radio Broadcasting Services; Liberty Hill, SC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; denial of.

SUMMARY: The Commission denies the petition for rule making filed by Jeffrey C. Sigmon seeking the allotment of Channel 252A to Liberty Hill, South Carolina, as the community's first local FM service. See 56 FR 32158, July 15, 1991. The Commission's staff determined that Liberty Hill was not a "community" for allotment purposes.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 91-191, adopted March 9, 1992, and released March 19, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW; Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 89-15; Notice 3]

Federal Motor Vehicle Safety Standards; Glazing Materials

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking; extension of comment period.

SUMMARY: This notice grants a request to extend the comment period on an agency proposal to amend Standard No. 205, *Glazing materials*, to revise the light transmittance requirements to replicate real world conditions more closely. An extension of the comment period is necessary so that affected industry may conduct testing to determine the effect of the proposal on their products and operations. The extension will permit the public to have adequate time to provide substantive comments on the effect of the proposal on their concerns. The comment closing date is extanded from March 23, 1992 to May 22, 1992.

DATES: Comments on Docket No. 89-15, Notice 2, must be received on or before May 22, 1992.

ADDRESSES: Comments should refer to Docket No. 89-15, Notice 2, and be submitted to: Docket Section, NHTSA, 400 Seventh Street SW, Washington, DC 20590. Docket hours are 9:30 am to 4 pm Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Patrick Boyd, Office of Rulemaking, NHTSA, 400 Seventh Street, SW, Washington, DC 20590. Mr. Bord's telephone number is: (202) 366-6346.

SUPPLEMENTARY INFORMATION: On January 22, 1992, NHTSA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to amend Standard No. 205, *Glazing materials*, to revise the light transmittance requirements to replicate real world conditions more closely (See 57 FR 2496; Docket No. 89-15; Notice 2). Under the proposal, light transmittance in window glazing would be measured in a laboratory test at the same angle at which the window is mounted in a vehicle, instead of at the 90 degree angle specified in the current standard. In addition, the proposed amendments would also make the light transmittance requirements consistent for passenger automobiles and light trucks. The January 1992 notice stated that the public comment period ends on March 23, 1992.

PPG Industries, Inc. (PPG), and Libbey-Owens-Ford Co (LOF), glazing manufacturers that supply a variety of tempered and laminated glazings to motor vehicle manufacturers and also produce after market replacement glazing, petitioned the agency to extend the comment period for the proposal. Both PPG and LOF asked for an extra sixty days for public comment. LOF stated that the extra time was needed since the rulemaking is "extremely complex." Both manufacturers indicated that additional time would be necessary to evaluate the new testing methods described in the proposal. This would enable each manufacturer to determine whether the new methods are convenient to use, and to see how the results of the tests may affect the marketability of its existing products.

NHTSA agrees with the petitioners that additional time is desirable for glazing manufacturers and other parties that wish to provide public comments. Because a large number of the proposed changes to Standard No. 205 involve new test methods, the agency concurs that the manufacturers should have additional time to evaluate the new test methods and to review their products pursuant to these new methods. Providing sufficient time to conduct necessary tests and review aid commenters in providing views that would be helpful to the agency in determining the effect of this proposal on the public. Accordingly, the agency believes that there is good cause for the extension and that the extension is consistent with the public interest. Based on the above considerations, the agency has decided to extend the comment period until May 22, 1992.

Issued on: March 19, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1033 and 1039

[Ex Parte No. 334 (Sub No. 8)]

Joint Petition for Rulemaking on Railroad Car Hire Compensation

[Ex Parte No. 334 (Sub-No. 8A)]

Joint Petition for Exemption of Arbitration Rule From Application of 49 U.S.C. 10706 and Motion To Dismiss

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments on proposed rulemaking and proposed approval of arbitration rule.

SUMMARY: The Commission is extending the deadline from March 27, 1992, to April 27, 1992, for filing comments on the notice of proposed rulemaking and proposed approval of Arbitration Rule that was published in the **Federal Register** February 27, 1992, at 57 FR 6697.

DATES: The new deadline for filing comments is April 27, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927-5660. (TDD for hearing impared: (202) 927-5721.)

SUPPLEMENTARY INFORMATION: On March 17, 1992, the Joint Petitioners seeking this rulemaking filed a request for a 30-day extension of time to file comments, due to the complexity of the issues underlying the **Federal Register** notice published February 27, 1992. Good cause has been shown to grant the extension and comments are now due April 27, 1992.

Decided: March 19, 1992.

By the Commission, Sidney L. Strickland Jr., Secretary.

Sidney L. Strickland, Jr.,

Secretary.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 20, 1992.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection;

(2) Title of the information collection;

(3) Form number(s), if applicable;

(4) How often the information is requested;

(5) Who will be required or asked to report;

(6) An estimate of the number of responses;

(7) An estimate of the total number of hours needed to provide the information;

(8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, room 404-W Admin. Bldg., Washington, DC 20250, (202) 690-2118.

Classification

Executive Order 12291

The final action has been reviewed under Executive Order 12291 and has been determined to be not major. The Department does not anticipate that this notice will have an annual effect on the economy of $100 million or more. This action will not result in a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. Further, this action will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This acton is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of this Act.

Paperwork Reduction Act

This notice does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Executive Order 12372

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.557 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, 48 FR 29112).

Description

Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) requires the Secretary to establish income criteria to be used with nutritional risk criteria in determining a person's eligibility for participation in the WIC Program. The law provides that persons will be eligible for the WIC Program only if they are members of families that satisfy the income standard prescribed for reduced price school meals under section 9 of the National School Lunch Act (42 U.S.C. 1758). Under section 9, the income limit for reduced price school meals is 185 percent of the Federal poverty income guidelines, as adjusted.

Section 9 also requires that these guidelines be revised annually to reflect changes in the Consumer Price Index. The annual revision for 1992 was published by the Department of Health and Human Services (DHHS) in the **Federal Register** on February 14, 1992 at 57 FR 5455. The guidelines published by DHHS are referred to as the poverty income guidelines.

The Department published final WIC regulations on February 13, 1985, at 50 FR 6108. Section 246.7(c)(1) specifies that State agencies may prescribe income guidelines either equaling the income guidelines established under section 9 of the National School Lunch Act for reduced price school meals or identical to State or local guidelines for free or reduced price health care. However, in conforming WIC income guidelines to State of local health care guidelines, the State cannot establish WIC guidelines which exceed the guidelines established under section 9 of the National School Lunch Act for reduced price school meals, or which are less than 100 pecent of the Federal poverty income guidelines.

Consistent with the method used to compute eligibility guidelines for reduced price meals under the National School Lunch Program, the poverty income guidelines were multiplied by 1.85 and the results rounded upward to the next whole dollar.

At this time the Department is publishing the maximum and minimum WIC poverty income limits by household size for the period July 1, 1992 through June 30, 1993. The first table of this notice contains the income limits by household size for the 48 contiguous States, the District of Columbia and all Territories, including Guam. Because the poverty income guidelines for Alaska and Hawaii are higher than the 48 contiguous States, separate tables for Alaska and Hawaii have been included for the convenience of the State agencies.

EFFECTIVE JULY 1, 1992-JUNE 30, 1993

Commodity Supplemental Food Program: Elderly Proverty Income Guidelines.

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: The Department announces adjusted poverty income guidelines to be used by State agencies in determining the income eligibility of elderly persons applying to participate in the Commodity Supplmental Food Program (CSFP). These poverty income guidelines are to be used in conjunction with the CSFP Regulations, 7 CFR part 247.

EFFECTIVE DATE: July 1, 1992.

FOR FURTHER INFORMATION CONTACT: Barbara Hallman, Branch Chief, Policy and Program Development Branch, Supplemental Food Programs Dvision, FNS, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302, (703) 305–2730.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

This final action has been reviewed under Executive Order 12291 and has been determined to be not major. The Department does not anticipate that this notice will have an annual effect on the economy of $100 million or more. This action will not result in a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. Further, this action will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This action is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of that Act.

Paper Reduction Act

This notice does not contain reporting or recordkeeping requirements subject to approval by the Office of Managment and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Executive Order 12372

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.565 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, 48 FR 29112).

Description

On December 23, 1985 the President signed the Food Security Act of 1985 (Pub. L. 99–198). This legislation amends action 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) to require that the Department establish procedures allowing agencies administering the CSFP to serve elderly persons if such service can be provided without reducing service levels for women, infants, and children. The law also mandates establishment of eligibility requirements for elderly participation. Prior to enactment of Public Law 99–198, elderly particpation was restricted by law to three designated pilot projects which served the elderly in accordance with agreements with the Department.

In order to implement the CSFP mandates of Public Law 99–198, the Department published interim rules on September 17, 1986 at 51 FR 32895 and a final rule on February 18, 1988 at 53 FR 4831. These regulations defined "elderly persons" as those who are 60 years of age or older. The final rule further stipulated that elderly persons certifed on or after September 17, 1986 must have "houshold income at or below 130 percent of the Federal Poverty Income Guidelines published annualy by the Department of Health and Human Services" (7 CFR 247.7(a)(3)).

These poverty income guidelines are revised annually to reflect changes in the Consumer Price Index. The revision for 1992 was published by the Department of Health and Human Services (DHHS) in the **Federal Register** for February 14, 1992 at 57 FR 5455. At this time the Department is publishing the income limit of 130 percent of the poverty income guidelines by household size to be used for elderly certification in the CSFP for the period July 1, 1992–June 30, 1993.

The poverty guidelines were multiplies by 1.30 and the results rounded up to the next whole dollar. The first table in this notice contains the income limits by household size for the 48 contiguous States, the District of Columbia, and all the Territoties including Guam. Because the poverty income guidelines for Alaska and Hawaii are higher than for the 48 contiguous States, separate tables for Alaska and Hawaii have been included for the convenience of the State agencies.

EFFECTIVE JULY 1, 1991–JUNE 30, 1992

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 6-92]

Proposed Foreign-Trade Zone, Meridian, ID (Boise Customs Port of Entry); Application Filed

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Meridian, Idaho, requesting authority to establish a general-purpose foreign-trade zone in Meridian, Idaho, within the Boise Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on March 12, 1992. The applicant is authorized to make the proposal under section 67–4703A of the Idaho Code and City Ordinance Number 561.

The proposed foreign-trade zone site (255 acres) is located within the Treasure Valley Business Center on North Eagle Road, Meridian, Idaho, approximately two miles west of the Boise City corporate limits. The site is owned by Gemtone, Inc., and International Trade Services, Inc., has been selected to be the zone operator.

The application contains evidence of the need for zone services in the Boise area. Several firms have indicated an interest in using zone procedures for warehousing/distribution of such items as skis and bicycles, electronic components, apparel, and hobby/craft products. Specific manufacturing approvals are not being sought at this time. Requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations (as revised, 56 F.R. 50790–50808, 10–8–91), a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is May 26, 1992. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to June 8, 1992).

While no public hearing has been scheduled for the FTZ Board, consideration will be given to such a hearing during the review.

A copy of the application and accompanying exhibits will be available during this time for public inspection at the following locations:

U.S. Department of Commerce District Office, 700 West State Street, State House Mall, Boise, Idaho 83720–2700.

Office of the Executive Secretary, Foreign-Trade Zones Board, room 3716, U.S. Department of Commerce, 14th & Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: March 18, 1992.

John J. Da Ponte, Jr.,
Executive Secretary.

Electric Golf Cars From Poland; Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration/ International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On December 9, 1991, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping finding on electric golf cars from Poland. The review covers one manufacturer/exporter of this merchandise to the United States and the period July 1, 1976 through June 10, 1980.

We gave interested parties an opportunity to comment on the preliminary results. At the request of Melex USA, Inc. (Melex), a wholly owned subsidiary of the Polish manufacturer, Pezetel Ltd. (Pezetel), we held a public hearing on January 28, 1992. Based on our analysis of the comments received and the correction of certain clerical errors, we have changed the preliminary margin for Pezetel to a final margin of 5.53 percent.

EFFECTIVE DATE: March 25, 1992.

FOR FURTHER INFORMATION CONTACT: Steven D. Presing or Thomas F. Futtner, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–4106.

SUPPLEMENTARY INFORMATION:

Background

On December 9, 1991, the Department published in the **Federal Register** (56 FR 64239) the preliminary results of its administrative review of the antidumping finding on electric golf cars from Poland (40 FR 53383, November 18, 1975). The Department has now completed that administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Tariff Act) (19 U.S.C. 1675(a)).

Scope of the Review

Imports covered by the review are electric golf cars, both 3-wheel and 4-wheel, from Poland. During the review period, such merchandise was classifiable under items 657.2560 and 692.1090 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under item number 8703.10.00 of the Harmonized Tariff Schedule (HTS). The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers Pezetel Ltd. (Pezetel), a manufacturer/exporter of Polish electric golf cars to the United States, and the period July 1, 1976 through June 10, 1980.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results as provided by § 353.22(c) of the Commerce Regulations. At the request of Melex USA, Inc. (Melex), a wholly owned subsidiary of Pezetel, we held a public hearing on January 28, 1992. We received case and rebuttal briefs from both the respondent and the petitioner, E–Z–GO. Based on our analysis of the comments received and the correction of certain clerical errors, we have revised our preliminary margin.

Comment 1

Melex believes that the General Agreement on Tariffs and Trade (the GATT), Article VI, section 6(a), forbids the assessment of dumping duties on the subject entries because this section requires, in part, a determination of injury or a threat thereof, before a country that is a party thereto can levy antidumping duties. Melex argues that there is no finding by any United States agency that the effect of any dumped Polish golf cars is such as to cause or threaten material injury to an established domestic industry. Melex adds that while such a determination was in effect until June 11, 1980, it is no longer in effect due to the revocation of the finding on that date. Melex states that there can be no claim that a revoked injury determination, more than a decade old, can provide any current justification for the United States to levy an antidumping duty today. Melex argues that this review itself, and any subsequent imposition of antidumping duties, is prohibited by the international legal obligations of the United States.

Department's Position

We disagree with Melex. Melex is correct that Article VI section 6(a) does require a determination that dumping is such as to cause or threaten material injury to an established domestic industry, or in such as to retard materially the establishment of a domestic industry. However, such a determination was made by the International Trade Commission (ITC) in its final determination of October 21, 1975 (40 FR 49153). Article 9 of the Agreement on Implementation of Article VI of the GATT, says that an antidumping duty shall remain in effect as long as is necessary to counteract dumping which is causing injury. The ITC's determination remained in effect until its subsequent changed circumstance review, which found that the threat of injury no longer existed, from that date forward. During the period of review, there was an existing affirmative injury determination.

Since Melex itself requested an administrative review of the antidumping finding for entries during the period from July 1, 1976 to June 10, 1980, before the effective date of revocation, the Department is required to initiate and complete this review and levy antidumping duties, where appropriate.

Comment 2

Melex argues that the Department should not now repudiate what Melex characterizes as prior assurances and findings by the Department that the sales subject to review were not made at "less than fair value" (LTFV). According to Melex, these assurances were communicated in a May 12, 1980 letter sent by the Department to the International Trade Commission (ITC). Melex contends that, based on an analysis conducted by the Department, the Department advised the ITC that if the antidumping finding were revoked, there would be no sales at below fair value. This analysis compared U.S. prices, as reported by the respondent, with foreign market values (FMVs) derived from a study, called the CREA study, valuing Polish factors of production for electric golf cars in Spain. The CREA cost study was contracted by Melex and performed by a Spanish consulting firm. This study determined the costs to manufacture a golf car at a company in Spain whose organization and manufacturing processes were similar to Pezetel's WSK factory located in Mielec, Poland.

Department's Position

We disagree with Melex. The Department did not grant promises or assurances to Melex and in no way represented or implied that if an administrative review were conducted, no sales at below fair value would be found.

The May 12, 1980 letter from the Department to the ITC provided pricing information and a statement that our analysis, at that time, indicated no sales below fair value. This analysis was an informal evaluation of the likelihood of dumping using pricing information which, by its own terms, was an estimate only. In any event, this analysis did not constitute a full and formal review as is required under the governing statute and regulations. Finally, this informal analysis did not determine assessments due on actual entries.

Comment 3

Melex claims that while it negotiated distribution contracts with its U.S. distributors, it sought pricing guidance and assurances of the administering authority, then the Treasury Department (Treasury). Melex maintains that it sought guidance as to the applicable FMVs for its sales during the 1979 and 1980 sales seasons. Based on verified data, and the CREA cost study, Melex claims it received assurances from Treasury of the applicable FMVs to ensure they would be selling at or above fair value over that period. In addition, Melex notes, during the period, it provided to the administering authority drafts and final distribution agreements, including price proposals, for guidance and approval.

Department's Position

We disagree with Melex. According to § 353.22 of the Department's regulations, interested parties may request an administrative review during the anniversary month of the publication of the antidumping finding or order. Upon initiation of the review, the Department issues questionnaires and, if appropriate, conducts a verification. Based on the results of the questionnaire response and verification, if one was conducted, the Department issues its preliminary results. Final results are issued after providing interested parties with an apportunity to comment on the preliminary results.

Although Melex sought guidance and assurances from Treasury regarding the fair value of Melex's sales, the FMVs of Melex's merchandise could not have been determined according to section 751 of the Tariff Act, since no administrative review had been conducted. Accordingly, any assurances Melex believed it recieved regarding the fair value of its sales were not binding, and provided in the form of guidance only, since an administrative review had not yet been conducted.

Comment 4

Melex argues that to apply the current regulations and methodologies retroactively to the entries under review is unfair. Melex explains that the FMVs provided by Treasury to Melex were based on computations made according to the then existing regulations and practices. Melex argues that applying the current regulations tends to increase the FMVs to the detriment of Melex. Melex refers to the fact that it relied on and set its prices for U.S. sales during the period under review based on its understanding of the assurances by the administering authority.

Department's Position

We disagree with Melex. Whether or not Treasury based its FMV computations, which were for guidance only, in accordance with the then existing regulations and practices has no bearing on the current administrative review. As explained above, an informal anlaysis conducted outside the realm of an administrative review does not constitute a full and formal review of sales still unliquidated. See the Department's Position to Comment 2 for further explanation. The Department is conducting this administrative review in accordance with the Tariff Act of 1930, as amended by the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) and the attendant current regulations. This review was initiated on April 18, 1991. The amendment to the relevant section of the 1988 Act was effective for, and applicable to, section 751 reviews initiated after August 5, 1988 (see 55 FR 9057). Therefore, current methodology and regulations govern this review.

Comment 5

Melex claims that the Department wrongly adjusted constructed value (CV) for inflation. Melex contends that if an inflation adjustment is to be made, the Department should apply the Polish rather than the Spanish inflation rates for the relevant time period.

Department's Position

We disagree with Melex. In calculating our preliminary and final margins, we considered Poland a nonmarket economy (NME). In accordance with § 353.52 of the

Commerce regulations, if the economy of a country is state-controlled, the Department will calculate FMV based on the valuation of factors of production in a non-state-controlled economy. As such, we calculated FMV based on a valuation of the factors of production in a market-economy country that was at a level of economic development comparable to that of Poland during the period of review and based on a factory whose organization and manufacturing processes were comparable to Pezetel. The CREA study was contracted by Melex, and Spain was selected as the appropriate surrogate country. The use of the CREA study was not contested by Melex.

To calculate CV using Spanish costs and then adjust those costs using Poland's inflation rates would be inappropriate and contradictory to § 353.52 of the Commerce regulations. If we use Spanish costs for calculating CV, we should use that same market economy's inflation rates. Therefore, it is appropriate to adjust the Spanish CREA study using Spanish, and not Polish, inflation rates.

Comment 6

Melex contends that the Department has misapplied the inflation rates used in projecting CV. It argues the Department used a calendar-year inflation rate (*i.e.*, 1977) and applied it to a specific date (*i.e.*, December 31, 1977), thereby overstating a single CV for the entire calendar year (*i.e.*, 1977). In other words, Melex believes that the Department used a CV for a calendar year that was accurate only on the last day of that year. Melex believes that the Department should correct this error by using monthly inflation rates.

Department's Position

We agree with Melex. We have used monthly inflation rates for calculating the final results of this administrative review. The use of annual inflation rates results in the application of an entire year's inflation to production costs that may not be representative of the entire year. Merchandise produced in the first quarter of a year should not be valued by applying an annual inflation rate.

Comment 7

Melex argues that if the Department is adjusting CV using the Spanish inflation rates, the Department should use U.S. inflation rates for valuing the cost of the electric motor imported from the United States.

Department's Position

We agree with Melex. To adjust the U.S. motor costs by applying a Spanish inflation rate would not reflect the true costs of purchasing the motor from the United States. The U.S. inflation rate must be used in order to reflect the realistic costs of purchasing the motor from the United States. In calculating the final results of review, we used U.S. inflation rates to determine the cost of the U.S. electric motor.

Comment 8

Melex argues that CV must be determined for each ESP sale at a time preceding exportation from Poland. It refers to the statute (section 773(3)(1) of the Tariff Act) which directs the Department to compute the cost of materials and fabrication of the products at a time prior to exportation of the goods. Melex asserts that the Department incorrectly based its analysis on comparisons of U.S. sales prices with the CV-based preliminary FMVs, with CVs determined as of the dates of sale rather than dates preceding export.

Department's Position

We disagree with Melex. The reported date of sale established all the elements necessary for a sale (*i.e.*, quantity, price, other terms). Therefore, in accordance with § 353.50(b) of the Commerce regulations which clarifies § 773(e)(1) of the Tariff Act, we have calculated CV using the most recent CV data available preceding the date of sale.

Comment 9

Melex believes that the Department incorrectly adjusted overhead costs valued according to the CREA study by re-allocating overhead costs based on Pezetel's actual golf car production quantities for each year under review. Melex explains that this overstates the overhead expenses incurred, because it incorrectly assumes that all of the overhead costs must be allocated only to Pezetel's production of golf cars. Melex explains that Pezetel produced several products other than golf cars, and that golf cars accounted for a relatively minor proportion of total production. Therefore, Melex argues that all such overhead costs should be allocated over all products, and not just golf cars, produced by Pezetel during the period of review.

Department's Position

We disagree with Melex. The CREA study was based solely on the production of three-wheel golf cars and, therefore, it did not reflect overhead costs for products other than golf cars. Thus, re-allocating the CREA study's overhead costs based on Pezetel's actual production quantities does not overstate the costs.

Comment 10

Melex argues that the Department erred in calculating credit expenses. Melex claims that it reported its actual credit costs and that the Department's application of Melex's reported formula is incorrect because the Department's calculation reflects the wrong date of shipment. The date of shipment used by the Department does not reflect the date of shipment to the customer. Rather, the Department used the date of shipment from Poland to Melex in the United States.

Department's Position

We disagree with Melex. In its submissions, Melex provided a narrative and a formula for calculating the U.S. credit expense, and it reported a credit variable on its computer tape. We attempted to reconcile the formula reported in the narrative with the "credit expense" variable on the computer tape. The results did not match. As we were unable to duplicate the computer tape credit figures, we calculated the credit expense using the formula as reported by Melex.

Melex assertion that the Department used the wrong date of shipment in applying Melex's formula is unfounded. In its questionnaire responses, Melex reported only one date of shipment. Melex did not explain that there was an additional date of shipment, nor did it provide the alternative dates of shipment. Therefore, we have calculated the final results using the formula and the date of shipment as reported by Melex.

Comment 11

Melex argues that the Department should use the Polish producer's reported costs for determining the CV of 4-wheel golf cars rather than using the estimated data concerning the production of 4-wheel golf cars submitted by E–Z–GO. Melex claims that it provided the Department with detailed cost information from the Polish producer showing actual differences between costs of production of 3-wheel and 4-wheel golf cars during the review period. It believes that the Department should rely on the cost information and ratios shown in respondent's November 25, 1991 filing.

Department's Position

We disagree with Melex. Although, in its November 25, 1991 response, Melex defined what the physical differences are between 3-wheel and 4-wheel golf cars, it did not provide an explanation for the source and basis of such cost differences. The Department cannot determine from the response whether the costs are based on Spanish cost experience, or whether the costs are based on Polish cost experience and later converted to pesetas. Melex only stated that the information enclosed is applicable to the CV valued in Spain, without further explanation.

Comment 12

Melex contends that the Department erroneously inflated, rather than deflated, the 1977 constructed value to arrive at the 1976 constructed value.

Department's Position

We agree with Melex. We have made the appropriate changes in our final results by deflating the 1977 CVs to determine the 1976 CVs.

Comment 13

Melex argues that sales made by Pezetel before July 1976 should be included in the administrative review. Melex explains that it reported sales made in 1975 that were exported to the United States and entered after July 1, 1976. Melex believes that these sales should be reviewed because, if they are not, an additional review would be required to cover these unliquidated entries.

Department's Position

We agree with Melex. In accordance with section 751(a) of the Tariff Act, the administering authority shall determine, among other things, the FMV and the United States price of each entry of merchandise subject to the antidumping duty order. Therefore, in order to liquidate all suspended entries, all Polish golf cars entered during the period of review have been reviewed.

Comment 14

The petitioner, E–Z–GO, believes that the Department did not use proper dates to establish the CV for comparison to the net price on each ESP and PP sale. It argues that the cost of materials and fabrication used for CV should be calculated at a time preceding the date of exportation of the merchandise to allow for the production of that merchandise in the ordinary course of business.

With particular attention to PP sales, the petitioner further explains that Melex's ordinary course for business was such that golf cars were shipped directly from the Pezetel factory to the United States, and that the shipments went directly to the port of entry designated by the ultimate consumer. They believe that this implies that the golf cars were exported immediately after they were manufactured. In addition, E–Z–GO mentions that Melex stated that the sales prices were usually set by contracts for a one-year period. In other words, prices set today can still be in effect for delivery one year later.

Department's Position

We disagree with E–Z–GO. The reported date of sale established all the elements necessary for a sale (*i.e.*, quantity, price, other terms). Therefore, in accordance with § 353.50(b) of the Commerce regulations which clarifies § 773(e)(1) of the Tariff Act, we have calculated CV using the most recent CV data available preceding the date of sale. For PP sales, the date of sale precedes the date of exportation.

Comment 15

E–Z–GO maintains that if the Department uses the dates of sale to determine the CV, the Department should include costs for maintaining golf cars in finished goods inventory in its CVs. E–Z–GO explains that using the dates of sale would imply that a golf car was inventoried before it was shipped to the customer, especially when sales were made one year prior to the actual shipment.

Department's Position

We agree in part with the petitioner. Melex reported inventory carrying costs for exporter's sale price (ESP) sales. Where Melex reported inventory carrying costs, we subtracted them from the relevant U.S. price for these final results. The evidence on the record suggests that Pezetel normally shipped golf cars from the factory directly to the port of entry designated by the ultimate consumer in the United States and did not typically hold golf cars in inventory prior to shipment. When they held golf cars in inventory prior to shipment in the United States, we made the appropriate deduction as reported by Melex. It would be inappropriate to include costs for maintaining golf cars in finished goods inventory for sales for which no inventory carrying costs were actually incurred.

Comment 16

E–Z–GO argues that the Department did not include in its CVs the cost of options that were included in the sales price of golf cars. E–Z–GO cites several observations supporitng this argument. Using these observations, E–Z–GO explains that Melex reported five sales of the identical product to one customer, yet one car was priced differently. Based on this price difference, E–Z–GO concludes that one car may have included options whose costs should be accounted for.

Department's Position

We disagree with the petitioner. The evidence on the record demonstrates that E–Z–GO's conclusion is incorrect. In its case brief, Melex explains that the price difference cited by E–Z–GO is accounted for by an anticipated change in the ocean freight expense, and not by any options on the golf cars.

Comment 17

E–Z–GO argues that electric golf cars and many of the parts and components that are purchased for attachment to electric golf cars are consumer goods. E–Z–GO believes that, since these products are routinely marketed in consumer channels, they would be included in the calculation of the CPI. Therefore, E–Z–GO believes that the Department should use the consumer price index (CPI) rather than the industrial price index (IPI), as an inflation factor.

Department's Position

We disagree with E–Z–GO. As stated in the International Financial Statistics Yearbook as published by the International Monetary Fund, the IPI is designed to monitor changes in prices of items at the point of the first important commercial transaction. The IPI overs a mixture of prices of industrial goods at various stages of production and distribution.

The CPI, on the other hand, reflects the changes in the cost of acquiring a fixed basket of goods and services which are typically purchased on a regular basis by the average consumer. A golf car manufacturer, such as Pezetel, is not the average consumer. The CPI or the "cost of living index" typically includes such items as food, clothing, automobiles, homes, and even fees to doctors. This does not accurately reflect the purchases made by Pezetel.

Although many of the parts and components by Pezetel may be considered to be consumer goods, the method and pricing of purchases are significantly different from those of the typical consumer channel. Companies like Pezetel can command lower prices not available to the average consumer. For these reasons, we believe the industrial price index is a more appropriate measure of inflation and we have used the IPI in calculating the final results.

Comment 18

E–Z–GO believes that the Department incorrectly calculated the inflation adjustment for 1976 costs. In calculating the factor to apply to 1977 costs, it believes that the Department should divide the difference between the 1977 and 1976 index values by the 1977, and not the 1976, index value.

Department's Position

We disagree with the petitioner. E–Z–GO's calculation is mathematically incorrect and the proposed use of it would yield inflation rates that do not match the figures reported in the International Monetary Fund statistics. To determine the percentage difference between the 1977 and 1976 inflation factors, the absolute difference must be divided by the 1976 inflation factor (*e.g.*, 1977 factor minus the 1976 factor, the result divided by the 1976 factor equals the percentage difference). To test the formula, add the percentage difference to the 1976 factor and it yields the 1977 inflation factor; using E–Z–GO's method does not.

Comment 19

E–Z–GO argues that the Department should deduct indirect selling expenses incurred by Melex on ESP sales. It claims that Melex incurred indirect selling expenses that were not reported. E–Z–GO believes that the Department should estimate the indirect selling expenses by using the company's financial statements.

Department's Position

We agree in part with the petitioner. For the final calculations, we have made a deduction for indirect selling expenses. Although Melex did report indirect selling expenses in its questionnaire response by invoice number, it reported indirect selling expenses inclusive of servicing and warranty expenses and commissions. Servicing and warranty expenses were already reported separately. We deducted these figures from the indirect selling expenses to avoid any double-count. To subtract servicing and warranty expenses, we used the figures as reported by Melex on page 3 of its September 30, 1991 submission.

To subtract an amount for commissions from the indirect selling expenses, we used Melex's financial statements. The financial statements reported commissions and salaries as one figure. Because we were unable to distinguish salaries from commissions we included, as a reasonable alternative, the amount reported as being representative of the commission expense. This amount was subtracted from the indirect selling expenses. The remaining amount, the indirect selling expenses, was divided by net sales to derive the ratio of indirect selling expenses to sales. This percentage was then multiplied by the U.S. net sales price to determine U.S. indirect selling expenses.

Comment 20

E–Z–GO believes that the Department should deduct sales commissions incurred by Melex on ESP sales, referring to Melex's financial statements which indicate that the company incurred commissions.

Department's Position

We agree with the petitioner. Melex confirmed at the administrative hearing that it did incur commissions on its sales to the United States, but did not segregate them from the indirect selling expenses. For the final results, we have calculated a commission expense based on Melex's financial statement, and subtracted it from all ESP sale in accordance with § 353.56 of the Department's regulations.

The commission expense was calculated by taking the total reported commissions in Melex's financial statements, as explained in the *Department's Position* to *Comment 19*, and dividing that number by net sales to arrive at a commission percentage. That percentage was then multiplied by the U.S. net sales price to determine the per-unit commission expense. Because there were no commissions in the FMV, to make the circumstance of sales adjustment, the indirect selling expenses were deducted. The subtraction for indirect selling expenses were limited to the amount of the U.S. commissions.

Comment 21

E–Z–GO argues that the Department failed to calculate U.S. imputed credit expenses for certain sales, explaining that these errors occurred because there was no interest rate entered in the "Rate" field for these sales.

Department's Position

We agree with the petitioner and have made the appropriate corrections for the final results.

Comment 22

E–Z–GO states that Pezetel reported sales exported from Poland in February and April of 1979, but the sales were entered into the United States in February of 1978. The incorrect dates resulted in incorrect calculations for inputed credit expenses.

Department's Position

We have made the appropriate changes in calculating our final results.

Final Results of Review

As a result of the comments received and the correction of clerical errors, we have revised the preliminary results, and we determine that the weighted average margin for Pezetel is 5.53 percent.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all entries made during the period of review. Individual differences between United States price and foreign market value may vary from the percentage stated above. Upon completion of this review, the Department will issue appraisement instructions directly to the Customs Service. Since the antidumping finding was revoked in 1980, this review was undertaken to determine assessed duties for entries made during the period of review. No cash deposits will be required for future entries of electric golf cars from Poland, nor will appraisements be withheld for antidumping purposes.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: March 16, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

Centers for Disease Control—CEHIC, et al; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 91–159. Applicant: Centers for Disease Control, CEHIC, Chamblee, GA 30341. *Instrument*: Mass Spectrometer, Model AutoSpec. *Manufacturer*: VG Analytical Ltd., United Kingdom. *Intended Use*: See notice at 56 FR 56633, November 6, 1991. *Reasons*: The foreign instrument provides: (1) trisector double focusing MS/MS capability, (2) sensitivity of 3.0 x 10^{-7} c/μg for m/z 298, (3) resolution to 60,000 and (4) scan rate to 0.2 second/decade. *Advice Submitted By*: National Institutes of Health, January 31, 1992.

Docket Number: 91–160. *Applicant*: National Institute of Standards and Technology, Gaithersburg, MD 20899. *Instrument*: Reflection High Energy Electron Diffraction System. *Manufacturer*: Staib Instrumente, GmbH, Germany. *Intended Use*: See notice at 56 FR 60972, November 29, 1991. *Reasons*: The foreign instrument provides: (1) Electron beam blanking, (2) beam rocking of ±2.0 degrees and (3) electron energy to 35 keV. *Advice Submitted By*: National Institutes of Health, January 31, 1992.

Docket Number: 91–163. *Applicant*: Pennsylvania State University, University Park, PA 16802. *Instrument*: Mass Spectrometer, Model MI–401. *Manufacturer*: Kratos Analytical, United Kingdom. *Intended Use*: See notice at 56 FR 60972, November 29, 1991. *Reasons*: The foreign instrument provides a rotation mechanism to change lenses without breaking vacuum and a two-stage detector to maximize mass resolution. *Advice Submitted By*: National Institutes of Health, January 31, 1992.

Docket Number: 91–171. *Applicant*: Howard Hughes Medical Institute, New York, NY 10003. *Instrument*: (4) Micromanipulators, Models SM–11–B and SM–15–B. *Manufacturer*: Narishige Scientific Instruments, Japan. *Intended Use*: See notice at 56 FR 64244, December 9, 1991. *Reasons*: The foreign instrument provides precise mechanical control (scale division to 10.9μm) compatible with a stereotaxic head-holding frame. *Advice Submitted by*: National Institutes of Health, February 2, 1992.

Docket Number: 91–181. *Applicant*: U.S. Department of Commerce—NOAA, Panama City, FL 32408. *Instrument*: Electronic Measuring Board with Accessories. *Manufacturer*: Limnoterra Atlantic Inc., Canada. *Intended Use*: See notice at 57 FR 1724, January 15, 1992. *Reasons*: The foreign instrument provides in situ measurements of fish length with simultaneous logging of ancillary data which can be down-loaded to a PC on return from the field. *Advice Submitted By*: National Institutes of Health, March 5, 1992.

The National Institutes of Health advises that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument. We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

U.S. Geological Survey, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 91–174. *Applicant:* U.S. Geological Survey, Denver, CO 80225. *Instrument:* Mass Spectrometer System, Model 252. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* See notice at 57 FR 399, January 6, 1992. *Reasons:* The foreign instrument provides: (1) An internal precision of 0.005 per mil for 3 bar μl samples CO_2, (2) a carbonate autosampler and (3) laser ablation for samples as small as 1.0 nanomole.

Docket Number: 91–180 *Applicant:* University of Miami, Miami, FL 33149. *Instrument:* Mass Spectrometer System, Model 215–50. *Manufacturer:* Mass Analyzer Products, Ltd., United Kingdom. *Intended Use:* See notice at 57 FR 1724, January 15, 1992. *Reasons:* The foreign instrument provides sensitivity of 6.0×10^{-4} A/torr for M/e 40 and an M/e 36 background less than 5.0×10^{-14} cm^3 STP.

The capability of each of the foreign instruments described above is pertinent to each applicant's intended purposes. We know of no instrument or apparatus being manufactured in the United States which is of equivalent scientific value of either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

Michigan State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR part 301). Ralated records can be viewed between 8:30 a.m. and 5:00 p.m. in room 4204, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 91–155. *Applicant:* Michigan State University, East Lansing, MI 48824–1115. *Instrument:* Gas Chromatograph Interface, Model Isochrom I. *Manufacturer:* Fisons Instruments, United Kingdom. *Intended Use:* See notice at 56 FR 56633, November 6, 1991.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* This is a compatible accessory for an instrument previously imported for the use of the applicant. The instrument and accessory were made by the same manufacturer. The National Institutes of Health advises in its memorandum dated January 31, 1992, that the accessory is pertinent to the intended uses and that it knows of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

Frank W. Creel,

Director, Statutory Import Programs Staff.

University of Virginia, Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 91–157. *Applicant:* University of Virginia, Charlottesville, VA 22903. *Instrument:* GC Interface, Model Isochrom I. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* See notice at 56 FR 56633, November 6, 1991.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Ressons:* This is a compatible accessory for an instrument proviously imported for the use of the applicant. The instrument and accessory were made by the same manufacturer. The National Institutes of Health advises in its memorandum dated January 31, 1992, that the accessory is pertinent to the intended uses and that it knows of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

Vanderbilt University, et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 91–190. *Applicant:* Vanderbilt University, Nashville, TN 37235. *Instrument:* Electron Microscope, Model CM 12. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 57 FR 4002, February 3, 1992. *Order Date:* August 21, 1991.

Docket Number: 91–194. *Applicant:* U.S. Department of Agriculture, APHIS, Ames, IA 50010. *Instrument:* Electron Microscope, Model CM 10/PC. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 57 FR 4003, February 3, 1992. *Order Date:* September 27, 1991.

Docket Number: 91–196. *Applicant:* The University of Connecticut, Storrs, CT 06269–2131. *Instrument:* Electron Microscope, Model EM 910. *Manufacturer:* Carl Zeiss, Germany. *Intended Use:* See notice at 57 FR 4003, February 3, 1992. *Order Date:* September 1, 1991.

Docket Number: 91–197. *Applicant:* Harvard Medical School, Boston, MA 02115. *Instrument:* Electron Microscope, Model H–7100. *Manufacturer:* Hitachi, Japan. *Intended Use:* See notice at 57 FR 4003, February 3, 1992. *Order Date:* July 31, 1991.

Docket Number: 91–199. *Applicant:* University of Wisconsin, Madison, WI 53706. *Instrument:* Electron Microscope, Model CM20. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 57 FR 4003, February 3, 1992. *Order Date:* July 19, 1991.

Docket Number: 91–200. *Applicant:* Veterans Affairs Medical Center, Ann Arbor, MI 48105. *Instrument:* Electron Microscope, Model CM 10/PC. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 57 FR 4003, February 3, 1992. *Order Date:* September 3, 1991.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. *Reasons:* Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Names of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 8–9 April 1992.

Time: 0800–2400 hours daily.

Place: Andrews AFB, VA.

Agenda: Members of the 1992 ASB Summer Study, "C2 on the Move" will meet to continue work on the study. The USSOCUM has invited the Army Science Board "Command and Control on the Move" sub group to attend classified briefings, interviews and demonstrations concerning capabilities. Contingency planning and missions will be discussed. Areas of interest are in both "real world" operational concerns and command and control areas. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 92–7020 Filed 3–24–92; 8:45 am]

BILLING CODE 3710–08–M

U.S. Army Reserve Command Independent Commission; Notice of Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting:

Name of Committee: U.S. Army Reserve Command Independent Commission.

Date of Meeting: April 13, 1992.

Place: 1225 Jefferson Davis Highway, suite 1410, Arlington, Virginia 22202.

Time: 9 a.m.–4 p.m.

Purpose: The Commission was established to assess the progress and effectiveness of the United States Army Reserve Command since its establishment.

Summary of Agenda: This is the second meeting of the Commission. The Commission will review the organization and responsibilities of the USARC and finalize measurement standards to be used in the assessment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the matter permitted by the committee. Anyone desiring to appear before the committee should contact the staff for procedures.

Ellis L. Pennington,

LTC, FA, U.S. Army Reserve Command, Independent Commission.

[FR Doc. 92–6858 Filed 3–24–92; 8:45 am]

BILLING CODE 3710–01–M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Meeting

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Executive Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10 (a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

Dates: April 14, 1992.

Time: 11 a.m. (E.T.).

Location: National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mary Ann Wilmer, Operations Officer, National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC, 20005–4013, Telephone: (202) 357–6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), title III–C of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub.L. 100–297), (20 USC 1221e-1).

The Board is established to formulate policy guidelines for the National Assessment of Educational Progress. The Board is responsible for selecting subject areas to be assessed, developing assessment objectives, identifying appropriate achievement goals for each grade and subject tested, and establishing standards and procedures for interstate and national comparisons. The Executive Committee of the National Assessment Governing Board will meet via telephone conference call on April 14, 1992 beginning at 11 a.m. The proposed agenda includes review and approval of the 1994 mathematics specifications; update on NAEP reauthorization and budget issues; and review of the NAGB agenda for the May 7–9 Board meeting. Because this is a teleconference meeting, facilities will be provided so the public will have access to the Committee's deliberations. Records are kept of all Board proceedings and are available for public inspection at the office of the National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC, from 8:30 a.m. to 5:00 p.m.

Date: March 20, 1992.

Roy Truby,

Executive Director, National Assessment Governing Board.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER90-525-007, et al.]

New England Service Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate filings

Take notice that the following filings have been made with the Commission:

1. New England Power Service Co.

[Docket No. ER90-525-007]

March 16, 1992.

Take notice that on March 2, 1992 New England Power Company tendered for filing its compliance filing in the above-referenced docket.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Green Mountain Power Corp.

[Docket No. ER92-362-000]

March 16, 1992.

Take notice that on March 10, 1992, Green Mountain Power Corporation (GMP) tendered for filing an Agreement dated as of November 1, 1991 between GMP and Central Vermont Public Service Corporation (CVPS), pursuant to which GMP has agreed to sell capacity in GMP's Berlin No. 5 gas turbine and associated energy to CVPS. GMP has requested waiver of the Commission's regulations in order to permit the agreement to become effective concurrently with the commencement of service to CVPS on November 1, 1991.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Duke Power Co.

[Docket No. ER92-360-000]

March 16, 1992.

Take notice that on March 9, 1992, Duke Power Company (Duke) tendered for filing an Interchange Agreement Between South Carolina Public Service Authority and Duke Power Company ("Agreement"). The Agreement will supersede the Interchange Agreement dated 1983, as amended, currently in effect between South Carolina Public Service Authority and Duke. The Agreement provides for interconnected operations between the two systems as well as transactions involving Spinning Reserve, Short Term Power, Limited Term Power, Economy Interchange, Other Energy, and Wheeling services.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Green Mountain Power Corp.

[Docket No. ER92-104-000]

March 16, 1992.

Take notice that on March 9, 1992, Green Mountain Power Corporation (GMP) tendered for filing an Agreement dated as of February 1, 1989 between GMP and Vermont Electric Generation and Transmission Cooperative, Inc. (VEG&T), pursuant to which GMP has agreed to sell VEG&T capacity and energy which may be available from time to time. GMP states that the Agreement consolidates into a single contract the provisions of, and is intended to substitute for, a Sales Agreement and unexecuted Addendum thereto previously filed in this proceeding.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Delmarva Power & Light Co.

[Docket No. ER92-358-000]

March 16, 1992.

Take notice that Delmarva Power & Light Company (Delmarva) on March 9, 1992, tendered for filing proposed supplements to its FERC Rate Schedules No. 67, 69, and 71. These Supplements, filed with the approval and concurrence of the City of Milford, Delaware, (Milford), the City of Newark, Delaware, and the Easton Utilities Commission Town of Easton, Maryland are being made to identify and seek FERC approval of existing "non-contractual" agreements and payments associated with "aid-in-construction" projects entered into by each of the above listed parties.

Copies of this filing were served upon the City of Milford, the City of Newark, and the Delaware Public Service Commission, the Mayor of the Town of Easton, the Easton Utilities Commission and the Maryland Public Service Commission.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Indiana Michigan Power Co.

[Docket No. ER92-278-000]

March 16, 1992.

Take notice that American Electric Power Service Corporation, on behalf of Indian Michigan Power Company (I&M), on March 11, 1992, tendered for filing an amendment to its filing in the captioned Docket.

The amendment, requested by the Commission's staff, involves cost support for demand charges contained in the filing.

A copy of the filing was served upon the Indiana Utility Regulatory Commission and the Michigan Public Service Commission.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Pacific Gas and Electric Co.

[Docket Nos. ER91-337-001 and EL91-31-000]

March 16, 1992.

Take notice that on February 3, 1992, Pacific Gas and Electric Company (PG&E) tendered for filing its refund report in the above referenced dockets.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. Cleveland Electric Illuminating Co.

[Docket No. ER92-292-000]

March 16, 1992.

Take notice that The Cleveland Electric Illuminating Company on March 10, 1992 as requested by the Commission Staff, filed revised cost information to reflect possible total utilization in the calculation of the energy adder within Schedule C (Short Term Power) and Schedule D (Limited Term Power). The Schedules are contained within the CEI-Cleveland Agreement for Installation and Operation of 138 kV Synchronous Interconnection as being amended February 1, 1992 to replace without interrupting the CEI-Cleveland Agreement for Installation and Operation of 138 kV Synchronous Interconnection dated as of April 17, 1975.

Copies of the filing were served upon the Ohio Public Utilities Commission and the City of Cleveland.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Idaho Power Co.

[Docket No. ER92-363-000]

March 16, 1992.

Take notice that on March 10, 1992, Idaho Power Company (IPC) tendered for filing a Restated Transmission Service Agreement dated February 6, 1992, between PacifiCorp Electric Operations and Idaho Power Company. The term of the new Agreement is co-extensive with the term of the Agreement for the Ownership of the Jim Bridger Project between IPC and Pacific Power and Light Company.

Idaho Power has requested an effective date for the Restated Transmission Service Agreement of May 9, 1992.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Central Maine Power Co.

[Docket No. ER90-471-002]

March 16, 1992.

Take notice that on March 2, 1992, Central Main Power Company (CMP) tendered for filing the following:

1. Second Amendment to Settlement Agreement between CMP and Massachusetts Municipal Wholesale Electric Company (MMWEC) dated February 27, 1992 (Second Amendment).

2. Amendment to Transmission Service Agreement dated February 27, 1992 (TSA Agreement).

3. Notice of Termination effective October 31, 1991 pertaining to Transmission Contract dated March 8, 1991 between CMP and MMWEC.

The Second Amendment and the TSA Amendment modify a Settlement Agreement between CMP and MMWEC submitted by CMP to the Commission for approval on June 10, 1991 along with a Transmission Service Agreement between CMP and MMWEC dated June 7, 1991.

CMP has requested waiver of the Commission's notice and filing requirements to permit the amended Transmission Service Agreement to become effective on November 1, 1991 and to permit the Notice of Termination to become effective as of October 31, 1991.

CMP has served a copy of the filing on the affected customer and on the Maine Public Utilities Commission.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Green Mountain Power Corp.

[Docket No. ER92-361-000]

March 16, 1992.

Take notice that on March 9, 1992, Green Mountain Power Corporation (GMP) tendered for filing an Agreement dated as of January 1, 1992 between GMP and Burlington Electric Department ("BED"), pursuant to which GMP has agreed to sell capacity in GMP's Berlin No. 5 gas turbine and associated energy to BED. GMP has requested waiver of the Commission's regulations in order to permit the Agreement to be made effective as of January 1, 1992, concurrently with the commencement of service to BED on January 1, 1992.

Comment date: March 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Entergy Services, Inc.

[Docket No. ER92-225-000]

March 17, 1992.

Take notice that Entergy Services, Inc. (Entergy Services), as agent for Arkansas Power & Light Company, Louisiana Power & Light Company, Mississippi Power & Light Company, and New Orleans Public Service Inc., on March 10, 1992 tendered for filing a revised contract for Purchases of Economic Energy with Jacksonville Electric Authority (JEA).

Entergy Services requests an effective date of April 1, 1992 for Purchasing of Economic Energy. Entergy requests waiver of the Commission's notice requirements under § 35.11 of the Commission's regulations.

Comment date; March 31, 1992, in accordance with Standard Paragraph E end of this notice.

13. Commonwealth Electric Co.

[Docket No. ER92-354-000]

March 17, 1992.

Take notice that on March 5, 1992, Commonwealth Electric Company (Commonwealth) tendered for filing, pursuant to Section 35.12 of the Commission's Regulations, an agreement governing the sale by Commonwealth of System Exchange Power to New England Power (NEP).

By the provisions of this agreement, Commonwealth proposes to sell to NEP electric power upon terms and conditions and in amounts mutually acceptable to both parties. Commonwealth has requested the Commission to waive its notice requirements pursuant to § 35.11 of its regulations for good cause shown and to permit the tendered agreement to become effective as proposed of January 16, 1992.

A copy of this filing has been served upon NEP and upon the Massachusetts Department of Public Utilities.

Comment date: March 31, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. New England Power Co.

[Docket No. ER92-372-000]

March 17, 1992.

Take notice that on March 12, 1992, New England Power Company (NEP) submitted for filing a Power Sales Contract with the Massachusetts Municipal Wholesale Electric Company for up to 100 megawatts of capacity and energy from NEP's Salem Harbor Unit No. 4. NEP requests waiver of the Commission's regulations to allow this Contract to become effective on March 30, 1992.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

15. Central Hudson Gas & Electric Corp.

[Docket No. ER92-347-000]

March 17, 1992,

Take notice that Central Hudson Gas and Electric Corporation (Central Hudson) on March 3, 1992, tendered for filing its development of actual costs for 1990 related to transmission service provided from the Roseton Generating Plant to Consolidated Edison Company of New York, Inc. (Con Edison) and Niagara Mohawk Power Corporation (Niagara Mohawk) in accordance with the provisions of its Rate Schdule FERC No. 42.

The actual costs for 1990 amounted to $.0271 per Mw.-day to Con Edison and $3.5168 per Mw.-day to Niagara Mohawk and are the basis on which charges for 1991 have been estimated.

Central Hudson requests waiver on the notice requirements set forth in 18 CFR 35.11 of the Regulations to permit charges to become effective January 1, 1991 as agreed by the parties.

Central Hudson states that a copy of its filing was served on Con Edison, Niagara Mohawk and the State of New York Public Service Commission.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

16. Tampa Electric Co.

[Docket No. ER92-370-000]

March 17, 1992,

Take notice that on March 11, 1992, Tampa Electric Company (Tampa Electric) tendered for filing amended Service Schedules A and B, providing for Emergency and Scheduled/Short-Term Firm Interchange Service, respectively, between Tampa Electric and the City of Homestead, Florida (Homestead). The amended Service Schedules are tendered as supplements to the existing contract for interchange service between Tampa Electric and Homestead.

Tampa Electric also tendered for filing a Letter of Commitment providing for negotiated sales of available power by Tampa Electric to Homestead. The Letter of Commitment is submitted as a supplement to Service Schedule J (Negotiated Interchange Service) under the existing contract for interchange service.

Tanpa Electric proposes an effective date of May 15, 1992, for the Service Schedules and Letter of Commitment.

Copies of the filing have been served on Homestead and the Florida Public Service Commission.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

17. Entergy Services, Inc.

[Docket No. ER92-365-000]

March 17, 1992.

Take notice that Entergy Services, Inc., as agent for Entergy Power, Inc. (Entergy Power), on March 11, 1992, tendered for filing a unit power sale agreement between Entergy Power and Northeast Texas Electric Cooperative, Inc. Entergy Power requests waiver of the Commission's notice requirements specified by § 35.3 of the Commission's Regulations and requests waiver of the Commission's cost support requirements under §35.12 or 35.13 of the Commission's Regulations, to the extent are otherwise applicable to this filing.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

18. Union Electric Co.

[Docket No. ER92-366-000]

March 17, 1992.

Take notice that on March 11, 1992, Union Electric Company (UE) tendered for filing a Second Amendment dated February 21, 1992, to the Interchange Agreement dated August 29, 1985, between Iowa Southern Utilities Company (ISU) and UE. Said Amendment provides for changes in facilities.

Also filed was a First Amendment dated February 21, 1992 to the Facility Use Agreement dated September 19, 1986, which also reflects changes in facilities along with a reduction in the annual charge.

UE requests that these filings be permitted to become effective February 21, 1992.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

19. Iowa-Illinois Gas and Electric Co.

[Docket No. ER92-368-000]

March 17, 1992.

Take notice that Iowa-Illinois Gas and Electric Company (Iowa-Illinois), on March 11, 1992, tendered for filing pursuant to Section 35.13 of the Regulations under the Federal Power Act a rate schedule change in the form of a First Amendment dated January 22, 1992 to Interchange Agreement (the Agreement) dated June 13, 1963, between Iowa-Illinois and Waverly Municipal Electric Utility of Waverly, Iowa (Waverly).

Iowa-Illinois states the Agreement applies only to transactions between Iowa-Illinois and Waverly. Under the First Amendment Schedule D (Supplement No. 4 to Rate Schedule FERC No. 48) has been changed to allow Short Term Firm Power to be taken for periods of one or more days rather than for periods of one or more weeks of seven consecutive days. The Demand Charge under Service Schedule D has been changed from 95 cents per kilowatt reserved per week to up to 19 cents per kilowatt reserved per day when reserved on a daily basis or up to 95 cents per kilowatt reserved per week when reserved on a weekly basis. The Energy Charge under Service Schedule D has been changed to remove the floor of 6 mills per kilowatthour and to establish the Energy Charge as the incremental cost of the delivering party plus ten percent (10%) of such costs plus reimbursement for certain wheeling charges.

Iowa-Illinois proposed the rate schedule change to be effective on June 1, 1992.

Copies of the filing were served upon the Illinois Commerce Commission, the Iowa Utilities Board and Waverly.

Comment date: March 31, 1992, in accordance with Standard Paragraph E at the end of this notice.

20. Public Service Electric and Gas Co.

[Docket No. ER92-367-000]

March 17, 1992.

Take notice that on March 11, 1992, Public Service Electric and Gas Company (PSE&G) tendered for filing an initial rate Schedule to provide interruptible transmission service to Orange and Rockland Utilities, Inc. for the delivery of power and associated energy from Pennsylvania Power and Light.

PSE&G requests a waiver of § 35.3 of the Commission's Regulations so that the Rate Schedule can be made effective forthwith.

Comment date: March 31, 1992, in accordance with Standard Paragraph E end of this notice.

21. Iowa Public Service Co.

[Docket No. ER92-364-000]

March 17, 1992.

Take notice that on March 10, 1992, Iowa Public Service Company (IPS) tendered for filing Supplement No. 1 to the Electric Utility Services Agreement (Agreement) with Waverly Light & Power (Waverly) dated May 1, 1989.

IPS indicates that FERC approved for filing and established Rate Schedule FERC No. 95 for the Agreement between IPS and Waverly. Supplement No. 1 changes the mix of generation purchase which Waverly obtains from IPS.

IPS requests a waiver of the Commission's rules so that the Supplement No. 1 may be approved retroactive to January 1, 1992.

Inasmuch as there is no change in the rate IPS charges for the exchange of power and energy included in this transaction, IPS respectfully request a waiver of the filing requirements pursuant to § 35.12(b).

IPS states that copies of this filing were served on Waverly and the Iowa Utilities Board.

Comment date: March 31, 1992, in accordance with Standard Paragraph E at the end of this notice.

22. EEA II, L.P.

[Docket No. QF91-22-001]

March 18, 1992.

On March 11, 1992, EEA II, L.P. (Applicant), of 1275 K Street, NW., suite 900, Washington, DC 20005-4005, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Bergen County, New Jersey. The facility will consist of a combustion turbine generator, a heat recovery boiler, and an extraction/condensing steam turbine generator. Thermal energy recovered from the facility will be provided to the Lowe Paper Company for process use. The primary energy source will be natural gas. The net electric power production capacity of the facility will be approximately 151.7 NW. Installation of the facility is scheduled to begin in September, 1992, with commercial operation schedule to begin in March, 1994.

Comment date: April 24, 1992, in accordance with Standard Paragraph E at the end of this notice.

23. Eastman Chemical Co., a Division of Eastman Kodak Co.

[Docket No. QF92-13-000]

March 18, 1992.

On March 16, 1992, Eastman Chemical Company, a division of Eastman Kodak Company (Applicant) tendered for filing an amendment to its filing in this docket.

The amendment provides additional information pertaining to the ownership structure and clarifies certain technical information. No determination has been made that the submittal constitutes a complete filing.

Comment date: April 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

24. Nevada Cogeneration Associates #2

[Docket No. QF90-68-005]

March 18, 1992.

On March 10, and March 11, 1992, Nevada Cogeneration Associates #2 tendered for filing amendments to its filing in this docket.

The amendments provide additional information pertaining to the ownership structure of its cogeneration facility. No determination has been made that the submittals constitute a complete filing.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. JD92-04521T New Mexico-31]

New Mexico; NGPA Determination by Jurisdictional Agency Designating Tight Formation

March 18, 1992.

Take notice that on March 13, 1992, the Oil Conservation Division of the State of New Mexico (New Mexico), submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that a portion of the Pictured Cliffs Formation, San Juan County, New Mexico, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The area of application is described on the attached appendix.

The notice of determination also contains New Mexico's and the Bureau of Land Management's findings that the referenced portion of the Pictured Cliffs Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA92-2-20-002]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 18, 1992.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on March 16, 1992, tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1, as set forth in the revised tariff sheets:

Proposed to be effective March 1, 1992

2 Sub 11 Rev Sheet No. 21
2 Sub 11 Rev Sheet No. 22
2 Sub 7 Rev Sheet No. 25
2 Sub 11 Rev Sheet No. 26
2 Sub 11 Rev Sheet No. 27
2 Sub 11 Rev Sheet No. 28
2 Sub 11 Rev Sheet No. 29

Algonquin states that on January 14, 1992, Algonquin submitted its Annual Purchased Gas Adjustment filing in Docket No. TA92-2-20-000 *et al.* On February 28, 1992, the Commission issued a Letter Order accepting Algonquin's filing subject to conditions. In its Letter Order the Commission directed Algonquin to file a revised Form No. 542-PGA, Schedule C1 to transfer the October 31, 1991 balance in the refund subaccount of Account No. 191 into the current deferral subaccount for November 1990 through October 1991, which will be amortized with the purchased gas cost subaccount beginning March 1, 1992. Furthermore, if such a transfer affects the surcharge adjustment by at least 0.1¢ per MMBtu, Algonquin is required to file revised

---

[Project No. 10703-001 Washington]

City of Centralia; Availability of Environmental Assessment

March 18, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a major license of more than 5 megawatts for the existing Yelm Project, located on the Nisqually River in Thurston and Pierce Counties, Washington, near the towns of Yelm and McKenna, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff has analyzed the existing and potential future environmental impacts of the project and has concluded that approval of the project would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3104, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6840 Filed 3-24-92; 8:45 am]

BILLING CODE 6717-01-M

tariff sheets to incorporate the effect of the transfer of the refund subaccount.

Algonquin states that Pursuant to the Commission's Letter Order of February 28, 1992, Algonquin has made the requisite tranfer of the refund balance. Upon transferring said amounts recalculation of the surcharge adjustments reveals that both the demand and commodity surcharge adjustments change by at least 0.1¢ per MMBtu. Accordingly, Algonquin is herein filing revised tariff sheets to incorporate the revised surcharge adjustments.

Algonquin states that the proposed effective date for the listed tariff sheets is March 1, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6833 Filed 3-24-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP89-661-016]

Algonquin Gas Transmission Co., Petition To Amend

March 18, 1992

Take notice that on March 16, 1992, Algonquin Gas Transmission Company (Algonquin), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed an application in Docket No. CP89-661-016, pursuant to section 7(c) of the Natural Gas Act for permission and approval to acquire a meter station, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, Algonquin proposes to acquire a meter station for service to Dartmouth Power Associates (Dartmouth) located at Dartmouth, Massachusetts. Algonquin had proposed to construct and operate the meter station in Docket No. CP89-661-005, however, Dartmouth needed to have the meter station in place by March 1992 to begin receiving test gas at its electric generating facility. Therefore, Algonquin and Dartmouth agreed that Dartmouth would construct the meter station, Algonquin would construct a tap connection with the meter station under its blanket certificate, and Algonquin would acquire the meter station from Dartmouth as part of its self-styled "Open Season Project." The cost of the acquisition is $372,190 which is less than the estimated cost for Algonquin to construct the meter station ($756,000). As a result, Algonquin has also adjusted its rates in Rate Schedules AFT-2 and X-38 to reflect the reduction in cost due to the acquisition.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before March 30, 1992 file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. TM92-3-23-000]

Eastern Shore Natural Gas Company; Proposed Changes in FERC Gas Tariff

March 18, 1992.

Take notice that Eastern Shore Natural Gas Company (ESNG) tendered for filing on March 13, 1992 a revised tariff sheet included in appendix A attached to the filing. Such sheet is proposed to be effective April 1, 1992.

ESNG states that the purpose of the instant filing is to revise the fuel retention percentages applicable to its storage rate schedules effective April 1, 1992. ESNG is "tracking" the revised fuel retention percentages from a filing made by Transco on March 3, 1992 (see Transco's First Revised Sheet No. 29).

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 and rule 214 of the Commission's Rules of Practice and Procedure 18 CFR § 385.211 and § 385.214. All such motions or protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6835 Filed 3-24-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER90-144-006]

Northeast Utilities Service Company; Filing

March 19, 1992.

Take notice that on February 24, 1992 Northeast Utilities Service Company (NUSCO) filed on behalf of North Atlantic Energy Corporation (NAEC) a compliance filing with the Commission in the captioned proceeding. On March 18, 1992, NUSCO filed an amendment to the compliance filing. The compliance filing, as amended, is intended to implement the Commission's Order on Rehearing issued January 29, 1992, in Consolidated Docket Nos. EC90-10-004, ER90-143-004, ER90-144-004, ER90-145-004 and EL90-9-004 (the "Order") with respect to the rate schedule ("Seabrook Power Contract") between NAEC and Public Service Company of New Hampshire ("PSNH"). The Seabrook Power Contract, which is a life-of-unit power contract for the sale to PSNH of NAEC's share of the output of Seabrook Unit I nuclear power plant, was filed with the Commission in Docket No. ER90-144-000. The compliance filings necessary for the remaining tariffs, will be made at a later date in accordance with the Commission's Order.

NUSCO had requested in its February 24, 1992 filing that the Commission act expeditiously on the filing and accept it by April 1, 1992 in order to support a prompt completion of the merger of PSNH and Northeast Utilities. In its amended to the compliance filing, NUSCO renewed its request that the

Commission act expeditiously.

The compliance filing, as amended, includes a revised form of Seabrook Power Contract. NUSCO staes that the revised contract includes the changes required by the Commission's Order: (i) It reduces the common equity rate of return ("ROE") for the first ten years of the contract from 13.75 percent to 12.53 percent; (ii) it eliminates the provision that would automatically adjust the ROE after the first ten years to the average ROEs for four other single-asset nuclear companies in New England (the so-called Yankee companies); and (iii) it excludes any investment in nuclear fuel owned by NAEC from the cash working capital allowance. In place of the automatically adjusting ROE provision, the revised contract permits changes in the ROE after May 15, 1997. After that time and through the balance of the first ten years of the contract, the ROE will be capped at 13.75 percent; thereafter, the ROE will be capped at the average of the ROEs for the Yankee companies. NUSCO states that the compliance filing also makes certain non-substantive and editorial revisions to reflect changes in circumstances since the Seabrook Power Contract was originally filed in January 1990, and provides that NAEC shall seek reinstatement of the automatically adjusting ROE provision if such provision is later found by the Commission to be consistent with the Federal Power Act.

Copies of the filing were served upon all parties to the proceeding in the consolidated dockets.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 31, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Federal Energy Regulatory Commission

[Docket No. RP85-203-010]

Panhandle Eastern Pipe Line Co.; Report of Refunds

March 18, 1992.

Take notice that on February 4, 1992, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Refund Report in accordance with Article II of a Settlement Agreement (Settlement) dated September 11, 1991, and the Commission's November 13, 1991 order issued in Docket No. RP85-203-000.

Panhandle states that on January 13, 1992, Panhandle distributed repayments amounts to the applicable customers in accordance with Article II of the Settlement Agreement dated September 11, 1991. Panhandle further states that repayments to each City was 50% of the amounts actually paid for production-related costs under the Commission Order Nos. 94 and 473 with interest.

Panhandle states that copies of the information was sent to each Panhandle's affected customers and respective state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Federal Energy Regulatory Commission

[Docket No. RP91-147-004]

Transcontinental Gas Pipe Line Corp., Tariff Filing

March 18, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on March 13, 1992 certain revised tariff sheets to Volume No. 1 of its FERC Gas Tariff, which tariff sheets are enumerated in appendix a attached to the filing. Transco states that the tariff sheets are proposed to be effective as indicated on appendix A.

Transcoe states that the purpose of the instant filing is to reflect a revision to the Litigant Producer Settlement Payment (LPSP) charge for the amortization period June 1, 1991 through May 31, 1993 pertaining to Sun Refining and Marketing Company (Sun), the only non-settling party to Transco's Revised Stipulation and Agreement dated August 7, 1989 in Docket Nos. RP88-68 *et al.* Transco states that the revision to Sun's LPSP charges is necessitated by the fact that Transco incorrectly included $16 million of LPSP costs which should have been excluded. Transco further states that since the correct amount of total LPSP payments is still in excess of Transco's cap for settling customers, Sun is the only party affected by the revision. Transco states that appendix B attached to the filing supports the calculation of the revised LPSP charges for Sun.

Transco states that copies of the filing were served to the parties to Docket No. RP91-147.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commisison, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP90-8-011]

Transcontinental Gas Pipe Line Corp; Refund Report

March 18, 1992.

Take notice that on March 2, 1992, Transcontinental Gas Pipeline Company (Transco) tendered for filing with the Federal Energy Regulatory Commission (Commission) its Report of Refunds showing refunds made to its transportation customers in compliance with the Commission's order issued January 24, 1992, approving Transco's Stipulation and Agreement filed

September 6, 1991 in Docket Nos. RP90–8–006 and RP90–8–007.

Transco states that the refunds of $2,382,284.83, calculated for transportation service on the Mobil Bay pipeline system, were made on February 26, 1992, for the period April 10, 1990 through January 31, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA92–1–43–002]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 18, 1992.

Take notice that Williams Natural Gas Company (WNG) on March 13, 1992 tendered for filing Substitute Third Revised Sheet No. 260 to be included in its FERC Gas Tariff, First Revised Volume No. 1. The proposed effective date of this tariff sheet is May 1, 1992.

WNG states that it made a filing on February 28, 1992 in Docket No. TA92–1–43. Third Revised Sheet No. 260, filed in that docket, inadvertently did not reflect the currently effective tariff provisions. The purpose of this filing is to amend this tariff sheet.

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with § 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before March 25, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

High Energy Physics Advisory Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: High Energy Physics Advisory Panel (HEPAP).

Date and Time: Monday, April 13, 1992, 9 a.m.–4 p.m.

Place: U.S. Department of Energy, room 1E–245, 1000 Independence Avenue SW., Washington, DC 20585.

Contact: Dr. Enloe T. Ritter, Executive Secretary, High Energy Physics Advisory Panel, U.S. Department of Energy, ER–221, GTN, Washington, DC 20585, Telephone: (301) 903–4829.

Purpose of Panel: To provide advice and guidance on a continuing basis with respect to the high energy physics research program.

Tentative Agenda

Monday, April 13, 1992

—Presentation of the Report of the 1992 HEPAP Subpanel on the U.S. Program of High Energy Physics Research.
—Discussion of the Subpanel Report.
—Reports on and Discussions of Topics of General Interest in High Energy Physics.
—Public Comment.

Public Participation: The meeting is open to the public. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to make oral statements pertaining to agenda items should contact the Executive Secretary at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Minutes: Available for public review and copying at the Public Reading Room, room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC between 9 a.m. and 4 p.m., Monday through Friday except Federal holidays.

Issued at Washington, DC, on March 19, 1992.

Marcia L. Morris,

Deputy Advisory Committee Management Officer.

Office of Fossil Energy

[FE Docket No. 92–15–NG]

Iroquois Gas Transmission System, L.P.; Application for Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application filed on February 7, 1992, by Iroquois Gas Transmission System, L.P. (Iroquois) requesting blanket authorization to import from Canada up to 1 Bcf of natural gas over a two-year period beginning on the date of first delivery. The proposed imports would enter the U.S. at a point on the international border near Waddington, New York, where TransCanada Pipeline Limited (TCPL) interconnects with the Iroquois Pipeline System.

The applications are filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 24, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Peter Lagiovane, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–8116.

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–0503.

SUPPLEMENTARY INFORMATION: Iroquois, is a Delaware limited partnership comprised of 12 U.S. and Canadian energy companies. On January 25, 1992, Iroquois completed the construction of a 370-mile natural gas pipeline from Iroquois, Ontario, through the states of New York and Connecticut, to South Commack, New York. The pipeline will ultimately transport up to 575.9 MMcf/d of natural gas on behalf of shippers in the states of New York, Connecticut, Massachusetts, Rhode Island, New Hampshire, and New Jersey.

Iroquois is a transportation-only gas pipeline company which, in general, neither purchases nor sells gas. However, in its application, Iroquois explains that from time to time it must make short-term purchases of gas to maintain the line pack needed to serve its shippers. While it frequently is able to obtain these short-term supplies in the U.S., Iroquois seeds import authority in order to be able to purchase gas from Canadian suppliers, or from U.S. suppliers via Canadian transporters, when they can provide the most competitive terms. Iroquois states that any gas it imports under the requested authorization would be used solely to achieve and maintain line pack on the system. It would not be resold to Iroquois' shippers or to any other entity. Iroquois also explains that it can only provide adequate and reliable service to its shippers if it is able to maintain line pack and, therefore, the gas it seeks to import clearly will be needed.

The decision on the request for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the market served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Iroquois states that the proposed imports would be purchased under market-responsive, competitive, short-term and spot arrangements of no more than two years in length. Iroquois asserts that the proposed imports would be purchased from suppliers offering the most competitive terms available at the time - to include affiliates of the Iroquois partners if the affiliate had the most competitive supplies available. In addition, Iroquois states that since it will be entering only short-term contracts, there should be no concern about long-term dependence on an unreliable foreign source of energy. Parties opposing Iroquois request for import authorization bear the burden of overcoming these assertions and should comment in their responses on the issue of competitiveness as set forth in the policy guidelines.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Iroquois' application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 19, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–6928 Filed 3–24–92; 8:45 am]

BILLING CODE 6450–01–M

[FE Docket No. 92–28–NG]

Signal Fuels Trading Corp.; Application for Blanket Authorization To Import and Export Natural Gas

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to import and export natural gas.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on March 2, 1992, of an application filed by Signal Fuels Trading Corporation (SFTC) requesting blanket authorization to import from Canada and Mexico up to 20 Bcf of natural gas and export to Canada and Mexico up to 20 Bcf of natural gas over a two-year term beginning on the date of first import or export. SFTC states that it would use existing border facilities and would provide DOE with quarterly reports detailing any import or export transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., Eastern time, April 24, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Yvonne Gabbay, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, 1000

Independence Avenue, SW., Washington, DC 20585, (202) 586–4587.
Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: SFTC, a corporation organized under the laws of the State of Colorado with its principal place of business in Denver, Colorado, is a natural gas marketer active in the arranging of the sale and transportation of domestic gas in United States markets. SFTC now seeks to expand its marketing activities to Mexican and Canadian markets.

SFTC requests authorization to import and export natural gas, on its own behalf or acting as agent on behalf of others, for sale to pipelines, local distribution companies and both commercial and industrial end-users. SFTC states that the requested export authorization would allow it to sell U.S. natural gas for which there is no present national or regional need. SFTC indicates in its application that the identity of its suppliers and purchasers and the specifics of each sale are not known at this time. However, the import and export arrangements, including the price paid for the gas, would be competitive spot and short-term transactions based on market conditions. SFTC requests that no daily volume limit be set.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the market served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing natural gas export applications, DOE considers the domestic need for the gas to be exported and any other issues determined to be appropriate, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties that may oppose the application should comment in their responses on these issues. SFTC asserts that its proposal is in the public interest. Parties opposing SFTC's application bear the burden of overcoming this assertion.

NEPA Compliance.

The National Environmental Policy Act (NEPA), 42 U.S.C 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of SFTC's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 19, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–6928 Filed 3–24–92; 8:45 am]

BILLING CODE 6455–01–M

[Docket No. FE C&E 92–03; Certification Notice–96]

Filing Certification of Compliance: Coal Capability of New Electric Powerplant Pursuant to Provisions of the Powerplant and Industrial Fuel Use Act, as Amended

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (FUA section 201(a), 42 U.S.C. 8311 (a), Supp. V. 1987). In order to meet the requirement of coal capability, the owner or operator of any new electric powerplant to be operated as a base load powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to FUA section 201(d), to the Secretary of Energy prior to construction, or prior to opeation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certifcation establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the **Federal Register** a notice reciting that the certification has been filed. One owner and operator of a proposed new electric base load powerplant has filed a self-certification in accordance with section 201(d).

Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following company has filed a self-certification:

Name	Date received	Type of facility	Megawatt capacity	Location
Tenaska Washington Partners, L.P., Omaha, NE.	03–10–92	Combined Cycle	245	Ferndale, WA

Amendments to the FUA on May 21, 1987 (Public Law 100–42), altered the general prohitibitions to include only new electric base load powerplants and to provide for the self-certification procedure.

This self-certification may be reviewed in the Office of Fuels Programs, Fossil Energy, room 3F–056, FE–52, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, or for further information call Myra Couch at (202) 586–6769.

Issued in Wasington, DC on March 19, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4117–3]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATE: Comments must be submitted on or before April 24, 1992. For further information or to obtain a copy of this ICR contact Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Water

Title: Construction Grants Program (ICR 0827.03).

Abstract: ICR 0827.03 seeks renewal of OMB clearance for the information requirements associated with the Construction Grants Program. Under this program, which is authorized by Title II of the Clean Water Act (CWA), EPA Regional Offices and delegated States provide grants to municipalities and Indian Tribes for wastewater treatment construction projects.

The information requirements imposed by the Construction Grants Program fall into three categories: those associated with new grant awards, those associated with project completions and those imposed on States.

New grant awards will be issued to approximately 61 applicants over the next three years. Grantees, most of them Indian Tribes, will have to submit facility identification data, as well as financial, technical, and planning information.

The estimated 1030 grantees expected to complete their projects within the next three years will have to submit construction records and certification of project performance.

The States and Territories that continue to award grants must submit to EPA lists of wastewater treatment projects in priority order for funding.

EPA will use the information to ensure accountability, public participation and consistent management in the pursuit of CWA goals.

Burden Statement: The average burden imposed by the Construction Grants Program is 2.9 hours per response. This total includes time for searching existing data sources, gathering the data needed, and completing and reviewing the collection of information.

Respondents: States, Territories, Municipalities, Indian Tribes.

Estimated No. of Respondents: 368.

Estimated Total Annual Burden on Respondents: 4576 hours.

Frequency of Collection: One-time.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460.

and

Matt Mitchell, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: March 17, 1992.

Paul Lapsley,

Director, Regulatory Management Division.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Hazardous Waste Specific Unit Requirements and Special Waste Processes and Types (ICR No. 1572). This ICR consolidates and reinstates the following five previously approved collections: ICR No. 811, Unsaturated Zone Monitoring at Hazardous Waste Land Treatment Facilities (OMB No. 2050–0038); part of ICR No. 995, Land Disposal Permitting Standards (OMB No. 2050–0007); part of ICR No. 1119, Notification of Waste as Energy Activities (OMB No. 2050–0047); part of ICR No. 1238, Reporting and Recordkeeping Requirements for Hazardous Waste Tanks (OMB No. 2050–0050); and part of ICR No. 1303,

Miscellaneous Solid Waste Management Units (OMB NO. 2050-0074).

Abstract: This ICR is a comprehensive presentation of the information collection activites related to specific unit requirements and special waste processes and types, as provided in 40 CFR parts 264, 265, and 266, for owners/operators of facilities that treat, store, or dispose of hazardous wastes in tank systems, surface impoundments, waste piles, land treatment, landfills, incinerators, thermal treatment units, chemical, physical and biological treatment units, unit process vents, miscellaneous units, and specific hazardous waste recovery/recyclying facilities.

Owners and operators of hazardous waste treatment, storage, and disposal facilities (TSDFs) must collect, record, and in some cases report to EPA. Activities include: Demonstrations for exemptions and variances, system assessments and certifications, leak tests and inspections, repair certifications, design and operating requirements, waste management plans, certifications of closure, monitoring and inspection data, and reporting releases and information pertinent to releases. Recordkeeping requirements include maintaining records on the types of wastes treated, stored, or disposed; operating methods; location, design, and construction of facilities; contingency plans; and maintenance of facilities.

EPA uses the information for a variety of inspection, enforcement, and tracking purposes.

Burden Statement: The public reporting burden for this collection is estimated to vary from 6 to 234 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Owners and operators of hazardous waste treatment, storage and disposal facilities.

Estimated Number of Respondents: 4,236.

Estimated Number of Responses Per Respondent: 1.

Estimated Total Annual Burden on Respondents: 514,306 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Jonathan Gledhill, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

BILLING CODE 6560-50-M

[OPP-180881; FRL-4046-1]

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the 10 States as listed below. A crisis exemption was initiated by the California Department of Food and Agriculture, Georgia Department of Agriculture, and two by the United States Department of Agriculture. Three quarantine exemptions were also granted to the United States Department of Agriculture. These exemptions, issued during the months of October and December, except for the one in May, September, and November, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. EPA has denied a specific exemption request from the Florida Department of Agriculture and Consumer Services. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific, crisis, and quarantine exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons: By mail: Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-305-5806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Arkansas State Plant Board for the use of dicamba on fallow land to be planted to cotton to control redvine; October 2, 1991, to December 1, 1991. (Susan Stanton)

2. Florida Department of Agriculture and Consumer Services for the use of avermectin B_1 on celery to control leafminers; October 2, 1991, to July 31, 1992. (Libby Pemberton)

3. Florida Department of Agriculture and Consumer Services for the use of diquat dibromide on tomatoes and green peppers to control nightshade parthenium; October 21, 1991, to August 31, 1992. (Jim Tompkins)

4. Florida Department of Agriculture and Consumer Services for the use of cyromazine on fresh market tomatoes to control leafminers; October 28, 1991, to July 31, 1992. (Libby Pemberton)

5. Florida Department of Agriculture and Consumer Services for the use of cyromazine on potatoes to control leafminers; November 20, 1991, to July 1, 1992. (Susan Stanton)

6. Georgia Department of Agriculture for the use of permethrin on southern peas to control the cowpea curculio; September 10, 1991, to October 31, 1991. Georgia had initiated a crisis exemption for this use. (Andrea Beard)

7. Georgia Department of Agriculture for the use of sethoxydim on canola to control Italian ryegrass; December 26, 1991, to April 15, 1992. (Susan Stanton)

8. Georgia Department of Agriculture for the use of streptomycin on onions to control leaf blight and bulb rot caused by an unnamed *Pseudomonas sp.*; December 4, 1991, to June 30, 1992. (Susan Stanton)

9. Idaho Department of Agriculture for the use of pendimethalin on mint to control kochia scoparia and Amaranthus retroflexus; December 6, 1991, to April 1, 1992. (Larry Fried)

10. Idaho Department of Agriculture for the use of imazalil on seed corn (sweet) to control damping-off and dieback diseases; October 2, 1991, to October 1, 1992. (Susan Stanton)

11. Michigan Department of Agriculture for the use of amitraz on honey bee colonies to control tracheal mites; October 3, 1991, to May 30, 1992. EPA completed a rebuttable presumption against registration (RPAR) on this chemical; final determination was published in the **Federal Register** of April 6, 1977. (Libby Pemberton)

12. Michigan Department of Agriculture for the use of sethoxydim on canola to control volunteer grains; October 2, 1991, to November 30, 1991. (Susan Stanton)

13. Mississippi Department of Agriculture and Commerce for the use of dicamba on fallow land to be planted to cotton to control redvine; October 2, 1991, to December 1, 1991. (Susan Stanton)

14. New York Department of Environmental Conservation for the use of Pro-Gro (50% thiram/30% carboxin) on onion seed to control onion smut; December 4, 1991, to May 31, 1992. (Susan Stanton)

15. Oregon Department of Agriculture for the use of pendimethalin on mint to control kochia scoparia and Amaranthus retroflexus; December 6, 1991, to April 4, 1992. (Larry Fried)

16. Pennsylvania Department of Agriculture for the use of chlorothalonil on mushrooms to control verticillium diseases; October 2, 1991, to October 1, 1992. (Susan Stanton)

17. Washington Department of Agriculture for the use of pendimethalin on mint to control kochia scoparia and Amaranthus retroflexus; December 6, 1991, to April 4, 1992. (Larry Fried)

Crisis exemptions were initiated by the:

1. California Department of Food and Agriculture on October 16, 1991, for the use of fenamiphos on broccoli and cauliflower to control nematodes. The need for this program is expected to last until October 15, 1992. (Libby Pemberton)

2. Georgia Department of Agriculture on May 30, 1991, for the use of permethrin on southern peas to control cowpea curculio. This program has ended. (Andrea Beard)

3. United States Department of Agriculture on December 4, 1991, for the use of methyl bromide on grapes to control Mediterranean fruit and vine moths. The need for this program is expected to last until January 31, 1992. (Libby Pemberton)

4. United States Department of Agriculture/APHIS on October 8, 1991, for the use of M-44's (sodium cyanide capsules) to control rabid canines in 15 counties in Texas. Since it was anticipated that this program would be needed for more than 15 days, USDA will request a public health exemption to continue it. This program is expected to last for 1-year. (Jim Tompkins)

Quarantine exemptions were granted to the:

1. United States Department of Agriculture for the use of methyl bromide on cherimoya to control any pest new to, or not known to be widely distributed within, the United States and ports of entry; October 10, 1991, to October 9, 1994. (Libby Pemberton)

2. United States Department of Agriculture/APHIS for the use of diazinon in quarantined areas to eradicate exotic (nonindigenous quarantined) subtropical members of the fruit fly family, Tephritidae, in Florida; October 26, 1991, to October 25, 1994. A Special Review was completed for this chemical on September 24, 1986. Uses on golf courses and sod farms were cancelled. (Susan Stanton)

3. United States Department of Agriculture/APHIS for the use of malathion in quarantined areas to eradicate exotic (nonindigenous quarantined) subtropical members of the fruit fly family, Tephritidae, in Florida; October 26, 1991, to October 25, 1994. (Susan Stanton)

EPA has denied a specific exemption request from the Florida Department of Agriculture and Consumer Services for the use of fosetyl-aluminum (Aliette) on lettuce to control downy mildew. (Susan Stanton)

Authority: 7 U.S.C. 136.

Dated: March 5, 1992.

ICI Agricultural Products; Amendment of Pesticide Petition and Food/Feed Additive Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received from ICI Agricultural Products the filing of amendments to pesticide petition (PP) 7F3560 and food/feed additive petition (FAP) 7H5543, which proposed amending 40 CFR parts 180 and 186, respectively, by establishing regulations to permit residues of the insecticide (±)-*α*-cyano-(3-phenoxyphenyl)methyl (±)*cis*-3-(Z-2-chloro-3,3,3-trifluoroprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate in or on various agricultural commodities. ICI proposes to increase the use rate and remove restrictions regarding the insecticide's use on wheat.

ADDRESSES: By mail, submit written comments identified by the document control number, [PF-555], to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Information submitted and any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and any written comments will be available for public inspection in rm. 1128 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: George T. LaRocca (PM-13), Registration Division (H-7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 204, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA, (703)-557-2400.

SUPPLEMENTARY INFORMATION: This notice announces that EPA has received from ICI Agricultural Products, Wilmington, DE 19897, a revised Section F for PP 7F3560 and FAP 7H5543, which originally appeared in the **Federal Register** of November 25, 1987 (52 FR 45238) and proposed amending 40 CFR parts 180 and 186, respectively, as follows:

1. *PP 7F3560.* Proposed amending 40 CFR part 180 to establish a regulation to permit residues of the insecticide in or on wheat grain at 0.01 ppm, sweet corn at 0.01 ppm, sunflower seeds at 0.03 ppm, and poultry meat, fat, and meat byproducts at 0.01 ppm.

2. *PP 7H5543.* Proposed amending 40 CFR part 561 by establishing a regulation to permit residues of the insecticide in or on sunflower hulls at 0.7 ppm and sunflower oil at 0.05 ppm.

ICI Agricultural Products has submitted an amendment to PP 7F3560 to establish the following tolerances for the raw agricultural commodity wheat: wheat grain at 0.03 ppm, wheat forage at 2.0 ppm, and wheat straw at 2.0 ppm. ICI has also submitted an amendment to FAP 7H5543 to establish the following tolerances for the processed commodity wheat: wheat bran at 0.2 ppm and wheat shorts, germ at 0.05 ppm. The proposed method for determining residues is gas liquid chromatography.

Authority: 21 U.S.C. 346a and 348.

Dated: March 5, 1992.

Stephanie R. Irene,

Acting Director, Registration Division, Office of Pesticide Programs.

[OPP-34022; FRL 4000-7]

Pesticide Reregistration Eligibility Documents; Availability for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of Reregistration Eligibility Documents; opening of public comment period.

SUMMARY: This Notice announces the availability of the Reregistration Eligibility Documents (RED) for the active ingredients carbon and carbon dioxide, dried blood, inorganic nitrate/nitrite, propionic acid, silicon dioxide and silica gel, and sodium diacetate, and the start of a 60-day public comment period. The RED for each of the above chemicals is the Agency's formal regulatory assessment of the health and environmental data base of the subject chemicals, and presents the Agency's determination regarding which pesticidal uses of the above active ingredients are eligible for reregistration.

DATES: Written comments on the REDs must be submitted by May 26, 1992.

ADDRESSES: Three copies of comments identified with the docket number "OPP-34022" should be submitted to: By mail: Public Response and Program Resources Branch, Field Operations Division (H7508C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment in response to this Notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential will be included in the public docket without prior notice. The public docket and docket index will be available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

To request a copy of the above Reregistration Eligibility Documents, or a RED Fact Sheet, contact the Public Response and Program Resources Branch, in rm. 1128 CM #2 at the address given above or call 703-305-5805.

FOR FURTHER INFORMATION CONTACT: Technical questions on the REDs should be directed to the chemical review manager for each RED: For carbon and carbon dioxide contact Virginia Dietrich at 703-308-8157; for dried blood contact Ernestine Dobbins at 703-308-8071; for inorganic nitrate/nitrite contact Mark Wilhite at 703-308-8072; for propionic acid contact G. Thomas Myers at 703-308-8074; for silicon dioxide and silica gel contact Frank Rubis at 703-308-8184; and for sodium diacetate contact Kathy Davis at 703-308-8068.

SUPPLEMENTARY INFORMATION: The Agency has issued Reregistration Eligibility Documents for the following pesticidal active ingredients: carbon and carbon dioxide, dried blood, inorganic nitrate/nitrite, propionic acid, silicon dioxide and silica gel, and sodium diacetate. Under the Federal Insecticide, Fungicide and Rodenticide Act, as amended in 1988, EPA is conducting an accelerated reregistration program to reevaluate existing pesticides to make sure they meet current scientific and regulatory standards. The data base to support the reregistration of each of the chemicals listed above is substantially complete. EPA has determined that all currently registered products containing carbon and carbon dioxide, dried blood, inorganic nitrate/nitrite, propionic acid, silicon dioxide and silica gel or sodium diacetate as an active ingredient are eligible for reregistration.

All registrants of products containing carbon and carbon dioxide, dried blood, inorganic nitrate/nitrite, propionic acid, silicon dioxide and silica gel, and sodium diacetate have been sent the appropriate RED and must respond to the labeling requirements and the product specific data requirements (if applicable) within 8 months of receipt. These products will not be reregistered until adequate product specific data have been submitted and all necessary product label changes are implemented.

The reregistration program is being conducted under congressionally mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing the six REDs as final documents with a 60-day comment period. Although the 60-day public comment period does not affect the registrants' response due date, it is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments will be carefully considered by the Agency and if any of those comments impact on the RED, EPA will issue an amendment to the RED and publish a **Federal Register** Notice announcing its availability.

Dated: December 23, 1991.

Daniel M. Barolo,

Director, Special Review and Reregistration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-F

[OPPTS-140179; FRL-4053-4]

American Association of Retired Persons; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized the American Association of Retired Persons (grantees under the Senior Environmental Employment Program) for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Some of the information may be claimed or determined to be trade secret information.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. NE-G008, Mail Stop TS-793, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-3757.

SUPPLEMENTARY INFORMATION: Under section 322 of EPCRA, facilities may assert trade secrecy claims regarding the chemical identities reported in their section 303, 311, 312, and 313 submittals to EPA.

Under grant number CQ-816529, the American Association of Retired Persons (AARP), 601 E St., NW., Washington, DC 20049, as an enrollee in the Senior Environmental Program, will assist the Office of Pollution Prevention and Toxic Substances in processing the information submitted by industry in response to the requirements of sections 303, 311, 312, 313, and 322 of EPCRA. AARP will conduct reviews of EPCRA submissions at the EPCRA Reporting Center where submissions are received and processed. AARP will review selected submissions for technical accuracy and contact submitters regarding potential discrepancies.

EPA has determined that in order to successfully carry out its duties under this grant, AARP may be required to review or receive information on behalf of EPA that is claimed or determined to be trade secret. Therefore, EPA has determined that AARP requires access to trade secret information under EPCRA. AARP employees will sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will provide AARP employees access to trade secret information on a need-to-know basis. All access to EPCRA trade secret information will take place at either headquarters offices or the EPCRA Reporting Center. Upon termination of their grant, or prior to termination of their grant at EPA's request, AARP will return all material to EPA.

Clearance to access to EPCRA trade secret information under this grant is scheduled to expire March 26, 1993.

Dated: March 17, 1992.

Steve Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6560-50-F

[OPPTS-140178; FRL-4053-3]

Sycom, Incorporated; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized Sycom, Incorporated of Chantilly, VA, for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Some of the information may be claimed or determined to be trade secret information.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. NE-G008, Mail Stop TS-793, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-3757.

SUPPLEMENTARY INFORMATION: Under EPCRA, industry must report information on the presence, use, production, and manufacture of certain chemicals to EPA. Under section 322 of EPCRA, facilities must send trade secrecy claims regarding their section 303, 311, 312, and 313 submittals to EPA.

Under contract number 68-W1-0050, Sycom, Incorporated (Sycom), 14523 Lee Road, Chantilly, VA 22021, assists the Office of Pollution Prevention and Toxics, Information Management Division in design, development, implementation, and maintenance of the Toxic Chemical Release Inventory data base in response to the requirements of sections 303, 311, 312, and 313 of EPCRA. Specifically, Sycom maintains a data base, called the Toxic Chemical Release Inventory, and an associated document tracking system for the purpose of electronically storing data collected by the EPA in accordance with requirements of EPCRA section 313.

Sycom performed these same duties in the past as subcontractor to Planning Research Corporation (PSC) under contract number 68-01-7361. EPA announced clearance for access to EPCRA trade secret information by Sycom as subcontractor to PSC under this prior contract in notices published in the **Federal Register** of June 10, 1988 (53 FR 21916), September 23, 1991 (56 FR 47959), and December 20, 1991 (56 FR 66035).

EPA has determined that Sycom requires continued access to trade secret information under EPCRA while performing the same duties under the new contract number 68-W1-0050. Sycom personnel will continue to sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will provide Sycom personnel access to trade secret information on a need-to-know basis. All access to EPCRA trade secret information will take place at the EPCRA Reporting Center. Upon termination of their contract, or prior to termination of their contract at EPA's request, Sycom will return all material to EPA.

Clearance for access to EPCRA trade secret information by Sycom under contract number 68-W1-0050 is expected to expire on June 30, 1992. Clearance for access under this notice will be extended for so long as Sycom continues to perform the duties described above pursuant to any contract renewal or other existing contract.

Dated: March 18, 1992.

Steve Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

FEDERAL MARITIME COMMISSION

Maryland Port Administration/Atlantic Venture, Inc., et al., Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200194-001.

Title: Maryland Port Administration/Atlantic Venture, Inc., Terminal Agreement.

Parties: Maryland Port Administration Atlantic Venture, Inc.

Synopsis: The proposed modification deletes authority for the parties to act as billing agents on behalf of each other for the collection of wharfage charges.

Dated: March 20, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

Pacific Coast/Australia-New Zealand Traffic Bureau; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime

Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–000050–060.

Title: Pacific Coast/Australia-New Zealand Tariff Bureau.

Parties: Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line), Blue Star Pace Limited, Australia-New Zealand Direct Line.

Synopsis: The proposed amendment would expand the parties' service in Australia to include the Northern Territory and Western Australia.

By Order of the Federal Maritime Commission.

Dated: March 19, 1992.

Joseph C. Polking,

Secretary.

[Petition No. P2–92]

Direct Container Line—Conditions Unfavorable to Shipping in the United States-Korea Trade; Extension of Time for Reply

Notice is given that the Commission has determined to grant a request by De Angelus, Schaffer & Associates, L.P. ("DS&A") to extend time for filing replies to the petition. DS&A claims it represents a group of Korean businessmen who are considering the feasibility of investing in a joint venture customs brokerage business in the United States. DS&A states that representatives of the group are expected to visit the United States in early April, and that the extension would allow time for the group to make a statement to the Commission.

Time for filing replies is extended to April 13, 1992. Parties are reminded that replies must consist of an original and 15 copies, that a copy must be served on F. Conger Fawcett, Esq., Fawcett & Fawcett, 101 Larkspur Landing Circle, suite 321, Larkspur, California 94939, and that replies must show that a copy has been so served.

By the Commission.[1]

Joseph C. Polking,

Secretary.

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

[File No. 902 3011]

Exhart Environmental Systems, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a California-based company and its owners from representing that their electronic devices can eliminate, reduce the number of, or prevent the reentry of rodents unless they can substantiate such representations, and would also prohibit them from stating that the devices are EPA-approved or waterproof, if that is not the case. In addition, the agreement would require the respondents to send a letter to all catalogue companies with which they have done business since January 1, 1990, informing them of the requirements of the order.

DATES: Comments must be received on or before April 24, 1992.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Eileen Harrington, FTC/H–238, Washington, DC 20580. (202) 326–3127.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

In the Matter of Exhart Environmental Systems, Inc., a corporation, and Isaac Weiser and, Margaret Weiser, individually and as officers of said corporation.

[File No. 902 3011]

Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Exhart Environmental Systems, Inc. ("Exhart"), a corporation, and Isaac Weiser and Margaret Weiser, individually and as officers of said corporation, (the company and individuals hereinafter sometimes will be referred to as "proposed respondents"), and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed By and between Exhart, by its duly authorized officer, and by Isaac Weiser and Margaret Weiser, individually and as officers of said corporation, and their attorney, and counsel for the Federal Trade Commission, that:

1. Exhart is a California corporation with its office and principal place of business at 21525 Strathern Street, Canoga Park, California 91304.

2. Isaac Weiser and Margaret Weiser are officers of Exhart. All all times relevant to this Order, both Isaac Weiser and Margaret Weiser formulated, directed and controlled the business acts and practices of Exhart. Their business address is the same as that of proposed respondent Exhart.

3. Proposed respondents admit all the jurisdictional facts set forth in the draft complaint here attached.

4. Proposed respondents waiver:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act, 5. U.S.C. 504.

5. This agreement shall not become part of the public record of this proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, the agreement, together with the draft complaint contemplated thereby and any related material pursuant to § 2.34 of the Commission's Rules, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and

decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the proposed complaint attached hereto.

7. The agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the United States Postal Service of the complaint and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waiver any rights they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation or interpretation not contained in the order or agreement may be used to vary or contradict the terms of the order.

8. Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purposes of this Order, the following definition shall apply:

Rodent control devise means the *Go'pher It, Go'pher It II, Molex, Gopher Buster* or any other substantially similar device or implement intended to repel, mitigate, control, or eliminate rodents.

I

It is ordered That respondents Exhart Environmental Systems, Inc., a corporation, its successors and assigns and its officers, Isaac Weiser and Margaret Weiser, individually and as officers of said corporation; and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, marketing, offering for sale, sale or distribution of any rodent control device in or affecting commerce, as "commerce" is defined in section 4 of the Federal Trade Commission Act, as amended, do forthwith cease and desist from making any representation, directly or by implication, that any such rodent control device:

(1) Is an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents generally;

(2) Is an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents in a given area; or

(3) Is an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents for a given time period,

unless, at the time of making such representation, respondents possess and rely upon competent and reliable scientific evidence that substantiates the representation. For purposes of this Order, for any experiment, analysis, research, study, survey, or other evidence to be deemed "competent and reliable," it shall be conducted and evaluated in an objective manner by persons recognized according to professional standards as being qualified to do so, using procedures generally accepted by others in the profession to yield accurate and reliable results.

II.

It is further ordered That respondents Exhart Environmental Systems, Inc., a corporation, its successors and assigns and its officers; Isaac Weiser and Margaret Weiser, individually and as officers of said corporation; and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, marketing, offering for sale, sale or distribution of any rodent control device in or affecting commerce, as "commerce" is defined in section 4 of the Federal Trade Commission Act, as amended, do forthwith cease and desist from misrepresenting in any manner, directly or by implication, that any such rodent control device (1) is waterproof; or (2) is approved by the Environmental Protection Agency.

III.

It is further ordered That respondents Exhart Environmental Systems, Inc., a corporation, its successors and assigns and its officers; Isaac Weiser and Margaret Weiser, individually and as officers of said corporation; and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, marketing, offering for sale, sale or distribution of any rodent control device or any other pest control device in or affecting commerce, as "commerce" is defined in section 4 of the Federal Trade Commission Act, as amended, do forthwith cease and desist form representing in any manner, directly or by implication, any performance characteristic relating to the ability of such product to eliminate, reduce the number of, or prevent the reentry of rodents or any other pests unless, at the time of making such representation, respondents possess and rely upon competent and reliable evidence that substantiates the representation. For purposes of this Order, for any experiment, analysis, research, study, survey, or other evidence to be deemed "competent and reliable," it shall be conducted and evaluated in an objective manner by persons recognized according to professional standards as being qualified to do so, using procedures generally accepted by others in the profession to yield accurate and reliable results.

IV.

It is further ordered That respondents Exhart Environmental Systems, Inc., Isaac Weiser and Margaret Weiser shall distribute a copy of this Order to each present and future officer, agent, representative and employee having sales, advertising or policy making responsibilities for any rodent control device, and shall secure from each such individual a signed statement acknowledging receipt of this Order.

V.

It is further ordered That respondents Exhart Environmental Systems, Inc., Isaac Weiser and Margaret Weiser shall, within seven days after the date of service of this Order, send to each catalogue company with which they have done business since January 1, 1990, a copy of appendix A to this Order.

VI.

It is further ordered That respondents Exhart Environmental Systems, Inc., its successors and assigns, Isaac Weiser, and Margaret Weiser shall maintain for three (3) years following the date of the last dissemination of each representation, and upon request shall make available to the Federal Trade Commission for inspection and copying:

A. All materials relied upon to substantiate any representation covered by this Order; and

B. All experiment results, test reports, studies, surveys or other evidence in their possession or control that contradict, qualify or call into question such representation or the basis upon which respondents relied for such representation.

VII.

It is further ordered That respondents Exhart Environmental Systems, Inc., its successors and assigns, Isaac Weiser, and Margaret Weiser shall maintain for three (3) years after the date this Order becomes final, and upon request shall make available to the Federal Trade Commission for inspection and copying, documents demonstrating compliance with the requirements of Part V of this Order including, but not limited to, copies of all notices sent to catalogue companies.

VIII.

It is further ordered That respondents Isaac Weiser and Margaret Weiser shall, for a period of ten (10) years after the date this Order becomes final, promptly notify the Commission of any discontinuance of their present business or employment and of their affiliation with any new business or employment whose activities or responsibilities include the advertising, marketing, offering for sale, sale or distribution of rodent control devices or pest control devices. Such notice shall include their new business address and a statement of the nature of the business or employment in which they are newly engaged as well as a description of their duties and responsibilities in connection with that business or employment.

IX.

It is further ordered That respondents Exhart Environmental Systems, Inc., its successors and assigns, Isaac Weiser, and Margaret Weiser shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may effect compliance obligations arising out of the Order.

X.

It is further ordered That respondents Exhart Environmental Systems, Inc., Isaac Weiser, and Margaret Weiser shall, within ninety (90) days after the date this Order becomes final, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

Appendix A

[To be Printed on Exhart Letterhead]

Dear [name of catalogue company]:

Exhart Environmental Systems, Inc. ("Exhart") has entered into a consent agreement with the Federal Trade Commission ("FTC") to stop making certain representations about the effectiveness of the Go'pher It and similar rodent control devices unless at the time of making such representation we have competent and reliable scientific evidence that substantiates the representation. According to the FTC complaint, Exhart does not possess substantiating evidence for the following representations:

(1) That the Go'pher It, Go'pher It II, Molex or Gopher Buster (hereinafter referred to as "devices") are an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents generally;

(2) That these devices are an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents in a given area;

(3) That these devices are an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents for a given time period.

The FTC also has alleged that representations that these devices are waterproof or are approved by the Environmental Protection Agency are false and misleading.

The devices covered by this agreement include the Go'pher It, Go'pher It II, Molex or Gopher Buster. Exhart previously has supplied you with promotional materials or advertising copy that make the above representations. You should cease using or relying on these materials as the basis for your own advertising unless and until we have provided you with substantiation or have provided new materials or advertising copy that comply with the consent agreement. You should also be aware that the FTC has taken the position that these representations are deceptive and misleading and that their continued dissemination may be a violation of the FTC Act.

Sincerely,

Issaac Weiser,

President, Exhart Environmental Systems, Inc.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Exhart Environmental Systems, Inc., Isaac Weiser, and Margaret Weiser. Exhart Environmental Systems, Inc. is located at 21525 Strathern Street, Canoga Park, California 91304.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Respondents sell through mail order catalogues and retail stores various rodent control devices known at "Go'pher It", "Go'pher It II," "Molex" and "Gopher Buster." These devices consists of an electronic stake, approximately one foot long, powered by four batteries which cause the stake to vibrate and emit a buzzing noise in 15 second intervals.

The complaint charges that through a variety of statements in their promotional and packaging materials, the respondents represented that their rodent control devices are an effective or proven means to eliminate, reduce the number of, or prevent the reentry of gophers, ground squirrels, moles and other burrowing rodents generally, in a given area and for a given time period. The complaint alleges that at the time they made those claims, the respondents did not possess or rely upon a reasonable basis for them. According to the complaint, the respondents' failure to possess and rely upon a reasonable basis for their claims is deceptive and in violation of Section 5 of the Federal Trade Commission Act.

The complaint also alleges that the respondents represented that their rodent control devices are approved by the Environmental Protection Agency and waterproof. The complaint charges that the devices are neither approved by the E.P.A. nor waterproof, and therefore the respondents' statements to the contrary are false and misleading and in violation of Section 5 of the Federal Trade Commission Act.

Paragraph I of the proposed consent order would prohibit the respondents from representing that their rodent control devices are an effective or proven means to eliminate, reduce the number of, or prevent the reentry of rodents generally in any given area or for any given time period without possessing and relying on a reasonable basis, consisting of competent and reliable scientific evidence, for those claims at the time they are made.

Paragraph II of the proposed consent order would prohibit the respondents

from misrepresenting that their rodent control devices are waterproof or are approved by the Environmental Protection Agency.

In Paragraph III of the proposed consent order, the respondents would be prohibited from representing any performance characteristic of any rodent control device or any other pest control device, relating to its ability to eliminate, reduce the number of, or prevent the reentry of rodents or other pests, unless at the time they make the claim they possess and rely upon a reasonable basis for that claim.

Paragraph IV of the proposed consent order would require the respondents to distribute copies of the order to the firm's officers, employees and other agents having sales, advertising or policy making responsibilities for rodent control devices. In Paragraph Five, the respondents would be required to give notice of the order to all catalogue companies with which they have done business since January 1, 1990, by sending those firms the letter attached as appendix A to the order. That letter sets forth the major provisions of the consent order and informs the catalogue companies that they should cease using the promotional materials previously supplied by the respondents as a basis for their own advertising, unless and until the respondents supply the companies with substantiation for that advertisement or new materials or advertising copy that complies with the order. The letter also informs the catalogue companies that the continued dissemination of the representations concerning the respondents' products may be a violation of the FTC Act.

Paragraph VI of the proposed consent order would require the respondents to maintain, for three years after the date of the last dissemination of each representation, any materials relied upon to substantiate such a claim or which may call into question the representation. Paragraph VII would require the respondents to maintain, for three years after the date the consent order becomes final, copies of the letters sent to the catalogue companies in response to Paragraph V. In Paragraphs VIII and IX, the respondents would be required to notify the Commission of any change in the individual respondents' present business or employment, or any change in the corporate respondent. In Paragraph X, the respondents would be required to file a compliance report with the Commission within 90 days after the date the order becomes final.

The purpose of this analysis is to facilitate public comment on the proposed consent order, and it is not intended to constitute an official interpretation of the agreement and proposed consent order or to modify their terms in any way.

Donald S. Clark,

Secretary.

Owens-Illinois, Inc., et al.; Prohibited Trade Practices and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This final order dismisses the complaint against the respondents because the record does not show that the acquisition of Brockway is likely to substantially lessen competition or to create a monopoly in the glass container industry.

DATES: Complaint issued January 11, 1988. Final order issued February 26, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Dennis Johnson, FTC/S-3302, Washington, DC 20580, (202) 326-2712.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

Commissioners: Janet D. Steiger, Chairman, Mary L. Azcuenaga, Deborah K. Owen, Roscoe B. Starek III, Dennis A. Yao.

In the Matter of: Owens-Illinois, Inc., a corporation, BI Acquisition Corporation, a corporation, and Brockway, Inc., a corporation.

Final Order

This matter having been heard on the appeal of respondents Owens-Illinois, Inc., BI Acquisition Corporation, and Brockway, Inc., from the Initial Decision and on briefs and oral argument in support of and in opposition to the appeal, for the reasons stated in the accompanying opinion, the Commission has determined to grant the appeal. Accordingly,

It is ordered that the complaint is dismissed.

By the Commission, Commissioner Starek and Commissioner Yao not participating.

Donald S. Clark,

Secretary.

National Institutes of Health

National Institute of Arthritis and Musculoskeletal and Skin Diseases; Meeting, National Advisory Board for Arthritis and Musculoskeletal and Skin Diseases

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Board for Arthritis and Musculoskeletal and Skin Diseases on April 13, 1992. The meeting will be held at the Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington, Virginia 20202. The Board will meet April 13, 8:30 a.m. to approximately 3 p.m.

The meeting, which will be open to the public, is being held to discuss the Board's activities and to continue evaluation of the National effort to combat arthritis and musculoskeletal and skin diseases. Attendance by the public will be limited to space available.

Ms. Geraldine B. Pollen, Executive Director, National Advisory Board for Arthritis and Musculoskeletal and Skin Diseases, 1801 Rockville Pike, suite 500, Rockville, Maryland 20852, (301) 496-6045, will provide on request an agenda and roster of the members. Summaries of the meeting may also be obtained by contacting her office.

Dated: March 17, 1992.

BILLING CODE 4140-01-M

Public Health Service

National Toxicology Program (NTP) Board of Scientific Counselors' Meeting To Review Specific Aspects of the Function and Purpose of the NTP

Pursuant to Public Law 92-463, notice is hereby given of a meeting of the National Toxicology Program (NTP) Board of Scientific Counselors, U.S. Public Health Service, to review and give advice to the Program Director and NTP Executive Committee on four specific aspects of the function or purpose of the NTP. The meeting will be held on April 14 and 15, 1992, in the Conference Center, Building 101, South Campus, National Institute of Environmental Health Sciences (NIEHS), 111 Alexander Drive, Research Triangle Park, North Carolina. The meeting will begin on April 14, at 8:30 a.m. and end at approximately 5 p.m. The meeting will begin on April 15 at 8:30 a.m. and continue until adjournment. The meeting is open to the public with attendance limited only by space available.

The Director, NTP, has as one of his major goals to assure that the program serves the public health by strengthening its role as the nation's premier toxicology research and testing program. To accomplish this goal, he has asked for advice on four specific aspects of the function or purpose of the NTP as to how:

(1) To assure that emphasis is placed on studies of the mechanisms of toxicity and carcinogenicity;

(2) To develop and validate better assays that may reduce the need for long-term testing in animals;

(3) To improve the quality of chemicals nominated for testing by assuring that they have the greatest public health significance; and

(4) To improve the procedures for alerting regulatory agencies and the public about test results on chemicals (particularly date which suggest potential hazard to humans from chemicals of widespread importance).

To obtain endpoint-specific advice on the first three issues, the work of the Board will be divided among three subcommittees for carcinogenesis, reproductive and heritable effects, and other toxicities and chemical disposition.

The preliminary agenda with approximate times are as follows:

April 14

8:30 a.m.-10 a.m.—Introduction and charge to the Board and presentation of NTP agency perspectives.
10 a.m.-4 p.m.—Subcommittee work sessions to discuss the four issues.
4 p.m.-5 p.m.—Public comment and discussion.

April 15

8:30a.m.-11 a.m.—Continuation of subcommittee work sessions.
11 a.m.-12 p.m.—Public comment and discussion.
1 p.m.-Adjournment—Continuation of public comment and discussion session.

The NTP seeks comments and views on the four issues. Suggestions of other activities to improve the NTP also are welcomed. Comments should be as brief as possible and should be addressed to the Chairman of the Board as follows: Chairman, NTP Board of Scientific Counselors, c/o Dr. Lazrry G. Hart, Executive Secretary, NIEHS, P.O. Box 12233, Research Triangle Park, North Carolina 27709.

Every effort will be made at the meeting on April 14-15 to consider comments received by c.o.b. Friday, April 10. Oral comments may be made during the public comment sessions and may not exceed 5 minutes in length. Preferably, oral comments should not duplicate written comments.

There will be further opportunities for public comment on these four issues as well as on the recommendations of the NTP Board of Scientific counselors and Executive Committee. First, the recommendations of the NTP Board and Executive Committee will be published in the **Federal Register** with a request for public comment. Second, a public meeting will be held in Washington, DC, in the near future (date to be announced in the **Federal Register** to allow for additional comments on the issues and the recommendations of the NTP Board and Executive Committee.

For further information regarding the meeting, please contact Dr.Hart by mail at the above address, by FAX to 919/541-2260 or by telephone at 919/541-3971 or FTS 629-3971. A roster of Board members will be available prior to the meeting.

Dated: March 18, 1992.

Kenneth Olden,

Director, National Toxicology Program.

BILLING CODE 4140-01-M

HEALTH AND HUMAN SERVICES

Vaccine Information Materials

ACTION: Notice.

SUMMARY: On December 17, 1991, the Food and Drug Administration (FDA) licensed an acellular pertussis vaccine for administration as the fourth and fifth doses given to children. This recent development necessitates a revision of the vaccine information pamphlet entitled, "Diphtheria, Tetanus, and Pertussis: What You Need to Know," which has been developed by HHS as required by the National Childhood Vaccine Injury Act of 1986. A separate Notice of Proposed Rule Making (NPRM) will be drafted to revise the pamphlet, under the rulemaking procedures mandated by 42 U.S.C. 300aa-26.

In the interim, the Centers for Disease Control (CDC) will distribute the following addendum regarding the acellular pertussis vaccine, which we recommend for use with the current diptheria, tetanus, and pertussis (DTP) pamphlet. CDC suggests that health-care providers use the following information so that individuals receiving the vaccine will have complete and accurate information which recognizes the recent licensing of acellular pertussis vaccine.

DATES: Effective April 15, 1992.

FOR FURTHER INFORMATION CONTACT: Dr. Steve Wassilak, Division of Immunization, National Center for Prevention Services, Centers for Disease Control, Mail Stop E-05, Atlanta, GA 30333, telephone (404) 639-1864.

SUPPLEMENTARY INFORMATION: Title XXI, section 2126 of the Public Health Service Act (42 U.S.C. 300aa-26), as amended by Public Law 100-203 and Public Law 101-239, requires the Secretary to develop and disseminate information materials on the vaccines included in the vaccine injury table (diphtheria, tetanus, pertussis, measles, mumps, rubella, and poliomyelitis vaccines). Vaccine information materials covering these vaccines were published as a Final Rule in the **Federal Register** on October 15, 1991 (56 FR 51798; codified at 42 CFR part 110). Effective April 15, 1992, any health-care provider intending to administer one of the covered vaccines must provide a copy of the relevant materials to the vaccine recipient, or in the case of a minor, to the parent or legal representative of the vaccine recipient, prior to administration of the vaccine. (Alternatively, health-care providers may provide other written information which meets the requirements of the law.)

Subsequent to the publication of the vaccine information materials, the FDA on December 17, 1991, licensed an acellular pertussis vaccine for administration as the fourth and fifth doses given to children. This recent development requires revision of the vaccine information pamphlet entitled, "Diphtheria, Tetanus, and Pertussis: What You Need to Know." An NPRM will be drafted to revise this pamphlet, under the rulemaking procedures mandated by 42 U.S.C. 300aa-26.

In the interim, CDC is distributing the following addendum regarding the acellular pertussis vaccine, which may be used with the current DPT pamphlet. Until a formal revision of the current version of the vaccine information pamphlet can be completed, CDC suggests that health-care providers use the following interim information, along with the current pamphlet, so that individuals receiving pertussis vaccine will have complete and accurate information:

Addendum to "Diphtheria, Tetanus, and Pertussis: What You Need to Know"

What You Need To Know About the New Pertussis Vaccine

After the 1991 pamphlet "Diphtheria, Tetanus, and Pertussis: What You Need to Know" was prepared, a new pertussis vaccine became available for the fourth and fifth shots against diphtheria, tetanus, and pertussis. This sheet provides up-to-date information about the new vaccine. You should read this sheet after you have read the pamphlet.

What Is the New Vaccine?

DTP vaccine is usually given 5 times before a child reaches age 7 years. Until now, pertussis vaccine has been made from killed whole pertussis cells and mixed with diphtheria and tetanus vaccines to make the whole-cell DTP shot. The new acellular pertussis vaccine, DTaP, is made of only a few parts of the pertussis cell and is also combined with diphtheria and tetanus vaccines.

When Should It Be Used?

The fourth and fifth shots of the DTP vaccine series are usually given to children 15-18 months old and 4-6 years old. The DTaP vaccine can be used only for the fourth and fifth shots. Testing is now in progress to show that DTaP is safe and effective for the first three doses. Until these studies are completed, this vaccine cannot be considered for use for the first three doses of the vaccine series. Whole-cell DTP vaccine should still always be used for the first three shots, and can still be used for the fourth and fifth DTP shots, although most experts will prefer to use DTaP vaccine.

Compared with the DTP vaccine, after DTaP shots fewer children will be cranky or drowsy, have fever, or have soreness or swelling where the shot was given. Convulsions that occur after receiving DTP vaccine are usually caused by fever. With DTaP, there is less chance of fever, so convulsions probably occur less often. Experts do not know whether unusual, more serious problems which have been reported after DTP vaccine (mentioned in the pamphlet) happen less often after DTaP shots than after DTP shots.

When Should the Vaccine Not Be Given?

If the health care provider determines that a whole-cell DTP shot should not be given, DTaP also should not be given. In that case, the child should usually get DT vaccine instead.

Dated: March 18, 1992.

James O. Mason,

Assistant Secretary for Health.

BILLING CODE 4160-16-M

DEPARTMENT OF THE INTERIOR

Nomination for National Indian Gaming Commission

AGENCY: Office of Secretary, Interior.

ACTION: Notice.

SUMMARY: The Indian Gaming Regulatory Act (25 U.S.C. 2701, *et seq.*) provides for appointment by the Secretary of the Interior of two associate members of the National Indian Gaming Commission after public notice and an opportunity for comment. Notice is hereby given of the proposed appointment of Jana McKeag to a three-year term as an associate member of the Commission.

DATES: Comments must be received by April 23, 1992.

ADDRESSES: Comments should be addressed to: Morris Simms, Director of Personnel, Department of the Interior, 1849 C Street, NW., Washington, DC 20240, (202) 208-6781.

SUPPLEMENTARY INFORMATION: Section 5(a) of the Indian Gaming Regulatory Act (25 U.S.C. 2704(a)) establishes a three-member National Indian Gaming Commission within the Department of the Interior. The Act provides that the Chairman of the Commission is to be appointed by the President with the advice and consent of the Senate. The two associate members of the Commission are to be appointed by the Secretary of the Interior (25 U.S.C. 2704(b)(1)). The Act provides that the Secretary shall publish notice of nominations for the associate member positions in the **Federal Register** and provide an opportunity for public comment.

Notice is hereby given of the proposed appointment of the following individual to be an associate member of the Commission for a term of three (3) years:

Jana McKeag: Ms. McKeag, a member of the Cherokee Nation of Oklahoma, is currently serving a one-year term as an associate member of the Commission. She has served in this capacity since April 1991. She was previously employed as Director of Native American Programs, Office of Intergovernmental Affairs, U.S. Department of Agriculture. From August 1988 to December 1990, Ms. Mckeag was Staff Assistant to the Deputy Assistant Secretary—Office of Trust and Economic Development in the Bureau of Indian Affairs. Prior to this appointment, she served as a Program Analyst and as Executive Assistant to the Deputy Assistant Secretary in the Bureau of Indian Affairs. Ms. Mckeag also served the Department of the Interior as a Program Analyst in the Office of Policy Analysis from August 1985 to August 1988, and as a Budget Analyst Intern with the Office of Budget from July 1983 to January 1984. She served as a Program Analyst for the Equal Employment Opportunity Commission from January 1984 to May 1985, and as an Equal Employment Opportunity Specialist for the U.S. Commission on Civil Rights from August 1976 to September 1979. Ms. McKeag's experience in American Indian affairs also includes serving as Executive Assisant to the Director for the Congressional American Indian Policy Review Commission from September 1975 to August 1976, and as Education Director for the National Congress of American Indians from July 1974 to September 1975. Ms. McKeag is an officer and a member of the board of directors for the Y.M.C.A. of Metropolitan Washington, and a member of the board of directors for the American Diabetes Association. She holds a Bachelor of Arts degree from Gettysburg College, Gettysburg, Pennsylvania, and a Master of Public Administration degree from Harvard University, Kennedy School of Government.

Persons wishing to comment on this proposed appointment may submit written comments to the address identified above. Comments must be received within 30 days of the date of the publication of this notice.

Dated March 17, 1992.

Manuel Lujan, Jr.,

Secretary of the Interior.

BILLING CODE 4310-RJ-M

Bureau of Land Management

[WY-920-02-4120-14]

North Antelope/Rochelle Coal Lease Application (WYW119554); Extension of Public Comment Period for the Draft Environmental Assessment

AGENCY: Bureau of Land Managment, Interior, WY

ACTION: Notice of extension of public comment period for the draft environmental assessment (EA) for the North Antelope/Rochelle Coal Lease Application (WYW119554).

SUMMARY: This notice extends the public comment period for the draft environmental assessment for the Powder River Coal Company (PRCC) application for a coal lease from c.o.b. April 3, 1992, to c.o.b. April 20, 1992. The PRCC application is for an estimated 370 million tons of federal coal reserves under 3,064 acres located adjacent to their existing North Antelope and Rochelle mines, Campbell County, Wyoming.

DATES: Comments on the EA must now be received at the address below no later than c.o.b. April 20, 1992.

ADDRESSES: Comments should be sent to Attention: Suzanne Mehlhoff, Casper District Office, 1701 East "E" Street, Casper, Wyoming 82601.

FOR FURTHER INFORMATION CONTACT: For more information or to obtain a copy of the EA, contact Suzanne Mehlhoff at the office identified above or by phone at (307) 261-7600.

SUPPLEMENTARY INFORMATION: Powder River Coal Company (PRCC) filed two applications on March 2, 1990, with the BLM for coal leases adjacent to their existing North Antelope and Rochelle mines. In December 1991, the BLM, under the authority of 43 CFR 3425.1-9, combined the two applications into a single lease application. These lands contain 3,064 acres, more or less. The application(s) were filed as lease-by-application (LBA) for the purpose of extending the producing life of the existing mines. The EA was to be made available for review and comment on or before February 21, 1992, however, problems with the printing contractor delayed the mailing of many of the documents until March 6, 1992. All comments received will be considered in preparation of the final EA.

F. William Eikenberry,

Associate State Director.

Scoping of a New Alternative for the Environmental Impact Statement Regarding the Proposed Expansion of the U.S. Army's National Training Center at Fort Irwin, San Bernardino County, CA

AGENCY: Bureau of Land Management, Interior. Cooperating Agency: National Training Center, U.S. Army.

ACTION: Notice of scoping of amendment to existing study area.

SUMMARY: Notice is hereby given that the Bureau of Land Management is accepting public input on an amendment to the existing Study Area for the Environmental Impact Statement (EIS) regarding the U.S. Army proposal to expand the National Training Center at Fort Irwin, California, onto public lands within the California Desert Conservation Area. This notice invites the public to provide scoping issues for this amendment to the existing Study Area which will constitute a new alternative in the EIS.

DATES: Scoping comments must be postmarked no later than April 24, 1992.

ADDRESSES: Comments should be sent to Sharon Paris, Bureau of Land Management, 150 Coolwater Lane, Barstow, California 92311.

SUPPLEMENTARY INFORMATION: The U.S. Army proposal to expand the National Training Center to include additional maneuver space for armored and mechanized training exercises was published in the **Federal Register** on August 22, 1988 and initial scoping meetings were held.

The existing Study Area was amended to include an additional 229,200 acres of public land by a withdrawal notice published in the **Federal Register** on February 12, 1992. The amendment to the Study Area constitutes an additional alternative, the Silurian Valley Alternative, which will be included and analyzed in the pending Draft EIS. The public is invited to provide additional scoping issues for the Silurian Valley Alternative.

The Silurian Valley Alternative encompasses approximately 322,000 acres of public land to the south, north, and east of the National Training Center. Known issues within the boundary of the Silurian Valley Alternative include: wilderness study areas; proximity to Death Valley National Monument; Dumont Dunes Off-Highway Vehicle Recreation Area; Areas of Critical Environmental Concern at Salt Creek and Denning Spring; the Amargosa River drainage; State Route 127; soil, vegetation, and wildlife, including desert tortoise and bighorn sheep; mineral development; cultural resources; and public health and safety.

Dated: March 9, 1992.

Karla K.H. Swanson,

Area Manager.

Public Meeting for Draft Environmental Impact Statement (DEIS) for Plan of Operations, Case Number A 25564; Gila Resource Area, Graham County, AZ

AGENCY: Bureau of Land Management (BLM), Safford District, AZ, Interior.

ACTION: Notice of meeting.

SUMMARY: The Bureau of Land Management, Safford District will hold a public meeting to discuss the Draft Environmental Impact Statement (DEIS) for the Sanchez Copper Project. The 60-day comment period began on March 13, 1992.

DATE: The meeting will be held on Thursday, April 2, 1992, at 7 p.m.

ADDRESS: The meeting place will be the Phelps Dodge Room, Safford Public Library, 800 7th Avenue, Safford, AZ 85546.

SUPPLEMENTARY INFORMATION: The BLM has prepared a DEIS for a proposed open pit copper mine near Safford, Arizona in response to a Plan of Operations submitted in August, 1991 by AZCO Mining, Inc.

The Plan of Operations calls for mining the Sanchez copper orebody, located on 581 unpatented lode and millsite claims at the southeast end of the Gila Mountains, about 10 miles east-northeast of the city of Safford, Graham County, in southeastern Arizona. The orebody will be mined using conventional open pit mining techniques and mining equipment. The planned ore mining rate is 10 million tons per year. Waste rock and alluvium will be mined at an average rate of about 13 million tons per year. The expected life of the mine is 17 years. The pit will ultimately measure about 4,000 feet in diameter and 1,200 feet deep.

The public meeting to answer questons about the project and DEIS will be held on Thursday, April 2, at 7 p.m., at the Safford Public Library's Phelps Dodge Room. Public comments on the DEIS will be accepted by BLM until May 11, 1992.

FOR INFORMATION CONTACT: Larry Thrasher, Project Manager, BLM Safford District Office, Division of Resource Management, (602) 428-4040.

Dated: March 13, 1992.

Ray A. Brady,

District Manager.

[ID-010-02-4350-08]

Intent To Amend Jarbidge Resource Management Plan and Notice of Availability of Planning Criteria

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to amend the Jarbidge Resource Management Plan; and notice of availability of planning criteria.

SUMMARY: Pursuant to 43 CFR part 1600 (BLM Planning Regulations) and 40 CFR part 1500 (National Environmental Policy Act—NEPA) the Bureau of Land Management (BLM) is beginning preparation of an amendment to the Jarbidge Resource Management Plan. The amendment will consider research natural area/area of critical environmental concern (RNA/ACEC) designation on one site to protect the redband trout, a Federal Category 2 (C2) candidate species. The site encompasses approximately 800 acres of BLM administered land along the west side of King Hill Creek for approximately 10 miles. The public is invited to comment on what issues, impacts and alternatives should be addressed during the process (scoping) and to comment on the proposed Planning Criteria.

DATES: It is anticipated that the amendment and NEPA support document will be available for public review and comment during late 1992. Any public meetings will be announced at a later date.

ADDRESSES: Written Comments should be mailed to: Bruneau Area Manager, Bureau of Land Management, 3948 Development Avenue, Boise, ID 83705.

FOR FURTHER INFORMATION CONTACT: Fred Minckler, Team Leader at: Bureau of Land Management 3984 Development Avenue, Boise, ID 83705. Telephone (208) 384-3300.

SUPPLEMENTARY INFORMATION: The Jarbidge Resource Management Plan (RMP) is a land use plan encompassing about 2,100,000 acres of public land administered by Boise District, BLM in southwest Idaho. The RMP was approved on March 23, 1987. Boundary adjustments within the Boise District resulted in administration of approximately 123,000 acres addressed in the Jarbidge RMP being transferred from the Jarbidge Resource Area to the Bruneau Resource Area on January 1, 1992. Since ACEC designation for this area was not considered in the Jarbidge RMP, an amendment is required.

The 800 acre site under consideration for RNA/ACEC designation is on the west side of King Hill Creek which forms the boundary between the Bruneau Resource Area in the Boise District and the Bennett Hills Resource Area in the Shoshone District. RNA/ACEC designation is also being considered on the east side of the creek in the curent Bennett Hills RMP effort. Since the area under consideration in this amendment is adjacent to the public lands being addressed in the Bennett Hills RMP, all further documentation for this amendment process will be incorporated into the Bennett Hills RMP effort.

This reach of King Hill Creek contains a population of Redband trout which is believed to be a genetically pure native population not subjected to hybridization or breeding with hatchery stocks. It is also believed to be the eastern-most population of redband trout north of the Snake River. Redband trout is currently identified by the U.S. Fish and Wildlife Service as a Federal Category 2 (C2) candidate species, a State of Idaho Species of Special Concern and a BLM sensitive species.

This initial phase in the plan amendment process incorporates the "Identification of Issues" step which provides for public input to help determine what issues, alternatives and impacts should be addressed and the "Planning Criteria" step which provides for public input on factors to be considered during decisionmaking.

Environmental issues are questions and concerns regarding impacts on resources and resource uses. Preliminary environmental issues identified to date for this amendment focus on management of the following: Wildlife habitat, livestock grazing, fisheries habitat, recreation use, cultural resources and watershed values.

Planning criteria are used to guide the plan amendment process. The planning criteria streamline and focus the process, establish standards and indicate the factors that will be considered in decisionmaking. The proposed planning criteria for this effort are those criteria that were approved for the parent plan, the Jarbidge RMP, as follows: Social and economic values; plans, programs, and policies of other Federal agencies, State and local government, and Indian tribes; existing laws, regulations, and BLM policy; future needs and demands for existing or potential resource commodities and values; public input; public welfare and safety; past and present use of public and adjacent lands; public benefits of providing goods and services in relation to costs; quantity and quality of noncommodity resource values; and environmental impacts.

This is the public's opportunity to identify any additional issues for consideration and to provide comments on the proposed planning criteria. In order to give maximum consideration to any concerns, written comments should be submitted by April 24, 1992. Comments should be mailed to the Bruneau Area Manager at the address listed above.

Dated: March 17, 1992.

Barry C. Cushing,

Acting District Manager.

Notice of Realty Action: Exchange; Beaverhead County, MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Designation of public lands in Beaverhead County, Montana, for transfer out of Federal ownership in exchange for lands owned by the State of Montana.

SUMMARY: BLM and the National Park Service propose to exchange public land with the State of Montana to achieve more efficient land management through disposal of isolated tracts (BLM) and to acquire State land within the boundaries of Yellowstone National Park for incorporation into the National Park system (NPS).

The following public land is being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

Principal Meridian Montana

T. 10 S., R. 6 W.,
Section 34: S½ containing 320 acres.

These lands are segregated from entry under the mining laws, except the mineral leasing laws, effective upon publication of the notice in the **Federal Register.** The segregative effect will terminate upon issuance of patent, upon publication in the **Federal Register** of termination of the segregation, or two years from the date of this publication, whichever comes first.

In exchange for these lands, the Federal Government will acquire the following described land from the State of Montana:

Principal Meridian Montana

T. 9 S., R. 8 E.,
Section 16: Lot 9, containing 19.5 acres.

Final determination on disposal will await completion of an environmental assessment. Upon completion of the environmental assessment, a Notice of Realty Action shall be published specifying the public lands being disposed of and the State lands being acquired.

DATES: On or before May 11, 1992. Interested parties may submit comments to the Butte District Manager, P.O. Box 3388, Butte MT 59702.

SUPPLEMENTARY INFORMATION: Detailed information concerning this exchange is available at the Butte District Office.

Dated: March 16, 1992.

James R. Owings,

District Manager.

BILLING CODE 4310-84-M

[NV-930-02-4212-14; N-55059]

Realty Action; Director Sale of Federal Land in Esmeralda County, NV

SUMMARY: The following described land has been examined and identified as suitable for disposal by direct sale to Verna Wallace, a resident of Fish Lake Valley, Nevada, under sections 203 and 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713 and 1719) at the appraised fair market value:

Mount Diablo Meridian

T. 4 S., R. 36 E.,
Sec. 16, SW¼NE¼/.

A parcel of land containing a total of 40.00 acres.

The sale parcel is land previously affected by desert land application N-21720 which was relinquished in order that the sale be could be considered. The sale is consistent with the Bureau's planning system and in conformance with the Esmeralda-Southern Nye Resource Management Plan, approved October 10, 1986. The land is not needed for any resource program and is not suitable for management by the Bureau or any other Federal department or agency. Ms. Wallace and her husband James P. Wallace are the only adjacent landowners. The land will not be offered for sale for at least 60 days after the publication of this Notice in the **Federal Register.**

Patent, when issued, will contain the following reservations to the United States:

A right-of-way thereon for ditches and canals constructed by the authority of the United States, in accordance with the Act of August 30, 1890 (26 Stat. 391; 43 U.S. C. 945).

Oil and gas and saleable minerals together with the right to prospect for, mine, and remove the minerals. All other mineral interests will be conveyed simultaneously with the patent.

Patent will be subject to all valid existing rights. The purchaser agrees that she takes the forty-acre parcel subject to the existing grazing use of William S. Wright, holder of grazing authorization Number 6121. The privilege of William S. Wright to graze domestic livestock on the forty-acre parcel according to the conditions and terms of authorization Number 6121 shall cease on October 16, 1993. The purchaser is entitled to receive annual grazing fees from William S. Wright for the forty-acre parcel in an amount not to exceed that which would be authorized under the Federal grazing feed published annually in the **Federal Register.**

General Information

Publication of this Notice in the **Federal Register** segregates the subject lands from all forms of appropriation under the public land laws and the mining laws. The segregative effect will end upon issuance of a patent to these lands, upon publication in the **Federal Register** of a notice of termination, or 270 days from the date of publication of this Notice, whichever comes first.

The appraised fair market value of the 40.0 acre tract will be made available at a later date. Persons who wish to be notified when the appraisal is complete should contact the Battle Mountain District Office.

For a period of 45 days from the date of publication of this Notice in the **Federal Register,** interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 1420, Battle Mountain, NV 89820. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: March 11, 1992.

Michael C. Mitchel,

Acting District Manager, Battle Mountain District.

BILLING CODE 4310-HC-M

[NV-930-02-4212-14; N-55683]

Realty Action; Non-Competitive Sale of Public Lands in Clark County, NV

The following described public land in Las Vegas, Clark County, Nevada has been determined to be suitable for sale utilizing non-competitive procedures, at not less than the fair market value.

Authority for the sale is section 203 of Public Law 94–579, the Federal Land Policy and Management Act of 1976 (FLPMA). The lands will not be offered for sale until at least 60 days after the date of publication of this notice in the **Federal Register**.

Mount Diablo Meridian, Nevada

T. 21 S., R. 60 E.
Sec. 28, W½SE¼NW¼SE¼.
Aggregating 5.00 acres (gross).

This parcel of land, situated in Las Vegas is being offered as a direct sale to Century Pacific Development. Justification for the direct sale is found in 43 CFR 2710.0–6(c)(1)(3)(iii). Century Pacific Development is the owner of the private parcels surrounding the public parcel except for the one immediately to the north of the subject parcel. Due to the construction of the Flamingo Wash Detention Basin Outfall Channel, the Clark County Regional Flood Control District has identified that access could only be accomplished by bridging the channel. Clark County Public Works Department has identified that the County does not intend to provide access across the channel, access can only be made from the adjacent properties owned by Century Pacific Development. If Century Pacific Development sells their interest in the private property before the consummation of the sale, the new landowners will be given the option to purchase this parcel upon proof of ownership.

This land is not required for any federal purposes. The sale is consistent with the Bureau's planning system. The sale of this parcel would be in the public interest.

In the event of a sale, conveyance of the available mineral interests will occur simultaneously with the sale of the land. The mineral interests being offered for conveyance have no known mineral value. Acceptance of a direct sale offer will constitute an application for conveyance of those mineral interests. The applicant will be required to pay a $50.00 nonreturnable filing fee for conveyance of the available mineral interests.

The patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. Oil, gas, sodium, potassium and saleable minerals.

And will be subject to:

1. Those rights for flood detention basin purposes which have been granted to Clark County by Permit No. N–43234 under the Act of October 21, 1976.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all forms of appropriation under the public land laws, including the general mining laws. This segregation will terminate upon issuance of a patent or 270 days from the date of this publication, whichever occurs first.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas, Nevada 89126. Any adverse comments will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, this realty action will become the final determination of the Department of the Interior. The Bureau of Land Management may accept or reject any or all offers, or withdraw any land or interest in the land from sale, if, in the opinion of the authorized officer, consummation of the sale would not be fully consistent with Public Law 94–579, or other applicable laws.

Dated: March 17, 1992.

Ben F. Collins,

District Manager, Las Vegas, NV.

Filing of Plats of Survey; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The purpose of this notice is to inform the public and interested state and local government officials of the latest filing of Plats of Survey in California.

EFFECTIVE DATES: Filing was effective at 10 a.m. on the date of submission to the Bureau of Land Management (BLM), California State Office, Public Room.

FOR FURTHER INFORMATION CONTACT: Clifford A. Robinson, Chief, Branch of Cadastral Survey, Bureau of Land Management (BLM), California State Office, 2800 Cottage Way, room E–2845, Sacramento, CA 95825, 916–978–4775.

SUPPLEMENTARY INFORMATION: The plats of Survey of lands described below have been officially filed at the California State Office, Sacramento, CA.

Mount Diablo Meridian, California

T. 6., R. 32 E.—Dependent resurvey, and Metes-and-Bounds Survey of Tract 37, (Group 1129) accepted October 31, 1991, to meet certain administrative needs of the BLM, Bakersfield District, Bishop Resource Area.

T. 27 S., R. 22 E.—Dependent resurvey of a portion of the subdivisional lines, the survey of a portion of the subdivisional lines and the subdivision of section lines of section 14, (Group 975) accepted December 17, 1991, to meet certain administrative needs of the BLM, Bakersfield District, Caliente Resource Area.

All of the above listed surveys are now the basic record for describing the lands for all authorized purposes. The surveys will be placed in the open files in the BLM, California State Office and will be available to the public as a matter of information. Copies of the surveys and related field notes may be furnished to the public upon payment of the appropriate fee.

Dated: March 17, 1992.

Clifford A. Robinson,

Chief, Branch of Cadastral Survey.

Proposed Withdrawal and Opportunity for Public Meeting; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Department of Agriculture, Forest Service, has filed an application to withdraw 270 acres of National Forest System land for protection of the State's rare plant, Senecio Layneae (Laynes Butterweed), and to control public access. This notice closes the lands for up to 2 years from location and entry under the United States mining laws. The land will remain open to all other uses which may be made of National Forest System land.

DATES: Comments and requests for meeting should be received on or before June 23, 1992.

ADDRESSES: Comments and meeting requests should be sent to the California State Director, BLM, 2800 Cottage Way, room E–2845, Sacramento, California 95825.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, 916–978–4820.

SUPPLEMENTARY INFORMATION: On January 17, 1992, the United States Department of Agriculture filed an application to withdraw the following described National Forest System land from location and entry under the United States mining laws, subject to valid existing rights:

Mount Diablo Meridian

Eldorado National Forest

T. 12 N., R. 10 E.,
sec. 24, lot 2, NW¼NW¼, S½NW¼, N½SW¼, E½SW¼SW¼, and SE¼SW¼.

The area described contains 270 acres in El Dorado County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the California State Director of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the California State Director within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which will be permitted during this segregative period are leases, licenses, permits, and rights-of-way consistent with the Eldorado National Forest Land and Resource Management Plan approved January 6, 1989.

Dated: March 17, 1992.

Nancy J. Alex,

Chief, Lands Section.

Proposed Withdrawal and Opportunity for Public Meeting; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw 200.59 acres of National Forest System lands to protect the rehabilitation work being performed on the White King/Lucky Lass Uranium Mines in the Fremont National Forest. This notice closes the lands for up to two years from mining. The lands will remain open to mineral leasing.

DATES: Comments and requests for a public meeting must be received by June 23, 1992.

ADDRESSES: Comments and meeting requests should be sent to the Oregon State Director, BLM, P.O. Box 2965, Portland, Oregon 97208–2965.

FOR FURTHER INFORMATION CONTACT: Linda Sullivan, BLM, Oregon State Office, 503–280–7171.

SUPPLEMENTARY INFORMATION: On March 9, 1992, the U.S. Department of Agriculture, Forest Service, filed an application to withdraw the following described National Forest System lands from location and entry under the United States mining laws (20 U.S.C. Ch. 2) subject to valid existing rights:

Willamette Meridian

Fremont National Forest

T. 37 S., R. 18 E.,
sec. 25, NW¼NE¼.
T. 37 S., R. 19 E.,
sec. 30, lot 1, E½NW¼, and NW¼SE¼.

The areas described aggregate 200.59 acres in Lake County, Oregon.

The purpose of the proposed withdrawal is to protect the rehabilitation work being performed on the White King/Lucky Lass Uranium Mines.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the State Director at the address indicated above.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested parties who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the State Director at the address indicated above within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of two years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The sites will be fenced to prevent other uses being made of this area.

Dated: March 12, 1992.

Robert E. Mollohan,

Chief, Branch of Lands and Minerals Operations.

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collections of information and related forms may be obtained by contacting the Bureau's Clearance Officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to the Bureau Clearance Officer and to the Office of Management and Budget; Paperwork Reduction Project (1010–0016); Washington, DC 20503, telephone (202) 395–7340, with copies to Chief, Engineering and Standards Branch; Engineering and Technology Division, Mail Stop 4700; Minerals Management Service; 381 Elden Street, Herndon, Virginia 22070–4817.

Title: Quarterly Oil Well Test Report, Form MMS–1869.

OMB approval number: 1010–0016.

Abstract: Respondents submit Forms MMS–1869 to the Minerals Management Service's (MMS) Regional Supervisors so they can evaluate the results of well tests to ascertain if reservoirs are being depleted in a manner that will lead to the greatest ultimate recovery of hydrocarbons. The form is designed to provide a quarterly test of oil-well capabilities and production characteristics for use in updating and verifying maximum (optimum) permissible producing rates and to provide the basis for revising MMS's estimates of remaining recoverable reserves.

Bureau form number: Form MMS–1669.

Frequency: Quarterly.

Description of respondents: Outer Continental Shelf oil, gas, and sulphur lessees performing offshore production operations.

Estimated completion time: 2 hours.

Annual responses: 8,400.

Annual burden hours: 16,800

Bureau Clearance Officer: Dorothy Christopher, (703) 787–1239.

Dated: February 11, 1992.

M.L. Courtois,

Acting Deputy Associate Director for Operations and Safety Managment.

Outer Continental Shelf (OCS) Advisory Board—Policy Committee; Notice and Agenda for Meeting

The Policy Committee of the OCS Advisory Board will meet Wednesday, April 15 and Thursday, April 16, 1992, at the Doubletree at Post Oak, 2001 Post Oak Boulevard, Houston, Texas, (713) 961–9300.

The agenda will cover the following principal subjects:

Wednesday, April 15

—Economics Report and Suggested Incentives to Encourage OCS Activity
—Improving Production Economics of Oil and Gas in Marginal OCS Fields
—Minerals Management Service Updates and Discussion
—Legislative Panel, including Update on Coastal Impact Assistance

Thursday, April 16

—Sand, Gravel, and Shell Resources Subcommittee Report
—OCS Related Regulatory Initiatives by the Environmental Protection Agency and National Oceanic and Atmospheric Administration
—Committee Roundtable
—Improving the Process for Developing the 5-Year OCS Oil and Gas Leasing Program, aka "the Shirley Report," and Other Committee Business

The meeting is open to the public. Upon request, interested parties may make oral or written presentations to the Policy Committee. Such requests should be made no later than April 3, 1992, to the Office of OCS Advisory Board Support, Minerals Management Service, 381 Elden Street, MS–4110, Herndon, Virginia 22070, Attention: Terry Holman.

Requests to make oral statements should be accompanied by a summary of the statement to be made. For more information, call Terry Holman at (703) 787–1211.

Minutes of the Policy Committee meeting will be available for public inspection and copying at the Minerals Management Service in Herndon, Virgnia. This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Public Law 92–463, 5 U.S.C. Appendix 1, and the Office of Management and Budget's Circular No. A–63, Revised.

Dated: March 11, 1992.

Thomas Gernhofer,

Associate Director for Offshore Minerals Management.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–530 (Final)]

High-Tenacity Rayon Filament Yarn From Germany; Institution and Scheduling of a Final Antidumping Investigation

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a final antidumping investigation

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investingation No. 731–TA–530 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Germany of high-tenacity rayon filament yarn,[1] provided for in subheading 5403.10.30 of the Harmonized Tariff Schedule of the United States.

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

EFFECTIVE DATE: February 20, 1992.

FOR FURTHER INFORMATION CONTACT: Janine Wedel (202–205–3178), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impared persons can obtain information on this matter by contacting the Commission's TDD terminal of 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that imports of high-tenacity rayon filament yarn from Germany are being sold in the United States at less than fair value within the meaning of section 733 of the act (19 U.S.C. 1673b). The investigation was requested in a petition filed on September 6, 1991 by North American Rayon Corp., Elizabethton, TN.

Participation in the Investigation and Public Service List

Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, not later than twenty-one (21) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this final investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff Report

The prehearing staff report in this investigation will be placed in the nonpublic record on April 17, 1992, and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rules.

[1] High-tenacity rayon filament yarn is a multifilament single yarn of viscose rayon with a twist of five turns or more per meter, having a denier of 1100 or greater, and a tenacity greater than 35 centinewtons per tex. Imports of this product fall under statistical reporting number 5403.10.3040 of the Harmonized Tariff Schedule of the United States.

Hearing

The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on May 1, 1992, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before April 27, 1992. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on April 28, 1992, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by §§ 201.6(b)(2), 201.13(f), and 207.23(b) of the Commission's rules.

Written Submissions

Each party is encouraged to submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 297.22 of the Commission's rules; the deadline for filing is April 27, 1992. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.23(b) of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.24 of the Commission's rules. The deadline for filing posthearing briefs is May 8, 1992; witness testimony must be filed no later than three (3) days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before May 8, 1992. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 297.3, and 207.7 of the Commission's rules.

In accordance with § 201.16(c) and 297.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules.

By Order of the Commission.

Issued: March 16, 1992.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 731–TA–545 (Preliminary)]

Medium-Voltage Underground Distribution Cable From Canada

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports from Canada of medium-voltage underground distribution cable (URD),[3] provided for in subheading 8544.60.60 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

Background

On January 31, 1992, a petiton was filed with the Commission and the Department of Commerce by counsel for the U.S. Cable Trade Action Group, an ad hoc trade association of URD producers, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of URD from Canada. Accordingly, effective January 31, 1992, the Commission instituted antidumping investigation No. 731–TA–545 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of February 10, 1992 (57 FR 4887). The conference was held in Washington, DC, on February 21, 1992, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on March 16, 1992. The views of the Commission are contained in USITC Publication 2489 (March 1992), entitled "Medium-Voltage" Underground Distribution Cable from Canada: Determination of the Commission in Investigation No. 731–TA–545 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By Order Of the Commission.

Issued: March 17, 1992.

Kenneth R. Mason,

Secretary.

[FR Doc. 92–6892 Filed 3–24–92; 8:45 am]

BILLING CODE 7020–02–M

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] Chairman Newquist and Commissioner Rohr dissenting.

[3] For purposes of this investigation, the subject product is URD, an insulated electrical conductor used by electric utility companies in the medium-voltage stage (i.e., for voltages exceeding 1,000 volts but not exceeding 46,000 volts) of transmitting electricity. Utility companies distribute electricity at high voltage from the power generation plant to regional substations primarily via uninsulated, overhead "high tension" wires. At the regional substation, the electricity is "stepped down" to medium voltage. URD is generally used to conduct the electricity from the regional substations to neighborhood transformers, where it is again "stepped down" to household voltages. URD is composed principally of metal (generally aluminum for the conductor and copper for the "neutral" or ground) and insulating compounds (e.g., polyethylene).

[Investigation No. 332–315]

Uranium and Uranium Enrichment Services; Impact on the Domestic Industry of Imports Into the United States From Nonmarket Economy Countries

AGENCY: United States International Trade Commission.

ACTION: Extension of due dates for public comment and final report.

EFFECTIVE DATE: March 18, 1992.

FOR FURTHER INFORMATION CONTACT: General inquiries regarding the investigation may be directed to Mr. James A. Emanuel (202)–205–3367, Energy and Chemicals Division, Office of Industries, U.S. International Trade Commission, Washington, DC 20436. Industry-specific information regarding the investigation may be obtained from Mr. Jack Greenblatt (202)–205–3353, also located in the Energy and Chemicals Division, Office of Industries. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel (202)–205–3091.

SUPPLEMENTARY INFORMATION: With the concurrence of the Senate Committee on Finance, which requested that the

Commission conduct the subject investigation, the Commission has extended the intended completion date of the investigation by 6 months, to January 27, 1993. The deadline for submission of statements regarding investigation No. 332–315 by interested persons has also been extended by 6 months, to the close of business July 31, 1992. The decision to extend the investigation was made after the institution of investigations by the Commission and the U.S. Department of Commerce under the antidumping law (19 U.S.C. 1673 et seq.) regarding imports of uranium from the U.S.S.R. (Commission investigation No. 731–TA–539 (Preliminary)).

The Commission's original notice of this investigation and hearing was published in the **Federal Register** of October 2, 1991 (56 FR 49905). The hearing provided for in that notice was cancelled because the Commission received no requests to appear. The procedures for filing written submissions were set forth in that notice.

Hearing impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202)–205–1810.

By order of the Commission.

Issued: March 19, 1991.

Kenneth R. Mason,

Secretary.

INTERSTATE COMMERCE COMMISSION

Agency Information Collection Under OMB Review

The following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) are being submitted to the Office of Management and Budget for review and approval. Scopies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Kathleen King, (202) 927–5493. Comments regarding this information collection should be addressed to Kathleen King, Interstate Commerce Commission, room 1312, Washington, DC 20423 and to Ed Clark, Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503. When submitting comments, refer to the OMB number of the title of the form.

Type of Clearance: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

Bureau/Office: Office of Economics.

Title of Form: Classification Index Survey Form For Line-Haul Railroad Companies That Do Not File An Annual Report With The Interstate Commerce Commission.

OMB Form Number: 3120–0077.

Agency Form Number: RCS.

Frequency: Annually.

Respondents: Railroads.

No. of Respondents: 355.

Total Burden Hours: 30.

Type of Clearance: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

Bureau/Office: Office of Economics.

Title of Form: Record Keeping, Ratemaking Organizations.

OMB Form Number: 3120–0116.

Agency Form Number: N/A.

Frequency: Recordkeeping.

Respondents: Surface Transportation Carriers (where required).

No. of Respondents: 71.

Total Burden Hours: 142.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an averge respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Lewis Arnold, on (202) 514–4305. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Lewis Arnold, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without any Change in the Substance or in the Method of Collection

(1) Monthly Return of Arson Offenses Known to Law Enforcement.

(2) 4–933. Federal Bureau of Investigation.

(3) Monthly.

(4) State or local governments. The information collected provides the number of arsons and the dollar loss throughout the United States. Summary statistics are published annually in the FBI's "Crime in the United States."

(5) 192,000 annual responses at .10 hours per response.

(6) 19,200 annual burden hours.

(7) Not applicable under 3504(h).

(1) Supplementary Homicide Report.

(2) 4–916. Federal Bureau of Investigation.

(3) Upon occurence of a homicide.

(4) State or local governments. The FBI is authorized to collect this information for inclusion in its annual publication, "Crime in the United States." The information includes the age, sex, race, and ethnic origin of the victim, relationship between murderer and victim, motive, and murder weapon.

(5) 1928 annual responses at .12 hours per response.

(6) 236 annual burden hours.

(7) Not applicable under 3504(h).

(1) Number of Full-Time Law Enforcement Employees as of October 31.

(2) 4–916. Federal Bureau of Investigation.

(3) Annually.

(4) State or local governments. The information requested is needed to determine the number of civilian and sworn full-time male and female law enforcement employees in the United States. The information is included annually in the FBI's publication, "Crime in the United States."

(5) 16,000 annual responses at .20 hours per response.

(6) 3,200 annual burden hours.

(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: March 19, 1992.

Lewis Arnold,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410–03–M

Lodging of Consent Decree Pursuant to Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on March 17, 1992, a proposed Consent Decree in *United States* v. *Lamar Thumm*, Civil Action No. 90–CV–73234–DT, was lodged with the United States District Court for the Eastern District of Michigan, Southern Division. The United States filed this action under sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9606 and 9607, for recovery of the costs it has incurred and will incur in connection with the Textile Road Site in Ypsilanti Township, Michigan, and for enforcement of an Administrative Order issued by the United States Environmental Protection Agency ("U.S. EPA") in connection with the Site. The proposed Consent Decree requires the defendant, Lamar Thumm, to pay the United States $40,000.00 in past response costs and $15,000.00 as a civil fine for noncompliance with U.S. EPA's Administrative Order.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Lamar Thumm*, D.J. Ref. No. 90–11–2–447.

The proposed Consent Decree may be examined at the office of the United States Attorney, Eastern District of Michigan 817 Federal Building, 231 West Lafayette, Detroit, Michigan 48226; at the Region V Office of U.S. EPA, Records Center, Seventh Floor, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, DC 20044.

Copies of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. [(202) 347–2072]. In requesting a copy, please enclose a check in the amount of $4.25 (25 cents per page for reproduction cost), payable to the Consent Decree Library.

John C. Cruden,

Chief EES, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Antitrust Division

U.S. v. Society Corporation and Ameritrust Corporation

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement have been filed with the United States District Court for the Northern District of Ohio in *United States* v. *Society Corporation and Ameritrust Corporation*, Civil Action No. 1:92CV 0525. The proposed Final Judgement is subject to approval by the Court after the expiration of the statutory 60-day public comment period and compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h).

The Complaint in this case alleges that the proposed acquistion of Ameritrust Corporation by Society Corporation would violate section 7 of the Clayton Act, as amended, 15 U.S.C. 18, in the markets for business banking services provided to small businesses in the Cleveland area.

The proposed Final Judgment directs the defendants to divest twenty-eight offices containing in excess of $1 billion in deposits and approximately $40 million in small business commercial loans. Twenty-six of the branches are located in Cuyahoga County, and two are located in Lake County.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Constance K. Robinson, Chief, Communications and Finance Section, Antitrust Division, Room 8104, 555 Fourth Street, NW., Washington, DC 20001, (202–514–5621).

Joseph H. Widmar,

Director of Operations Antitrust Division.

In the United States District Court For the Northern District of Ohio Eastern Division

United States of American, Plaintiff, v. *Society Corporation and Ameritrust Corporation, Defendants.*

Filed: 3/13/92, Civil No. 1:92CV0525, Judge Bell.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys that:

1. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

2. The parties shall abide by and comply with the provisions of the Final Judgment pending entry of the Final Judgment.

3. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation will be of no effect whatever, and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated March 13, 1992.

Counsel for the Plaintiff:

James F. Rill
Assistant Attorney General

J. Mark Gidley

Constance K. Robinson

Counsel for the Defendants:
Society Corporation

Mark A. Weiss

Stuart C. Stock, Covington & Burling, 1201 Pennsylvania Avenue, NW., P.O. Box 7566, Washington, DC 20044, (202) 662–5308.

Ameritrust Corporation

Joe Sims

Peter Heyward, Jones, Day, Reavis & Pogue, Metropolitan Square, 1450 G Street, NW., Washington, DC 20004–2088, (202) 879–3803.

Final Judgment

Whereas, Plantiff, United States of America, having filed its Complaint herein on March 13, 1992, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

And whereas, defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas, prompt and certain divestitures of bank branches, deposits and commercial loans are the essence of this agreement, and defendants have represented to plaintiff that the defendants believe the divestitures required herein can and will be made and that defendants will later raise no claims of hardship or difficulty as grounds for asking the Court to modify any of the divestiture provisions contained herein;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, Adjudged and Decreed as follows:

I. Jurisdiction

This Court has jurisdiction over the subject matter of this action and over each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendants under section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II. Definitions

As used in this Final Judgment:

A. "Ameritrust" means the defendant Ameritrust Corporation, its successors and assigns, its parents, subsidiaries, affiliates, directors, officers, managers, agents, and employees, any other persons under its direct or indirect control, and any other person acting for or on behalf of it.

B. "Business banking services" means banking services offered to business customers and includes at least:

1. "transaction account deposits," *i.e.*, money deposited with a depository institution either at an agreed upon rate of interest or at no interest, withdrawable in practice upon demand and upon which third-party drafts may be drawn by the depositor, including checking accounts and NOW accounts; and

2. "commercial loans," *i.e.*, secured or unsecured loans to businesses, excluding commercial mortgages. Business banking services may also include additional services such as cash and coin, lockbox, cash management, and business expertise and advice offered to business customers. Business banking services excludes services offered to individual consumers.

C. "Branch assets" means personal property; cash on hand; the branch loans specified in section IV.B. and IV.C.; all safe deposit boxes at the branches, exclusive of contents; all prepaid expenses, including security deposits of the branches, determined in accordance with generally accepted accounting principles, as of the closing date; all rights of defendants to all contracts relating to the branch; all records and original documents in defendants' possession pertaining to the leasehold, the personal property, the branch loans specified in sections IV.B. and IV.C., and the nondeposit liabilities; and leasehold; any real estate, buildings, structures, drive-in teller facilities, ATMs, fixtures and improvements thereon which are owned and used by defendants as premises for the branches; and any other assets required for the branch to compete effectively in offering business banking services. Branch assets does not include those assets that at the request of the purchaser are excluded from a branch sale, including among other things classified loans, signs, and computer equipment not useful to a purchaser. Moreover, Brnch assets will not include:

1. "retail loans" assignable to the branch;

2. "residential mortgage loans" assignable to the branch;

3. "commercial mortgages" assignable to the branch;

4. "commercial loans" assignable to the branch made to businesses with annual sales of more than $10 million; and

5. "merchant contracts for credit card receipt processing" that are settled electronically, as opposed to settled using paper documents.

D. "Bank One" means Banc One Corporation, its successors and assigns, its parents, subsidiaries, affiliates, directors, officers, managers, agents, and employees, any other persons under its direct or indirect control, and any other person acting for or cn behalf of it.

E. "Branch deposits" means liabilities allocated to a branch that constitute the unpaid balance of money or its equivalent received or held by the branch in the usual course of business and for which the branch has given or is obligated to give credit, either conditionally or unconditionally, to a commerical, checking, savings, time, investment, retirement or thrift account, or which is evidenced by its certificate of deposit, or a check or draft drawn against a deposit account and certified by the branch. Branch deposits will include public funds for which Ameritrust does not have another branch (other than the branch locations specified in sections IV.B. and IV.C.) that can legally hold such funds and which the purchaser of the branch locations in sections IV.B. and IV.C. wishes to acquire, but will not include:

1. "principal accounts" and "performance packages"—Ameritrust's proprietary sweep accounts;

2. "self-directed retirement accounts"—*i.e.*, IRA, Keogh and HR–10 accounts;

3. "business banking secondary accounts"—deposits of businesses that have their primary deposit account relationships at a branch to be retained; and

4. business deposits of companies with annual sales of more than $10 million.

F. "Commercial mortgages" means loans secured by real estate as evidenced by mortgages or other liens on business and industrial properties.

G. "Defendants" means Society Corporation and Ameritrust Corporation.

H. "Divestiture branches" or "divested branches" means all of the following offices operated by Ameritrust prior to the merger:

1. "Bedford" means the office located at 680 Braodway Avenue in Bedford, Ohio, in the Cuyahoga County market.

2. "Berea" means the office located on 118 Front Street in Berea, Ohio, in the Cuyahoga County market.

3. "BP America" means the office located in the BP mall at 200 Public Square in downtown Cleveland, Ohio, in the Cuyahoga County market.

4. "Broadview-Pearl" means the office located at 4175 Pearl Road in Cleveland, Ohio, in the Cuyahog County market.

5. "Brookpark-Broadview" means the office located at 2132 Brookpark Road in Cleveland, Ohio, in the Cuyahoga County market.

6. "Cedar-Lee" means the office located at 2211 Lee Road in Cleveland Heights, Ohio, in the Cuyahoga County market.

7. "Clark-25th" means the office located at 3104 West 25th Street in Cleveland, Ohio, in the Cuyahoga County market.

8. "Detroit-Columbia" means the office located at 25653 Detroit Road in Westlake, Ohio, in the Cuyahoga County market.

9. "Eastgate" means the office located in the Eastgate Shopping Center at 1485 S.O.M. Center Road in Mayfield Heights, Ohio, in the Cuyahoga County market.

10. "Emery-Richmond" means the office located at 25890 Emery Road in Warrensville Heights, Ohio, in the Cuyahoga County market.

11. "Euclid-97th" means the office located at 9701 Euclid Avenue in Cleveland, Ohio, in the Cuyahoga County market.

12. "Euclid-260th" means the office located at 25811 Euclid Avenue in Euclid, Ohio, in the Cuyahoga County market.

13. "Food Terminal" means the office located at 4100 Woodland Avenue in Cleveland, Ohio, in the Cuyahoga County market.

14. "Franklin-25th" means the office located at 1720 West 25th Street in Cleveland, Ohio, in the Cuyahoga County market.

15. "Galleria" means the office located in the Galleria shopping mall at 1301 East 9th Street, Suite 100 in downtown Cleveland, Ohio, in the Cuyahoga County market.

16. "Garfield Heights" means the office located at 5007 Turney Road in Garfield Heights, Ohio, in the Cuyahoga County market.

17. "Independence" means the office located at 4500 Rockside Road in Independence, Ohio, in the Cuyahoga County market.

18. "Lakeshore-264th" means the office located at 26410 Lakeshore Boulevard in Euclid, Ohio, in the Cuyahoga County market.

19. "Lorain-98th" means the office located at 9740 Lorain Avenue in Cleveland, Ohio, in the Cuyahoga County market.

20. "Puritas-150th" means the office located at 4423 West 150th Street in Cleveland, Ohio, in the Cuyahoga County market.

21. "Ridge-Biddulph" means the office located at 6610 Biddulph Road in Brooklyn, Ohio, in the Cuyahoga County market.

22. "Shaker Square" means the office located at 13117 Shaker Square in Cleveland, Ohio, in the Cuyahoga County market.

23. "Southgate" means the office located in the Southgate Shopping Center at 5384 Northfield Road in Maple Heights, Ohio, in the Cuyahoga County market.

24. "Strongsville" means the office located at 14444 Pearl Road in Strongsville, Ohio, in the Cuyahoga County market.

25. "Terminal Prospect" means the office located on the corner of Prospect Street and Ontario Street in downtown Cleveland, Ohio, in the Cuyahoga County market.

26 "Wilson Mills-Richmond" means the office located in the Richmond Mall Shopping Center at 5134 Wilson Mills Road in Richmond Heights, Ohio, in the Cuyahoga County market.

27. "Willoughby" means the office located at 4098 Erie Street in Willoughby, Ohio, in the Lake County market.

28. "Mentor East" means the office located at 9572 Mentor Avenue in Mentor, Ohio, in the Lake County market.

I. "Huntington Bank" means Huntington National Bank, its successors and assigns, its parents, subsidiaries, affiliates, directors, officers, managers, agents, and employees, any other persons under its direct or indirect control, and any other person acting for or on behalf of it.

J. "National City Bank" means National City Corporation, its successors and assigns, its parents, subsidiaries, affiliates, directors, officers, managers, agents, and employees, any other persons under its direct or indirect control, and any other person acting for or on behalf of it.

K. "Relevant geographic market" means any or all of the following geographic areas:

1. the "Cuyahoga County market" means all of the townships included within the boundaries of Cuyahoga County, Ohio.

2. the "Lake County market" means all of the townships included within the boundaries of Lake County, Ohio.

L. "Small business" means a business with $10 million or less in revenues annually.

M. "Small business loan" means a commercial loan to a business with $10 million or less in annual revenues.

N. "Society" means the defendant Society Corporation, its successors and assigns, its subsidiaries, affiliates, directors, officers, managers, agents, and employees, any other persons under its direct or indirect control, and any other person acting for or on behalf of it. Society shall include Ameritrust and any of its assets and liabilities after such time, if any, as Society acquires Ameritrust.

O. "Star Bank" means Star Banc Corporation, its successors and assigns, its parents, subsidiaries, affiliates, directors, officers, managers, agents and employees, any other persons under its direct or indirect control, and any other person acting for or on behalf of it.

III. Applicability

A. The provisions of this Final Judgment shall apply to the defendants, to their successors and assigns, to their subsidiaries, affiliates, directors, officers, managers, agents, and employees, and all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. Defendants shall require, as a condition of the negotiated sale or other negotiated disposition of all or substantially all of their assets or stock, that the acquiring party agree to be bound by the provisions of this Final Judgment.

C. Nothing herein shall suggest that any portion of this Final Judgment is or has been created for the benefit of any third party, and nothing herein shall be construed to provide any rights to any third party.

IV. Divestiture of Branches and Loans

A. Defendants are hereby ordered and directed to divest to a qualified purchaser, within six (6) months of the date of filing of this Final Judgment, all of their direct and indirect ownership and control in the branch assets and deposits identified below. The defendants shall make all reasonable efforts to ensure the sale of the entire divestiture package to a single purchaser. The purchaser shall be independent of defendants; shall be a federally insured financial institution that offers business customers, at a minimum, transaction deposit accounts and commercial loans; shall deliver promptly to plaintiff following the execution of a binding contract an affidavit from an authorized officer stating a present intention that the branches purchased will offer business banking services in the geographic area served by the branches; and shall be subject to approval by the plaintiff. The obligation to divest shall be satisfied if, within six (6) months of the date of filing of this Final Judgment, defendants enter into a binding contract with a qualified purchaser for the sale of the branch assets and deposits at each location listed below to a purchaser according to terms approved by plaintiff that are contingent upon compliance with the terms of this Final Judgment and that specify a prompt and reasonable date for closing after compliance with all federal or state bank regulatory requirements and if the sale is completed pursuant to the contract. In the event that any proposed divestiture is denied approval by the Board of Governors of the Federal Reserve System or any other federal or state bank regulatory agency, the time period specified herein in which defendants must satisfy the obligation to divert the section IV.B. and IV.C. branch locations will still expire on the six (6) month anniversary date of the filing of this Final Judgment, unless plaintiff under Section IV.D. grants additional time.

B. In Cuyahoga County, Ohio, defendants are hereby ordered and directed to divest:

1. The Bedord Ameritrust branch assets and deposits, including approximately $0.71 million in small business loans;

2. The Berea Ameritrust branch assets and deposits, including approximately $2.0 million in small business loans;

3. The BP America Ameritrust branch assets and deposits, including approximately $1.7 million in small business loans;

4. The Broadview-Pearl Ameritrust branch assets and deposits, including approximately $0.2 million in small business loans;

5. The Brookpark-Broadview Ameritrust branch assets and deposits, including approximately $0.3 million in small business loans;

6. The Cedar-Lee Ameritrust branch assets and deposits, including approximately $0.5 million in small business loans;

7. The Clark-25th Ameritrust branch assets and deposits, including approximately $0.5 million in small business loans;

8. The Detroit-Columbia Ameritrust branch assets and deposits, including approximately $3.6 million in small business loans;

9. The Eastgate Ameritrust branch assets and deposits, including approximately $2.2 million in small business loans;

10. The Emery-Richmond Ameritrust branch assets and deposits, including approximately $1.7 million in small business loans;

11. The Euclid-97th Ameritrust branch assets and deposits, including approximately $0.3 million in small business loans;

12. The Euclid-260th Ameritrust branch assets and deposits, including approximately $0.9 million in small business loans;

13. The Food Terminal Ameritrust branch assets and deposits, including approximately $1.5 million in small business loans;

14. The Franklin-25th Ameritrust branch assets and deposits, including approximately $3.1 million in small business loans;

15. The Galleria Ameritrust branch assets and deposits, including approximately $1.9 million in small business loans;

16. The Garfield Heights Ameritrust branch assets and deposits, including approximately $2.1 million in small business loans;

17. The Independence Ameritrust branch assets and deposits, including approximately $4.8 million in small business loans;

18. The Lakeshore-264th Ameritrust branch assets and deposits, including approximately $0.1 million in small business loans;

19. The Lorain-98th Ameritrust branch assets and deposits, including approximately $1.1 million in small business loans;

20. The Puritas-150th Ameritrust branch assets and deposits, including approximately $1.2 million in small business loans;

21. The Ridge-Biddulph Ameritrust branch assets and deposits, including approximately $0.1 million in small business loans;

22. The Shaker Square Ameritrust branch assets and deposits, including approximately $0.3 million in small business loans;

23. The Southgate Ameritrust branch assets and deposits, including approximately $0.7 million in small business loans;

24. The Strongsville Ameritrust branch assets and deposits, including approximately $2.1 million in small business loans;

25. The Terminal Prospect Ameritrust branch assets and deposits, including approximately $1.7 million in small business loans; and

26. The Wilson Mills-Richmond Ameritrust branch assets and deposits, including approximately $0.4 million in small business loans.

The plaintiff and the defendants recognize that the amount of small business loans specified in this section IV.B. with respect to each branch location will fluctuate in the ordinary course of business, including due to paydowns, increases in draws, and new extensions of credit. In the case of the small business loans, the defendants' obligation to divest shall be satisfied by offering the purchaser the right to buy such loans.

C. In Lake County, Ohio, defendants are hereby ordered and directed to divest:

1. The Willoughby Ameritrust branch assets and deposits, including approximately $0.9 million in small business loans; and

2. The Mentor East Ameritrust branch assets and deposits, including approximately $3.6 million in small business loans.

The plaintiff and the defendants recognize that the amount of small business loans specified in this section IV.C. with respect to each branch location will fluctuate in the ordinary course of business, including due to paydowns, increases in draws, and new extensions of credit. In the case of the small business loans, the defendants' obligation to divest shall be satisfied by offering the purchaser the right to buy such loans.

D. If defendants have not accomplished the required divestitures, within six (6) months of the filing date of this Final Judgment, plaintiff may, in its sole discretion, extend this time period, separately for each section IV.B. and IV.C. branch location, for an additional period of time, if defendants request such an extension and demonstrate to plaintiff's satisfaction for each such branch location that it is then engaged in negotiations with a prospective purchaser that are likely to result in the required divestitures but that the contract cannot be completed by the six (6) month anniversary date of the filing of this Final Judgment.

E. Defendants agree to take all reasonable steps to accomplish said divestitures promptly. In carrying out their obligation to divest the branch assets and deposits at each location identified in sections IV.B. and IV.C. of this Final Judgment, defendants may divest these branch assets and deposits alone, or may divest along with these branch assets any other assets of Society or Ameritrust.

F. Defendants have already taken steps to accomplish the divestiture of the section IV.B. and IV.C. branch locations, deposits, and loans. In the event that these negotiations cease, defendants shall promptly thereafter make known in the Wall Street Journal, the American Banker, and in the State of Ohio, by usual and customary means, the availability of the section IV.B. and IV.C. branch locations, for sale as ongoing branches that offer business banking services, and shall also make known by the same means the availability of the deposits and loans required to be divested. The defendants shall notify any person making an inquiry regarding the possible purchase of any or all of the section IV.B. and IV.C. branch locations, deposits, and loans that the sale is being made pursuant to this Final Judgment and that this Final Judgment requires approval of this Court. The defendants shall provide any such person with a copy of this Final Judgment. The defendants shall also offer to furnish to all bona fide prospective purchasers of any or all of the section IV.B. and IV.C. branch locations, deposits, and loans, subject to customary confidentiality assurances, all pertinent information regarding each section IV.B. and IV.C. branch location and the deposits and loans. Defendants shall provide such information to the plaintiff as soon as possible, but no later than two (2) business days after it furnishes such information to any other person. Defendants shall permit prospective purchasers of any or all of the section IV.B. and IV.C. branch locations to consult personnel at each section IV.B. and IV.C. branch location and to make such inspection of physical facilities and any and all financial, operational, or other documents and information as may be relevant to the sale of each section IV.B. and IV.C. branch location or to the deposits and loans to be divested. Defendants shall not be required to permit prospective purchasers to have access to any documents or information relevant to defendants' banking business, except to the extent it relates to the section IV.B. and IV.C. branch locations' operations and business or to the deposits or loans to be divested. Defendants shall not object to any application for new bank charters sought to facilitate any divestitures.

G. Star Bank is hereby determined by plaintiff to be an acceptable purchaser of any or all of the section IV.B. and IV.C. branches, deposits, or loans. National City Bank, Huntington Bank and Bank One are hereby determined by plaintiff to be unacceptable purchasers of any or all of the section IV.B. and IV.C. divestiture branches, deposits, or loans. As to any other proposed purchaser, the divestitures required by sections IV.B. and IV.C. of this Final Judgment shall be accomplished in such a way as to satisfy plaintiff, in its sole discretion that the purchaser is qualified in the following two respects: (1) The purchaser intends to use the section IV.B. and IV.C. branch assets and deposits to compete in the provision of business banking services in the geographic area currently served by the branch, and (2) the purchaser has the managerial, operational, and financial capability to compete effectively in the provision of such business banking services.

H. Following accomplishment of the divestitures, defendants shall not acquire or attempt to acquire from the purchaser any branch assets or deposits divested pursuant to sections IV.B. and IV.C. of this Final Judgment without first receiving prior approval from the plaintiff during the duration of this Final Judgment (except assets that the purchaser can require defendants to repurchase pursuant to the terms of the binding contract under section IV.A.).

I. Except to the extent otherwise approved by plaintiff, any branch assets divested to this Final Judgment shall be divested free and clear of (1) all mortgages, encumbrances and liens to defendants and of (2) any contractual commitments or obligations to defendants existing as of the date of divestiture, unless plaintiff is satisfied that the purchaser of a divested branch location wishes to voluntarily assume the future performance of any such existing contracts, and plaintiff consents thereto.

V. Appointment of Trustee

A. If defendants have not accomplished the divestitures required by sections IV.B. and IV.C. of this Final Judgment by the five (5) month anniversary date of the filing of this Final Judgment, defendants shall notify plaintiff in writing of that fact. Within ten (10) days of that date, or twenty (20) days prior to the expiration of any extension granted pursuant to Section IV.D., whichever is later, plaintiff shall provide defendants with written notice of the names and qualifications of not more than two (2) nominees for the position of trustee for the required divestitures. Defendants shall notify plaintiff within ten (10) days thereafter whether either or both of such nominees are acceptable. If either or both of such nominees are acceptable to defendants, plaintiff shall notify the Court of the person upon whom the parties have agreed and the Court shall appoint that person as the trustee. If neither of such nominees is acceptable to defendants, they shall furnish to plaintiff, within ten (10) days after plaintiff provides the names of its nominees, written notice of the names and qualifications of not more than two (2) nominees for the position of trustee for the required divestitures. If either or both of such nominees are acceptable to plaintiff, plaintiff shall notify the Court of the person upon whom the parties have agreed and the Court shall appoint that person as the trustee. If neither of such nominees is acceptable to plaintiff, it

shall furnish the Court with the names and qualifications of its proposed nominees and the names and qualifications of the nominees proposed by defendants. The Court may hear the parties as to the qualifications of the nominees and shall appoint one of the nominees as the trustee.

B. If defendants have not accomplished the divestitures required by sections IV.B. and IV.C. of this Final Judgment at the expiration of the time period specified in sections IV.A. or IV.D. of this Final Judgment, as applicable, the appointment by the Court of the trustee shall become effective. The trustee shall then take steps to effect divestiture of the not yet divested section IV.B. and IV.C. branch locations, deposits, and loans according to the terms of this Final Judgment; provided, however, that the appointment of the trustee shall not become effective if, prior to expiration of the applicable time period, defendants have notified plaintiff pursuant to section VI. of this Final Judgment of a proposed divestiture of section IV.B. and IV.C. branch locations, deposits, and loans and plaintiff has not filed a written notice that it objects to said proposed divestitures.

C. After the trustee's appointment has become effective, only the trustee shall have the right to sell any section IV.B. and IV.C. branch location and any deposits or loans as to which it has been designated to effect divestiture. The trustee shall have the power and authority to accomplish divestitures to a purchaser acceptable to the plaintiff at such price and on such terms as are then obtainable upon a reasonable effort by the trustee, subject to the provisions of Section VI. of this Final Judgment, and shall have such other powers as this Court shall deem appropriate. Defendants shall not object to a sale of the section IV.B. and IV.C. branch locations, deposits, or loans by the trustee on any grounds other than the trustee's malfeasance. Any such objection by defendants must be conveyed in writing to plaintiff and the trustee within fifteen (15) days after the trustee has notified defendants of the proposed sale in accordance with section VI. of this Final Judgment.

D. The trustee shall serve at the cost and expense of defendants, shall receive compensation based upon a fee arrangement which includes an incentive based upon the price of the divestitures and the speed with which they are accomplished, and shall serve on such other terms and conditions as the Court may prescribe; provided, however, that the trustee shall receive no compensation, nor incur any costs or expenses, prior to the effective date of his or her appointment. The trustee shall account for all costs and expenses incurred in connection with this matter. After approval by the Court of the trustee's accounting, including fees and reasonable expenses for his or her services, all remaining monies shall be paid to defendants and the trust shall then be terminated.

E. Defendants shall take no action to interfere with or impede the trustee's accomplishment of the divestitures and shall, if requested by the trustee, use its best efforts to assist the trustee in accomplishing the required divestitures. The trustee shall have full and complete access to the personnel, books, records, and facilities of the section IV.B. and IV.C. branch locations which the trustee is designated to divest, and defendants shall develop such financial or other information relevant to the section IV.B and IV.C. branch locations, deposits, and loans being divested as the trustee may request.

F. After his or her appointment becomes effective, the trustee shall file monthly reports with the parties and the Court setting forth the trustee's efforts to accomplish divestitures as contemplated under this Final Judgment; provided, however, that to the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. Such reports shall include the name, address, and telephone number of each person who, during the preceding thirty (30) days, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contact, or made an inquiry about acquiring, any ownership interest in the Section IV.B. and IV.C. branch locations, deposits, or loans and shall describe in detail each contact with any such person during that period. The trustee shall maintain full records of all efforts made to divest the section IV.B and IV.C. branch locations, deposits, or loans and shall provide additional information to plaintiff upon its request.

G. Within six (6) months after his or her appointment has become effective, if the trustee has not accomplished the divestitures required by sections IV.B. and IV.C. of this Final Judgment, the trustee shall promptly file with the Court a report setting forth (1) the trustee's efforts to accomplish the required divestitures, (2) the reasons, in the trustee's judgment, why any required divestitures have not been accomplished, and (3) the trustee's recommendations; provided, however, that to the extent the report contains information that the trustee deems confidential, the report shall not be filed in the public docket of the Court. The trustee shall at the same time furnish the report to the parties, who shall each have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust and the term of the trustee's appointment.

VI. Notification

Immediately following execution of a binding contract, contingent upon compliance with the terms of this Final Judgment, to effect any proposed divestitures pursuant to Section IV. of this Final Judgment, defendants or the trustee, whichever is then responsible for effecting the divestitures, shall notify plaintiff of the proposed divestitures. If the trustee is responsible, he or she shall similarly notify defendents. The notice shall set forth the details of the proposed transactions and list the name, address, and telephone number of each person not previously identified who offered to, or expressed an interest in or desire to, acquire any ownership interest in the section IV.B. and IV.C. branch locations, deposits, or loans, together with full details of same. Within fifteen (15) days of receipt by plaintiff of such notice, plaintiff may request additional information concerning the proposed divestitures and the proposed purchaser. Defendants and/or the trustee shall furnish any additional information requested within twenty (20) days of receipt of the request, unless the parties shall otherwise agree. Within thirty (30) days after receipt of the notice or within twenty (20) days after plaintiff has been provided the additional information requested (including any additional information requested of persons other than the defendants or the trustee), whichever is later, plaintiff shall provide written notice to defendant and to the trustee, if there is one, stating whether or not it objects to the proposed divestitures. If plaintiff provides written notice to defendants and/or the trustee that it does not object, then the divestitures may be consummated, subject only to defendants' limited right to object to the sale under the proviso in section V.C. Upon objection by plaintiff, a divestiture proposed under section IV. shall not be consummated. Upon objection by plaintiff, or by defendants under the proviso in section V.C., a divestiture proposed under section V. shall not be consummated unless approved by the Court. The

requirements of this section VI. are subject to waiver by the plaintiff.

VII. Affidavits

Within fifteen (15) business days of filing of this Final Judgment and every thirty (30) days thereafter until the divestitures have been completed or authority to effect divestitures passes to the trustee pursuant to section V. of this Final Judgment, defendants shall deliver to plaintiff an affidavit as to the fact and manner of compliance with section IV. of this Final Judgment. Each such affidavit shall include the name, address, and telephone number of each person who, at any time after the period covered by the last such report, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any ownership interest in the section IV.B. and IV.C. branch locations, deposits, or loans and shall describe in detail each contact with any such person during that period. Defendants shall maintain full records of all efforts made to divest the section IV.B. and IV.C. branch locations, deposits, and loans.

VIII. Financing

Defendants shall not finance all or any part of any purchase made pursuant to sections IV. or V. of this Final Judgment without plaintiff's prior consent.

IX. Preservation of Assets

Until the divestiture of the section IV.B. and IV.C. branch locations, deposits, and loans required by this Final Judgment have been accomplished.

A. The defendants shall take all steps necessary to assure that the section IV.B. and IV.C. branch locations will be maintained as economically viable, ongoing branches that offer business banking services. The defendants shall use all reasonable efforts to maintain and increase sales of business banking services provided through the section IV.B. and IV.C. branch locations, and continue with any current plans for development of business banking services at those locations. Insofar as defendants make any new small business loans on or after March 13, 1992, to small business customers who have transaction account deposits at a section IV.B. or IV.C. branch location, such small business loans shall be offered to the purchaser of the branch location.

B. The defendants shall not sell, lease, assign, transfer or otherwise dispose of, or pledge as collateral for loans, any branch assets or deposits required to be divested pursuant to sections IV.B. and IV.C., except that any component of such branch assets as is replaced in the ordinary course of business with a newly purchased component may be sold or otherwise disposed of, provided the newly purchased component is so identified as a replacement component for one to be divested.

C. The defendants shall provide and maintain sufficient working capital to preserve the section IV.B. and IV.C. branch locations, including funds for commercial lending, as viable, ongoing branches that offer business banking services consistent with the requirements of section IX.A.

D. Defendants shall preserve the physcial branch assets required to be divested pursuant to sections IV. and V., except those replaced with newly acquired assets in the ordinary course of business, in a state of repair equal to their state of repair as of the date of this Final Judgement, ordinary wear and tear excepted. Defendants shall preserve the documents, books, and records of the section IV.B. and IV.C. branch locations until the date of divestiture.

E. Pending completion of the divestiture, except in the ordinary course of business, or as is otherwise consistent with the requirements of section X., the defendants shall refrain from terminating or altering any current employment, salary, or benefit agreements (except that defendant Society may substitute its benefit agreement for Ameritrust's benefit agreement for former Ameritrust employees, upon consummation of the merger, provided that the employees of the section IV. branch locations receive benefits comparable to those of other Society employees) for any managerial or commercial loan personnel of the section IV.B. and IV.C. branch locations, and shall refrain from transferring any employee so employed without the prior written approval of plaintiff. Similar protection shall be afforded to sufficient Ameritrust personnel, including commercial loan officers, not assigned to the branches to be divested but needed to handle the small business customers whose deposits and loans are to be divested.

F. Defendents shall refrain from taking any action that would jeopardize the sale of the section IV.B. and IV.C. branch locations, deposits, or loans.

X. Employment Offers

A. Defendants are hereby enjoined and restrained until two (2) years following the date of divestiture, from employment of, or making offers of employment to, any person who currently is a commercial loan manager, officer or representative, the preponderance of whose duties relate to the successful operation of the section IV.B. and IV.C. branch locations, deposits, and loans or reasonably needed by the purchaser to continue the successful operation of those branches and the servicing of the small business customers whose loans are being divested. This provision, however, does not apply to any employee who is terminated by the purchaser of a divested branch. Defendants shall make available for interview and employment offers by purchaser sufficient Ameritrust personnel, including branch personnel, and commercial loan officers not assigned to the branches to be divested but needed to handle the small business customers whose deposits and loans are to be divested. Defendants shall encourage and faciliate employment by the purchaser of such employees, and shall remove any impediments that may deter such employees from accepting employment with the purchaser of any section IV.B. and IV.C. branch locations, or deposits or loans, including, but not limited to, the payment of all bonuses accrued up to the closing date of sale of each section IV.B. and IV.C. branch location, or deposits or loans to which such employees would otherwise have been entitled had they remained in the employment of defendants until December 31, 1992. For the Ameritrust personnel not assigned to the branches to be divested, but needed to handle the small business customers whose deposits and loans are to be divested, the purchaser shall be afforded the opportunity to make job offers to up to ten of these employees. In connection with the purchaser's solicitation of any employees under this Section X., defendants shall not make competing offers.

XI. Visitorial Clause

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to the defendants made to their principal offices, be permitted:

1. Access during office hours of the defendants to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of the defendants, who may have counsel

present, relating to any matters contained in this Final Judgment; and

2. Subject to the reasonable convenience of the defendants and without restraint or interference from it, to interview officers, employees and agents of the defendants, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to the defendant principal offices, the defendants shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this section XI. shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

C. If at the time information or documents are furnished by the defendants to plaintiff, the defendants represent and identify in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendants mark each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days' notice shall be given by plaintiff to the defendants prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which the defendants are not a party.

XII. Expiration of Judgment

This Final Judgment will expire on the tenth anniversay of its date of entry or, with respect to any particular provision, on any earlier date specified.

XIII. Retention of Jurisdiction

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

XIV. Statement of Public Interest

Entry of this Final Judgment is in the public interest.

Dated: _____

United States District Judge.

Competitive Impact Statement

The United States, pursuant to section 2(b) of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. 16 (b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in the civil antitrust proceedings.

I. Nature and Purpose of the Proceeding

On March 13, 1992, the United States filed a civil antitrust complaint under section 15 of the Clayton Act, as amended, 15 U.S.C. 25, alleging that the proposed merger between Society Corporation ("Society") and Ameritrust Corporation ("Ameritrust") would violate section 7 of the Clayton Act, as amended, 15 U.S.C. 18.

The complaint alleges that the effect of the transaction may be substantially to lessen competition in the provision of business banking services to small businesses in the relevant geographic markets reasonably approximated by: (1) Cuyahoga County, Ohio; and (2) Lake County, Ohio. Business banking services offered to business customers include, either collectively or individually, services such as commercial loans, commercial checking accounts, cash and coin, lockbox, cash management, and business expertise and advise. Both Society and Ameritrust compete directly in offering a variety of business banking services to business customers, including small businesses, in the relevant geographic markets. The proposed acquisition would result in substantial increases in concentration in markets that are already highly concentrated and for which regulatory and other market factors make it unlikely that effective entry or expansion will cure the transaction's anticompetitive effects.

The complaint alleges that the proposed transaction would, in particular, hurt the many small business customers purchasing business banking services in the relevant geographic markets. Small businesses are defined as businesses generating total revenues of $10 million or less annually. The complaint seeks to enjoin the proposed transaction and thereby prevent its anticompetitive effects.

On March 13, 1992, the United States, Society and Ameritrust filed a Stipulation by which they consented to the entry of a proposed Final Judgment. Under the proposed Final Judgment, as explained more fully below, defendants would be required to sell designated commercial banking branches, deposits, and accompanying small business loans, in Cuyahoga and Lake Counties.[1] The United States and the defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the government withdraws its consent after considering public comments on the proposal. Entry of the proposed Final Judgment would terminate this action except that the Court would retain jurisdiction to construe, modify, and enforce the Judgment and to punish any violations.

II. Events Giving Rise to the Alleged Violation

Society, headquartered in Cleveland, is the third largest bank holding company in Ohio and the third largest commerical bank in Cuyahoga County, as measured by total deposits. In 1991, Society maintained consolidated assets of $15.4 billion, with total deposits of $11.6 billion. Through its five subsidiary banks, Society operates 289 full service banking offices in Ohio and has a significant presence in Indiana and Michigan. In the market approximated by Cuyahoga County, Society controls total deposits of approximately $3.3 billion, representing approximately 21% of total deposits held by depository institutions.[2] Society has 53 offices in Cuyahoga County, representing approximately 16% of total offices. In adjacent Lake County, Society controls deposits of $193.7 million (11% of total deposits), and 11 offices (16% of total offices).

Ameritrust, also headquartered in Cleveland, is the fifth largest bank holding company in Ohio and the largest commercial bank in Cuyahoga County, as measured by deposits. In 1991, Ameritrust reported consolidated assets of $10.8 billion, with $8.7 billion in total deposits. Ameritrust's six subsidiary banks serve markets throughout most of Ohio, as well as a significant number of markets in Indiana and Michigan. In the Cuyahoga County market, Ameritrust controls $4.8 billion in deposits, approximately 30.3% of the market. Ameritrust has a vast branch network of 83 offices (25.5% of total offices) spread throughout the market. In the Lake County market, Ameritrust controls $251.6 million in deposits (14.5%) and has six offices (8.7%).

On November 12, 1991, Society and Ameritrust submitted their formal application to the Federal Reserve Board ("Board" or "FRB") for consumption of the transaction. The Board announced its approval of the application by a vote of 6–1 on February 13, 1992, subject only to divestitures in Starke County, Indiana, and Ashtabula County, Ohio.[3] The Board did not order any divestitures in the Cleveland FRB market.[4] Under the Bank Holding Company Act, as amended, 12 U.S.C. 1849,[5] the United States had thirty days from the date of the Federal Reserve Board's decision to seek to prevent the proposed acquisition by filing suit.

The merger arose out of financial difficulties experienced by Ameritrust in early 1990. These difficulties stemmed from asset quality problems in the areas of commercial real estate loans and highly leveraged transactions.[6] In the wake of these developments, Ameritrust received various expressions of interest and proposals from a number of institutions, including Society, National City Bank ("NCB"), and Banc One. After abandoning announced merger plans with Cleveland's second largest bank, NCB, in mid 1991, Ameritrust ultimately decided to merge into Society.

The United States filed its complaint because the proposed merger would likely reduce competition in the provision of business banking services to small businesses in the relevant geographic markets reasonably approximated by Cuyahoga and Lake Counties. The likelihood of competitive harm appears greatest for small business customers, and would likely result in higher prices for business banking services for these customers.

Investigation by the United States shows that Society and Ameritrust compete in the provision of a wide range of banking services, including services to individual consumers and services to businesses in the two markets. While many other financial institutions, particularly thrifts, compete with Society and Ameritrust in the provision of consumer banking services, only commercial banks and a small number of thrift institutions are currently competitors for business customers in those markets. These are the only firms that either currently provide, or are likely in the event of a supracompetitive price increase to begin to provide business banking services, as defined by the complaint.

Society and Ameritrust each offer a variety of business banking services, and compete directly with one another in the geographic markets. A significant number of small business customers purchase both transactions accounts and commercial loans, as well as other business banking services from Society and Ameritrust.

Few financial institutions that currently do not offer business banking services appear likely to start offering these services in the Cuyahoga and Lake County markets within a reasonable time even if the proposed merger results in a supracompetitive price increase. Savings and loan associations currently face tax incentives to limit the extent to which they make commercial loans; moreover, their ability to begin offering these services to businesses, including small businesses, is substantially affected by capital requirements and their own capital positions. Under the Financial Institutions Reform, Recovery, and Enforcement Act of 1989,[7] new, more significant capital requirements and other restrictions were placed upon the lending activities of savings and loan associations. Moreover, the vast majority of savings and loan associations in the two markets do not currently provide business banking services.

The United States' investigation revealed that the above factors, coupled with other economic factors concerning business banking services, make it unlikely that most savings and loan associations in the relevant geographic markets would begin to provide such services. However, the investigation did uncover a small number of thrift institutions that indicated that they might offer such services in the event of a small but significant and non-transitory price increase. The United States included these institutions in the relevant market in its competitive analysis. Because of statutory and regulatory constraints on the offering of non-mortgage commercial loans by thrifts, however, when considering the competitive influence in the relevant markets of these few thrifts the United States has appropriately weighted their deposits and offices at 40% while weighting commercial bank deposits and offices at 100%.

The investigation also revealed that credit unions in the Cleveland area are not generally current or potential competitors in business banking services due to a combination of legal and economic restraints. Credit unions may offer services to individual consumers, but are not permitted to offer most business banking services such as those provided to the small business customers served by commercial banks and certain thrifts.

Loan production offices ("LPOs") of commercial banks headquartered elsewhere do not offer transaction accounts and, under current regulation, are prohibited from doing so. Moreover, the LPOs in Cuyahoga and Lake County serve large business customers and do not currently provide commercial loans to small businesses. Based upon available evidence, even with a significant, non-transitory price increase for commercial loans to small businesses, LPOs are unlikely to begin to make such loans.

Non-depository institutions may provide one or even a few of the services provided by commercial banks

---

[1] The proposed Final Judgment requires divestiture of 28 bank branches in Cuyahoga and Lake Counties, totaling approximately $1 billion in deposits and $40 million in small business loans. In Cuyahoga County, the proposed Final Judgment requires that 25 offices with $973 million in deposits and $35.7 million in small business loans be divested; in Lake County, the required divestitures total two offices with approximately $76.5 million in deposits and $4.7 million in small business loans.

[2] Market share calculations include all depository institutions—thrift institutions as well as commercial banks—that currently offer, or would likely offer in the event of a supracompetitive price increase, business banking services. A more detailed discussion of market share is included below.

[3] *Society Corporation*, Federal Reserve System Order, February 13, 1992. Federal Reserve Board Governor Angell dissented from the order approving the merger, and agreed with the conclusions expressed by the Department of Justice in its February 6, 1992 letter to the Board. *Id.*, at 21.

[4] The Cleveland FRB market is substantially larger than the markets alleged in the complaint. The FRB market encompasses all of Cuyahoga, Lake, Geauga, and Lorain counties, as well as portions of Portage, Erie, Medina and Summit counties, while the complaint alleges county-wide markets.

[5] Section 1849(b)(1) provides in pertinent part that:

The Board shall immediately notify the Attorney General of any approval by it pursuant to section 1842 of this title of a proposed acquisition, merger, or consolidation transaction * * * [T]he transaction may not be consummated before the thirtieth calendar day after the date of approval by the Board.

Any action brought under the antitrust laws arising out of an acquisition, merger, or consolidation transaction approved under section 1842 of this title shall be commenced prior to the earliest time under this subsection at which the transaction approval under the section 1842 of this title might be consummated. The commencement of such an action shall stay the effectiveness of the Board's approval unless the court shall otherwise specifically order. In any such action, the court shall review de novo the issues presented.

[6] Although it had long been the market leader among depository institutions in Cuyahoga County, home of the Cleveland-metro area, in 1990 Ameritrust reported a net loss of $90 million while recording a provision for loan losses of $325 million. During the latter half of 1990, Ameritrust experienced significant management changes, including the loss of its chairman and chief executive officer.

[7] 12 U.S.C. 1464(t).

and certain thrift institutions. For example, investment or brokerage houses offer products that are offered by commercial banks or thrift institutions. Non-depository institutions, however, do not provide certain important business banking services, such as transaction accounts for business customers, which are offered by commercial banks and some thrift institutions. Moreover, they do not offer products that are close substitutes for these business banking services. Even these business services that are provided by non-depository institutions to business customers are generally only provided to large businesses. Loans offered by non-depository institutions to commericial loan customers are sufficiently different in price or terms than loans offered by commercial banks and some thrifts that they are not close substitutes for these products. For these reasons, such firms do not compete with depository institutions in offering business banking services.

Banking organizations in Cuyahoga and Lake Counties that accept deposits in more than one market may have the ability to shift funds from one market to another, offering more services, particularly loans, in one market than deposits in that market alone would support. There are, however, constraints on the amount of out-of-market funds that a depository institution can effectively utilize for loans in a market. In addition to considerations relating to risk, an institution needs an effective means of delivering banking services, including loans, to customers. Among other things, it needs a network of branch offices and trained loan personnel sufficient to provide convenient service to customers throughout the relevant markets. It is particularly important to small business customers that an office of their depository institution be convenient to their place of business. Thus, the number of offices a depository institution has in a market can also be a useful indicator of its capacity to provide business banking services in that market.

The United States estimates that over 30,000 small businesses operate in Cleveland. Such businesses generally are economically able to obtain business banking services only from banks which have offices located in the geographic markets where the business is situated—in this case Cuyahoga County or Lake County. Small business customers typically engage in "relationship" banking, and purchase a number, if not all, of their different banking services from a single bank. For example, a business customer might use the bank for a checking account, credit for the purchase of inventory, payroll services, night deposit, and cash and coin services. The United States' investigation revealed that both small business customers and business banking institutions view it as beneficial to engage in this relationship banking. By purchasing more than one business banking service, such as transactions accounts and commercial loans, from the same institution, the customer typically obtains better overall rates or service. Similarly, the bank benefits from economies in cross-selling a variety of products to a single commercial customer. In fact, most business banking institutions in Cuyahoga and Lake Counties strongly encourage a business customer to maintain its primary transaction account at the institution as long as the institution is the customer's leading source of depository institution credit.

The United States concluded that the relevant geographic markets are Cuyahoga and Lake Counties, Ohio and not the larger market defined by the Federal Reserve Bank of Cleveland.[8] The investigation disclosed that small business banking customers operating in Cuyahoga and Lake Counties can only obtain business banking services from depository institution offices in the areas reasonably approximated by their home counties. For a variety of reasons, including but not limited to convenience, such businesses cannot practicably turn to a depository institution outside of their home county, even in the event of a supracompetitive price increase.

Seventeen commercial banks operate in the Cuyahoga County market and nine commercial banks operate in the Lake County market. In addition, there are five thrifts operating in one or both of the counties that either currently offer business banking services or are likely to do so in the event of a supracompetitive price rise for these services. A few of these institutions have very large market shares and the others are much smaller. The Cuyahoga County market is dominated by three very large banks, two of which are Society and Ameritrust, and two smaller banks. Lake County is similarly dominated by five large commercial banks.

In Cuyahoga County, Ameritrust, although declining financially, is the leading firm with over 30% of total deposits.[9] Following National City Bank with 27%, Society is the third largest institution with 21% of total deposits. Two other firms have 7% and 4% and are within the top tier in Cuyahoga County. The remaining firms in the market all have shares well below 2%. This market structure means that combining two of these largest three firms will significantly increase concentration in the market.

In Lake County, Ameritrust controls 14.5% of deposits and Society controls 11%. Banc One is the market leader with 36% of deposits, National City Bank is third with 13% and Fifth Third Bank is fifth with 11%. All of the remaining institutions in Lake County have 4% or less of total deposits.

Under the Justice Department's *Merger Guidelines*,[10] when the Herfindahl-Hirschman Index ("HHI"),[11] a measure of market concentration, is over 1800, the market is considered highly concentrated. A merger that increases the HHI by more than 50 points is of significant competitive concern and may be unlawful, depending upon an analysis of all other relevent factors.

In the Cuyahoga County market, the HHI, calculated on the basis of total deposits [12] of firms offering business banking services, would increase as a result of the merger by 1265 points to 3416. In Lake County, a similar HHI calculation results in a 323 point increase to 2274. These measures indicate highly concentrated markets that would be further concentrated as a result of the proposed merger.

The United States' investigation concluded that an adequate branch network delivery system is of great importance in serving the various needs of small business customers throughout the geographic markets. Calculating the HHI using total number of bank branches as a measure of concentration produces an increase in Cuyahoga County of 833 points to 2342, and an increase in Lake County of 277 points to 1629. These markets are also concentrated according to this measure, and the merger results in a significant increase in concentration, which raises strong competitive concerns.

The investigation of the United States concluded that without divestiture, this merger would serve to facilitate coordinated behavior among the leading banks in Cuyahoga County and Lake County. The merger reduces the number of leading banks in both Cuyahoga and Lake Counties from five to four and increases concentration in those markets, thereby enhancing the ability of firms to reach and enforce an anticompetitive understanding. In addition, there is ample opportunity in both markets for banks to monitor the pricing of their competitors, detect any discounting, and punish such "cheaters" or discounters by targeting their customers. The United States further concluded that entry by outside firms or expansion by firms already operating within the markets would not be sufficiently timely or of sufficient magnitude to remedy such anticompetitive concerns.

For all of the above reasons, the United States concluded that there is a significant probability that, absent divestiture, the merger would substantially lessen competition in the provision of business banking services to small business customers in Cuyahoga and Lake Counties.

III. Explanation of the Proposed Final Judgment

The risk to competition posed by this transaction will be substantially reduced by the structural relief provided in the proposed Final Judgment whereby there will be divestitures of commercial bank branches and accompanying levels of deposits and small business commercial loans.

Society is required, by section IV. of the proposed Final Judgment, within six months of the filing date of the proposed Final Judgment to divest 28 Ameritrust bank offices and the deposits of individuals and small businesses, with a few exceptions, held at these offices. Those deposits currently total approximately $1.05 billion. The offices are:

1. *Within Cuyahoga County, Ohio*—Bedford, 660 Broadway Avenue, Bedford, Ohio; Berea, 118 Front Street, Berea, Ohio; BP America, 200 Public Square, Cleveland, Ohio; Broadview-Pearl, 4175 Pearl Road, Cleveland, Ohio; Brookpark-Broadview, 2132 Brookpark Road, Cleveland, Ohio; Cedar-Lee, 2211 Lee Road, Cleveland Heights, Ohio; Clark-25th, 3104 West 25th Street, Cleveland, Ohio; Detroit-Columbia, 25653 Detroit Road, Westlake, Ohio; Eastgate, 1485 S.O.M. Center Road, Mayfield Heights, Ohio; Emery-Richmond, 25890 Emery Road, Warrensville Heights, Ohio; Euclid-97th, 9701 Euclid Avenue, Cleveland, Ohio; Euclid-280th, 25811 Euclid Avenue, Euclid, Ohio; Food Terminal, 4100 Woodland Avenue, Cleveland, Ohio; Franklin-25th, 1720 West 25th Street, Cleveland, Ohio; Galleria, 1301 East 9th Street, Suite 100, Cleveland, Ohio; Garfield Heights, 5007 Turney Road, Garfield Heights, Ohio; Independence, 4500 Rockside Road, Independence, Ohio; Lakeshore-284th, 28410 Lakeshore Boulevard, Euclid, Ohio; Lorain-98th, 9740 Lorain Avenue, Cleveland, Ohio; Puritas-150th, 4423 West 150th Street, Cleveland, Ohio; Ridge-Biddulph, 6610 Biddulph Road, Brooklyn, Ohio; Shaker Square, 13117 Shaker Square, Cleveland, Ohio; Southgate, 5384 Northfield Road, Maple Heights, Ohio; Strongsville, 14444 Pearl Road, Strongsville, Ohio; Terminal Prospect, corner of Prospect Street and Ontario Street, Cleveland, Ohio; and Wilson Mills-Richmond, 5134 Wilson Mills Road, Richmond Heights, Ohio

2. *Within Lake County, Ohio*—Mentor East, 9572 Mentor Avenue, Mentor, Ohio; and Willoughby, 4098 Erie Street, Willoughby, Ohio.

Society is also required, by section IV. of the Final Judgment, to divest all of the small business loans accompanying the above-mentioned branches and other small business loans sufficient to raise the total level of Ameritrust small business loans divested so that the percentage of loans divested is approximately equivalent to the offices divested. The United States calculates the total of these loans at approximately $35 million for the total Cuyahoga County package of offices, and approximately $4.7 million for the package of Lake County offices.

To ensure that the diverstitures are accomplished in such a way as to maintain competition, the proposed Final Judgment prohibits the sale of the branches to certain very large firms that already have a significant competitive presence in the Cuyahoga and Lake County markets. The proposed Final Judgment prohibits the sale of any of the above branches to National City Bank, Huntington Bank, or Banc One. The divestitures will bring about the entry of a new provider or make larger an existing, small provider of business banking services in the relevant markets, thereby ensuring that competition is not substantially lessened by the transaction.

The divestiture package will provide the buyer with well located and profitable branches that comprise an adequate branch network delivery system for business loans and transaction accounts, an adequate commercial and retail deposit gathering base, and a solid base of commercial loan relationships from which to serve small business customers in the two markets. The branch network will also facilitate the shifting of lending capacity by the buyer, both within the markets and from other outside markets, thereby permitting it to expand small business lending relatively quickly in the relevant markets. Finally, in reaching this settlement the United States took into account the fact that Ameritrust has recently experienced financial difficulties resulting in a somewhat diminished presence in these markets. The United States concludes that these divestitures will adequately remedy the risk of anticompetitive behavior in Cuyahoga Lake Counties arising from the merger.

Any purchaser must demonstrate to the satisfaction of the United States that it has a good faith intention to utilize the divested branches in a banking network that offers business banking services. The proposed Final Judgment also requires that Society preserve the assets of the divested banking branches until purchased by a buyer. If Society fails to sell the branches within six months of the filing date of the proposed Final Judgment, the United States will proceed under the terms of section V. of the proposed Final Judgment to bring about the appointment of a trustee to accomplish the divestitures.

The United States, Society and Ameritrust have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the APPA. The proposed Final Judgment constitutes no admission by any party as to any issue of fact of law. Under the provisions of section 2(e) of the APPA, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Final Judgment is in the public interest.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the anittrust laws may bring suits in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorney's fees.[13] Entry of

---

[8] *See* footnote 4.

[9] All market share calculations include those thrifts that the United States has concluded are in the market or are likely to enter in the event of a supracompetitive price increase. As noted above, these thrift deposits and offices are weighted at 50%.

[10] Department of Justice Merger Guidelines, 2 Trade Reg. Rep. (CCH) ¶13,102 at 20,529–30.

[11] The HHI is a measure of market concentration calculated by squaring the market shares of each firm in the market and then summing the resulting numbers. For example, for a market supplied by four firms with shares of 30, 30, 20 and 20 percent, the HHI is 2600, or (30×30) + (30×30) + (20×20) + (20×20) = 900 + 900 + 400 + 400 = 2600. The HHI takes into account the relative sizes and distribution of firms in a market. It approaches zero when a market is supplied by a large number of firms of relatively equal size and reaches its maximum of 10,000 when a market is supplied by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparities in size among these firms increase.

[12] There is a relationship between the ability to accept deposits and the granting of credit and the provision of other services. The deposits accepted by a financial institution are an important and often least expensive source of the loans made by it and a principal source of funds to support other services.

[13] The Bank Holding Company Act, 12 U.S.C. 1849, however, prevents the filing of an antitrust suit (other than a suit under § 2 of the Sherman Act) later than thirty days after the February 13, 1992, Board order.

the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust actions under the Clayton Act. Under the provisions of section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendants.

V. Procedures Available for Modification of the Proposed Final Judgment

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**. The United States will evaluate the comments, determine whether it should withdraw its consent, and respond to the comments. The comments and any responses of the United States will be filed with the Court and published in the **Federal Register**.

Written comments should be submitted to Constance K. Robinson, Chief, Communications and Finance Section, Antitrust Division, U.S. Department of Justice, 555 Fourth Street, NW., room 8104, Washington, DC 20001.

The proposed Final Judgment provides that the Court retains jurisdiction over this action and any party may apply to the Court for any order necessary or appropriate for its modification, interpretation, or enforcement.

VI. Alternatives to the Proposed Final Judgment

The United States considered both smaller and slightly larger divestiture packages as possible alternatives to the package designated in the proposed Final Judgement. After evaluating the alternatives, the United States concluded that the package in the proposed Final Judgement adequately addresses its competitive concerns, although a smaller package would not have done so.

As a final alternative to the proposed Final Judgment, the United States considered litigation seeking an injunction to block the merger between Society and Ameritrust. The United States rejected that alternative because the divestiture of the bank branch package will, for reasons stated above, establish a significant and viable competitor in the provision of business banking services to small businesses in Cuyahoga and Lake Counties and will prevent the proposed transaction from having any significant anticompetitive effects in those markets.

VII. Standard for Review Under the Tunney Act for Proposed Final Judgment

The Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. 16 (1974), requires that proposed consent judgments in antitrust cases brought by the United States be subject to a sixty-day comment period, after which the court shall determine whether entry of the proposed final judgment "is in the public interest". In making that determination, the court *may* consider—

(1) The competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;

(2) The impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. 16 (e). The courts have recognized that the term, "public interest", "take(s) meaning from the purposes of the regulatory legislation."[14] Since the purpose of the antitrust laws is to "preserv(e) free and unfettered competition as the rule of trade," [15] the focus of the "public interest" inquiry under the Tunney Act is whether the proposed final judgment would serve the public interest in free and unfettered competition.[16] In conducting this inquiry, "(t)he Court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process."[17] Rather,

> (a)bsent a showing of corrupt failure of the government to discharge its duty, the Court, in making the public interest finding, should...carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances.[18]

It is also unnecessary for the district court to "engage in an unrestricted evaluation of what relief would best serve the public."[19] Precedent requires that

> the balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is one that will best serve society, but whether the settlement is "*within the reaches of the public interest.*" (citation omitted). More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree. (emphasis add).[20]

A proposed consent decree is an agreement between the parties which is reached after exhaustive negotiations and discussions. Parties do not hastily and thoughtlessly stipulate to a decree because, in doing so, they

> waive their right to litigate the issues involved in the case and thus save themselves the time, expense, and inevitable risk of litigation. Naturally, the agreement reached normally embodies a compromise; in exchange for the saving of cost and the elimination of risk, the parties each give up something they might have won had they proceeded with the litigation.[21]

The proposed consent decree, therefore, should not be reviewed under a standard of whether it is certain to eliminate every anticompetitive effect of a merger or whether it mandates certainty of free competition in the future. Court approval of a final judgment requires a standard more flexible and less strict than the standard required for a finding of liability. "(A)

BILLING CODE 4410–01–M

Petroleum Environmental Research Forum; National Cooperative Research Notification

Notice is hereby given that, on January 21, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301, *et. seq.* ("the Act"), the participants in the Petroleum Environmental Research Forum ("PERF") Project No. 90–12, titled "A Field Test of Air Sparging/Venting Technology," filed written notification simultaneously with the Attorney General and with the Federal Trade Commission disclosing (1) the identities of the parties to the project and (2) the nature and objectives of the research program to be performed in accordance with said project. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties participating in PERF Project No. 90–12, together with the nature and objectives of the research program, are given below.

The current parties to PERF Project No. 90–12 identified by this notice are:

Amoco Oil Company, Naperville, Illinois 60566
ARCO Corp., Plano, Texas 75075
Conoco, Inc., Houston, Texas 77252
Chevron Corporation, Richmond, California 94802–0627
Exxon Research and Engineering Company, Florham Park, New Jersey 07932
Marathon Oil Company, Littleton, Colorado 80160–0269
Unocal Science & Technology, Brea, California 92621
Mobil Oil Corporation, Princeton, New Jersey 08543–1029
Phillips Petroleum Company, Bartlesville, Oklahoma 64004
Texaco, Inc., Port Arthur, Texas 77641

The nature and objective of the research program performed in accordance with PERF Project No. 90–12 is to design a field test of air sparging/venting technology. The design is to include a literature review and analysis, justification for the application method chosen, estimated costs, potentjal technical and regulatory problems, monitoring requirements, marketability, and evaluation techniques.

Participation in this project will remain open until termination of the agreement for PERF Project No. 90–12, and the participants intend to file additional written notification disclosing all changes to membership of this project. Information regarding participation in this project may be obtained from the Contract Coordinator, Mr. Victor J. Kremesec, Amoco Oil Company, P.O. Box 3011, Naperville, Illinois 60566.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Petroleum Environmental Research Forum; National Cooperative Research Notification

Notice is hereby given that, on January 21, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301, *et seq.* ("the Act"), the participants in the Petroleum Environmental Research Forum ("PERF") Project No. 90–16, titled "A Field Test of Steam Injection/Venting Technology," filed written notifications simultaneously with the Attorney General and with the Federal Trade Commission disclosing (1) the identities of the parties to the project and (2) the nature and objective of the research program to be performed in accordance with said project. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties participating in PERF Project No. 90–16, together with the nature and objectives of the research program, are given below.

The current parties to PERF Project No. 90–16 identified by this notice are:

Amoco Oil Company, Naperville, Illinois 60566
ARCO Corp., Plano, Texas 75075
Conoco, Inc., Houston, Texas 77252
Chevron Corporation, Richmond, California 94802–0627
Exxon Research and Engineering Company, Florham Park, New Jersey 07932
Marathon Oil Company, Littleton, Colorado 80160–0269
Unocal Science & Technology, Brea, California 92621
Mobil Oil Corporation, Princeton, New Jersey 08543–1029
Phillips Petroleum Company, Bartlesville, Oklahoma 64004
Texaco Inc., Port Arthur, Texas 77641

The nature and objective of the research program performed in accordance with PERF Project No. 90–16 is to design a field test of steam injection/venting technology. The design is to include a literature review and analysis, justification for the application method chosen, estimated costs, potential technical and regulatory problems, monitoring requirements, marketability, and evaluation techniques.

Participation in this project will remain open until termination of the Agreement for PERF Project No. 90–16, and the participants intend to file additional written notification disclosing all changes to membership of this project. Information regarding participation in this project may be obtained from the Contract Coordinator, Mr. Victor J. Kremesec, Amoco Oil Company, P.O. Box 3011, Naperville, Illinois 60566.

Petrotechnical Open Softwares Corp., Joint Research and Development Venture; National Cooperative Research Notification

Notice is hereby given that, on January 21, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301, *et seq.* ("the Act"), Petrotechnical Open Software Corporation ("POSC") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of invoking the protections of the Act limiting the

recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, the notification stated that the following additional parties have become new, non-voting members of POSC:

Tigress, Marlow, Bucks SL7 1DB, England;
Oracle Corp., Redwood Shores, California;
Total Exploration Production, Division Strategie Plan Controle de Gestion, Department Coordination Informatique, 92800 Puteaux, France;
Interactive Network Technologies Corp., Apple Valley, Minnesota;
Reservoir Simulation Research Corp., Tulsa, Oklahoma; and
Gas Research Institute, Chicago, Illinois.

No other changes have been made in either the membership or planned activity of POSC.

On January 14, 1991, POSC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on February 7, 1991, (56 Fed. Reg. 5021). On April 12, 1991, July 19, 1991, and October 21, 1991, POSC filed additional written notifications. The Department published notices in the **Federal Register** in response to these additional notifications on May 7, 1991 (56 FR 21176), August 13, 1991 (56 FR 38465), and November 14, 1991, (56 FR 57902), respectively.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

National Cooperative Research Polyurethanes Recycle & Recovery Council of the Society of the Plastic Industry, Inc.; Notification

Notice is herby given that, on February 18, 1992, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the PolyUrethanes Recycle & Recovery Council ("PURRC") of the Society of the Plastics Industry, Inc. ("SPI") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing certain changes in the membership of PURRC. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

The changes announced in this notice are the result of the corporate restructuring of existing PURRC members and do not materially affect the composition of the group. AC West Virginia Polyol Company, located in Danbury, CT, has been deleted from the list of members because it was recently acquired by ARCO Chemical Compnay, which continues as a member of PURRC. In addition, Mobay Corporation, located in Pittsburgh, PA, has been merged with Miles Inc. and will henceforth be known as Miles Inc.

The companies presently participating in the PolyUrethanes Recycle & Recovery Council of SPI are:

Air Products and Chemicals, Inc., Allentown, PA
Allied-Signal, Inc., Morristown, NJ
ARCO Chemical Company, Newton Square, PA
ATOCHEM North America, Inc., Philadelphia, PA
BASF Corporation, Parsippany, NJ
The Dow Chemical Company, Midland, MI
Goldschmidt Chemical Corporation, Hopewell, VA
ICI Americas, Inc., Wilmington, DE
Miles Inc., Pittsburgh, PA
Olin Corporation, Stamford, CT
Stepan Chemical Company, Northfield, IL
Texaco Chemical Company, Houston, TX
Union Carbide Chemical and Plastics Corporation, Danbury, CT
Witco Corporation, New York, NY
The Society of the Plastics Industry, Inc., Washington, DC

No other changes have been made in either the membership, purposes or objectives of PURRC. PURRC will file additional notifications disclosing any changes in the structure of PURRC, as necessary.

On July 31, 1991, PURRC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on August 29, 1991, at 56 FR 42758.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

Bureau of Prisons

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Construction of a Federal Correctional Institution in Tracy, San Joaquin County, CA

AGENCY: Bureau of Prisons, Justice.

ACTION: Cancellation of the notice of intent to prepare a draft environmental impact statement (DEIS).

SUMMARY

Proposed Action

The U.S. Department of Justice, Federal Bureau of Prisons determined that a new Federal correctional institution with an adjacent satellite prison camp is needed in its system. A 200 acre tract of land located approximately 5 miles west of the City of Tracy was evaluated. The proposal calls for the construction of a 750 bed facility to house medium security inmates and a 250 bed camp to house minimum security inmates.

Approximately 150 of the 200 acreas would be used for road access, inmate housing, administration and program spaces and service and support facilities. In addition, exercise areas would be included in the needed acreage.

The Process

In the process of evaluating the tract of land, several aspects received a detailed examination including: Utilities, traffic patterns, noise levels, visual intrusion, threatened and endangered species, cultural resources, and socio-economic impacts.

Alternatives

In developing the DEIS, the options of no action and alternative sites for the proposed facility were fully and thoroughly examined.

The Federal Bureau of Prisons has adopted the no action alternative for this project, electing not to complete the Environmental Impact Statement process.

Scoping Process

During the preparation of the DEIS there were numerous opportunities for public involvement in order to determine the issues to be examined. A scoping meeting was held at a location convenient to the citizens of Tracy. The meeting opened with the showing of a 22 minute videotape titled "A Federal Prison in your Community." The meeting was well publicized and held at a time which made it possible for the public and interested agencies or organizations to attend.

DEIS Preparation

Public notice is now given concerning the termination of the Draft Environmental Impact Statement process.

Address

Questions concerning the proposed action and the DEIS can be answered by: K. Bradley Wiggins, Site Selection Specialist, Federal Bureau of Prisons, 320 First Street, NW., Washington, DC 20534, (202) 514-6470.

Dated: March 20, 1992

Patricia K. Sledge,

Chief, Site Selection and Environmental Review.

BILLING CODE 4410-35-M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of March 1992.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated.

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,634; Times Microwave Systems, Wallingford, CT
TA-W-26,622; Cincinnati Milacron Heald Corp, Worcester, MA
TA-W-26,669; The Lance Corp., Lee Plant, Durham, NH
TA-W-26,735; Latrobe Die Casting Co., Latrobe, PA
TA-W-26,656; AGFA Corp., West Caldwell, NJ
TA-W-26,581; Talon, Inc., Meadville, PA
TA-W-26,559; APV Crepaco, Inc., Lake Mills, WI
TA-W-26,754; Howmet Corp.,Muskegon County Operations, Whitehall, MI

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasosn specified.

TA-W-26,793; Niagara Cutter, Inc., North Tonawanda, NY

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-26,717; Pan American World Airways, Jamaica, NY

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-26,715; Gleason Corp., Gleason Works Assembly Div., Rochester, NY

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-26,763; Americable Wireline Div., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-26,771; Eastern Foundry Co., Inc., Boyertown, PA

U.S. imports of cast iron tubes, pipes and hollow profiles declined absolutely in quantity in 1990 compared to 1989 and in 1991 compared to 1990. U.S. imports of cast iron tubes, pipes and hollow profiles declined in value in 1989, 1990 and 1991.

TA-W-26,645; Goodyear Tire and Rubber Co., Union City, TN

U.S. imports of truck tires and passenger car tires declined absolutely and relative to US production in 1991 compared to 1990. Imports of radial passenger tires by the subject firm declined in 1991 compared to 1990.

TA-W-26,659 & TA-W-26,660; Bethlehem Steel Corp, Bethforge Div., Bethforge Treatment, Bethlehem, PA & Bethlehem Steel Corp., Bethforge Div., No. 2 Machine Shop, Bethlehem, PA

Sales of component parts for electric power generation at the subject firm increased in 1990 compared to 1989 and in 1991 compared to 1990.

Affirmative Determinations

TA-W-26,759; Tobin-Hamilton Co., Inc., Mansfield, MO

A certification was issued covering all workers separated on or after January 3, 1992.

TA-W-26,840; Jerilyn, Inc., Jermyn, PA

A certification was issued covering all workers separated on or after February 4, 1991.

TA-W-26,836; Dunlop Slazenger Corp., Hartwell, GA

A certification was issued covering all workers separated on or after January 1, 1992.

TA-W-26,833; De Ja Vu Apparel, Forest City, PA

A certification was issued covering all workers separated on or after January 30, 1991.

TA-W-26,757; Roydon Wear, Inc., Statesboro, GA

A certification was issued covering all workers separated on or after January 7, 1991.

TA-W-26,795; Dole Packaged Foods Co., Honolulu, HI

A certification was issued covering all workers separated on or after January 20, 1991.

TA-W-26,738; Molycorp, Inc., Questa Div., Questa, NM

A certification was issued covering all workers separated on or after January 3, 1991.

TA-W-26,725; Ashland Leather Co., Waynesville, NC

A certification was issued covering all workers separated on or after January 6, 1991.

TA-W-26,810; Key Tronic Corp., Cheney, WA

A certification was issued covering all workers separated on or after February 2, 1991.

TA-W-26,712; Unocal Molycorp Div., Washington, PA

A certification was issued covering all workers separated on or after December 20, 1990.

TA-W-26,678; UDT Sensors, Inc., El Paso, TX

A certification was issued covering all workers separated on or after December 6, 1990.

TA-W-26,505; Western Cutlery, Inc., Longmont, CO

A certification was issued covering all workers separated on or after October 22, 1990.

TA-W-26,880; Ballet Makers, Inc., Crest Shoe Div., Lewiston, ME

A certification was issued covering all workers separated on or after October 1, 1991.

TA-W-26,618; Bijur Lubricating Corp, Bennington, VT

A certification was issued covering all workers separated on or after November 2, 1990.

TA-W-26,743; ABB Power T & D Co., Inc., Bloomington, IN

A certification was issued covering all workers separated on or after January 7, 1991.

TA–W–26,730; Halliburton Logging Services, Inc., Headquartered in Houston, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,731; Halliburton Logging Services, Inc., Mid-Continent Div., Headquartered in New Orleans, LA & Operating at Various Sites Out of The Following Offices: A; Abilene, TX, B; Pampa, TX, C; San Angelo, TX, D; Odessa, TX, E; Wichita Falls, TX, F; Hobbs, NM, G; Pauls. Valley, OK, H; Shawnee, OK, I; Woodward, OK, J; Great Bend, KS, K; Liberal, KS, L; Fort Smith, AR, M; Homer City, PA, N; Meadville, PA, O; Mt. Pleasant, MI, P; Gate City, VA, Q; Parkersburg, WV

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,728; Halliburton Logging Services, Inc., Gulf Coast Div., Headquartered in New Orleans, LA & Operating at Various Sites Out of The Following Offices: A; Bossier City, LA, B; Houma, LA, C; Lafayette, LA, D; Laurel, MS, E; Tuscaloosa, AL, F; Lake Charles, LA G; Victoria, TX, H; Beaumont, TX, I; Richmond, TX, J; Tyler, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,727; Halliburton Geodata, Houston, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,729; Halliburton/Vann Systems, Houston, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,732; Halliburton Logging Services, Inc., Austin Research Center, Austin, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,732A; Halliburton Logging Services, Inc., Ft. Worth Manufacturing Plant, Ft. Worth, TX

A certification was issued covering all workers separated on or after January 1, 1991.

TA–W–26,732B; Halliburton Logging Services, Inc., Alvarado Special Tools Plant, Alvarado, TX

A certification was issued covering all workers separated on or after January 1, 1991.

I hereby certify that the aforementioned determinations were issued during the month of March 1992. Copies of these determinations are available for inspection in room C–4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: March 16, 1992.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Museum Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amaneded, notice is hereby given that a meeting of the Museum Advisory Panel (Professional Development Section) to the National Council on the Arts will be held on April 8, 1992 from 9 a.m.–5:30 p.m. in room 730 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public from 9 a.m.–10 a.m. The topics will be opening remarks and general discussion.

The remaining portion of this meeting from 10 a.m.–5:30 p.m. is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, this session will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contact the Office of Special Constituences, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: March 11, 1992.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Astronomical Sciences; Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Astronomical Sciences.

Date & Time: April 13, 1992: 9 am–5:15 pm; April 14, 1992: 9 am–4 pm.

Place: National Science Foundation; 1800 G Street, NW., room 543.

Type of Meeting: April 13, 1992: 9 am–3:15 pm, Open; 3:15 pm–5:15 pm, Closed; April 14, 1992: 9 am–4 pm, Open.

Contact Person: Dr. Julie H. Lutz, Director, Division of Astronomical Sciences, room 615, National Science Foundation, Washington, DC 20550 (202/357–9488).

Summary Minutes: May be obtained from the contact person at the above address.

Purpose of Committee: To provide advice and recommendations concerning research programs, proposals, and projects in NSF-funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short-range and long-range plans in astronomy, including a recommendation of relative priorities.

Agenda:

Monday, April 13

9 am–11 am Report on Resolutions and Budget Discussions.
11 am–11:45 am Long-Range Planning Discussions.
1 pm–2:15 pm Discussion of MPS Plan.
2:15 pm–3:15 pm Discussion of Theory Program.
3:15 pm–5:15 pm Closed. Review of Proposals.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning indivduals associated with the proposals. These matters are exempt under 5 U.S.C. 552 b. (c)(4) and (6) of the Government in the Sunshine Act.

Tuesday, April 14

9 am–12 Noon Discussion of possible NAS Advisory Committee for NSF and NASA; Adpative Optics Presentation; and Discussion of Cross-Directorate Programs.
1:15 pm–2 pm Discussion of the GEMINI Project.
2 pm–3 pm Formulation of resolutions; other business.
3 pm–4 pm Dr. Massey, Director/NSF.

M. Rebecca Winkler,

Committee Management Officer.

Dated: March 20, 1992.

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Advisory Committee for Ocean Sciences.

Date and Time: April 14–15, 1992; 8:30 a.m. to 5:30 p.m.,

Place: St. James Hotel, 950 24th St., N.W., Washington, DC 20037.

Type of Meeting: Closed.

Contact Person: Dr. Michael Reeve, Section Head, OSRS, room 609, National Science Foundation, Washington, DC 20550. Telephone: (202) 357–7924.

Purpose of Meeting: To provide oversight review of the OSRS programs.

Agenda: To carry out Committee of Visitors review, including examination of decisions on proposals, reviewer comments, and other privileged materials.

Reason for Closing: The meeting is closed to the public because the Committee is reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they were disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552 b. (c) (4) and (6) of the Government in the Sunshine Act would improperly be disclosed.

Dated: March 20, 1992.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 92–6847 Filed 3–24–92; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Atomic Safety and Licensing Board

[Docket Nos. 50–440–A, 50–346–A; (Suspension of Antitrust Conditions); ASLBP No. 91–644–01–A]

Ohio Edison Co. et al; Disposition Filings

March 19, 1992.

In the matter of Ohio Edison Company (Perry Nuclear Power Plant, Unit 1, Facility Operating License No. NPF–58) and The Cleveland Electric Illuminating Company, The Toledo Edison Company (Perry Nuclear Power Plant, Unit 1, Facility Operating License No. NPF–58) (Davis-Besse Nuclear Power Station, Unit 1, Facility Operating License No. NPF–3).

Order (Scheduling Oral Argument on Parties' Summary Disposition Filings)

Oral argument on the motions and cross-motions for summary disposition filed by the parties to this proceeding will be held on Wednesday, June 3, 1992, at 9:30 a.m. in the NRC Public Hearing Room, Fifth Floor, West Tower, East-West Towers Building, 4350 East-West Highway, Bethesda, Maryland. The allocation of time for argument and the order of presentation will be as follows:

Applicants	[1] 90 minutes.
NRC Staff and Justice Department.	50 minutes.
Other Intervening Parties	40 minutes.

[1] A portion of this time may be reserved for rebuttal.

One counsel representing applicant Ohio Edison Company and one counsel

representing applicants Cleveland Electric Illuminating Company and Toledo Edison Company may present argument on behalf of applicants. The Board prefers to hear argument from only one counsel for each of the other parties.[2]

It is so *Ordered.*

Bethesda, Maryland, March 19, 1992.

For the Atomic Safety and Licensing Board.

Marshall E. Miller,

Chairman, Administrative Judge.

[FR Doc. 92-6931 Filed 3-24-92; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on April 2-4, 1992, in room P-110, 7920 Norfolk Avenue, Bethesda, Maryland. Notice of this meeting was published in the **Federal Register** on February 24, 1992.

Thursday, April 2, 1992

8:30 a.m.-8:45 a.m: Opening Remarks by ACRS Chairman (Open)—The ACRS Chairman will make opening remarks and comment briefly regarding items of current interest.

8:45 a.m.-11 a.m.: GE Advanced Boiling Water Reactor (Open/Closed)—The Committee will discuss a proposed ACRS report regarding the draft safety evaluation report for certification of this standardized nuclear power plant design.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this matter.

11 a.m.-12 Noon: Implementation of NRC Safety Goals (Open)—The Committee will discuss a proposed ACRS report to NRC on an alternate plan for implementation of NRC's safety goal policy.

Representatives of the NRC staff will participate, as appropriate.

1 p.m.-3 p.m.: Evaluation of Risk Associated With Low Power and Shutdown Operations of Nuclear Power Plants (Open)—The Committee will review and comment on the NRC staff evaluation of risk from low power and shutdown operations at nuclear power plants (NUREG-1449). Representatives of the NRC staff will participate, as appropriate.

3 p.m.-4 p.m.: Use of Probabilistic Risk Assessment in the Regulatory Process (Open)—The Committee will hear a briefing by and hold a discussion with representatives of the NRC staff regarding the status of activities of the NRC interoffice working group to develop guidance on consistent and applicable methods to be applied in the use of probabilistic risk assessment.

4:15 p.m.-4:45 p.m.: Meeting with NRC Chairman Ivan Selin (Open)—The Committee will meet with the Committee to discuss topics of mutual interest regarding ACRS activities.

4:45 p.m.-6:15 p.m.: Policy Issues for Certification of Advanced LWR Plants (Open)—The Committee will discuss proposed ACRS plans to review policy issues identified by the NRC staff that are applicable to certification of advanced light water reactors, including evolutionary and passive plants.

6:15 p.m.-6:45 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS positions and reports items considered during this meeting.

Friday, April 3, 1992

8:30 a.m.-10 a.m.: Power Level Increase for GE Boiling Water Resources (Open)—The Committee will review and comment on topical reports submitted by the GE Company as the basis for power level increases in operating GE BWR power plants.

Representatives of the NRC staff and the GE Company will participate, as appropriate.

10:15 a.m.-11:15 a.m.: Elimination of Burdensome Regulatory Requirements (Open)—The Committee will hear a briefing by representatives of the NRC staff regarding the NRC's program to eliminate regulatory requirements that are a burden without in any way reducing public health and safety.

11:15 a.m.-12:15 p.m. and 1:15 p.m.-2:15 p.m.: GE Advanced Boiling Water Reactor (Open/Closed)—The Committee will discuss a proposed ACRS report on the draft safety evaluation report for certification of this standardized nuclear power plant design

Portions of the session will be closed as necessary to discuss Proprietary Information related to this matter.

2:15 p.m.-3:30 p.m: Meeting with Director, NRC's Office of Nuclear Reactor Regulation and Director, NRC's Office of Nuclear Regulatory Research, (Open)—The Committee will discuss items of mutual interest, including aspects of the full-height, full-pressure integral system testing program for the Westinghouse AP600 passive nuclear plant.

3:30 p.m-4:15 p.m: Future ACRS Activities (Open)—The Committee will discuss anticipated ACRS subcommittee activities and items proposed for consideration by the full Committee.

4:15 p.m-6 p.m: Implementation of NRC Safety Goals (Open)—The Committee will discuss a proposed ACRS report to NRC on an alternate plan for implementation of NRC's safety goal policy.

Representatives of the NRC staff will participate, as appropriate.

6 p.m-6:30 p.m: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS positions and reports regarding items considered during this meeting.

Saturday, April 4, 1992

8:30 a.m-11:30 a.m: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports to NRC regarding items considered during this meeting.

11:30 a.m-12 Noon: Appointment of ACRS Members (Open/Closed)—The Committee will discuss qualification of candidates proposed for appointment as ACRS members.

This session will be closed as necessary to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

12 Noon-12:45 p.m: ACRS Subcommittee Activities (Open)—The Committee will hear a briefing and hold a discussion regarding the status of activities assigned to cognizant subcommittees, including the planning and conduct of ACRS work, reconciliation of ACRS recommendations, application of ASME risk-based standards, and related matters.

12:45 p.m-2 p.m: Miscellaneous (Open)—The Committee will complete discussion of items considered during this meeting and items which were not completed at previous meetings as time and availability of information permit.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 1991 (56 FR 49800). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those open portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS

[2] Counsel for the applicants, counsel for the staff and the Department of Justice, and counsel for intervening parties City of Cleveland, American Municipal Power-Ohio, and Alabama Electric Cooperative should consult and arrive at an agreement concerning the division of the time allotted to the respective parties.

Executive Director, Mr. Raymond F. Fraley, as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

Use of still, motion picture, and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director prior to the meeting. In view of the possibility that the Schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Public Law 92-463 that it is necessary to close portions of this meeting noted above to discuss Proprietary Information applicable to the matters being considered in accordance with 5 U.S.C. 552(b)(4) and information the release of which would represent a clearly unwarranted invasion of personal privacy per 5 U.S.C. 552b(c)(6).

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492-8049), between 8 a.m. and 4:30 p.m. est.

Dated: March 19, 1992.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 92-6932 Filed 3-24-92; 8:45 am]

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Defense Policy Advisory Committee on Trade; Meeting

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of Defense Policy Advisory Committee on Trade Meetings Schedule.

SUMMARY: The meetings will include a review and discussion of current issues which influence U.S. trade policy. Pursuant to section 2155 (f) of title 19 of the United States Code, I have determined that these meetings will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions.

DATES: The meeting of the Executive Committee of the Defense Policy Advisory Committee on Trade (DPACT) will be held from 10 am to 2 pm on Tuesday, April 21. The meeting of the full committee of DPACT will be held from 9 am to 4 pm on Thursday, June 4.

ADDRESSES: The meetings will be held at the Pentagon, room 3D1019 on April 21, 1992, and room 3E869 on June 4, 1992, Washington, DC, 20301-3070.

FOR FURTHER INFORMATION CONTACT: Judy Davis, Administration Assistant to DPACT, Department of Defense, OUSD(a)/IP/ILO, tel: (703) 693-2473.

Carla A. Hills,

United States Trade Representative.

[FR Doc. 92-6921 Filed 3-24-92; 8:45 am]

BILLING CODE 3190-01-M

POSTAL SERVICE

International Surface AO Mail to Canada

AGENCY: Postal Service.

ACTION: Changes in rate schedules.

SUMMARY: Pursuant to its authority under 39 U.S.C. 407, the Postal Service, after considering the comments submitted in response to its request in 57 FR 3805 for comments on proposed changes in the rate schedules for surface AO mailings to Canada, hereby gives notice that it is implementing the changes as proposed

EFFECTIVE DATE: 12:01 a.m., April 18, 1992:

FOR FURTHER INFORMATION CONTACT: John F. Alepa (202) 268-2650.

SUPPLEMENTARY INFORMATION: On January 31, 1992, the Postal Service published in the **Federal Register** a notice of proposed changes in the rate schedules for surface mailings to Canada of regular printed matter, small packets, and publishers' periodicals (57 FR 3805). The proposed changes involved establishing one-ounce rate increments for items weighing between four ounces and one pound, and adjusting the rate levels applicable to publishers' periodicals weighing three ounces or less.

The Postal Service requested comments on the proposed changes by March 2, 1992. The only comment submitted by that date came from the editor of a news publication, who raised two issues. First, the commenter asserted that rates that do not take into account the mailer's distance from the U.S.-Canadian border place a publisher mailing from a location near the border at a disadvantage in relation to a publisher mailing from a location further from the border. The commenter suggested that the Postal Service consider offering zoned rates for Canada-bound publications based on the mailer's distance from the border.

Second, the commenter pointed out that the current rate schedule for publishers' periodicals to Canada has two-ounce rate increments after the fourth weight step. The commenter claimed that this rate structure unfairly penalizes publishers mailing items weighing more than four ounces.

The Postal Service believes that the first issue raised by the commenter is unrelated to the January 31 proposal, which was intended to simplify rate application and to lower the postage for certain items. With regard to the commenter's second point, the Postal Service notes that the changes being implemented provide relief for the condition identified as a problem.

In setting international postage rates, the Postal Service must ensure that such rates (1) do not apportion the costs of the service so as to impair the overall value of the service to the users; (2) apportion the costs of all postal operations to all users on a fair and equitable basis; (3) are fair and reasonable; and (4) are not unduly or unreasonably discriminatory or preferential. The rates for surface AO mailings to Canada announced herein satisfy these criteria.

Accordingly, the Postal Service hereby adopts the changes set forth in the rate schedules below. These changes shall take effect at 12:01 a.m., on April 18, 1992.

Authority: 39 U.S.C. 407, 410.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 33-6928, File No. S7-6-92]

Securities Uniformity; Annual Conference on Uniformity of Securities Law

AGENCY: Securities and Exchange Commission.

ACTION: Publication of release announcing issues to be considered at a conference concerning uniformity of securities laws, and requesting written comments.

SUMMARY: In conjunction with a conference to be held on March 30, 1992, the Commission and the North American Securities Administrators Association, Inc. today announced a request for comments on the proposed agenda for the conference. This inquiry is intended to carry out the policies and purposes of section 19(c) of the Securities Act of 1933, adopted as part of the Small Business Investment Incentive Act of 1980, to increase uniformity in matters concerning State and Federal regulation of securities, maximize the effectiveness of securities regulation in promoting investor protection, and to reduce burdens on capital formation through increased cooperation between the Commission and the state securities regulatory authorities.

DATES: The conference will be held on March 30, 1992. Written comments must be received on or before March 27, 1992 in order to be considered by the conference participants.

ADDRESSES: Written comments should be submitted in triplicate by March 27, 1992 to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549. Comments should refer to File No. S7-6-92 and will be available for public inspection at the Commission's Public Reference Room, 450 5th Street NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: William E. Toomey or Richard K. Wulff, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street NW., Washington, DC 20549, (202) 272-2644.

SUPPLEMENTARY INFORMATION:

I. Discussion

A dual system of federal-state securities regulation has existed since the adoption of the federal regulatory structure in the Securities Act of 1933 (the "Securities Act").[1] Issuers attempting to raise capital through securities offerings, as well as participants in the secondary trading markets, are responsible for complying with the federal securities laws as well as all applicable state regulations. For some time, it has been recognized that there is a need to increase uniformity between federal and state regulatory systems and to improve cooperation among those regulatory bodies so that capital formation can be made easier while investor protections are retained.

The importance of facilitating greater uniformity in securities regulation was endorsed by Congress with the enactment of section 19(c) of the Securities Act in the Small Business Investment Incentive Act of 1980.[2] Section 19(c) authorizes the Commission to cooperate with any association of state securities regulators which can assist in carrying out the declared policy and purpose of section 19(c). The policy of that section is that there should be greater Federal and State cooperation in securities matters, including: (1) Maximum effectiveness of regulation; (2) maximum uniformity in federal and state standards; (3) minimum interference with the business of capital formation; and (4) a substantial reduction in costs and paperwork to diminish the burdens of raising investment capital, particularly by small business, and a reduction in the costs of the administration of the government programs involved. In order to establish methods to accomplish these goals, the Commission is required to conduct an annual conference. The 1992 conference will be the ninth such conference.

II. 1992 Conference

The Commission and the North American Securities Administrators Association, Inc. ("NASAA") [3] are planning the 1992 Conference on Federal-State Securities Regulation (the "Conference") to be held March 30, 1992 in Washington, DC. At the Conference, representatives from the Commission and NASAA will form into working groups in the areas of corporation finance, market regulation, investment management, and enforcement, to discuss methods of enhancing cooperation in securities matters in order to improve the efficiency and effectiveness of federal and state securities regulation. Generally, attendance will be limited to representatives of the Commission and NASAA in an effort to maximize the ability of Commission and state representatives to engage in frank and uninhibited discussion. However, each working group, in its discretion, may invite certain self-regulatory organizations to attend and participate in certain sessions.

Representatives of the Commission and NASAA currently are in the process of formulating an agenda for the Conference. As part of that process, the public, securities associations, self-regulatory organizations, agencies, and private organizations are invited to participate through the submission of written comments on the issues set forth below. In addition, comment is requested on other appropriate subject that commenters wish to be included in the Conference agenda. All comments will be considered by the Conference attendees.

III. Tentative Agenda and Request for Comments

The tentative agenda for the Conference consists of the following topics in the areas of corporation finance, investment management, market regulation and oversight, and enforcement.

(1) Corporation Finance Issues

a. Uniform Limited Offering Exemption

Congress specifically acknowledged the need for a uniform limited offering exemption in enacting section 19(c) of the Securities Act and authorized the Commission to cooperate with NASAA in its development. Working with the states, the Commission developed regulation D, the federal exemption for limiting offerings. Regulation D was adopted by the Commission in March 1982. On September 21, 1983, NASAA endorsed a revised form of the Uniform Limited Offering Exemption ("ULOE") that is intended to complement regulation D.

[1] 15 U.S.C. 77a et seq.

[2] Public Law 96-477, 94 Stat. 2275 (October 21, 1980).

[3] NASAA is an association of securities administrators from each of the 50 states, the District of Columbia, Puerto Rico, Mexico and twelve Canadian Provinces and Territories.

ULOE provides a uniform exemption from state registration for certain issuers. An issuer raising capital in a state which has adopted ULOE may take advantage of both a state registration exemption and a federal exemption under regulation D. Because regulation D provides the framework for ULOE, NASAA's assistance in developing proposals to improve regulation D is important. Within the past four years the Commission, with NASAA's cooperation, has adopted significant changes to regulation D.[4]

To date, more than half the states have adopted some form of ULOE. Both the Commission and NASAA continue to make a concerted effort toward the universal adoption of ULOE. The conferees will discuss viable options to convince non-participating states to adopt ULOE and to enhance consistency.

b. Other Exemptive Approaches

Participants at the Conference will consider a rulemaking initiative by the Commission.

The Commission's small business initiative consists of a series of rulemaking changes and legislative proposals designed to improve the overall capacity to help finance new companies, and to provide new opportunities for investors. New registration form SB-1 is being proposed for offerings by businesses with less than $15 million in revenues. This form is intended to be far simpler than the traditional form S-1. New periodic reporting forms, the "10-K Junior" and the "10-Q Junior", will be written in plain English and will be easier to use than existing forms.

In addition, the Commission has proposed: that the regulation A ceiling be raised from $1,500,000 to $5,000,000; that small businesses using regulation A can "test the waters" for investor interest before they begin selling their securities; that an SBIC can issue $15,000,000 rather than only $5,000,000 of securities under regulation E each year; and that the percentage of illiquid securities (such as small business securities) that an open end mutual fund may hold be increased from 10% to 15%.

Finally, the Commission's legislation proposals would:

Relax the attribution rules used to determine whether a company has under 100 investors and is thus exempt as a "private investment company."

Create a "qualified investor investment company exception," parallel to Rule 144A, to allow any number of qualified investors to form an investment company.

Increase from $5 million to $10 million the Commission's authority to exempt small issues from Securities Act registration requirements.

Increase from $100,000 to $10 million the amount of securities that can be issued by an exempt intrastate investment company.

Relax some of the requirements for Business Development Companies, investment companies that specialize in small business investment.

Comment is requested on these proposed changes as well as other uniform exemptions that might be developed to enhance the ability of issuers to raise capital.

c. Disclosure Policy and Standards

The Commission has an ongoing program of considering, reviewing and revising its policies with regard to the most appropriate methods of ensuring the disclosure of material information to the public. Coordination with the States has been beneficial. Recently, both the Commission and the states have devoted considerable attention to issues arising from the so-called "roll-up" of limited partnerships. A roll-up usually involves the combination or reorganization of one or more partnerships. The conferees will discuss the special disclosure problems involved in such transactions with emphasis on the new disclosure rules adopted by the Commission to improve the quality of information provided to investors.[5]

Commenters are invited to discuss other areas where federal-state cooperation in the area of disclosure standards could be of particular significance as well as any ways in which federal-state cooperation could be improved.

d. Multinational Securities Offerings

In June 1991, the Commission and the Canadian Securities Administrators adopted a multijurisdictional disclosure system that permits certain Canadian and U.S. issuers to offer securities, undertake tender offers, and file periodic reports using the disclosure procedures of their home jurisdiction.[6] On September 14, 1989, NASAA endorsed the multijurisdictional disclosure system as originally proposed and called upon its membership to take any action necessary to accommodate the offerings covered by the system within state securities laws. Based upon the information obtained from a survey of securities administrators, NASAA, on August 30, 1990, adopted Model Rules to the Uniform Securities Act (1956) and recommended their adoption to the membership, where necessary to accommodate the Canadian multijurisdictional system.

Current developments relating to the multijurisdictional disclosure system and to the actions taken by the states in connection therewith will be discussed at the conference.

On June 6, 1990, the Commission issued a concept release on multinational tender and exchange offers. In the release, the Commission sought comment on a conceptual approach designed to encourage foreign bidders to extend multinational tender and exchange offers to their U.S. security holders on the basis of foreign disclosure, procedural and accounting requirements, where U.S. investors own a small percentage of the securities sought.

On June 5, 1991, the Commission published for comment an exemptive rule, a registration form and an order that would permit tender offers, exchange offers and business combinations relating to a foreign issuer's securities to proceed in the United States on the basis of the applicable regulation of the target company's home jurisdiction, where a small percentage of the shares sought are held of record by U.S. holders.[7] The Commission also published for comment an exemptive rule and a registration form to facilitate rights offerings of equity securities by foreign private issuers to their existing U.S. shareholders.[8] These proposed exemptions and new registration forms will be discussed, with special consideration being given to methods of coordinating federal and state regulations to accommodate such multinational offerings.

Comment is specifically requested on ways to coordinate federal and state treatment of multinational offerings.

(2) Market Regulation Issues

a. *Disclosures on Registration Forms*

1. *Form BD and Disclosure of Bank Affiliates.* In September 1991, the Commission published for comment amendments to form BD,[9] the uniform

[4] Securities Act Release No. 6663 (October 2, 1986) (51 FR 36385); Securities Act Release No. 6758 (March 3, 1988) (53 FR 7866); Securities Act Release No. 6825 (March 14, 1989) (54 FR 11369).

[5] Securities Act Release No. 6922 (October 30, 1991) (56 FR 47237).

[6] Securities Act Release No. 6902 (June 21, 1991) (56 FR 30036).

[7] Securities Act Release No. 6897 (June 5, 1991) (56 FR 27582).

[8] Securities Act Release No. 6896 (June 5, 1991) (56 FR 27564).

[9] Securities Exchange Act Release No. 29643 (September 6, 1991) (56 FR 44029) ("Release 34-29643").

registration form for broker-dealers under the Securities Exchange Act of 1934 ("Exchange Act").[10] These amendments were the result of ongoing discussions between Commission staff and NASAA's Forms Revision Committee, as well as representatives of the National Association of Securities Dealers, Inc. ("NASD") and the securities industry, concerning ways to improve form BD.

NASAA voted to adopt the proposals at its Fall membership meeting last year. Other comments on the proposed amendments also generally were favorable. The Commission and NASAA will discuss these comments, as well the NASD's progress toward changing the Central Registration Depository ("CRD") system to accommodate the amendments to the form and the schedules. The conferees will also discuss an additional change to Form BD that was not proposed in Release 34–29643; that is, whether to require applicants for registration that are controlled by, or under common control with, a U.S. or foreign bank, to disclose that affiliation on form BD. Written comment on these proposed changes would be welcomed.

2. *Customer Complaint System.* The staff of the Commission, NASAA, and the NASD recently reached an understanding that would reconcile the Commission's and NASAA's differing interpretations of the word "proceeding," as used in item 7(G) of form BD. As part of this compromise agreement, the Commission and the NASD plan to provide state securities regulators with their customer complaint information through an NASD database system accessible through the CRD. The Commission and NASAA participants will discuss the implementation of the customer complaint system, as well as the timing of the amendments to Form BD to reflect the new uniform interpretation of "proceeding." In addition, the conferees and NASAA will examine ways to further enhance regulatory coordination between the states, the Commission, and the self-regulatory organizations.

b. Proposed Penny Stock Rules

In the Securities Enforcement Remedies and Penny Stock Reform Act of 1990 ("Penny Stock Reform Act"),[11] Congress created a comprehensive new regulatory scheme designed to address the lack of public information about "penny stocks," as well as problems of recidivism among promoters and other persons involved in penny stock offerings. To implement the provisions of the Penny Stock Reform Act, on April 17, 1991, the Commission proposed for public comment rule 3a51–1, rules 15g–1 through 15g–7, and Schedule 15G under the Exchange Act.[12] The Commission staff currently is reevaluating the proposed rules in light of the comments and suggestions made in the seventy comment letters received to date. The staff's progress on this project and the recommendations of the commentators will be discussed at the Conference.

c. Small Business Listing Standards

Several national securities exchanges have submitted proposals to the Commission to create a second tier of listing standards for small issues. The second tier standards generally are substantially lower than the regular listing standards in most categories (such as outstanding float, number of shareholders, total assets, etc.). The purpose of the second tier is to help smaller business raise capital by providing easier access to an exchange listing. Examples of alternative listing standards are the American Stock Exchange's "Emerging Company Marketplace" and the Pacific Stock Exchange's proposal to list SCOR offerings. Because companies listed on the American Stock Exchange are exempt by state statute or regulation from blue sky registration of offerings in virtually every state, and Pacific Stock Exchange issues are granted a similar exemption in many states, these second tier companies would not be subject to blue sky registration. To address this, the American Stock Exchange has taken measures to prevent its Emerging Company Marketplace issuers from availing themselves of these exemptions. Nevertheless, questions have been raised about this issue and other issues arising out the creation of a tier of substantially smaller and less mature issuers for stock exchange trading. Participants will discuss the benefits and problems involved in small business listing standards.

(3) Investment Management Issues

a. Investment Companies

(1) *Small business initiatives.* The Commission has recently proposed or instituted changes in investment company regulation in order to help promote access to capital by small businesses. First, the Commission has proposed to increase (from $5 million to $15 million) the aggregate offering price of all securities of a small business investment company that may be sold in a twelve-month period under the exemption from registration in the Commission's regulation E. Second, the Division has revised its policy on investment in "illiquid assets" by open-end investment companies by increasing the percentage of net assets of an open-end company that may consist of such illiquid assets from 10% to 15%. Third, the Commission is planning to recommend legislation amending the Investment Company Act of 1940 ("1940 Act") to lessen certain restrictions on the formation and operation of business development companies, create a new exemption for investment companies owned by sophisticated investors, and create new exemptions for state-regulated business and industrial development companies. The conferees will discuss how these changes and their expected practical results may affect the states in their regulation of investment companies and similar entities.

(2) *Investment company disclosure and filing requirements.* Investment companies register with the Commission under the 1940 Act, [13] register their securities under the Securities Act of 1933, and comply with the proxy and reporting requirements under the Securities Exchange Act of 1934. Most investment companies also are required to register under state securities laws the shares they offer for sale in the state. While many states permit investment companies to satisfy state filing requirements by filing a copy of the registration statement filed with the Commission, states may require the filing of additional documents, or require that documents be filed at different times.

The Commission and the states have worked to coordinate, to the extent possible, the filing and disclosure requirements for investment companies. For example, in 1983 the Commission adopted a new two-part disclosure format for mutual funds under which all investors receive a shorter prospectus containing essential information about the fund and the risks investment in the fund presents while other more detailed information about the fund is available to investors requesting it in a Statement of Additional Information ("SAI").[14] When the new format was adopted, representatives of NASAA made substantial efforts to assure that the new format also be viewed as meeting state disclosure requirements.

Conferees will discuss the status of federal and state efforts toward achieving the goal of more uniform federal and state investment company disclosure requirements and filing procedures. Among other things, conferees will discuss:

(A) *Two part format.* State regulators have expressed certain concerns about whether important about mutual fund investments is "drifting" from the prospectus to the SAI. Conferees are expected to discuss whether the perceived problems reflect the failure by some registrants to comply with existing requirements for prospectus disclosure or whether the allocation of information between the prospectus and SAI required under the applicable Commission registration forms should be reviewed.

(B) *Hub-and-spoke arrangements.* In a hub-and-spoke arrangement, a mutual fund (the "hub") sells shares to another mutual fund (the "spoke"). Shares of the spokes are sold to the public. Some states are beginning to require special disclosure about these arrangements. These state disclosure standards differ in several respects from information that registrants now include in prospectuses to comply with Commission requirements. Conferees will discuss what can be done to better assure that uniform requirements will be imposed in this area. Specifically, the conferees will discuss how to harmonize federal and state requirements to assure investors are provided with information that enables them to understand this form of investment company product, and any material risks it may entail.

(3) *Special study on investment company regulation.* The Commission is reexamining the regulation of investment companies under the federal securities laws. As part of this re-examination, the Commission published a concept release seeking comment on reform of the regulation of investment companies under the federal securities laws.[15] The Division of Investment Management has reviewed the comments submitted in response to the Management has reviewed the comments submitted in response to the concept release and is formulating its recommendations to the Commission. The conferees will discuss issues raised by the concept release, particularly those that may affect state laws.

(b) Investment Advisers

Investment advisers register with the Commission and with the forty-three states that have investment adviser laws. Since 1985, advisers have registered with the states and the Commission by filing Uniform Form ADV,[16] a form developed jointly by the Commission and NASAA. Form ADV contains information necessary for federal and state registration. In addition, part II of the form contains the information about the adviser and its business practices that an adviser is required to give to clients and prospective clients under the Commission's brochure rule.[17] In enforcing the provisions of the Investment Advisers Act of 1940,[18] the Commission historically has relied primarily upon a program of inspections of adviser books and records. The conferees will discuss:

(1) *Central Registration Depository ("CRD").* When Uniform Form ADV was adopted, NASAA and the Commission indicated that a clearing house procedure, such as the CRD, would be considered to process adviser registration filings. The CRD is a computerized filing and data processing system operated by the NASD that maintains information concerning NASD member broker-dealers and their personnel for access by state regulators. It permits a broker-dealer to make one filing and for the information in that filing to be communicated electronically to the appropriate state regulators. In 1986, the CRD, in a pilot test, began registering investment adviser agents for the state of Virginia which had just begun to require registration of advisers and their agents.

The conferees will discuss, among other things, how a central registration system could be designed, what cost savings to advisers and regulatory benefits would result from such a system, what the experience is of the Virginia agent registration pilot, and whether cost-effective means can be developed for Commission participation in any central processing system.

(2) *Brochure rule.* Part II of Form ADV contains the information about the adviser and its business practices that an adviser is required to give to clients and prospective clients under the Commission's brochure rule. The current requirements may not adequately inform investors about conflicts of interest, compensation, and other important matters. Also, the check-the-box format of Part II, while useful to regulators in maintaining an adviser data base, may not present information to the prospective advisory client in an easily comprehensible manner. Thus, the Commission staff and NASAA have been working on improved disclosure requirements. Conferees will review the status of these efforts.

(3) *Inspections.* The Commission and the states have coordinated their inspection efforts to the greatest extent possible. A joint Commission/State inspections and training program was instituted in 1984 to coordinate regulatory efforts by sharing registration and examination information, thereby increasing the overall regulatory coverage of the investment adviser industry. The conferees expect to discuss options for maximizing the effectiveness of the regulatory efforts of the Commission and the states by avoiding duplication of regulatory efforts and increasing and improving routine surveillance of investment advisers.

(4) Enforcement Issues

In addition to the above stated topics, the state and federal regulators will discuss various enforcement related issues which are of mutual interest.

(5) General

There are a number of matters which are applicable to all, or a number, of the areas noted above. These include Edgar, the Commission's pilot electronic disclosure system, the coordination of Commission rulemaking procedures with the states, training and educating staff examiners and analysts, and sharing of information.

The Commission and NASAA request specific public comments and recommendations on the above-mentioned topics. Commenters should focus on the agenda but may also discuss or comment on other proposals which would enhance unformity in the existing scheme of state and federal regulation, while helping to maintain high standards of investor protection.

Dated: March 19, 1992.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment Nos. 1 and 2 by American Stock Exchange, Inc. Relating to Trading Index Warrants and Non-Option Derivative Products on the Floor by Registered Traders

March 18, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 3, 1992, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. On March 11, 1992, the Amex submitted to the Commission Amendment No. 1 to the proposed rule change.[1] On March 13, 1992, the Amex submitted Amendment No. 2 to the proposal.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to add Commentary .11 to Amex Rule 111, Restrictions on Registered Traders; Commentary .13 to Amex Rule 114, Registered Equity Market Makers ("REMMs"); and Commentary .10 to Amex Rule 958, Options Transactions of Registered Traders, to provide that proprietary transactions on the floor in (1) index warrants and (2) derivative products, which are otherwise traded under the Exchange's equity trading rules, shall be governed by, and effected in accordance with, Amex Rule 958. The following is the text of the proposed rule change:

Rule 111 Restrictions on Registered Traders

* * * Commentary .11

Transactions on the floor in (i) index warrants and (ii) derivative products (as defined in article iv, section 1(b)(4) of the Exchange Constitution) which are otherwise traded under the Exchange's equity trading rules, by a member for an account in which he has an interest shall be governed by the provisions of Rule 958. (See Commentary .10 Rule 958.)

Rule 114 Registered Equity Market Makers

* * * Commentary .13

Transactions on the Floor in (i) index warrants and (ii) derivative products (as defined in article IV, section 1(b)(4) of the Exchange Constitution) which are otherwise traded under the Exchange's equity trading rules, by a member for an account in which he has an interest shall be governed by the provisions of Rule 958. (See Commentary .10 Rule 958.)

Rule 958 Options Transactions of Registered Traders

* * * Commentary .10

Transactions on the Floor in index warrants by Registered Traders who are regular members, and transactions by Registered Traders on the Floor in derivative products (as defined in article IV, section 1(b)(4) of the Exchange Constitution) which are otherwise traded under the Exchange's equity trading rules, shall be effected in accordance with the provisions of this Rule. In addition, Rule 111, Commentary .01 and .02 shall not apply to such transactions. (See Rule 111, Commentary .11, and Rule 114, Commentary .13.)

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Index warrants. Currently, index warrants, like other securities traded under the Exchange's equity trading rules, are traded on the Exchange floor by REMMs pursuant to the provisions of Amex Rule 114, which include applicable provisions of Amex Rule 111. Under the proposed rule change, regular members wishing to engage in supplemental market making activity in index warrants would be required to register as Registered Traders under Amex Rule 958, and would trade for their own accounts in such issues pursuant to the provisions of this rule.[3]

In contrast to REMMs trading pursuant to Amex Rules 111 and 114, competing market makers governed by Rule 958 (*e.g.*, Registered Options Traders ("ROTs")) have continuous affirmative market making obligations.[4] In recognition of this, such market makers therefore are designated as specialists on the Exchange for all purposes under the Act,[5] and are entitled to "good faith" market maker margin with respect to transactions on the floor in their assigned securities.[6] The Amex anticipates that application of Rule 958 requirements to supplemental Exchange market makers will encourage additional competing market maker activity in index warrants and enhance index warrant liquidity, while ensuring the continuous market making obligations of such members.

Non-option derivative products. Article IV, section 1(b)(4) of the Exchange Constitution was recently amended [7] to provide that "derivative products" under that section include, in addition to standardized options, securities "which are issued by * * * (a) limited purpose entity or trust and which are based on the performance of an index or portfolio of other publicly traded securities." [8] This amendment was adopted specifically so that such securities may be traded by Amex options principal members ("OPMs") and limited trading permit ("LTP") holders [9] as a means of increasing depth and market liquidity for such products.[10] The Amex believes that providing that trading of such market basket-type securities will be governed by Rule 958 will further enhance market making competition and provided additional depth and liquidity.

Certain provisions not applicable. The Amex notes that Rule 111, Commentary .01 [11] would not be applied to transactions in index warrants and non-option derivative products because Registered Traders under Rule 958 are specifically exempted from Rule 111, Commentary .01 by Rule 958, Commentary .06, which refers to Rule 950(c).[12] Because of the nature of the affirmative obligations imposed by Rule 958, a limitation on the number of Registered Traders in an index warrant or non-option derivative product trading crowd would be inappropriate. Rule 111, Commentary .02 [13] would not apply insofar as Commentary .01 to Rule 958 defines the term "on the floor" for purposes of Rule 958.

2. Statutory Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to protect investors and the public interest, and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The proposed rule change is intended to increase supplemental market making in index warrants and non-option derivative products on the Exchange floor and thereby enhance market liquidity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the Federal Register or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to File No. SR-Amex-92-06 and should be submitted by April 15, 1992

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-6920 Filed 3-24-92; 8:45 am]

BILLING CODE 8010-01-M

---

[1] Specifically, under the original proposal, proposed Rule 958, Commentary .10 would have excluded Rule 958(c)(ii) and (f), and Commentary .02, .03, .07 and .08 from being applied to trading by Registered Traders in index warrants and non-option derivative products. Amendment No. 1 would apply Rule 958(c)(ii) and Commentary .02 and .07 to such trading.

[2] Amendment No. 2 proposes to apply Rule 958 in its entirety to transactions by Registered Traders in index warrants and non-option derivative products. As a result, Amendment No. 2 would apply Rule 958(f) and Commentary .03 and .08 to such trading.

[3] REMMs as well as any other Registered Traders under Rule 111 currently trading index warrants or non-option derivative products will be required to register under Rule 958 and will thus become subject to the provisions of this rule in lieu of Rule 114 governing REMMs or Rule 111. Conversation between Michael Cavalier, Assistant General Counsel, Amex, and Edith Hallahan, Attorney, Commission, on March 11, 1992.

[4] *See* Amex Rule 958(c).

[5] *See* Amex Rule 958, Commentary .01.

[6] 12 CFR 220.2(k) and 220.12 (1991).

[7] *See* Securities Exchange Act Release No. 28612 (November 14, 1990), 55 FR 48308 (approving File No. SR-Amex-90-17).

[8] The Amex notes that Article IV, section 1(b)(4) specifies that for purposes thereof the term "derivative products" does not include warrants of any type or closed-end mutual funds.

[9] Previously, article IV, section 1(b)(4) of the Amex Constitution limited OPMs to trading standardized options and Section 1(j)(3) authorized LTP holders to trade only standardized index options, specifically excluding both from trading warrants and other securities.

[10] An example of such a non-option derivative product is the SuperUnits of certain SuperTrusts sponsored by SuperShare Services Corporation ("SSC"). SuperTrust™, SuperShare™ and SuperUnit™ are trademarks of Leland O'Brien Rubenstein Associates Incorporated. In addition, the Commission has approved a proposed rule change relating to the listing and trading of unit investment trust securities such as SuperTrust securities. See Securities Exchange Act Release No. 30394 (February 21, 1992), 57 FR 7409 (approving File No. SR-Amex-90-06).

[11] This provision limits to three the number of Registered Traders in a trading crowd permitted to establish or increase a position for accounts in which they have an interest, absent written Floor Official approval.

[12] Specifically, Commentary .02 to Rule 950(c) provides that the number of ROTs in a trading crowd establishing or increasing a position for accounts in which they have an interest may be limited if it is determined by two Floor Officials that this is in the interest of fair and orderly markets.

[13] This provision relates to the term "on the floor" as used in Rules 110 and 111.

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, section 402, Public Law 101-59, 104 Stat. 2589, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J.W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W.M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Coast Guard

[CGD8-92-05]

Eighth Coast Guard District Industry Day; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of Meeting.

SUMMARY: On May 8, 1992 the Commander, Eighth Coast Guard District will sponsor an Industry Day program to provide for an exchange of ideas, opinions and information concerning developments affecting the Coast Guard, the maritime community as well as related industries. The Industry Day program will be held at the Doubletree Hotel in New Orleans, LA. The format will be as follows:

May 7, 1992—Doubletree Hotel

6 p.m. to 8 p.m. Registration for early arrivals.

May 8, 1992—Doubletree Hotel

8 a.m. Registration continues.

9 a.m. General session; greeting, opening remarks.

9:45 a.m. Coffee Break.

10 a.m. Panel discusions; six separate, small-group discussions focusing on the MARPOL/Oil Pollution Act of 1990; Waterways Management; Outer Continental Shelf Vessels and Facilities; User Fees; Drug Testing; Licensing, and Vessel Inspections.

11:45 a.m Banquet style luncheon with keynote speaker.

1:30 p.m. Panel discussion continue.

3 p.m. Break.

3:15 p.m. Reconvene General Sessions.

4:30 p.m. Industry Day concludes.

4:45 p.m. No host reception.

Persons desiring to attend the program are encouraged to provide additional topics for consideration. Preregistration for the program is required to assure adequate space. The conference and lucheon fee will be $32.00. Contact the below named officer to submit topics for discussion, to obtain registration forms and luncheon menu. Topic suggestions and reservations must be recieved by April 25, 1992.

DATES: May 8, 1992 8 am to 4:45 pm.

ADDRESSES: Doubletree Hotel, 300 Canal Street, New Orleans, LA 70130.

FOR FURTHER INFORMATION CONTACT: LCDR Kenneth B. Parris, USCG, c/o Commander (mvs), Eighth Coast Guard District, Hale Boggs Federal Building, room 1341, 501 Magazine Street, New Orleans, LA 70130-3396; telephone number (504) 589-6271.

BILLING CODE 4910-14-M

Federal Aviation Adminstration

Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed noise compatibility program that was submitted for Monroe Regional Airport under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) (hereinafter referred to as "the Act") and 14 CFR part 150 by the city of Monroe, Louisiana. This program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR part 150 for Monroe Regional Airport were in compliance with applicable requirements effective July 13, 1990. The proposed noise compatibility program will be approved or disapproved on or before August 29, 1992.

EFFECTIVE DATE: The effective date of the start of FAA's review of the noise compatibility program is March 2, 1992. The public comment period ends May 1, 1992.

FOR FURTHER INFORMATION CONTACT: Dean A. McMath, Department of Transportation, Federal Aviation Administration, Fort Worth, Texas, 76193-0610, (817) 624-5594. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is, reviewing a proposed noise compatibility program for Monroe Regional Airport which will be approved or disapproved on or before August 29, 1992. This notice also announces the availability of this program for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the noise compatibility program for Monroe Regional Airport, effective on March 2, 1992. It was requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a mixmum of 180 days, will be completed on or before August 29, 1992.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76193-0610

Monroe Regional Airport, room 200, Terminal Building, 5400 Operations Road, Monroe, Louisiana 71203

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Fort Worth, Texas, March 2, 1992.

Donald J. Guffey,

Manager, Arkansas/Louisiana Airport Development Office.

[FR Doc. 92-6867 Filed 3-24-92; 8:45 am]

BILLING CODE 4910-13-M

Noise Exposure Map Notice; Receipt of Noise Compatibility Program and Request for Review Ohio State University Airport, Columbus, OH

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Ohio State University for Ohio State University Airport, under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193) and 14 CFR part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Ohio State University Airport under part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before August 31, 1992.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and of the start of its review of the associated noise compatibility program is March 2, 1992. The public comment period ends May 1, 1992.

FOR FURTHER INFORMATION CONTACT: Robert H. Allen, Federal Aviation Administration, Detroit Airports District Office, DET-ADO-670.1, East Willow Run Airport, 8820 Beck Road, Belleville, MI 48111, (313) 487-7296.

SUPPLEMENTARY INFORMATION: This notice announces the FAA finds that the noise exposure maps submitted for Ohio State University Airport are in compliance with applicable requirements of part 150, effective March 2, 1992. Furthe, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before August 31, 1992. This notice also announces the availability of this program for public review and comment.

Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airpport operation may submit to the FAA noise exposure maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community government, agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposed for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The Ohio State University submitted to the FAA on July 2, 1990, noise exposure maps, descriptions and other documentation which were produced during the Airport Noise Compatibility Planning (part 150) Study at Ohio State University Airport from August 1977 to July 1990. It was requested that the FAA review this material as the noise exposure maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the Ohio State University. The specific maps under consideration are 1987 Noise Exposure Map (existing conditions) and 1994 Noise Exposure Map (abated conditions). They are included along with supporting documentation found in the Part One Noise Exposure Map Documentation of the part 150 Study in the submission and part 2 Noise Compatibility Program Section V. The FAA has determined that these maps for Ohio State University Airport are in compliance with applicable requirements. This determination is effective on March 2, 1992. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the

relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Ohio State University Airport, also effective on March 2, 1992. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before August 31, 1992.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Great Lakes Region, 2300 East Devon Avenue, room 289, Des Plaines, IL 60018.

Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, MI 48111.

Upper Arlington Public Library, Lane Road Branch, 1945 Lane Road, Columbus, OH 43220.

Ohio State University Airport, Administration Building, 2160 West Case Road, Columbus, OH 43235.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Belleville, Michigan, March 2, 1992.

Peter A. Serini,

Manager, Detroit Airports District Office, Great Lakes Region.

[FR Doc. 92-6886 Filed 3-24-92; 8:45 am]

BILLING CODE 4910-13-M

Approval of Noise Compatibility Program; University of Illinois-Willard Airport, Savoy, IL.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the University of Illinois under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On August 5, 1989, the FAA determined that the noise exposure maps submitted by the University of Illinois under part 150 were in compliance with applicable requirements. On July 9, 1991, the Assistant Administrator for Airports approved the University of Illinois-Willard Airport noise compatibility program, as supplemented and clarified in the airport operator's June 27, 1991, submittals.

A total of fifteen (15) measures were originally included in the University of Illinois's recommended program. Two measures have been withdrawn by the sponsor, one a noise abatement measure and the other a land use management measure. Of the remaining thirteen (13) measures one is listed as a Noise Abatement Measure, eight are listed as Land Use Management Measures and four are Other Implementation Measures (Continuing Planning). The FAA has approved all thirteen (13) of these remaining measures.

EFFECTIVE DATE: The effective date of the FAA's approval of the University of Illinois-Willard Airport noise compatibility program is January 3, 1992.

FOR FURTHER INFORMATION CONTACT: Jerry R. Mork, Federal Aviation Administration, Great Lakes Region, Chicago, Airports District Office, CHI-ADO-630.5, 2300 East Devon Avenue, Des Plaines, Illinois 60018. (312) 694-7522. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for University of Illinois-Willard Airport, effective January 3, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measure should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in part 150 and the Act, and is limited to the following determinations.

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Chicago Airports District Office in Des Plaines, Illinois.

The University of Illinois submitted to the FAA on June 7, 1988, noise exposure maps, descriptions and other documentation. This documentation was produced during the Airport Noise Compatibility Planning (Part 150) Study at University of Illinois-Willard Airport from October 13, 1987 through June 7, 1988. The University of Illinois-Willard Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on August 5, 1989. Notice of this determination was published in the **Federal Register** on November 2, 1989.

The University of Illinois-Willard Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 2000. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on July 9, 1991 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period would have been deemed to be an approval of such program.

The submitted program, was supplemented and clarified by the airport operator's April 27, 1991 Response to FAA's Consolidated Comments and Addenda and Errata. The original program proposed by the airport sponsor contained fifteen (15) measures for noise mitigation on and off the airport, two were subsequently withdrawn by the sponsor. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Assistant Administrator for Airports effective January 3, 1992.

Two of the original fifteen measures submitted were listed as "Noise Abatement Measures". One dealing with following through with the airport development program, including extension of an existing runway and construction of a general aviation parallel runway, was withdrawn by the sponsor as not appropriate for purposes of part 150. The other noise abatement measure was approved. It dealt with continuation and expansion of a preferential runway use program. Eight of the fifteen measures originally submitted are listed as "Land Use Management Measures", of which seven were approved outright. Of these seven land use measures, five are preventive measures that include adopting the part 150 NCP as a comprehensive plan element, adopting guidelines for discretionary review, adopting a fair disclosure policy, establishing compatible use rezoning and adopting noise overlay zoning. Two other of these seven land use management measures are corrective measures such as acquiring or urging others to acquire and redevelop noise impacted dwellings. Once additional land use management measures was withdrawn by the sponsor since it was to purchase land for a runway extension that was not primarily for nosie mitigation purposes, but instead for capacity. Neither it or the noise abatement measure withdrawn provided noise relief within the 65 DNL noise contour and provided only relatively insignificant relief outside the 65 DNL noise contour. Finally, four measures, "Other Implementation Measures" dealing with continuing planning were also approved outright. These determinations are set forth in detail in a Record of Approval endorsed by the Assistant Administrator for Airports on January 3, 1992. The Record of Approval, as well as other evaluation materials and documents which comprised the submittal to FAA are available for review at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., room 617, Washington, DC 20591.

Federal Aviation Administration, Great Lakes Region, 2300 East Devon Avenue, room 261, Des Plaines, Illinois 60018.

Federal Aviation Administration, Chicago Airports District Office, Great Lakes Region, 2300 East Devon Avenue, room 260, Des Plaines, Illinois 60018.

Office of Airport Manager, University of Illinois—Willard Airport, Savoy, Illinois 61874.

Division of Aeronautics, Illinois Department of Transportation, Capital Airport, Springfield, Illinois 62706.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Des Plaines, Illinois, March 6, 1992.

Louis H. Yates,

Manager, Chicago Airports District Office, Great Lakes Region.

BILLING CODE 4910-13-M

[Summary Notice No. PE-92-9]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before April 15, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

FOR FURTHER INFORMATION CONTACT: Mr. C. Nick Spithas, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9683.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on March 19, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Correction

The Federal Aviation Administration published erroneously, in the **Federal Register** (57 FR 4509, February 5, 1992; FR Doc. 92-2736) that American Airlines petitioned the Federal Aviation Administration for exemption from 14 CFR 121.371(a) and 121.378. The petitioner is Executive Airlines, Inc., a subsidiary of AMR Eagle, Inc.

A corrected summary follows:

Docket No.: 23730.

Petitioner: Executive Airlines, Inc.

Sections of the FAR Affected: 14 CFR 121.371(a) and 121.378.

Description of Relief Sought: To allow Executive Airlines, Inc., a subsidiary of AMR Eagle, Inc. to utilize certain foreign original equipment manufacturers to inspect, repair, and overhaul components and parts of ATR-42, ATR-72, and CASA-212 aircraft operated by Executive Airlines, Inc.

[FR Doc. 92-6879 Filed 3-24-92; 8:45 am]

BILLING CODE 4910-13-M

Passenger Facility Charge; Lake Tahoe Airport, South Lake Tahoe, CA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of intent to rule on application to impose and use the revenue from a Passenger Facility Charge (PFC) at Lake Tahoe Airport, city of South Lake Tahoe, California.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Lake Tahoe Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) and 14 CFR part 158).

On March 13, 1992, the FAA determined that the application to impose and use revenue from a PFC submitted by the city of South Lake Tahoe was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than May 1, 1992.

DATES: Comments must be received on or before April 27, 1992.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Airports Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, CA 90009 or San Francisco Airport District Office, 831 Mitten Road, room 210, Burlingame, CA 94010-1303. In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Richard French, Airport Director, Lake Tahoe Airport, at the following address: City of South Lake Tahoe, 1901 Airport Road, suite 100, South Lake Tahoe, California 96150-7004. Comments from air carriers and foreign air carriers may be in the same form as provided to the city of South Lake Tahoe under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph R. Rodriguez, Supervisor, Planning and Programming Section, Airports District Office, 831 Mitten Road, room 210, Burlingame, CA 94010-1303, Telephone: (415) 876-2805. The applications may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The following is a brief overview of the application:

Level of proposed PFC: $3.00.

Proposed charge effective date: 8/01/92.

Proposed charge expiration date: 7/31/97.

Total estimated PFC revenue: $3,113,747.

Brief description of proposed project: Two Snow Plows, South Hazard Beacon, Security Fence, Snow Blower, § 107.14 Access Control, Erosion Control/Safety Areas, Replace Snow Cat Rescue Vehicle, Replace Two Snow Blowers, Saw/Seal Runway, Enhance, Enhance FAA Tower Visibility, Feasibility Study/Clear Areas, Expand ARFF/Snow Equip. Bldg., Home Purchase Program, ARFF Access Road, Pron End Loader.

Availability of Application

Any person may inspect the application in person at the FAA office listed above. In addition, any person may, upon request, inspect the application, notice and other documents germane to application in person at the city of South Lake Tahoe.

Issued in Hawthorne, California, on March 13, 1992.

Herman C. Bliss,

Manager, Airports Division, Western-Pacific Region.

[FR Doc. 92-6880 Filed 3-24-92; 8:45 am]

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement: Anderson and Abbeville Counties, SC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway facility from the City of Anderson in Anderson County to the City of Abbeville in Abbeville County, South Carolina.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Myers, Planning & Environmental Engineer, Federal Highway Administration, 1835 Assembly Street, suite 758, Strom Thurmond Federal Building, Columbia, South Carolina 29201, Telephone: (803) 253-3881.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the South Carolina Department of Highways and Public Transportation (SCDHPT), will prepare an environmental impact statement on the proposed Anderson-Abbeville Connector in Anderson & Abbeville Counties, South Carolina. The proposed connector will be located in a corridor approximately eight miles wide beginning on the southern side of the city of Anderson and continuing to S.C. Route 72 near City of Abbeville. The study area for the connector is within an area from the intersections of S.C. Route 28/Airline Drive and U.S. 76/U.S. 178 to the north; S.C. Routes 252, 20, and 185 to the east; S.C. Route 28 to the west; and S.C. Route 72 between Abbeville and Greenwood to the south. The total project length is about 30 miles.

The proposed Connector is included in the South Carolina Strategic Highway Plan for Improving Mobility and Safety and has been identified by their Select Oversight Committee as a roadway facility necessary to provide a stimulus for economic development in the Anderson-Abbeville area. Alternatives under consideration include: (1) Taking no action (no-build); (2) Transportation System Management (improvement of existing routes); and, (3) build alternatives.

The FHWA and SCDHPT are seeking input as a part of the scoping process to assist in determining and clarifying issues relative to this project. Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A formal scoping meeting with federal, state, and local agencies, and other interested parties is planned for Friday, April 17, 1992 at 10:30 a.m. in the SCDHPT fifth floor auditorium at 955 Park Street, Columbia, South Carolina. This scoping meeting will include both this project and the Anderson Parkway Project.

Coordination will be continued with appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A series of public hearings will be held for which public notice will be given of the time and place of the hearings. The draft EIS will be available for public and agency review and comment prior to the public hearings.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments, and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: March 17, 1992.

Robert J. Probst,

Division Administrator, Columbia, South Carolina.

[FR Doc. 92-6848 Filed 3-24-92; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement: Anderson County, SC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA isd issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway facility around the City of Anderson in Anderson County, South Carolina.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Myers, Planning & Environmental Engineer, Federal Highway Administration, 1835 Assembly Street, suite 758, Strom Thurmond Federal Building, Columbia, South Carolina 29201, Telephone: (803) 253-3881.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the South Carolina Department of Highways and Public Transportation (SCDHPT), will prepare an environmental impact statement on the proposed Anderson Parkway in Anderson County, South Carolina. The proposed Parkway will be located in a circumferential corridor approximately two miles wide around the southern side of the city of Anderson. The parkway is proposed as a multi-lane facility predominantly on new location extending from I-85 northwest of Anderson to I-85 to the northeast. connection to I-85 to the northwest will involve crossing Lake Hartweel through improvements to the existing bridges along either S.C. route 24 or Centerville Road (route S-4-71). On the eastern side, the bypass is proposed to tie to I-85 via either improvements to U.S. 29 north, or through the continuation of the new location facility to S.C. Route 81 then north to I-85. The total project length is about 37 miles.

The proposed Parkway is included in the South Carolina Strategic Highway Plan for Improving Mobility and Safety and has been identified by their Select Oversight Committee as a roadway facility necessary to provide for existing and projected traffic demands in the Anderson area. Alternatives under consideration include: (1) Taking no action (no-build); (2) Transportation System Management (improving existing routes); and, (3) build alternatives.

The FHWA and SCDHPT are seeking input as a part of the scoping process to assist in determining and clarifying issues relative to this project. Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A formal scoping meeting with federal state, and local agenices, and other interested parties is planned for Friday, April 17, 1992 at 10:30 a.m. in the SCDHPT fifth floor auditorium at 955 Park Street, Columbia, South Carolina. This scoping meeting will include both this project and the Anderson-Abbeville Connector Project.

Coordination will be continued with appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A series of public hearings will be held for which public notice will be given of the time and place of the hearings. The draft EIS will be available for public and agency review and comment prior to the public hearings.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments, and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

BILLING CODE 4910-22-M

[FHWA Docket No. 92-18]

Fuel Tax Evasion Projects

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice; request for comments.

SUMMARY: Funds have been authorized by the Congress for the use of the States and the Internal Revenue Service (IRS) to stem motor fuel tax evasion. This notice describes the procedures for making these funds available to the States. The Congress has also directed that a study be conducted on the use of motor fuel dyes and markers for detecting octane mislabeling, preventing consumer fraud, and enforcing motor fuel tax laws. This notice requests any comments and suggestions on the funding procedures for State tax evasion

projects and on issues to be addressed as part of the motor fuel dyeing/marking study.

DATES: Comments must be received on or before May 26, 1992.

ADDRESSES: Submit written, signed comments to FHWA Docket No. 92-16, room 4232, HCC-10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except legal Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. James R. Link, Office of Policy Development, 202-366-0570; or Mr. Wilbert Baccus, Office of the Chief Counsel, 202-366-0780; Federal Highway Administration, 400 Seventh Street, SW., Washigton, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal holidays.

SUPPLEMENTARY INFORMATION: Section 1040 of the Intermodal Surface Transportation Efficiency Act of 1991 (Pub. L. No. 102-240, 105 Stat. 1914) authorized $5 million per year for fiscal years (FY) 1992 through 1997 from the Highway Trust Fund and $2.5 million per year from the General Fund for highway use tax evasion projects. A portion of these funds are being allocated to the States for participation in regional motor fuel tax enforcement task forces. Three such task forces were organized in 1991 covering 14 States, under the coordination and leadership of the IRS district offices and State revenue agencies in the States of New Jersey, Indiana, and Texas. A preliminary plan for organizing all of the States and the District of Columbia into regional task force groups is as follows:

New Jersey Task Force

* New Jersey (Lead)
* Delaware
* New York
Pennsylvania
Maryland
District of Columbia

Indiana Task Force

* Indiana (Lead)
* Illinois
Michigan
* Ohio
* Kentucky
Missouri
Wisconsin
Minnesota

Texas Task Force

* Texas (Lead)
* Louisiana
* New Mexico
* Arkansas
* Oklahoma

California Task Force

California (Lead)
Nevada
Hawaii
Arizona
Utah

Northwest Task Force

Oregon (Lead)
Washington
Alaska
Montana
Idaho

Forida Task Force

Florida (Lead)
Georgia
Mississippi
Alabama

North Carolina Task Force

North Carolina (Lead)
South Carolina
Virginia
West Virginia
Tennessee

Nebraska Task Force

Nebraska (Lead)
Wyoming
South Dakota
Iowa
Kansas
North Dakota
Colorado

New England Task Force

Massachusetts (Lead)
Connecticut
Maine
New Hampshire
Rhode Island
Vermont

---

* Under agreement in FY 1991.

The revenue agencies in the indicated lead States have been invited to work with the respective IRS district offices to organize regional task forces. Other lead States may be designated for a regional task force if necessary.

A total of $3 million per year of the amount authorized from the Highway Trust Fund will be allocated to the States, including the District of Columbia, for the use of the State revenue agency responsible for motor fuel tax enforcement to carry out the purposes of section 1040. Lead States will be allocated $100,000 annually, and the remaining States will be allocated $50,000 annually. Funds allocated to a State shall remain available until September 30, 1997, at which time any unobligated funds may be withdrawn by the FHWA for other motor fuel tax evasion projects. It should be noted that, in any fiscal year, limitations on obligation authority may restrict the funds available for obligation.

Funds are available at 100 percent Federal share. However, as specified in section 1040, States wishing to receive funds for tax evasion projects must certify that the aggregate expenditure of funds of the State, exclusive of Federal funds, for motor fuel tax enforcement activities will be mainitained at a level which does not fall below the average level of such expenditures for its last two fiscal years.

To receive funding under this program, the State revenue agency responsible for enforcement of State motor fuel taxes shall follow these procedures:

1. Sign the Memorandum of Understanding (MOU) agreeing to participate in at least one of the regional task forces. The proposed regional grouping plan presented above was developed as a guide. States should join one or more task forces to best meet their needs for coordinated fuel tax enforcement.

2. Prepare an estimate of costs by category of expenditure. Allowable costs shall be determined in accordance with the Office of Management and Budget Circular A-87, "Cost Principles for State and Local Governments."

3. Establish accounting codes for attributing costs to the project. For example, if a system of time distribution for payroll costs is not already in place, a system will have to be developed to record the hours devoted to the project.

4. Comply with the intergovernmental review requirements of 49 CFR part 17 according to the procedures established by the State.

5. Submit a letter to the FHWA Division Administrator in the State requesting funds for the project along with the following items:

a. Evidence of completion of the intergovernmental review requirements,

b. A copy of the signed MOU (original signatures not required,)

c. The cost estimate by expenditure category,

d. Three signed original copies of the Grant Agreement. (One signed original copy will be returned to the State following signature by the Division Administrator.)

6. Request in writing FHWA approval of the following items as necessary:

a. Revised budget whenever the estimate for a single cost category changes by more than 10 percent of the total agreement amount, i.e. $5,000 for a $50,000 project,

b. Proposal for procurement of professional services, including identification of the contractor and estimated cost, when the estimated cost exceeds $10,000.

7. Designate, for the lead States, a representative and alternate to serve on the national project Steering Committee. The Steering Committee comprised of Federal, State, and industry representatives reviews progress and results of motor fuel tax compliance activities.

8. Submit progress reports and payment vouchers as described in the Grant Agreement. The report of motor fuel tax enforcement activities, project expenditures by category, and narrative project summary will be used to compile the reports to the Congress on March 31 and September 30 each year.

9. Arrange for audits when required by 49 CFR part 90.

The Grant Agreement includes all of the specific requirements on the use of project funds, including the certification to maintain funding for motor fuel tax enforcement activities at the average level for the previous two fiscal years. Enforcement of motor fuel tax compliance with respect to commercial motor carriers will not be included under this program. Enforcement of motor fuel taxes with respect to motor carriers will be addressed under section 4008 of the Intermodal Surface Transportation Efficiency Act of 1991 entitled "Participation in International Registration Plan and International Fuel Tax Agreement." A copy of the Grant Agreement form and provisions may be obtained from the contacts listed in this notice.

The remaining funds authorized by section 1040 are being reserved for the use of the IRS for motor fuel tax enforcement activities.

The FHWA is seeking any comments concerning the funding allocation, administrative procedures described in this notice, or any suggestions to enhance motor fuel tax compliance under this program.

Section 1040 of the Intermodal Surface Transportation Efficiency Act of 1991 and the act making appropriations for the Department of Transportation in fiscal year 1992 (Pub. L. No. 102-143, 105 Stat. 917) directed that a study be conducted of the feasibility and desirability of using motor fuel dyes and markers for detecting octane mislabeling, preventing consumer fraud, and enforcing motor fuel tax laws. This study will include a review of experience with the use of dyes and markers, assessment of the benefits and costs associated with implementing a nationwide standard of motor fuel dyes and markers and an evaluation of alternative means to achieve similar benefits in consumer fraud prevention and motor fuel tax enforcement. The study will account for the impacts on State and Federal revenue, burden on industry, and difficulty in implementing the standards. The FHWA is requesting any comments, suggestions, or information on issues that need to be addressed as part of the study.

Comments should be submitted to the docket by the deadline indicated above.

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: March 18, 1992.

T. D. Larson,

Administrator.

BILLING CODE 4910-22-M

Maritime Administration

[Docket P-005]

Interpretation of the Fourth Exception to Section 506 of the Merchant Marine Act, 1936, as Amended

AGENCY: Maritime Administration, Transportation.

ACTION: Policy consideration.

SUMMARY: The Maritime Administration (MARAD) is considering issuing a new determination under the Fourth Exception to section 506 of the Merchant Marine Act, 1936, as amended, 46 app. U.S.C. 1156 (the Act), regarding the maximum amount of domestic cargo permitted to be carried by vessels built with the aid of construction-differential subsidy (CDS) in foreign voyages with a stop at an island possession or territory of the United States.

DATES: Public comment on this issue is invited. Comments must be received by April 24, 1992.

ADDRESSES: Send 15 copies of comments to the Secretary, Maritime Administration, room 7300, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. All comments will be made available for inspection during normal business hours at the above address. Commentors wishing MARAD to acknowledge receipt of comments should enclose a stamped, self-addressed envelope or postcard.

FOR FURTHER INFORMATION CONTACT: Murray A. Bloom, Chief, Division of Maritime Aids, Office of the Chief Counsel, Maritime Administration, Washington, DC 20590, tel. (202) 366-5320.

SUPPLEMENTARY INFORMATION: Section 506 of the Act requires owners of CDS-built vessels to agree to operate those vessels exclusively in the United States foreign commerce. Some exceptions are provided in section 506 to allow for limited operation by CDS-built vessels in domestic trade. As relevant here, what has become known as the "Fourth Exception" of section 506 authorizes a CDS-built vessel to "stop" at Hawaii or an island possession or territory on a "voyage in foreign trade." The terms, "stop" and "voyage in foreign trade," are not defined. Section 506 does not state a limit for carriage of domestic cargo. CDS-built vessels engaging in such voyages must payback a proportional amount of CDS in a ratio tied to gross revenue derived from carriage of domestic cargo compared to gross revenue derived from the entire voyages of the previous year. No approvals are required for engaging in such voyages.

On February 28, 1990, in response to an order of the United States District Court for the District of Columbia, in *Marine Transportation Services Sea-Barge Group* v. *Skinner*, Civ. No. 89-2278 (D.D.C. Sep 27, 1989), and following a public notice and comment procedure, MARAD issued its modified Final Statutory Interpretation on the Fourth Exception of Section 506 applicable to the Puerto Rican trade. That Interpretation held in relevant part as follows:

Effective on and after April 1, 1990, with respect to CDS-built container vessels carrying cargo between the U.S. mainland and foreign countries via Puerto Rico, to be considered a *bona fide* voyage in the foreign trade under the Fourth Exception of section 506, each voyage of a CDS-built vessel may stop only once inbound and once outbound at Puerto Rico, and, at a minimum, the vessel must carry foreign cargo equal to 25 percent of the total TEUs carried on the vessel on a voyage basis. Failure to meet that level of carriage will result in a rebuttable presumption, that the voyage is not one in foreign trade. This rebuttal is effective in normal circumstances, but MARAD retains the right to assure that the carrier has taken sufficient steps to carry significant quantities of foreign cargo on each voyage in deciding whether the presumption has in fact been rebutted. The failure of quarterly results to achieve the required results can be excused only by MARAD finding that circumstances caused by *force majeure* precluded the operation of CDS-built vessels from otherwise meeting the 25 [percent] requirement. Operators involved in such service will be required to report cargo carriage on the same quarterly basis.

On January 31, 1992, the United States District Court for the District of Columbia struck down MARAD's interpretation and ordered MARAD to make a new determination as to the requirements of the Fourth Exception to section 506 of the Act. *Marine Transportation Services Sea-Barge Group* v. *Busey*, Civ. Nos. 89–2278, 90–0969 (D.D.C. Jan. 31, 1992). Importantly, the court affirmed MARAD's authority to prescribe an acceptable level of domestic cargo for a CDS vessel. *Slip. Op.* at 22. In addition, the court explicitly rejected arguments that the CDS repayment provisions of section 506 adequately protect the domestic fleet. *Slip. Op.* at 28, n. 17. However, the court ruled that MARAD did not adequately explain how its interpretation furthered the purposes and policy of the Act. *Slip. Op.* at 29. The court indicated that the foreign cargo limitation should be set at the level at which the domestic cargo carried on a CDS-built vessel is incidental to foreign cargo that is carried on that voyage. *Id.* The court faulted MARAD's interpretation for not considering the value of the cargo in measuring compliance with a domestic cargo limit and for not establishing the relevance of the 25 percent minimum foreign cargo requirement by statistical evidence, market research or otherwise. *Slip. Op.* at 30–31. The court, however, did not pass on the issue of whether the 25 percent minimum foreign cargo requirement "is a good or bad rule, or whether it furthers and serves the purpose and policies of the Act or not." *Slip. Op.* at 32. The court also suggested that MARAD consider the issues of the itinerary restriction and inclusion of transshipped cargo when reconsidering its rule. *Slip. Op.* at 33.

MARAD now invites public comment on the issues raised in the court's decision. This process would be most useful in helping MARAD formulate a response to the court's decision if commenters' remarks also included suggestions on the following specific issues:

1. Whether a new interpretation or a rule to be published in the Code of Federal Regulations should be promulgated.

2. What studies or information gathering should be conducted to lay the groundwork for a new interpretation.

3. What should be the basis for determining whether the domestic cargo carried by a CDS-built vessel on a foreign voyage is incidental to the foreign voyage.

4. How should MARAD enfore its determination.

By Order of the Maritime Subsidy Board.

Dated: March 20, 1992.

James E. Saari,

Secretary.

BILLING CODE 4910–81–M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: March 17, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0007.

Form Number: IRS Form T.

Type of Review: Extension.

Title: Forest Industries Schedules.

Description: Form T is filed by individuals and corporations to report income and deductions from the timber business. IRS uses Form T to determine if the correct amount of income and deductions are claimed.

Respondents: Individuals or households, Farms, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents/Recordkeepers: 37,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—37 hours, 4 minutes.

Learning about the law or the form—42 minutes.

Preparing the form and sending the form to the IRS—1 hour, 20 minutes.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 1,446,330 hours.

Clearance Officer: Garrick Shear (202) 535–4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4830–01–M

[Number: 102–11]

Delegation—Institute of American Indian Arts

Date: March 17, 1992.

By virtue of the authority vested in the Secretary of the Treasury, including the authority vested by 20 U.S.C. 4425, I hereby delegate the following authority for the Institute of American Indian and Alaska Native Culture and Arts Development.

1. *The Assistant Secretary (Management)* has the authority to:

a. Prescribe procedures, in accordance with 20 U.S.C. § 4425(a)(3), for the valuation of contributions to the Institute of American Indian and Alaska Native Culture and Arts Development;

b. Establish recordkeeping procedures in accordance with Section 4425(c) for the:

(1) Investment of funds received under the trust fund established in Section 4425(b); and

(2) Expenditure of accumulated interest for the trust fund under Section 4425(a); and

c. Monitor the program, and periodically evaluate the financial recordkeeping procedures in accordance with Section 4425(c).

2. *The Inspector General* shall audit the program, as necessary, and participate in the periodic evaluation of the finanical recordkeeping procedures.

3. This authority may be redelegated.

Nicholas F. Brady,

Secretary of the Treasury.

BILLING CODE 4810–25–M

UNITED STATES INFORMATION AGENCY

Reporting and Information Collection Requirements Under OMB Review

AGENCY: United States Information Agency.

ACTION: Proposed collection.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), agencies are required to submit proposed or established reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the Agency has made such a submission. The information collection activity involved with this program is conducted pursuant to the mandate given to the United States Information Agency under the terms and conditions of Public Law 98–164. USIA is requesting approval for a three-year extension of the Travellers Funded by USIA form (IAP–94), under OMB control number 3116–0181, which expires April 30, 1992. Estimated burden hours per response is thirty minutes.

DATE: April 24, 1992.

COPIES: Copies of the Request for Clearance (SF–83), supporting statement, transmittal letter and other documents submitted to OMB for approval may be obtained from the USIA Clearance Officer. Comments on the items listed should be submitted to the Office of Information and Regulatory Affairs of OMB, *Attention*: Desk Office for USIA, and also to the USIA Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Agency Clearance Officer, Ms. Debbie Knox, United States Information Agency, M/ASP, 301 Fourth Street, SW., Washington, DC 20547, telephone (202) 619–5503; and OMB review: Ms. Lin Liu, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503, Telephone (202) 395–7340.

SUPPLEMENTARY INFORMATION: Public reporting burden for this collection of information is estimated to average thirty minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the United States Information Agency, M/ASP, 301 Fourth Street, SW., Washington, DC 20547; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Title: Travellers Funded by USIA.

Form Number: IAP 94.

Abstract: A report is required for submission to the Speaker of the House of Representatives and the Chairman of the Senate Foreign Relations Committee listing all individuals, with their organizations, who in the preceding five years made two or more trips involving foreign travel financed in whole or in substantial part by grants from USIA's Office of Private Sector Programs. The information must be obtained from grantees, which necessitates the information collection.

Proposed Frequency of Responses: No. of Respondents—150; Recordkeeping Hours—320; Total Annual Burden—620.

Dated: March 19, 1992.

Rose Royal,

Federal Register Liaison.

BILLING CODE 8230–01–M

DEPARTMENT OF VETERANS AFFAIRS

Information Collection Under OMB Review

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). This document lists the following information:

(1) The title of the information collection, and the Department form number(s), if applicable;

(2) A description of the need and its use;

(3) Who will be required or asked to respond;

(4) An estimate of the total annual reporting hours, and recordkeeping burden, if applicable;

(5) The estimated average burden hours per respondent;

(6) The frequency of response; and

(7) An estimated number of respondents.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from Janet G. Byers, Veterans Benefits Administration (20A5), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 (202) 233–3021.

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, NEOB, room 3002, Washington, DC 20503, (202) 395–7316. Do not send requests for benefits to this address.

DATES: Comments on the information collection should be directed to the OMB Desk Officer on or before April 24, 1992.

Dated: March 19, 1992.

By direction of the Secretary.

Frank E. Lalley,

Associate Deputy, Assistant Secretary for Information Resources Policies and Oversight.

Revision

1. Loan Service Report, VA Form 26–6808.

2. The use of this form will allow VA to service delinquent guaranteed and insured home loans, loan sold, and portfolio loans to determine whether relief measures can be extended to assist the obligor in retaining the property.

3. Individuals or households.

4. 40,427 hours.

5. 25 minutes.

6. On occasion.

7. 97,028 respondents.

[FR Doc. 92–6850 Filed 3–24–92; 8:45 am]

BILLING CODE 8320–01–M

Information Collection Under OMB Review

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). This document lists the following information:

(1) The title of the information collection, and the Department form number(s), if applicble;

(2) A description of the need and its use;

(3) Who will be required or asked to respond;

(4) An estimate of the total annual reporting hours, and recordkeeping burden, if applicable;

(5) The estimated average burden hours per respondent;

(6) The frequency of response; and (7) an estimated number of respondents.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from Janet G. Byers, Veterans Benefits Administration (20A5), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 (202) 233–3021.

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, NEOB, room 3002, Washinton, DC 20503, (202) 395–7316. Do not send requests for benefits to this address.

DATES: Comments on the information collection should be directed to the OMB Desk Officer on or before April 24, 1992.

Dated: March 19, 1992.

By direction of the Secretary.

Frank E. Lalley,

Associate Deputy, Assistant Secretary for Information Resources Policies and Oversight.

Extension

1. Request for Identifying Information Re: Veteran's Loan Records, VA Form Letter 26–626.

2. This form letter is used to notify a correspondent that additional information is needed in order to identify and associate their previous correspondence with the correct veteran's loan application or records.

3. Individuals or households.

4. 200 hours.

5. 5 minutes.

6. On occasion.

7. 2,400 respondents.

Vol. 57, No. 58
Wednesday, March 25, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

TIME AND DATE: 10:00 a.m., Thursday, March 26, 1992.

PLACE: Room 600, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Mar-Land Industrial Contractor, Inc.*, Docket No. SE 90-117-M (Issues include whether the judge erred in finding that Mar-Land violated 30 C.F.R. § 56.15005 and that Mar-Land was highly negligent).

2. *Peabody Coal Company*, Docket Nos. KENT 91-340-R, etc. (Issues include whether the judge erred in concluding that miners' representatives are entitled to accompany, with no loss of pay, inspectors of the Secretary of Labor who are engaged in separate inspection functions).

Any person attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR § 2706.150(a)(3) and § 2706.160(d).

CONTACT PERSON FOR MORE INFO: Jean Ellen (202) 653-5629/(202) 708-9300 for TDD Relay, 1-800-877-8339 (Toll Free).

Dated: March 20, 1992.

Part II

Presidential Commission on the Assignment of Women in the Armed Forces

Meeting

THE PRESIDENTIAL COMMISSION ON THE ASSIGNMENT OF WOMEN IN THE ARMED FORCES

Meeting

WHO: The Commission will discuss the proposed agenda for the final report which is required to be transmitted to the President by November 15, 1992. The panel will hear testimony from military services addressing the policies pertaining to the assignment of female service members.

WHEN: Wednesday, March 25, and Thursday, March 26

9:00 am to 11:05 am—Swearing in of Commissioners; Review of agenda and policies

11:10 am to 11:30 am—Press Availability

11:35 am to 1:00 pm—Lunch Break

1:05 pm to 6:00 pm—Military Services Testimony

Where: Department of Health and Human Services, 330 Independence Avenue, SW., Room PH–800, Washington, DC

Contact: Kevin K. Kirk, (202) 653–0864.

W.S. Orr,

Interim-Staff Driector.

The President

Proclamation 6416—Cancer Control Month, 1992

Federal Register
Vol. 57, No. 58
Wednesday, March 25, 1992

Presidential Documents

Title 3—

The President

Proclamation 6416 of March 23, 1992

Cancer Control Month, 1992

By the President of the United States of America

A Proclamation

When our Nation first observed Cancer Control Month more than 50 years ago, few diseases evoked more dread or inspired a greater sense of mystery than cancer. Today, however, thanks to advances in early detection, diagnosis, and treatment, more than half of the people who are diagnosed with cancer survive their disease 5 years or more. While this progress is heartening, each year more than 1,000,000 Americans continue to be diagnosed with cancer—and tens of thousands die of the disease. Thus, the observance of Cancer Control Month warrants as much public attention and cooperation as ever.

Further progress in the fight against cancer depends on continuing research. Through the National Cancer Institute (NCI), the Federal Government supports a nationwide network of cancer centers where physicians and scientists conduct basic research and clinical trials on cancer prevention and treatment. The Institute also helps to support the research of investigators in private laboratories and hospitals across the country.

Basic research has made cancer prevention a realistic expectation and brought us a range of new cancer therapies. Such advances hold promise not only for our fight against cancer but also for our battles against other diseases, such as AIDS. In addition, our Nation's investment in the work of pioneers who are investigating the genetic and molecular bases of cancer has produced an extra dividend: a thriving biotechnology industry that, in turn, has helped to accelerate biomedical research.

To help speed the transfer of the results of biomedical research from the laboratory to the patient, the NCI's Physician Data Query (PDQ) incorporates into a computerized system the newest information about cancer prevention, technologies for early detection, and innovative therapies. Through the PDQ, physicians can readily obtain needed information. Cancer patients and other concerned individuals can dial toll-free numbers to obtain information as well: 1–800–4–CANCER to reach the NCI's Cancer Information Center and 1–800–ACS–2345 to access the Cancer Response System of the American Cancer Society.

While research is helping to lead the way in the fight against cancer, the public also has a key role to play in achieving victory. Each of us can adopt healthy behaviors that lower our risk of developing cancer. Smoking is implicated in at least one-third of all cancer deaths each year—about 170,000 deaths in all. No new drug, therapy, or screening technique would strike as forceful a blow in our fight against cancer as the decision by millions of smokers to quit the habit.

Maintaining a high-fiber, low-fat diet is another effective means of cancer prevention. Americans can reduce their risk of developing colon and other kinds of cancer by reducing their consumption of fatty foods and by increasing their daily intake of fruits, vegetables, and whole grain breads and cereals.

Just as a healthy life-style—one that includes a sensible diet and regular exercise—can help to decrease the risk of developing cancer, periodic cancer screenings and early detection can also save lives. Every American is encouraged to learn about cancer and its warning signs and to supplement regular self-examinations with periodic checkups by his or her doctor. A physician's judgment, which is often based on the use of sophisticated testing equipment, is imperative.

Simple steps like these, along with continuing research, can take us a long way toward our goal of defeating cancer. Indeed, as we continue to unlock the secrets of this complex disease, our failure to take advantage of all that we have learned would be the only mystery that remains.

In 1938, the Congress passed a joint resolution (52 Stat. 148, 36 U.S.C. 150) requesting the President to issue an annual proclamation declaring April to be Cancer Control Month.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the month of April 1992 as Cancer Control Month. I invite the Governors of the fifty States and the appropriate officials of all other areas under the American flag to issue similar proclamations, and I urge every citizen to join in achieving continued progress in the fight against cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.J. Res. 446/P.L. 102–260
Waiving certain enrollment requirements with respect to H.R. 4210 of the 102d Congress. (Mar. 20, 1992; 106 Stat. 85; 1 page) Price: $1.00

S. 1467/P.L. 102–261
To designate the Federal Building and the United States Courthouse located at 15 Lee Street in Montgomery, Alabama, as the "Frank M. Johnson, Jr. Federal Building and United States Courthouse." (Mar. 20, 1992; 106 Stat. 86; 1 page) Price: $1.00

S. 1889/P.L. 102–262
To designate the Federal Building and the United States Courthouse located at 111 South Wolcott Street in Casper, Wyoming, as the "Ewing T. Kerr Federal Building and United States Courthouse." (Mar. 20, 1992; 106 Stat. 87; 1 page) Price: $1.00

S.J. Res. 240/P.L. 102–263
Designating March 25, 1992, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy." (Mar. 20, 1992; 106 Stat. 88; 1 page) Price: $1.00

Last List March 24, 1992

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

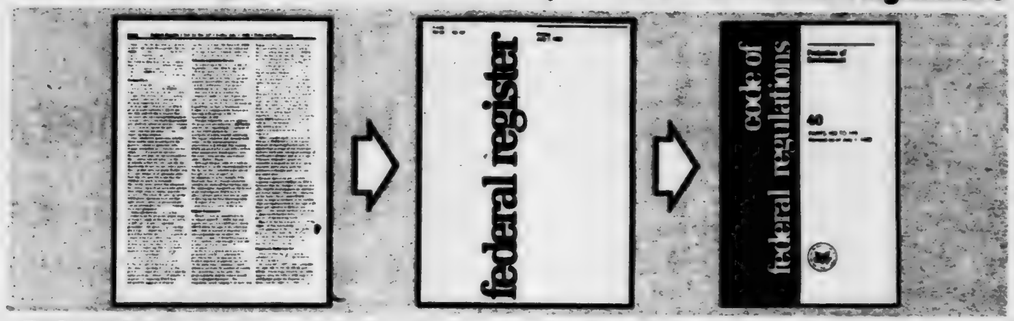
Rev 1-91

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The Federal Register, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register;** and the cumulative **Federal Register Index.**

The Code of Federal Regulations (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register.** Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402–9325.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

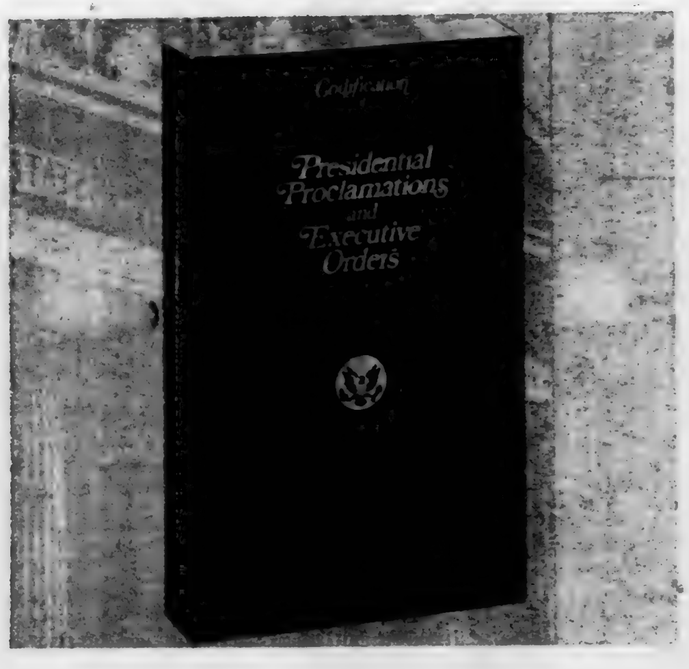
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

T4WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.

Rules and Regulations

Federal Register
Vol. 57, No. 59
Thursday, March 26, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Chapter III

Transfer of Receivership Rules and Removal of Subchapter

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Final rule; technical amendment.

SUMMARY: The FDIC is transferring its receivership rules (12 CFR part 360) from subchapter C to subchapter B of chapter III and removing subchapter C in its entirety from the Code of Federal Regulations. This action is being taken because subchapter C is no longer necessary. Subchapter C was added to accommodate regulations transferred from the Federal Savings and Loan Insurance Corporation by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989. Since the transfer (54 FR 42800, October 18, 1989) all subchapter C regulations, except part 360, have been revoked or incorporated into other FDIC regulations.

EFFECTIVE DATE: March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Jen Hickson, 202–898–3807.

SUPPLEMENTARY INFORMATION: The provisions of section 553 of title 5, United States Code, relating to notice, public participation, and deferred effective date do not apply because this amendment is procedural in nature and does not constitute a substantive rule subject to the requirements of that section.

Accordingly, under the authority of title IV of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (Pub. L. 101–73; 103 Stat. 183, 354), the FDIC is amending 12 CFR chapter III as follows:

PART 360—[AMENDED]

1. Part 360 is transferred from subchapter C to subchapter B.

PART 386—[REMOVED]

2. Subchapter C, consisting of Part 386, which is reserved, is removed.

Dated: March 20, 1992.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91–NM–188–AD; Amendment 39–8207; AD 92–07–11]

Airworthiness Directives; Boeing Model 747–100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Boeing Model 747–100 series airplanes, which requires inspection to detect cracking of the wing front spar web above engine numbers 2 and 3, and repair, if necessary. This amendment is prompted by a report of an 18-inch crack in the front spar web at the attach fitting of the number 3 engine. The actions specified by this AD are intended to prevent fuel leakage onto an engine and a resultant fire.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington, 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Satish Pahuja, Seattle Aircraft Certification Office, Airframe Branch, ANM–120S; telephone (206) 227–2781; fax (206) 227–1181. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to Boeing Model 747–100 series airplanes was published in the **Federal Register**, on October 11, 1991 (56 FR 51349). That action proposed to require repetitive visual and ultrasonic inspections of the wing front spar web above engine numbers 2 and 3 to detect cracks; and repair if necesary. That action also proposed an optional terminating action, consisting of the replacement of fasteners at the upper and lower chord with oversized fasteners.

Interested persons have been afforded and opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Several commenters do not concur with the issuance of the proposed rule, because only one operator reported a single crack on an airplane that had accumulated 19,458 flight cycles. Similar cracking has not been observed on the manufacturer's "Fatigue Test Airplane," which has accumulated 25,601 flight cycles. The FAA does not concur. It has been determined that the crack was caused by fatigue; therefore, similar cracking is likely to develop on the wing front spar web on other Boeing Model 747–100 series airplanes, which are built with identical structural design and fabrication methods.

The Air Transport Association (ATA) of America, on behalf of several of its members, requests that the proposed threshold for inspections be revised. Two members question whether the proposed inspection threshold of 15,000 flight cycles is justified, considering that the airplane on which the subject cracking was detected had accumulated 19,458 flight cycles. These commenters suggest that the proposed threshold for inspections be extended to 18,000 flight cycles. The FAA does not concur. The inspection threshold was established

based upon (1) general priniciples of fatigue crack growth analysis, (2) the average annual utilization of the Boeing Model 747-100 fleet, and (3) the service experience of the airplane on which the cracking was discovered. Based on these factors, the FAA has determined that 15,000 flight cycles represents a conservative estimate of the interval when fatigue cracking may initiate, and when such cracking could be detected by ultrasonic inspection prior to the crack jeopardizing the structural integrity of the wing front spar web.

Other ATA members suggest changes to the proposed compliance times. One member requests that the proposed one-year inspection compliance time for airplanes that have accumulated fewer than 20,000 flight cycles be extended an additional 3 months. Several other commenters request that the compliance period be increased from the proposed one year to 15 months for airplanes that have accumulated between 15,000 and 20,000 flight cycles. These commenters consider that such extensions would ensure that inspections could be accomplished during scheduled heavy maintenance visits, and passenger service would not be disrupted. Also, extension of the proposed one-year compliance time would preclude special scheduling at considerable expense, beyond what was projected by the proposed rule. One commenter requests that the proposed one-year compliance time be increased, because paint stripping would be required in order to perform the inspection, and an airplane would be out of service for at least one day. The FAA concurs that the compliance times can be extended somewhat. The FAA's intent was that the inspections be conducted during a regularly scheduled maintenance visit for the majority of the affected fleet, when the airplanes would be located at a base where special equipment and trained personnel would be readily available, if necessary. Based on the information supplied by the commenters, the FAA now recognizes that 15 months corresponds more closely to the interval representative of most of the affected operators' normal maintenance schedules. Accordingly, paragraphs (a)(2) and (a)(3) of the final rule have been revised to reflect a compliance time of 15 months. The FAA does not consider that this extension will adversely affect safety.

Two commenters recommend that the proposed rule include a terminating action for the repetitive inspections. The FAA notes that provisions for a terminating action were included in paragraph (c)(2) of the notice (and, likewise, in this final rule).

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 135 Boeing Model 747-100 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 87 airplanes of U.S. registry will be affected by this AD, that it will take approximately 16 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $76,560.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-11. Boeing: Amendment 39-8207. Docket 91-NM-188-AD.

Applicability: Model 747-100 series airplanes; as listed in Boeing Alert Service Bulletin 747-57A2266, dated June 6, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent fuel leakage onto an engine and a resultant fire, accomplish the following:

(a) Perform a visual and an ultrasonic inspection of the wing front spar web between front spar station (FSS) 636 and FSS 675 in accordance with Boeing Alert Service Bulletin 747-57A2266, dated June 6, 1991, at the applicable time specified in the following schedule:

(1) For airplanes that have accumulated more than 20,000 flight cycles as of the effective date of this AD, perform the inspections within six months after the effective date of this AD.

(2) For airplanes that have accumulated between 15,000 flight cycles and 20,000 flight cycles as of the effective date of this AD, perform the inspections within 15 months after the effective date of this AD.

(3) For airplanes with fewer than 15,000 flight cycles as of the effective date of this AD, perform the inspections within 15 months after accumulating 15,000 flight cycles.

(b) If cracking is found, prior to further flight, repair in a manner approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

(c) If no cracking is found, accomplish either subparagraph (c)(1) or (c)(2) of this AD:

(1) Repeat the inspections required by paragraph (a) of this AD at intervals not to exceed 2,000 flight cycles.

(2) Install the modification, consisting of the replacement of fasteners, specified in Boeing Alert Service Bulletin 747-57A2266, dated June 6, 1991. Accomplishment of this modification constitutes terminating action for the repetitive inspection requirements of this AD.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(f) The inspections and repairs shall be done in accordance with Boeing Alert Service Bulletin 747-57A2266, dated June 6, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

(g) This amendment becomes effective May 4, 1992.

Issued in Renton, Washington, on March 10, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-7032 Filed 3-25-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-215-AD; Amendment 39-8205; AD 92-07-09]

Airworthiness Directives; Boeing Model 737-300, -400, and -500 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, that currently requires a limitation in the FAA-approved Airplane Flight Manual (AFM) to incorporate certain operational procedures to detect uncommanded changes in the altitude windows of the Mode Control Panel (MCP). This amendment requires modification of the currently-installed MCP. This amendment is prompted by the development of a new MCP that is not susceptible to uncommanded changes in the altitude window. The actions specified by this AD are intended to prevent uncommanded changes that could cause the airplane to fly to an altitude that was not selected by the pilot.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Skaves, Aerospace Engineer, Seattle Aircraft Certification Office, Systems & Equipment Branch, ANM-130S, FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2795; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation regulations by superseding AD 90-07-02, Amendment 39-6547 (55 FR 10605, March 22, 1990), which is applicable to Boeing Model 737-300 series airplanes equipped with Sperry SP300 autopilots, was published in the Federal Register on November 18, 1991 (56 FR 58191). The action proposed to require modification of the currently-installed Mode Control Panel (MCP).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

Two commenters request that the proposed compliance time be extended from 12 to 24 months after the effective date of the AD. One of these commenters states that certain operators are accomplishing the MCP modifications in their own facilities, and that spare MCP availability and existing operator modification capabilities cannot support equipment modification turnaround rates that are high enough to meet the proposed 12 month compliance period. Another commenter points out that timely accomplishment of the modification is dependent upon the ability of Honeywell to quickly rework and return a fixed number of rotatable units. The commenter indicates that most of the units affected by the AD belong to one operator; consequently, retrofit cannot be easily accelerated unless significantly more rotatable units are made available to this operator. Additionally, the commenter believes that, since the operational limitations required by AD 90-07-02 remain in effect until the modification required by this AD is accomplished, flight safety would not be compromised in the interim. The FAA partially concurs. Since operators have been aware of the problem addressed in this AD since the time Boeing issued Service Bulletin 737-22A1098 (January 17, 1991), the FAA has determined that an extension of the proposed compliance time from 12 to 18 months is warranted in order to provide adequate time for operators to comply with the requirements of this AD.

Two commenters suggest that the economic analysis paragraph of the preamble be revised. These commenters state that there are no parts or labor costs involved with this action, since Boeing and Honeywell are covering these costs with regard to the modification. Therefore, only the costs associated with removal and reinstallation of the MCP's will be incurred by the operators. One commenter suggests that the number of work hours required to accomplish this removal and reinstallation should reflect only 1 work hour, rather than the 16 work hour figure that appeared in the preamble to the proposal. Further, the commenter states that labor costs to an airline modifying its own MCP's will be reimbursed at the normal hourly rate paid for warranty repairs. The FAA concurs and, based on this new data, the economic analysis paragraph, below, has been revised accordingly.

One commenter, Honeywell, requests that the final rule provide clarification as to how the modification will be performed. This commenter states that reference to "replacement of MCP's," as stated in the cost analysis information in the preamble to the notice, could result in confusion. The FAA concurs that clarification of this point is necessary: Honeywell is producing modification kits for existing MCP's; once the MCP is modified with this kit, it is assigned a new part number. An operator can either install the modification kit and bill Honeywell for the costs, or send the MCP to a Honeywell service center for installation of the modification kit (at no cost to the operator). Upon request, a spare MCP may be loaned to an operator temporarily, until the operator's modification kit is installed. Honeywell has established a modification schedule to facilitate the flow of units to be modified for operators. To further clarify this point, the FAA has revised paragraph (b) of the final rule to specify that the required action is to "modify" the MCP, rather than "replace."

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 864 Boeing Model 737-300, -400, and -500 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 440 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to remove and reinstall the MCP, and that the average labor rate is $55 per work hour. Modification of the MCP's will be accomplished by the manufacturer and vendor at no cost to the operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $24,200.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6547 (55 FR 10605, March 22, 1990), and by adding a new airworthiness directive (AD), amendment 39-8205, to read as follows:

92-07-09. Boeing: Amendment 39-8205. Docket 91-NM-215-AD. Supersedes AD 90-07-02, Amendment 39-6547.

Applicability: Model 737-300, -400, and -500 series airplanes; equipped with Sperry SP300 Autopilot Flight Control Computers and Mode Control Panels (MCP); certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent uncommanded changes to the target altitude displayed in the altitude window of the autopilot mode control panel (MCP), accomplish the following:

(a) For Model 737-300 series airplanes: Within 10 days after April 5, 1990 (the effective date of AD 90-07-02, Amendment 39-6547), incorporate the following procedures into the Limitations Section of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by inserting a copy of this AD in the AFM.

"Autopilot Limitations

"For airplanes with SP300 autopilot MCP. Flightcrews must use the following procedures:

1. Check MCP settings after any electrical power interruptions.

2. Following change in ALT selection in the MCP window, check ALT display to ensure desired altitude is displayed.

3. Closely monitor altitude during all altitude changes to ensure that the autopilot captures and levels off at the desired altitude.

Note: Standard 'callouts,' crew coordination, and cross-checking of MCP settings and flight instruments are necessary to detect any nonselected MCP display number changes."

(b) For all airplanes: Within 18 months after the effective date of this AD, modify the MCP in accordance with Boeing Alert Service Bulletin 737-22A1098, dated January 17, 1991.

(c) After accomplishment of paragraph (b) of this AD, remove the AFM limitation that is specified in paragraph (a) of this AD.

Note: For Model 737-400 and -500 series airplanes, this limitation was included in the amended type certificate, and must be deleted in accordance with this paragraph.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The modification shall be done in accordance with Boeing Alert Service Bulletin 737-22A1098, dated January 17, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

(g) This amendment becomes effective on May 4, 1992.

Issued in Renton, Washington, on March 10, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-93-AD; Amendment 39-8206; AD 92-07-10]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, that requires the installation of additional protection on the wire bundles in the circuit breaker panel to guard against damage from chafing and to protect the battery bus wiring from overloading. This amendment is prompted by reports of arcing and smoke emanating from the panel, and the discovery of undersized wiring to the battery bus. The actions specified by this AD are intended to prevent smoke and fire in the cockpit emanating from the panel and loss of safety-essential systems.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Matthew S. Wade, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2751; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 737 series airplanes was published in the **Federal Register** on October 8, 1991 (56 FR 50679). That action proposed to require the installation of additional protection on the wire bundles in the circuit breaker panel to guard against damage from chafing and to protect the battery bus wiring from overloading.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposal.

The Air Transport Association (ATA) of America, on behalf of several of its member operators, requests that the proposed compliance time of 6 months be extended. Several members suggest that the proposed compliance time be changed so that the modifications can be scheduled during a "C" check, approximately 18 months. One member points out that an extension of the compliance time is necessary since all electrical power must be removed from each airplane for 10 to 12 hours in order to complete the proposed modification; consequently, retrofit could not be accomplished during a typical overnight hold, because other maintenance activity requiring electrical power could not be completed. The FAA does not concur that an extension of the compliance time is warranted. Continued use of the existing wire between the 28 volt DC battery bus and the Digital Flight Control System poses a hazard to the system itself, as well as the adjoining wire bundles in the P6 panel. Consequently, many systems contained in the wire bundles could be damaged from wire chafing or overheating of the DC battery bus wiring. In developing an appropriate compliance time for the AD, the FAA considered not only the degree of urgency associated with addressing this unsafe condition, but the availability of required parts and the practical aspect of installing the required modification within a maximum interval of time allowable for all affected airplanes to continue to operate without compromising safety. Additionally, the proposed compliance time was selected so that it would fall during an interval of regularly scheduled maintenance for the majority of the affected fleet. Further, since issuance of the NPRM, another incident has occurred, causing 22 wires to chafe and short against the airplane structure. Taking these items into consideration, the FAA considers the compliance time, as proposed, to be justified. However, as provided by paragraph (c) of the final rule, the FAA may consider the approval of an extended interval as an alternative method of compliance, if the operator can provide sufficient data to justify such an extension.

One commenter maintains that if wire bundles located in the P6-2 circuit breaker panel are modified in accordance with Boeing Service Bulletin 737-24-1077, as would be required by proposed paragraph (a), then the failure mode addressed by Boeing Service Bulletin 737-24-1084 (and proposed paragraph (b)) that would produce a 60 amp load on the 28 volt DC battery bus wiring circuit is highly unlikely to occur. In light of this, the commenter believes that the subsequent installation of the correct gauge wire in the circuit breaker panel, as would be required by proposed paragraph (b), is not necessary. The FAA does not concur. As demonstrated by service history and confirmed through fault analysis, either failure mode described in the referenced Boeing service bulletins can occur and each represents an unsafe condition if the undersized wire is operated beyond the carrying limits of current industry standards. Both proposed modifications are necessary in order to fully protect the system and address positively the unsafe condition presented.

The manufacturer recommends that the AD be revised to state that airplanes previously modified in accordance with earlier versions of the cited Boeing service bulletins (that is, Service Bulletin 737-24-1077, dated August 17, 1989, or Revision 1, dated August 16, 1990; or Service Bulletin 737-24-1084, dated October 11, 1990) are considered to be in compliance with the rule. The FAA concurs, and has revised paragraphs (a) and (b) of the final rule to reflect this.

This final rule specifies that Boeing Service Bulletin 737-24-1084, Revision 1, was issued on March 21, 1991, instead of March 8, 1991, as was inadvertently cited in the notice.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes described previously. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 863 Boeing Model 737 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 450 airplanes of U.S. registry will be affected by this AD. Both modifications specified in the rule will be required to be accomplished on approximately 388 airplanes; it will take approximately 10 manhours per airplane to accomplish both modifications. Replacement of the undersized wire will be required to be accomplished on approximately 62 airplanes; it will take approximately 6 manhours per airplane to accomplish the replacement. The average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $233,860.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-12. Boeing: Amendment 39-8208. Docket 91-NM-92-AD.

Applicability: Model 737 airplanes, as listed in Boeing Service Bulletin 737-24-1077, Revision 2, dated July 25, 1991, and Boeing Service Bulletin 737-24-1084, Revision 1, dated March 21, 1991; certificated in any category.

Compliance: Required within 6 months after the effective date of this AD, unless accomplished previously.

To prevent chafing of wires and electrical overload of wires, and to remove the potential for a fire in the cockpit, accomplish the following:

(a) For airplanes listed in Boeing Service Bulletin 737-24-1077, Revision 2 dated July 25, 1991: Modify the wire bundles and install a capped quick release receptacle and nutplate, in accordance with Boeing Service Bulletin 737-24-1077, dated August 17, 1989; or Revision 1, dated August 16, 1990; or Revision 2, dated July 25, 1991.

(b) For airplanes listed in Boeing Service Bulletin 737-24-1084, Revision 1, dated March 21, 1991: Replace the undersized wire with a 12 gauge wire in the P6-2 circuit breaker panel, in accordance with Boeing Service Bulletin 737-24-1084, dated October 11, 1990; or Revision 1, dated March 21, 1991.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The modifications shall be done in accordance with Boeing Service Bulletin 737-24-1077, dated August 17, 1989, or Revision 1, dated August 16, 1990, or Revision 2, dated July 25, 1991; and in accordance with Boeing Service Bulletin 737-24-1084, dated October 11, 1990, or Revision 1, dated March 21, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(f) This amendment becomes effective on May 4, 1992.

Issued in Renton, Washington, on March 16, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-7034 Filed 3-25-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-154-AD; Amendment 39-8208; AD 92-07-12]

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Boeing Model 767 series airplanes, that requires modification of the lever and bracket assemblies and connecting bolts for the off-wing escape slide compartment door opening actuators. This amendment is prompted by reports of operations unable to adjust the travel on the actuator firing pins to obtain the required engagement, and insufficient connecting bolt length. The actions specified by this AD are intended to prevent an inadvertent in-flight off-wing escape slide deployment during flight and consequent damage to the airplane, or failure of the off-wing escape system to deploy when required for an emergency evacuation.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson Claar, Aerospace Engineer, Airframe Branch, ANM-120S, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2784; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 767 series airplanes was published in the **Federal Register** on September 30, 1991 (56 FR 49437). That action proposed to require modification of the lever and bracket assemblies and connecting bolts for the off-wing escape slide compartment door opening actuators.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

Another commenter requests that the applicability of the AD be revised to include only those Boeing Model 767 series airplanes on which a firing pin lever has been installed in accordance with the original version of Boeing Service Bulletin 767-25-0137, and those with the production equivalent through line number 357. The commenter contends that installation of a firing pin lever was intended only as a product improvement to assist operators in performing the required rigging adjustment. The FAA does not concur. The FAA has received reports indicating that some operators have experienced difficulty rigging the compartment doors, in particular, aligning the firing pin lever. Difficulty in rigging the compartment doors could lead to the possibility of airplanes being returned to service with misrigged or inoperative doors. Incorporation of the procedures specified in the original service bulletin will eliminate this difficulty. In light of this information, the FAA has determined that both the installation of the firing pin lever (reference the original version of the service bulletin) and the correction of the bolt length (reference Revision 1 of the service bulletin) are necessary for all airplanes currently listed in the applicability of the Notice in order to ensure that the unsafe condition is corrected.

One commenter questions the justification for proceeding with the proposed rule. This commenter states that there have been no occurrences where the firing pin was not pulled adequately in order to fire the actuator, and no occurrences where inadvertent deployment was caused by pulling the pins by mistake. The FAA does not concur with commenter's suggestion that this AD action is not justified. Although there have been no in-service incidents of inadvertent slide deployment, there have been at least three reports of the inability of crew or maintenance personnel to adjust the travel on the actuator firing pins in order to obtain the required engagement. Sufficient data exist to demonstrate that this factor, coupled with the fact that connecting bolts may have insufficient length, presents a situation that could result in the inadvertent deployment of the slide. Since this unsafe condition potentially could exist on any of the affected airplanes equipped with these escape systems, the FAA has determined that the modification required by this AD represents a positive fix to prevent its occurrence.

One commenter requests that the proposed rule be revised to require only repetitive verification of the travel distance of the actuator firing pins. This commenter believes that modification of the subject unit is not necessary to address the unsafe condition. The FAA does not concur. This AD action reflects the FAA's decision that long term continued operational safety should be assured by actual modification of the airframe to remove the identified problem, rather than by repetitive inspections. As addressed previously, the modification required by this AD action is a positive fix to prevent the occurrence of the addressed unsafe condition.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 318 Boeing Model 767 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 131 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Modification parts will be provided by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $57,640.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-12. Boeing: Amendment 39-8208. Docket 91-NM-164-AD.

Applicability: Model 767 series airplanes, as listed in Boeing Service Bulletin 767-25-0137, Revision 1, dated May 9, 1991, certificated in any category.

Compliance: Required within the next 18 months after the effective date of this AD, unless accomplished previously.

To ensure proper deployment of the off-wing escape system, accomplish the following:

(a) Modify the off-wing escape system in accordance with Boeing Service Bulletin 767-25-0137, Revision 1, dated May 9, 1991.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Boeing Service Bulletin 767-25-0137, Revision 1, dated May 9, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on April 30, 1992.

Issued in Renton, Washington, on March 10, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-7035 Filed 3-25-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-154-AD; Amendment 39-8209; AD 92-07-13]

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes, that requires adjustment of the escape system girt bar locks. This amendment is prompted by a report of an escape slide that failed to deploy and fell to the ground. The actions specified by this AD are intended to ensure proper retention of the girt bar to the girt bar carrier. This condition, if not corrected, could result in the escape system not being available during an emergency evacuation.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson B. Claar, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2784. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an

airworthiness directive (AD) that is applicable to certain Boeing Model 767 series airplanes was published in the Federal Register as a supplemental notice of proposed rulemaking on January 13, 1992 (57 FR 1229). That action proposed to require adjustment of the escape system girt bar locks on Type A and certain Type I emergency exits.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

Both commenters support the rule as proposed.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 354 Boeing Model 767 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 134 airplanes of U.S. registry will be affected by this AD, that it will take approximately 20 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $147,400.

The regulations adopted herein will not have substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-13. Boeing: Amendment 39-8200. Docket 91-NM-154-AD.

Applicability: Model 767 series airplanes; as listed in Boeing Alert Service Bulletin 767-52A0081, Revision 1, dated September 26, 1991; certificated in any category.

Compliance: Required within the next 60 days after the effective date of this AD, unless accomplished previously.

To ensure proper retention of the girt bar to the girt bar carrier, accomplish the following:

(a) Adjust the ball plunger for the girt bar locks in accordance with Boeing Alert Service Bulletin 767-52A0081, Revision 1, dated September 26, 1991.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The repair shall be done in accordance with Boeing Alert Service Bulletin 767-52A0081, Revision 1, dated September 26, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on May 4, 1992.

Issued in Renton, Washington, on March 10, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; British Aerospace Model BAe 125-800A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model BAe 125-800A series airplanes, that requires installation of an improved wash basin water tank shroud drain outlet. This amendment is prompted by reports of wash basin water tank leakage, which could result in ice forming on the aileron control cables. The actions specified by this AD are intended to prevent reduced controllability of the airplane.

DATES: Effective May 4, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain British Aerospace Model BAe 125-800A series airplanes was published in the Federal Register on December 2, 1991 (56 FR 61213). That action proposed to require installation of an improved wash basin water tank shroud drain outlet.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter requests that the FAA require the manufacturer to develop a shield to cover the aileron control cable pulleys in order to prevent the unsafe condition regardless of where the water leak occurs. The commenter notes that the British Aerospace service bulletin referenced in the proposal addresses only one possible source of water leakage that could freeze and result in the unsafe condition. Additionally, the commenter indicates that a Service Difficulty Report on a certain British Aerospace Model BAe 125-800A series airplane has been filed, which depicts another water leak source that could result in ice forming on the aileron control cables.

The FAA does not concur with the commenter's request. The notice proposes corrective action to address service difficulties involving aileron cable freezing that could occur due to failures in an aft lavatory water supply and drain system supplied by British Aerospace at the time the airplane was manufactured. The FAA has determined that the currently proposed corrective action is an adequate solution to problems that the manufacturer's assessment indicates could occur with that system. The commenter's request for a different approach to correct aileron freezing problems is prompted by other service experience involving aileron cable freezing associated with a specific Supplemental Type Certificate (STC)-approved aft bar and ice maker system installation. The FAA plans to investigate the need for different or additonal corrective action to prevent aileron cable freezing on airplanes with the STC-approved aft bar and ice maker installation as a separate project, and will take corrective action, as warranted. However, the FAA would consider a request for approval to correct the aileron cable freezing problem by means other than that specified in this AD, in accordance with the provisions of paragraph (c) of this AD.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 4 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 work hours per airplane to accomplish the required actions, and that the average labor rate of $55 per work hour. Required parts will cost approximately $2,159 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $10,396.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilites among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-03. British Aerospace: Amendment 39-8199. Docket 91-NM-208-AD.

Applicability: Model BAe 125-800A series airplanes, as listed in British Aerospace Service Bulletin 25-67-25A013A, Revision 2, dated October 18, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent reduced controllability of the airplane, accomplish the following:

(a) Within 30 days after the effective date of this AD, drain the water from the wash basin water tank; and fabricate and install a placard to indicate that the wash basin is "inoperative."

(b) Within 3 months after the effective date of this AD, install a new collector/outlet and drain pipe below the wash basin water tank outlet in accordance with British Aerospace Service Bulletin 25-67-25A013A, Revision 2, dated October 18, 1991. After installing the new collector/outlet and drain pipe, remove the placard required by paragraph (a) of this AD.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The installation shall be done in accordance with British Aerospace Service Bulletin 25-67-25A013A, Revision 2, dated October 18, 1991, which includes the following list of effective pages:

Note: The individual pages of this service bulletin are marked only with a "revision level." No dates appear on the pages, except for page 1, which references July 16, 1991, as the issue date of the original version of the service bulletin, and October 18, 1991, as the issue date of Revision 2.

Page No.	Revision level
1, 7-8, 9-10	2
2, 3, 4, 5-6, 11-12, 13, 14	Original

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(f) This amendment becomes effective on May 4, 1992.

Issued in Renton, Washington, on March 5, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 200, 203, and 234

[Docket No. R-92-1514; FR-2855-C-03]

Single Family Development Acceptance of Individual Residential Water Purification Equipment; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule; correction.

SUMMARY: On March 19, 1992 (57 FR 9602), the Department published in the **Federal Register**, a final rule that sets out the circumstances under which the Department will agree to provide FHA mortgage insurance on single family properties for which a loan-to-value ration (LTV) greater than 90% is proposed, and when certain of the requirements associated with water supply systems set out in 24 CFR 200.926d(f), and usually applied to such properties, cannot be met. The purpose of this document is to correct the regulatory text amendatory language indicated in the final rule to reflect the fact that the published rule was indeed a final rule and not a proposed rule. This document will also list the Subject Indexing Terms for 24 CFR parts 200, 203, and 234, and the Federal Domestic Assistance Catalog number that the inadvertently omitted from the published final rule.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Donald Fairman, Manufactured Housing and Construction Standards Division, room 6207, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone, voice: (202) 708–0718; (TDD) (202) 708–4594. (These are not toll-free numbers).

SUPPLEMENTARY INFORMATION: Accordingly, FR Doc. 92–6234, the final rule amending 24 CFR parts 200, 203, and 234, published in the **Federal Register** on Thursday, March 19, 1992 (57 FR 9602) is corrected to read as follows:

PARTS 200, 203, and 234—[CORRECTED]

1. On page 9609, immediately following the end of the preamble and before the words of issuance at the top of the third column, the Federal Domestic Assistance Catalog number (FDAC) and the list of subjects are added to read as follows:

"The Federal Domestic Assistance Catalog number (FDAC) for this final rule is 14.181.

List of Subjects

24 CFR Part 200

"Administrative practice and procedure, Claims, Equal employment opportunity, Fair housing, Home improvement, Housing standards, Lead poisoning, Loan programs—housing and community development, Mortgage insurance, Organization and functions (Government agencies), Reporting and Recordkeeping requirements, and Social security.

24 CFR Part 203

Hawaiian Natives, Home improvement, Loan programs—housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, and Solar energy.

24 CFR Part 234

Condominiums, Mortgage insurance, Reporting and recordkeeping requirements."

2. On page 9609, in the third column, at the top of the page, the words of issuance for parts 200, 203 and 234 is corrected to read as follows:

"Accordingly, the Department amends 24 CFR parts 200, 203, and 234 as follows:".

3. On page 9609, in the third column, item 1 is corrected to read as follows:

"1. The authority citation for part 200 continues to read as follows:

"Authority: Titles I and II, National Housing Act (12 U.S.C. 1701–1715z–18); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d))."

4. On page 9609, in the third column, the amendatory language for item 2 is corrected to read as follows:

§ 200.926d [Corrected]

"2. Section 200.926d is amended by revising paragraph (f)(2)(ii) to read as follows:".

5. On page 9609, in the third column item 3 is corrected to read as follows:

"3. The authority citation for part 203 continues to read as follows:

Authority: Secs. 203, 211, National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d). In addition, subpart C is issued under sec. 230, National Housing Act (12 U.S.C. 1715u)."

6. On page 9609, in the third column, the amendatory language for item 4 is corrected to read as follows:

§ 203.52 [Corrected]

"4. A new § 203.52 is added to subpart A, to read as follows:".

7. On page 9611, in the first column, the amendatory language for item 5 is corrected to read as follows:

§ 203.550 [Corrected]

"5. In subpart C, § 203.550 is amended by revising the first sentence in paragraph (c), and by adding a new second sentence to paragraph (c), to read as follows:".

8. On page 9611, in the second column, item 6 is corrected to read as follows:

"6. The authority citation for part 234 continues to read as follows:

"Authority: Secs. 211, 234, National Housing Act (12 U.S.C. 1715b, 1715y); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). Section 234.520(a)(2)(ii) is also issued under sec. 201(a), National Housing Act (12 U.S.C. 1707(a))."

9. On page 9611, in the second column, the amendatory language for item 7 is corrected to read as follows:

§ 234.64 [Corrected]

"7. A new § 234.64 is added to subpart A, to read as follows:".

Dated: March 20, 1992.

Grady J. Norris,

Assistant General Counsel for Regulations.

[FR Doc. 92–6947 Filed 3–25–92; 8:45 am]

BILLING CODE 4210–27–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AF66

Veterans' Benefits Programs Improvement Act of 1991

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations concerning the frequency of parents' dependency and indemnity compensation (DIC) payments, the eligibility of remarried surviving spouses or married children for the reinstatement of benefits, the presumptive period for leukemia as a radiogenic disease, the definition of a radiation-exposed veteran and the protection of ratings when changes are made in the Schedule for Rating Disabilities (38 CFR part 4). These amendments are necessary to implement recently enacted legislation. The intended effect of these amendments is to bring the regulations into conformance with the new statutory requirements.

EFFECTIVE DATE: These amendments are effective August 14, 1991, the date that Public Law 102–86 was signed into law.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: Section 102 of the Veterans' Benefits Programs Improvement Act of 1991, Public Law 102–86, amended 38 U.S.C. 1315 (formerly 415) to authorize the Secretary to make payment of parents' DIC less frequently than monthly if the amount of the annual benefit is less than 4 percent of the maximum annual rate payable under 38 U.S.C. 1315. The Secretary has decided to exercise that authority by authorizing semiannual payments, but allowing affected beneficiaries to elect to receive payment monthly in cases in which other federal benefits would otherwise be denied. Because of the small number of beneficiaries receiving benefits under this program, and because the difference between the minimum payment of $5 per month and the point at which payment less frequently than monthly is authorized is so slight, the cost of programming to provide for payment at additional intervals is not warranted. VA is amending 38 CFR 3.30 to provide for semiannual payments.

Section 8004 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508, eliminated the eligibility of remarried surviving spouses and married children for reinstatement of benefits when that marital relationship terminates unless the disqualifying marital relationship was void or was annulled. Similarly, the fact that a surviving spouse of a veteran terminated a relationship with another person, in which the surviving spouse held himself or herself out openly to the public as the spouse of that person, was also eliminated as a basis for the reinstatement of benefits. These provisions apply to claims filed after October 31, 1990. Section 502 of Public Law 102–86 provides that the amendments made by section 8004 of Public Law 101–508 do not apply with respect to any individual who on October 31, 1990, was a surviving spouse or child within the meaning of title 38, United States Code, unless after that date that individual marries or, in the case of a surviving spouse, begins to live with another person while holding himself or herself out openly to the public as that person's spouse. VA is amending 38 CFR 3.55, 3.215, 3.400(u), 3.400(v), and 3.400(w) (as amended by 56 FR 25043–45) to implement this new statutory provision.

Section 2 of the Radiation-Exposed Veterans Compensation Act of 1988, Public Law 100–321, provided a 40-year presumptive period for all but one of the conditions for which presumptive service connection may be granted based upon participation in a radiation-risk activity during active military service; a 30-year presumptive period was provided for leukemia. Under Public Law 100–321, reservists who participated in a radiation-risk activity while on active duty for training or inactive duty training are not entitled to presumptive service connection. Section 104 of Public Law 102–86 amended 38 U.S.C. 1112 (formerly 312) to provide for a 40-year presumptive period for the occurrence of leukemia in veterans exposed to radiation, and section 105 of Public Law 102–86 extended presumptive service connection to individuals who were engaged in a radiation-risk activity during active duty for training or inactive duty training. VA is amending 38 CFR 3.309(d) to implement these new statutory provisions.

The VA General Counsel, in O.G.C. Prec. 68–90, determined that VA had no statutory authority to "grandfather" or protect disability evaluations assigned under superceded rating criteria. Section 103 of Public Law 102–86 amended 38 U.S.C. 1155 (formerly 355) to provide that a modification to the rating schedule occurring after August 14, 1991, will not result in a reduction of any disability evaluation unless that disability has actually improved. VA is deleting 38 CFR 3.343(d) since that paragraph is no longer relevant, and is amending § 3.951 to implement this new statutory provision.

VA is issuing a final rule to implement the statutory changes contained in Public Law 102–86. Because these amendments implement statutory changes, publication as a proposal for public notice and comment is unnecessary.

Since a notice of proposed rulemaking is unnecessary and will not be published, these amendments are not a "rule" as defined in and made subject to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601(2). In any case, these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the RFA, 5 U.S.C. sections 601–612. These amendments will not directly affect any small entity.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.105, 64.109 and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved February 7, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3 is amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.30, paragraph (e) is redesignated as paragraph (f), a new paragraph (e) is added, the section heading, introductory text and paragraph headings for paragraphs (a), (b), (c), and (d) are revised to read as follows:

§ 3.30 Frequency of payment of improved pension and parents' dependency and indemnity compensation (DIC).

Payment shall be made as shown in paragraphs (a), (b), (c), (d), (e), and (f) of this section; however, beneficiaries receiving payment less frequently than monthly may elect to receive payment monthly in cases in which other Federal benefits would otherwise be denied.

(a) *Improved pension—Monthly.*

* * * * *

(b) *Improved pension—Quarterly.*

* * * * *

(c) *Improved pension—Semiannually.*

* * * * *

(d) *Improved pension—Annually.*

* * * * *

(e) *Parents' DIC—Semiannually.*

Benefits shall be paid every 6 months on or about June 1, and December 1, if the amount of the annual benefit is less than 4 percent of the maximum annual rate payable under 38 U.S.C. 1315.

* * * * *

3. In § 3.55, paragraphs (b),(c), (d), (e), and the cross reference that appears at the end of the section are revised to read as follows:

§ 3.55 Terminated marital relationships.

* * * * *

(b) Provided that the marriage:

(1) Has been terminated by death, or

(2) Has been dissolved by a court with basic authority to render divorce decrees unless the Department of Veterans Affairs determines that the divorce was secured through fraud by the surviving spouse or by collusion, and

(3) The surviving spouse has not remarried after October 31, 1990, marital relationships terminated on or after January 1, 1971, but prior to November 1, 1990, shall not bar the furnishing of benefits to such surviving spouse.

(c) Provided that the same or similar relationship does not resume after October 31, 1990, the fact that a surviving spouse has lived with another person and has held himself or herself out openly to the public as the spouse of such other person shall not bar the furnishing of benefits to him or her after he or she terminates the relationship, on or after January 1, 1971, but prior to November 1, 1990.

(d) Provided that the same or similar conduct or relationship does not resume after October 31, 1990, the fact that benefits to a surviving spouse may previously have been barred because his or her conduct or a relationship into which he or she had entered had raised an inference or presumption that he or she had remarried or had been determined to be open and notorious adulterous cohabitation, or similar conduct, shall not bar the furnishing of benefits to such surviving spouse after he or she terminates the conduct or relationship, on or after January 1, 1971, but prior to November 1, 1990.

(e) Provided that the marriage:

(1) Has been terminated by death, or

(2) Has been dissolved by a court with basic authority to render divorce decrees unless the Department of Veterans Affairs determines that the divorce was secured through fraud by either party or by collusion, and

(3) The child has not remarried after October 31, 1990, marital relationships terminated on or after January 1, 1971, but prior to November 1, 1990, shall not bar the furnishing of benefits to or for such child.

Cross Reference: Evidence. See § 3.207. Termination of marital relationship or conduct. See § 3.215.

* * * * *

4. Section 3.215 is revised to read as follows:

§ 3.215 Termination of marital relationship or conduct.

With respect to marriages terminated on or after January 1, 1971, but prior to November 1, 1990, benefits may be resumed to an unmarried surviving spouse upon filing of an application and submission of satisfactory evidence that the surviving spouse has ceased living with another person and holding himself or herself out openly to the public as that person's spouse or that the surviving spouse has terminated a relationship or conduct which had created an inference or presumption of remarriage or related to open or notorious adulterous cohabitation or similar conduct, unless the same or similar conduct or relationship resumes after October 31, 1990. Such evidence may consist of, but is not limited to, the surviving spouse's certified statement of the fact.

5. In § 3.309, paragraphs (d)(3) and (d)(4)(i) are revised to read as follows:

§ 3.309 Disease subject to presumptive service connection.

* * * * *

(d) * * *

(3) The presumptive period referred to in paragraph (d)(1) of this section is the 40-year period beginning on the last day on which the veteran participated in a radiation-risk activity.

(4) * * *

(i) The term *radiation-exposed veteran* means either a veteran who while serving on active duty, or an individual who while a member of a reserve component of the Armed Forces during a period of active duty for training or inactive duty training, participated in a radiation-risk activity.

* * * * *

6. In § 3.343, paragraph (d) is removed.

7. In § 3.400, paragraphs (u)(3) and (u)(4), (v)(3) and (v)(4), and (w) are revised to read as follows:

§ 3.400 General.

* * * * *

(u) * * *

(3) *Death.* Date of death if claim is filed within 1 year after that date; otherwise date of receipt of claim. Benefits are not payable unless the provisions of § 3.55(e) of this part are met.

(4) *Divorce.* Date the decree became final if claim is filed within 1 year of that date; otherwise date of receipt of claim. Benefits are not payable unless the provisions of § 3.55(e) of this part are met.

(v) * * *

(3) *Death.* Date of death if claim is filed within 1 year after that date; otherwise date of receipt of claim. Benefits are not payable unless the provisions of § 3.55(b) of this part are met.

(4) *Divorce.* Date the decree became final if claim is filed within 1 year after that date; otherwise date of receipt of claim. Benefits are not payable unless the provisions of § 3.55(b) of this part are met.

(w) *Termination of relationship or conduct resulting in restriction on payment of benefits (38 U.S.C. 103(d)(3), 5110(m), effective January 1, 1971; §§ 3.50(b)(2) and 3.65).*

Date of receipt of application filed after termination of relationship and after December 31, 1970. Benefits are not payable unless the provisions of § 3.55 (c) or (d), as applicable, are met.

* * * * *

8. In § 3.951, the current text is designated as paragraph (b) and a new paragraph (a) and authority citation are added to read as follows:

§ 3.951 Preservation of disability ratings.

(a) A readjustment to the Schedule for Rating Disabilities shall not be grounds for reduction of a disability rating in effect on the date of the readjustment unless medical evidence establishes that the disability to be evaluated has actually improved.

(Authority: 38 U.S.C. 1155)

BILLING CODE 8320-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6925

[CA-940-4214-10; CACA 7435]

Revocation of Secretarial Order Dated June 23, 1908; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes in its entirety a Secretarial order which withdrew 80 acres of National Forest System land for use as an administrative site. The land is no longer needed for this purpose, and the revocation is needed to permit disposal of the land through land exchange under the General Exchange Act of 1922. This action will open the land to such forms of disposition as may by law be made of National Forest System land. The land is temporarily closed to mining by a Forest Service exchange proposal. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: April 27, 1992.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, Federal Office Building, 2800 Cottage Way, room E-2845, Sacramento, California 95825, 916-978-4820.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. The Secretarial Order dated June 23, 1908, which withdrew the following described National Forest System land for use as an administrative site, is hereby revoked in its entirety:

Mount Diablo Meridian

Klamath National Forest
Crawford Creek Administrative Site
T. 38 N., R. 11 W.,
Sec. 20, W½NE¼SW¼, NW¼SW¼, NE¼SW¼SW¼, and NW¼SE¼SW¼.

The area described contains 80 acres in Siskiyou County.

2. At 10 a.m. on April 27, 1992, the land shall be opened to such forms of disposition as may by law be made of National Forest land, subject to valid existing rights, the provision of existing withdrawals, other segregations of record, and the requirements of applicable law.

Dated: March 17, 1992.

Dave O'Neal,

Assistant Secretary of the Interior.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 91-336; RM-7757]

Radio Broadcasting Services; Leesburg and Unadilla, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 278C3 for Channel 279A at Leesburg, Georgia, and modifies the construction permit for Station WEGC(FM) to specify operation on the higher class channel, and substitutes Channel 280A for vacant but applied for Channel 278A at Unadilla, Georgia, at the request of Rowland Albany Radio, Inc. See 56 FR 58864, November 22, 1991. Channel 278C3 can be allotted to Leesburg in compliance with the Commission's minimum distance separation requirements with a site restriction of 11.7 kilometers (7.3 miles) southeast of the community. The coordinates are North Latitude 31-39-09 and West Longitude 84-05-20. Channel 280A can be substituted for vacant but applied for Channel 278A at Unadilla in compliance with the Commission's minimum distance separation requirements with a site restriction of 3.3 kilometers (2.1 miles) northwest of the community, in order to avoid a short-spacing to Station WSGY(FM), Channel 262C, Tifton, Georgia. The coordinates are North Latitude 32-17-13 and West Longitude 83-45-13. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

[MM Docket No. 90-592; RM-7074; RM-7659]

Radio Broadcasting Services; Oak Grove, Bastrop, and Dubach, LA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of William W. Brown (RM-7659), substitutes Channel 249C3 for Channel 249A at Dubach, Louisiana. Channel 249C3 can be allotted to Dubach in compliance with the Commission's minimum distance separation requirements with a site restriction of 5.4 kilometers (3.3 miles) south to accommodate Brown's desired site. The coordinates for Channel 249C3 at Dubach are 32-39-11 and 92-40-38. The proposal filed by 98.7 FM Radio, Inc. (RM-7074), requesting the substitution of Channel 244C2 for Channel 244C3 at Oak Grove and the substitution of channel 248A for Channel 247A at Bastrop, Louisiana, is dismissed. See 55 FR 51133, December 12, 1990. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

[MM Docket No. 90-544; RM-7527 and RM-7515]

Radio Broadcasting Services; Thief River Falls and Walker, MN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 256C1 for Channel 256C2 at Walker, Minnesota, and modifies the license for Station KLLZ-FM (formerly KLLR-FM), in response to a petition filed by Thomas E. Ferebee and Sioux Valley Broadcasting Co. See 55 FR 48257, November 20, 1990. Channel 256C1 can be allotted to Walker, Minnesota, in compliance with the Commission's spacing requirements at coordinates 47-12-42 and 94-55-02. Canadian concurrence has been obtained for this allotment. The counterproposal filed by Olmstead Broadcasting, Inc., to substitute Channel 257C2 for Channel 257A at Thief River Falls, Minnesota, has been denied (RM-7615). With this action, this proceeding is terminated.

EFFECTIVE DATE: May 4, 1992.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 663

[Docket No. 920109-2009]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of fishing restriction; request for comments.

SUMMARY: NOAA announces the reduction of the daily trip landing limit for sablefish taken with nontrawl gear from 1,500 pounds to 500 pounds. This action is necessary to comply with the 1992 notice of fishery specifications and management measures that specified if 440 metric tons are projected to be taken before the regular season begins, the 500-pound trip landing limit imposed at the beginning of the year will be reimposed until the beginning of the regular season.

DATES: Effective from 0001 hours March 20, 1992. Comments will be accepted until April 6, 1992.

ADDRESSES: Send comments to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., Bldg. 1, Seattle, Washington 98115; or E. Charles Fullerton, Director Southwest Region, National Marine Fisheries Service, 501 West Ocean Blvd; Suite 4200, Long Beach, California 90802-4213.

FOR FURTHER INFORMATION CONTACT: William L. Robinson at (206) 526-6140; or Rodney R. McInnis at (310) 980-4040.

SUPPLEMENTARY INFORMATION: The notice of 1992 groundfish fishery specifications and management measures (57 FR 1654; January 15, 1992) announced a two-tier scheme of trip landing limits for the nontrawl sablefish fishery that began in January and was intended to extend until the beginning of the regular nontrawl sablefish season. The fishing year began with a 500-pound daily trip limit which was increased to 1500 pounds on March 1, 1992. If 440 metric tons (mt) of the 3,612 mt designated for the nontrawl sablefish fishery is projected to be taken prior to the beginning of the regular season, which is currently scheduled to begin April 1, 1992, the 500-pound daily trip limit is to be reimposed until the beginning of the regular season.

Between January 1, 1992 and February 29, 1992, about 70 mt is estimated to have been taken under the 500-pound daily trip limit. During the first week of March, under the 1500-pound trip limit, about 200 mt of sablefish is estimated to have been taken. Because the amount of effort in the fishery has not diminished, it is projected that at least 200 mt will have been landed between March 8-14 bringing the season total to at least 470 mt as of March 14, 1992.

Thus NOAA is reimposing the 500-pound daily trip limit until the beginning of the regular season. The public should be aware that NOAA is considering an emergency regulation to delay the beginning of the regular season from April 1, 1992, until May 12, 1992. If this emergency regulation is implemented, the 500-pound daily trip limit will apply through May 11, 1992.

Secretarial Action

For the reasons stated above, the Secretary of Commerce announces that:

(1) From 0001 hours April 20, 1992, until 2400 hours on the last day before the 1992 nontrawl sablefish regular season begins, the daily trip limit for sablefish caught with nontrawl gear is 500 pounds. This trip limit applies to sablefish of any size.

(2) This restriction applies to all sablefish caught with nontrawl gear between 3 and 200 nautical miles offshore of Washington, Oregon, and California. All sablefish caught with nontrawl gear and possessed between 0 and 200 nautical miles offshore or landed in Washington, Oregon, or California are presumed to have been taken and retained between 3 and 200 nautical miles offshore of Washington, Oregon, or California unless otherwise demonstrated by the person in possession of those fish.

Classification

The determination to reduce the daily drip limit for the nontrawl sablefish fishery is based on the most recent data available. The aggregate data upon which the determination is based are available for public inspection at the Office of the Director, Northwest Region (see **ADDRESSES**) during business hours until April 6, 1992.

Because any delay in implementation of the this action would result in greater than 440 mt being landed in the nontrawl sablefish fishery prior to the beginning of the regular season, the Secretary finds that additional advance notice and public comment on this change are impracticable and not in the public interest, and that no delay should occur in its effective date. Public comments were accepted for 15 days after publication of 57 FR 1654 (January 15, 1992) in the **Federal Register** which announced NOAA's intent to take this action. No comments were received. The Secretary therefore finds good cause to waive the 30-day delayed effectiveness requirement of the Administrative Procedure Act.

This action is authorized by Amendment 4 to the FMP for which a Supplemental Environmental Impact Statement (SEIS) was prepared in accordance with the National Environmental Policy Act (NEPA). Because this action and its impacts have not changed significantly from those considered in the SEIS, this action is categorically excluded from the NEPA requirement to prepare an environmental assessment in accordance with paragraph 6.02c3(f) of the NOAA Administrative Order 216-6.

This action is taken under the authority of 50 CFR 663.23(c) and section III.B.1. of the Appendix to 50 CFR part 663, and is in compliance with Executive Order 12291. The action is covered by the Regulatory Flexibility Analysis prepared for the authorizing regulations.

[Docket No. 911182-2044]

RIN 0648-AE47

Groundfish of the Gulf of Alaska; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues final regulations to implement Amendment 17 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI) and Amendment 22 to the FMP for Groundfish of the Gulf of Alaska (GOA). These regulations implement FMP amendment measures, which. (1) Establish a new management subarea in the BSAI; (2) establish area closures around walrus haulout sites in the BSAI; (3) remove Statistical Area 68 in the GOA; and (4) authorize the Regional Director, Alaska Region, NMFS, to issue experimental fishing permits in the GOA and/or BSAI. Certain technical changes to existing regulations are implemented. Two technical amendments to directed fishing standards for BSAI rockfish and GOA flatfish also are implemented. These actions are necessary to promote management and conservation of groundfish and other living marine resources. They are intended to further the goals and objectives contained in the FMPs that govern these fisheries.

EFFECTIVE DATE: Effective on April 24, 1992, except § 675.22(f) which is effective 12 noon, Alaska local time (Alt), April 1, 1992.

ADDRESSES: Copies of the environmental assessment/regulatory impact review/final regulatory flexibility analysis (EA/RIR/FRFA) may be obtained from the North Pacific Fishery Management Council, P O. Box 103136, Anchorage, AK 99510 (telephone 907-271-2809).

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg, Acting Chief, Fishery Management Division, Alaska Region, NMFS, 907-586-7230.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the Exclusive Economic Zone (EEZ) of the GOA and BSAI are managed by the Secretary of Commerce (Secretary) according to FMPs prepared by the North Pacific Fishery Management Council (Council) under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The FMPs are implemented by regulations for the foreign fishery at 40 CFR part 611 and for the U.S. fishery at 50 CFR parts 672 and 675. General regulations that also pertain to U.S. fisheries appear at 50 CFR part 620.

During its August 13-15, 1991, meeting, the Council approved Amendments 17 and 22 for review by the Secretary under section 304(b) of the Magnuson Act. Section 304(b) requires the Secretary, or his designee, to approve, disapprove, or partially disapprove FMPs or FMP amendments any time after the 60th day after the receipt date and before the close of the 95th day following receipt. A Notice of Availability of the proposed amendments was published in the **Federal Register** (56 FR 56353; November 4, 1991). It invited review of, and comment on, the amendments until December 27, 1991. A notice of proposed rulemaking was published in the **Federal Register** on December 4, 1991 (56 FR 63487). It invited comments on the proposed rule implementing the amendments through January 13, 1992. One hundred and fifty letters of comments were received. They are summarized and responded to below in the "Response to comments" section.

The Regional Director has reviewed and approved the measures in amendments 17 and 22 and the reasons for them and has determined that they are necessary for conservation and management of the groundfish fisheries off Alaska. This final rule: (1) Establishes the Bogoslof subarea in the BSAI, (2) establishes groundfish fishing closures around walrus haulout sites in the BSAI; (3) rescinds Statistical Area 68 in the GOA; and (4) authorizes the Regional Director to issue experimental fishing permits for the GOA and/or BSAI groundfish fisheries. A full description of these measures and their justification are presented in the December 4, 1991, notice of proposed rulemaking.

With respect to measure (4) above, regulations are set forth for the GOA at 50 CFR 672.6. Regulations at 50 CFR 675.6 require persons interested in experimental fishing permits for the BSAI to comply with the provisions at § 672.6.

In addition to the above measures, certain existing regulations were proposed to be amended as discussed in the December 4, 1991, notice of proposed rulemaking. These amendments are listed as follows:

1. In § 672.20(f)(1) (i), (ii), and (iii), the phrase "* * * the Regional Director will publish a notice in the **Federal Register** prohibiting fishing by JVP and DAP vessels * * *" was proposed to be revised to read, "* * * NMFS will publish a notice in the **Federal Register** prohibiting directed fishing for groundfish by JVP and DAP vessels * * *".

2. Section 672.20(g)(3) was proposed to be amended to clarify authority for State of Alaska management of the demersal shelf rockfish fishery by referring to Alaska Administrative Code 28.170 for directed fishing standards that apply to demersal shelf rockfish.

3. A definition of "non-pelagic trawl", a term already used elsewhere in implementing regulations, was proposed to be added to §§ 672.2 and 675.2.

4. In § 675.20(h)(2), the first sentence was proposed to be revised to read, "Using trawl gear for yellowfin sole, 'other flatfish,' or arrowtooth flounder until May 1." After the general flatfish season starts on May 1, directed fishing standards specify that yellowfin sole, "other flatfish," or arrowtooth flounder will be allowed in amounts up to 20 percent of other fish species on board the vessel during the same trip.

5. Sections 672.2 and 675.2 were proposed to be amended by revising the definitions of groundfish. Rather than listing individual groundfish species, the definitions would reference §§ 672.20(a)(1) or 675.20(a)(1).

6. Paragraphs 672.24(a) and 675.24(a) were proposed to be amended to require fishermen using pots in the groundfish fishery to mark each pot with a tag that identifies the pot as being used in the groundfish fishery.

Each of the above regulatory amendments was discussed in the same **Federal Register** notice (56 FR 63487; December 4, 1991) that proposed regulations implementing Amendments 17 and 22. Each of these amendments is intended to clarify, or promote, management of the groundfish fisheries off Alaska. The amendments were approved in principle by NMFS on January 31, 1992. However, a moratorium on proposed and final rules was issued by the President on January 28, 1992. Four of these six amendments do not fall within any of the exemptions to the moratorium and, although they have been approved in principle, are not included in this final rule. The two amendments concerning State of Alaska authority to manage the demersal shelf rockfish fishery and the definition of groundfish are technical in nature and, because they do not constitute a substantive change to existing regulations, are implemented. A final rule implementing the remaining four regulatory amendments will be issued after the moratorium has ended.

Changes in the Final Rule From the Proposed Rule

This final rule includes changes from the proposed rule. These changes are described as follows:

1. Technical amendments to §§ 672.20(g)(1)(i) and 675.20(h)(3)(iii) are implemented. First, § 672.20(g)(1) presently contains a definition of a directed sablefish trawl fishery, which reads, in part:

> The operator of a vessel is engaged in the directed fishing for sablefish if he retains at any particular time during a trip sablefish caught using trawl gear in an amount equal to or greater than:
> (i) 15 percent of the aggregate amount of deepwater flatfish species, including Dover sole, rex sole, and flathead sole, * * *.

Because flathead sole has been separated from the deepwater flatfish target species category identified in the notice of final specifications as provided in the § 672.20(c)(1)(ii), flathead sole is not a deep water flatfish, and the current regulation technically is wrong. Section 672.20(g)(1)(i) is revised to reflect this.

Second, the definition of a directed rockfish fishery contained in § 675.20(h)(3)(iii), reads:

> For rockfish, 10 percent of the total amount of all sablefish and Greenland turbot retained at the same time on the vessel during the same trip plus 1 percent of the total amount of other fish species retained at the same time on the vessel during the same trip.

This definition is not operative when some rockfish fisheries are open and some are closed. Because a definition is necessary to allow measures against rockfish target species categories for which directed fisheries are open, § 675.20(h)(3)(iii) has been revised.

Neither technical amendment has an impact other than to render effective management of directed fishing closures.

2. In § 675.24 (c)(1)(i) and (f)(1), references to the Bogoslof Subarea are added to reflect the division of the former Bering Sea Subarea into a smaller Bering Sea Subarea and the newly established Bogoslof Subarea.

3. The final rule revises the definition of groundfish, removes Table 1 from §§ 672.20 and 675.20 and amends §§ 672.20(a)(1) and 675.20(a)(1) to include a reference to Table 1 of the annual notice of harvest limits for groundfish as provided in §§ 672.20(c)(1) and 675.20(a)(7). These changes to the proposed rule are necessary to reflect the intent of the proposed rule to provide a single reference source for groundfish. All references to Table 1 throughout parts 672 and 675 have been revised to refer to §§ 672.20(a)(1) and 675.20(a)(1).

4. In § 672.20, paragraph (g)(3) is redesignated (g)(4), and a new paragraph (g)(3) is added. Paragraph (g) contains a series of directed fishing standards. This change maintains the function of the last paragraph under paragraph (g).

5. In § 672.24(a), paragraph (2) is revised by removing the phrase "in good condition" and replacing it with the phrase, "* * * so the markings are clearly visible." This change clarifies the purpose of this regulation.

Response to Comments

One hundred fifty letters of comments were received during the comment period. Each was directed at the proposed measure to prohibit groundfish operations between 3 and 12 miles of walrus haulout sites known as Round Island, the Twins, and Cape Pierce for purposes of reducing noise associated with groundfish trawl operations. One hundred forty-nine letters supported this measure. One recommended that even larger areas should be established to protect walrus haulout sites. Comments were of three types and are summarized and responded to below:

Comment: The measure that prohibits groundfish operations within the 12 miles of walrus haulout sites at Round Island, the Twins, and Cape Pierce should be approved.

Response: The Regional Director concurs and approved this measure.

Comment: The North Pacific Fishery Management Council provided a written comment after its December 1991 meeting, recommending that the measure establishing the walrus haulout sites be disapproved. Upon reviewing its December 1991 action during its January 1992 meeting, after the comment period had closed, the Council recommended instead that the measure be approved as initially recommended at its August 1991 meeting.

Response: The Regional Director notes the Council's actions.

Comment: Alternative 3 contained in the EA should be implemented, because closed areas would be larger and would afford greater protection to those haulout sites used by walrus.

Response: Although Alternative 3 would implement a larger area that would be closed to groundfish operations, no evidence is available to indicate that it is a superior alternative. This measure will be reviewed periodically with respect to its effectiveness and may be adjusted as necessary.

Classification

The Regional Director determined, and the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), concurred, that the FMP amendments and their implementing regulations are necessary for the conservation and management of the groundfish fisheries in the GOA and BSAI and that they are consistent with the Magnuson Act and other applicable law.

The Council prepared an EA for these amendments. The Assistant Administrator found that no significant impact on the quality of the human environment will result from this rule. A copy of the EA may be obtained from the Council (See **ADDRESSES**).

On October 22, 1991, NMFS concluded informal consultation under section 7 of the Endangered Species Act concerning Amendments 17/22. NMFS concluded that adoption of the management measures proposed in amendments 17/22 was not likely to adversely affect listed species in a manner or to an extent not previously considered in three formal consultations on these fisheries. The analysis and consensus of the October conclusion were supplemented by a formal biological opinion dated January 21, 1992. The January opinion analyzed the 1992 total allowable catch (TAC) specifications for the BSAI, and specifically analyzed the impact of the reduced TAC specification for the newly created Bogoslof subarea. The January opinion concluded that, with the implementation of Steller sea lion protection measures, the 1992 TAC specifications would not jeopardize the continued existence of this species.

This Assistant Administrator determined that this rule is not a "major rule" requiring a regulatory impact analysis under E.O. 12291. This determination is based on the EA/RIR/FRFA prepared by the Council. A copy of the EA/RIR/FRFA may be obtained from the Council (see **ADDRESSES**).

The Assistant Administrator concluded that this rule will have significant effects on a substantial number of small entities. These effects have been discussed in the EA/RIR/FRFA, a copy of which may be obtained from the Council (see **ADDRESSES**).

This rule contains a collection-of-information requirement for purposes of the Paperwork Reduction Act. A request to collect this information has been approved by OMB as a revision to OMB No. 0648-0206. Information collected under the rule regarding experimental fishing permits is limited to that necessary to determine whether such a permit should be issued and to monitor the progress of the experimental fishing. The additional burden is estimated to be about 240 hours per year, assuming 20

applicants apply for a permit each year. The 240-hour estimate assumes that each applicant might spend as many as 10 hours preparing an application and 2 hours preparing and submitting a report about the experiment. Each applicant would spend 12 hours per year. Therefore, 20 applicants would spend a total of 240 hours per year. Send comments regarding this burden estimate or any other aspect of this collection of information to NMFS (see **ADDRESSES**) and to the Office of Information and Budget, (see **ADDRESSES**). This rule also includes changes to statistical areas that would affect reporting requirements already approved by OMB under Approval Number 0648–0213. In addition, the data requirements under §§ 672.5 and 675.5 have been approved by OMB under Approval Number 0648–0213.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management program of Alaska. This determination has been submitted for review by the responsible State of Alaska agencies under section 307 of the Coastal Zone Management Act. Consistency is automatically inferred, because the appropriate State agency did not reply within the statutory time period.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

To afford maximum opportunity for public comment and participation, the Administrative Procedure Act (5 U.S.C. 553) requires that, generally, final rules be published not less than 30 days before they become effective. This 30-day period may be shortened or waived if the rulemaking agency publishes with the rule an explanation of what good cause justifies an earlier date. This rule, implementing Amendment 17 to the FMP, establishes permanently a seasonal closure (April 1 through September 30) for directed fishing for groundfish in the Exclusive Economic Zone (EEZ) within 12 miles of islands named Round Island and The Twins, and around Cape Peirce. The purpose of the closure is to reduce noise associated with groundfish trawl operations during the time of the year that the walrus use these areas for haulout sites. The seasonal closure corresponds directly to the period of peak walrus utilization. This measure addresses potential disturbance problems by prohibiting groundfish operations within the 12 miles of the walrus haulout sites during the seasonal closure. These closures were originally authorized by regulation implementing Amendment 13 to the BSAI FMP (54 FR 50386; December 6, 1989); However, the authority expired on December 31, 1991. The public had an opportunity to comment on the proposed rule to implement 17. Of the 150 comments received, 149 supported the closure and one recommended that even larger areas should be established to protect walrus haulout sites. The Assistant Administrator has determined that the closures are necessary and the potential disruption to the walrus make it impracticable and contrary to the public interest to delay its effective date. Therefore, § 675.22(f) is effective at 12 noon, Alt, April 1, 1992. Other measures contained in the rule will be effective after the 30-day cooling off period, as noted above.

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: March 20, 1992.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR parts 672 and 675 are amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 672.2, the definition of "groundfish" is revised and the definition of "statistical area" is amended by removing paragraph (6) and revising the introductory text and paragraph (5) of the definition, to read as follows:

§ 672.2 Definitions.

* * * * *

Groundfish means target species categories and the "other species" category, referenced in § 672.20(a)(1).

* * * * *

Statistical area means any one of the five statistical areas of the EEZ in the Gulf of Alaska defined as follows:

* * * * *

(5) Statistical Area 65—between 132°40′ and 140° W. longitudes and north of 54°30′ N. latitude;

* * * * *

3. In § 672.5, paragraph (b)(3)(ii)(A)(*11*) is amended by revising the last sentence of the introductory text, paragraph (c)(2)(iii)(I) is amended by revising the first sentence, and paragraph (c)(3)(ii)(F) is revised, to read as follows:

§ 672.5 Recordkeeping and reporting.

* * * * *

(b) * * *

(3) * * *

(ii) * * *

(A) * * *

(*11*) * * * Product information must include the following information for any product resulting from the processing of any groundfish species or species group for which a total allowable catch (TAC) is specified under § 672.20 of this part, with one exception: Species within the "other species" category must be reported by species or species group identified in § 672.20(a)(1).

* * * * *

(c) * * *

(2) * * *

(iii) * * *

(I) The fish product weight of each product produced during the weekly reporting period, including species and product-type codes, for each groundfish species or species group for which a total allowable catch is specified under § 672.20, with one exception: Species within the "other species" category must be reported by the species or species group identified in § 672.20(a)(1). * * *

* * * * *

(3) * * *

(ii) * * *

(F) The fish product weight of each product produced during a day, including species and product-type codes, for each groundfish species or species group for which a total allowable catch is specified under § 672.20 of this part, with one exception: Species within the "other species" category must be reported by species or species group identified in § 672.20(a)(1).

* * * * *

4. Section 672.6, which was reserved, is added to read as follows:

§ 672.6 Experimental fisheries.

(a) *General.* For limited experimental purposes, the Regional Director may authorize, after consulting with the Council, fishing for groundfish in a manner that would otherwise be prohibited. No experimental fishing may be conducted unless authorized by an experimental fishing permit issued by the Regional Director to the participating vessel owner in accordance with the criteria and procedures specified in this section. Experimental fishing permits will be issued without charge and will expire at the end of a calendar year unless otherwise provided for under paragraph (e) of this section.

(b) *Application.* An applicant for an experimental fishing permit shall submit to the Regional Director, at least 60 days before the desired effective date of the experimental fishing permit, a written application including, but not limited to, the following information:

(1) The date of the application;

(2) The applicant's name, mailing address, and telephone number;

(3) A statement of the purpose and goal of the experiment for which an experimental fishing permit is needed, including a general description of the arrangements for disposition of all species harvested under the experimental fishing permit;

(4) Technical details about the experiment, including:

(i) Amounts of each species to be harvested that are necessary to conduct the experiment, and arrangement for disposition of all species taken;

(ii) Area and timing of the experiment;

(iii) Vessel and gear to be used;

(iv) Experimental design (e.g., sampling procedures, the data and samples to be collected, and analysis of the data and samples); and

(v) Provision for public release of all obtained information, and submission of interim and final reports;

(5) The willingness of the applicant to carry observers, if required by the Regional Director, and a description of accommodations and work space for the observer(s);

(6) Details for all coordinating parties engaged in the experiment and signatures of all representatives of all principal parties;

(7) Information about each vessel to be covered by the experimental fishing permit, including:

(i) Vessel name;

(ii) Name, address, and telephone number of owner and master;

(iii) U.S. Coast Guard documentation, State license, or registration number;

(iv) Home port;

(v) Length of vessel;

(vi) Net tonnage;

(vii) Gross tonnage;

(8) The signature of the applicant; and

(9) The Regional Director may request from an applicant additional information necessary to make the determinations required under this section. Any application that does not include all necessary information will be considered incomplete. An incomplete application will not be considered to be complete until the necessary information is provided in writing. An applicant for an experimental fishing permit need not be the owner or operator of the vessel(s) for which the experimental fishing permit is requested.

(c) *Review procedures.* (1) The Regional Director, in consultation with the Alaska Fishery Science Center, will review each application and will make a preliminary determination whether the application contains all the information necessary to determine if the proposal constitutes a valid fishing experiment appropriate for further consideration. If the Regional Director finds any application does not warrant further consideration, the applicant will be notified in writing of the reasons for the decision.

(2) If the Regional Director determines any application is complete and warrants further consideration, he will initiate consultation with the Council by forwarding the application to the Council. The Council's Executive Director shall notify the applicant of a meeting at which the Council will consider the application and invite the applicant to appear in support of the application if the applicant desires. If the Regional Director initiates consultation with the Council, the Secretary will publish a notice of receipt of the application in the **Federal Register** with a brief description of the proposal.

(d) *Notifying the applicant.* (1) The decision of the Regional Director, after consulting with the Council, to grant or deny an experimental fishing permit is the final action of the agency. The Regional Director shall notify the applicant in writing of the decision to grant or deny the experimental fishing permit and, if denied, the reasons for the denial, including:

(i) The applicant has failed to disclose material information required, or has made false statements as to any material fact, in connection with the application;

(ii) According to the best scientific information available, the harvest to be conducted under the permit would detrimentally affect living marine resources, including marine mammals and birds, and their habitat in a significant way;

(iii) Activities to be conducted under the experimental fishing permit would be inconsistent with the intent of this section or the management objectives of the FMP;

(iv) The applicant has failed to demonstrate a valid justification for the permit;

(v) The activity proposed under the experimental fishing permit could create a significant enforcement problem;

(vi) The applicant failed to make available to the public information that had been obtained under a previously issued experimental fishing permit; or

(vii) The proposed activity had economic allocation as its sole purpose.

(2) In the event a permit is denied on the basis of incomplete information or design flaws, the applicant will be provided an opportunity to resubmit the application, unless a permit is denied because experimental fishing would detrimentally affect living marine resources, be inconsistent with the management objectives of the FMP, create significant enforcement problems, or have economic allocation as its sole purpose.

(e) *Terms and conditions.* The Regional Director may attach terms and conditions to the experimental fishing permit that are consistent with the purpose of the experiment, including but not limited to:

(1) The maximum amount of each species that can be harvested and landed during the term of the experimental fishing permit, including trip limitations, where appropriate;

(2) The number, sizes, names, and identification numbers of the vessels authorized to conduct fishing activities under the experimental fishing permit;

(3) The time(s) and place(s) where experimental fishing may be conducted;

(4) The type, size, and amount of gear that may be used by each vessel operated under the experimental fishing permit;

(5) The condition that observers be carried aboard vessels operated under an experimental fishing permit;

(6) Reasonable data reporting requirements (OMB Approval No. 0648–0206);

(7) Such other conditions as may be necessary to assure compliance with the purposes of the experimental fishing permit and consistency with the FMP objectives; and

(8) Provisions for public release of data obtained under the experimental fishing permit.

(f) *Effectiveness.* Unless otherwise specified in the experimental fishing permit or a superseding notice or regulation, an experimental fishing permit is effective for no longer than 1 calendar year, but may be revoked, suspended, or modified during the calendar year. Experimental fishing permits may be renewed following the application procedures in paragraph (b) of this section.

5. In § 672.20, paragraph (a)(1) is amended by revising the last sentence; Table 1 to the section is removed; paragraph (c)(2) is amended by revising the second sentence; paragraph (c)(3) is amended by revising the first sentence; paragraphs (c)(6), (d)(1)(i), (e)(4), and (g)(1)(i) are revised; paragraph (g)(3) is

redesignated (g)(4); and a new paragraph (g)(3) is added to read as follows:

§ 672.20 General limitations.

(a) * * *

(1) * * * The species categories are defined in Table 1 of the notice of specifications as provided in § 672.20(c)(1).

* * * * *

(c) * * *

(2) *Notices prohibiting directed fishing.* * * * The amount of a species or species group apportioned to a fishery or, with respect to pollock, to a quarterly allowance, is the amount identified in the notice of specifications as provided in § 672.20(c)(1) as these amounts are revised by inseason adjustments, for that species or species group, as identified by regulatory area or district and as further identified according to any allocation of TALFF, the apportionment for JVP, the apportionment for DAP, the quarterly allowance of pollock and, if applicable, as further identified by gear type. * * *

(3) *Notices of closure.* If the Regional Director determines that the TAC for any target species or of the "other species" category in a regulatory area or district identified in the notice of specifications as provided in § 672.20(c)(1) has been or will be reached, the Secretary will publish a notice in the **Federal Register** declaring that the species or species group is to be treated as a prohibited species under paragraph (e) of this section in all or part of that area or district. * * *

* * * * *

(6) *Prohibition of JVP or TALFF fishing if PSC limit is or will be reached.* If the Regional Director determines that a PSC limit applicable to a directed JVP or TALFF fishery in a regulatory area or district identified in the notice of specifications as provided in § 672.20(c)(1) is or will be reached, the Secretary will publish a notice of closure in the **Federal Register** prohibiting all further JVP or TALFF fishing in or all or part of the regulatory area or district concerned.

(d) * * *

(1) * * *

(i) In accordance with paragraph (d)(5) of this section and as soon as practicable after April 1, June 1, and August 1, and on such other dates as he determines necessary, the Secretary, after consultation with the Council, may reapportion to TALFF, part or all of the reserves identified in the notice of specifications as provided in § 672.20(c)(1).

* * * * *

(e) * * *

(4) In any regulatory area where the TAC in the notices provided for in § 672.20(c) for any species is zero, any catch of that species by a vessel regulated by this part, in that fishing area, will be considered catch of a "prohibited species" and will be treated in accordance with this paragraph.

* * * * *

(g) * * *

(1) * * *

(i) 15 percent of the aggregate amount of deepwater flatfish species, flathead sole, and rockfish species of the genera *Sebastes* and *Sebastolobus* retained at the same time by the vessel during the same trip; plus

* * * * *

(3) *Demersal shelf rockfish.* Directed fishing standards for demersal shelf rockfish in management areas within the Eastern Regulatory Area, for which a total allowable catch is specified in § 672.20(a)(1), are governed by title 5 of the Alaska Administrative Code, section 28.170.

* * * * *

6. In § 672.24, paragraph (a)(2) is revised to read as follows:

§ 672.24 Gear limitations.

(a) * * *

(2) Markings shall be in characters at least 4 inches (10.16 cm) in height and one-half inch (1.27 cm) in width in a contrasting color visible above the water line and shall be maintained so the markings are clearly visible.

* * * * *

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

7. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

8. In § 675.2, the definition of "Bering Sea and Aleutian Islands management area" is amended by revising paragraph (a) and adding a new paragraph (c), the definition of "groundfish" is revised, and the definition of "statistical area" is amended by revising the introductory text, removing existing paragraph (e), redesignating existing paragraphs (f) and (g) as (e) and (f), respectively, redesignating existing paragraphs (h) through (k) as (i) through (l), respectively, and adding new paragraphs (g) and (h), to read as follows:

§ 675.2 Definitions.

* * * * *

Bering Sea and Aleutian Islands management area * * *

(a) The Bering Sea subarea of the management area means that part of the EEZ contained in areas I, exclusive of the Bogoslof subarea, II, and III of Figure 1.

* * * * *

(c) The Bogoslof subarea of the management unit means that portion of the EEZ contained in Statistical Area 518 as defined in this section.

* * * * *

Groundfish means target species categories and the "other species" category, referenced in § 675.20(a)(1).

* * * * *

Statistical Area means any one of the 12 statistical areas of the Bering Sea and Aleutian Islands management area defined as follows (Figure 2):

* * * * *

(g) Statistical area 518—south of straight lines connecting the following coordinates in the order listed: 55°46′ N. 170°00′ W., 54°30′ N. 167°00′ W., then south to straight lines between the Aleutian Islands connecting the following coordinates in the order listed:

54°23.9′ N. 164°44.0′ W.,
54°11.9′ N. 165°23.3′ W.,
54°08.9′ N. 165°38.6′ W.,
54°07.7′ N. 165°40.6′ W.,
54°02.9′ N. 166°03.0′ W.,
53°59.0′ N. 166°17.2′ W.,
53°23.8′ N. 167°50.1′ W.,
53°18.7′ N. 167°51.4′ W.,
52°49.8′ N. 169°06.3′ W., and
52°49.2′ N. 169°40.4′ W.,
52°49.2′ N. 170°00.0′ W., then north to
55°46.0′ N. 170°00.0′ W.

(h) Statistical Area 519—the area bounded by the following coordinates in the order listed:

54°30′ N. 167°00′ W.,
54°30′ N. 165°00′ W.,
53°30′ N. 167°00′ W., and
54°30′ N. 167°00′ W.

* * * * *

9. In § 675.5, paragraph (b)(3)(ii)(A)(*11*) is amended by revising the last sentence of the introductory text, paragraph (c)(2)(iii)(I) is amended by revising the first sentence, and paragraph (c)(3)(ii)(F) is revised, to read as follows:

§ 675.5 Recordkeeping and reporting.

* * * * *

(b) * * *

(3) * * *

(ii) * * *

(A) * * *

(*11*) * * * Product information must include the following information for any product resulting from the processing of any groundfish species or species group for which a total allowable catch (TAC) is specified under § 675.20 of this part, with one exception: Species within the "other species" category must be reported by species or species group identified in § 675.20(a)(1).

* * * * *

(c) * * *

(2) * * *

(iii) * * *

(*I*) The fish product weight of each product produced during the weekly reporting period, including species and product-type codes, for each groundfish species or species group for which a total allowable catch is specified under § 675.20, with one exception: Species within the "other species" category must be reported by the species or species group identified in § 675.20(a)(1). * * *

* * * * *

(3) * * *

(ii) * * *

(F) The fish product weight of each product produced during a day, including species and product-type codes, for each groundfish species or species group for which a total allowable catch is specified under § 675.20 of this part, with one exception. species within the "other species" category must be reported by species or species group identified in § 675.20(a)(1).

* * * * *

10. Section 675.6, which was reserved, is added to read as follows:

§ 675.6 Experimental fisheries.

Issuance of experimental fishing permits issued under this section is governed by provisions set forth in § 672.6(a) through (g).

11. In § 675.20, paragraph (a)(1) is amended by revising the last sentence, Table 1 to the section is removed, and paragraph (h)(3)(iii) is revised to read as follows:

§ 675.20 General limitations.

(a) * * *

(1) * * * The species categories are defined in Table 1 of the notice of specifications as provided in § 675.20(a)(7).

* * * * *

(h) * * *

(3) * * *

(iii) For the aggregate amount of rockfish target species categories for which a directed fishing closure applies, 10 percent of the total amount of all sablefish, Greenland turbot, and other rockfish target species categories for which directed fisheries are open that are retained at the same time on the vessel during the same trip plus 1 percent of the total amount of other fish species retained at the same time on the vessel during the same trip.

* * * * *

11. In § 675.22, paragraph (f) is revised to read as follows:

§ 675.22 Time and area closures.

* * * * *

(f) From April 1 through September 30 of any fishing year, vessels permitted under § 675.4 are prohibited in that part of the Bering Sea subarea between 3 and 12 miles seaward of the baseline used to measure the territorial sea around islands named Round Island and The Twins, as shown on National Ocean Survey Chart 16315, and around Cape Peirce (58°33′ N. latitude, 161°43′ W. longitude).

12. In § 675.24, paragraph (c)(1)(i) and the heading of paragraph (f)(1) are revised to read as follows:

§ 675.24 Gear limitations.

* * * * *

(c) * * *

(1) * * *

(i) In the Bering Sea and Bogoslof subareas, defined at § 675.2, hook-and-line and pot gear may be used to take up to 50 percent of the TAC for sablefish; trawl gear may be used to take up to 50 percent of the TAC for sablefish.

* * * * *

(f) * * *

[Docket No. 911193-2048]

RIN 0648-AD82

Western Pacific Crustacean Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement Amendment 7 to the Fishery Management Plan for the Crustacean Fisheries of the Western Pacific Region (FMP). This rule establishes a limited access program for the lobster fishery of the Northwestern Hawaiian Islands (NWHI), with vessel permit eligibility based on historical participation in the fishery. A maximum of 15 vessel permits will be effective at any time. Permits will be transferable. Only one permit may be held by any person, except a person who qualifies initially for two or more permits. To further control effort, a maximum of 1100 assembled lobster traps (and up to 100 unassembled replacement traps) may be maintained on board or in the water by any vessel. To further protect lobster stocks, the rule establishes an annual closed season (January 1–June 30) and an annual quota based on the condition of stocks. The rule imposes additional reporting requirements to ensure adequate data to monitor and carry out the limited access and conservation measures for the fishery. The Director, Southwest Region, NMFS (Regional Director), with the concurrence of the Western Pacific Fishery Management Council (Council), may initiate rulemaking to adjust the number of permits, the length of the closed season, the quota, or reporting requirements. The amendment is intended to conserve NWHI lobster stocks and provide the basis for an economically healthy and productive fishery for the long term.

DATES: Effective on April 27, 1992, except § 681.29, which is effective at 0001 hours local time April 10, 1992.

ADDRESSES: Copies of Amendment 7 and the environmental assessment may be obtained from the Western Pacific Fishery Management Council, 1164 Bishop St., Suite 1405, Honolulu, HI 96813.

Send comments on the collections of information to the Director, Southwest Region, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802–4213 and to the Office of Information and Regulatory Affairs, OMB, ATTN: Paperwork Reduction Projects 0648–0204 and 0648–0214, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Svein Fougner, Fisheries Management Division, Southwest Region, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802–4213 (310) 980–4034; or Alvin Z. Katekaru, Pacific Area Office, NMFS Southwest Region, Honolulu, Hawaii (808) 955–8831

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Council and approved and implemented by the Secretary of Commerce (Secretary) in 1983 (48 FR 5560, February 7, 1983). The FMP has been amended six times. The FMP covers fisheries for spiny lobster and slipper lobster in Hawaii, Guam, and American Samoa, but the fishery in the NWHI is more heavily regulated than the other areas. This has been the largest and most dynamic lobster fishery in the region, with peak landings of almost 1,100 metric tons (mt) in 1985. Conservation and management measures have included permits and reporting requirements for fishermen to monitor the fishery, and size limits, area closures, and trap escape vents to conserve the lobster stocks.

As indicated in the proposed rule (56 FR 65209, December 18, 1991) for this amendment, several recent trends in the NWHI lobster fishery are clear. Landings, catch per unit effort (CPUE), and revenues all declined in 1990 after 2 years of relative stability in the fishery. The average size of spiny lobster tails (4–8 oz for 1990) continued to decrease through the year, causing increasing concern among vessel operators. Fleet revenues for 1990 were $4.9 million, down 22 percent from 1989. Commercial fishing logbooks for the period January–April indicated that CPUE for the period was 0.63 legal lobsters/trap-haul, the lowest ever recorded during that period since 1984 (when such data started being recorded). By comparison, the CPUE for this period in 1990 was 0.84.

Low recruitment to the fishery was first observed at Maro Reef and the banks northwest of Maro, resulting in a decline in CPUE. Fishing effort then intensified at Necker Island and Gardner Pinnacles, resulting in declining lobster stocks in those areas. The 1990 spawning stock biomass of spiny and slipper lobsters in the NWHI was 22 percent of the levels in the late 1970's, prior to the development of the fishery, an indication that the million trap-hauls in 1990 may have been excessive since recruitment to the fishery was low. The FMP defines the threshold for recruitment overfishing at 20 percent of the pre-fishery level. Thus, the status of spawning stock biomass in 1990 was at or near a level that could cause a severe decline in recruitment. In 1991, lobster fishing continued in the NWHI until the fishery was closed by emergency action on May 8 (56 FR 21961, May 13, 1991), in response to a request from the Council. The closure was subsequently extended for a second 90-day period (56 FR 36012, July 30, 1991).

During the emergency closure, the Council completed an amendment to the FMP to provide long-term conservation. The Council concluded that a combination of limited access and effort and harvest limitations is needed to protect the resource and the industry that depends on it. The amendment and its implementing rule provide for a limited access system, a limit on effort, an annual fleet harvest quota, a closed season, and new reporting requirements. These measures and the rationale for the limited access system are described in detail in the proposed rule and will not be repeated here.

In total, the amendment proposes a comprehensive program of conservation and management measures to ensure the long-term health of the stocks and of the businesses that depend on them.

The seasonal closure becomes effective 15 days after publication of this rule. Timely notice will be given to fishermen on the grounds by the Regional Director to allow a reasonable time to retrieve their gear and exit the fishing gounds. This will allow operators of vessels to retrieve their gear and return to Hawaii to unload their catches. The fishery will then be closed until July 1, 1992, when the first annual quota will be implemented.

The only comments received from the public on this rule were from two fishery participants, who support immediate implementation of the rule, and from the Marine Mammal Commission, which supported approval and implementation of the amendment. The Commission also urged the NMFS reinitiate consultations with the Council under Section 7 of the Endangered Species Act (ESA) because the Commission was concerned that the FMP's definition of "overfishing" for lobster stocks could be lower than appropriate for promoting recovery of Hawaiian monk seals in the NWHI. The Commission recommended that the consultations address several concerns. NMFS conducted a review of the proposed amendment relative to Hawaiian monk seals and concluded in informal consultations under the ESA that the amendment will not adversely affect any endangered or threatened species or adversely affect any critical habitat. There was no new information in the Commission's letter to change that conclusion. The Commission's concerns are known to the Council and will be

considered in future planning for the lobster fishery.

This rule is different from the proposed rule in several respects. The proposed definition for "fleet harvest quota" has been deleted because it was deemed superfluous. The definition for "Regional Director" has been amended to note the change in address for the Southwest Region, NMFS. Section 681.31(a)(2) has been revised to clarify that, for 1992, only lobster caught and retained after the season closure becomes effective will count toward the final quota. Other editorial changes have been made to clarify the requirements and prohibitions under the rule. In addition, it should be noted that permit holders will be provided with a copy of a National Weather Service chart, which depicts different combinations of wind and sea conditions. Permit holders should refer to this chart in providing information in fishing logbooks regarding the general condition of sea surface, as required in § 681.5(b)(2)(ix).

Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that Amendment 7 to the FMP and its implementing rule are necessary for the conservation and management of the crustacean fishery resources of the western Pacific region and are consistent with the Magnuson Fishery Conservation and Management Act and other applicable law.

The Council prepared an environmental assessment (EA) for this amendment that concluded that there will be no significant impact on the environment. Based on this EA, the Assistant Administrator signed a Finding of No Significant Impact. A copy of the EA is available from the Council (see **ADDRESSES**).

The Assistant Administrator has determined that this final rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities. No new information has been obtained or presented to change that certification.

The Council considered the potential effects of this action on endangered and threatened species and concluded that no impacts are likely. The Council initiated informal consultations with NMFS under the Endangered Species Act. NMFS concluded that the action would not adversely affect any listed species and would not adversely affect any critical habitat.

This rule contains several collection-of-information requirements that are subject to the Paperwork Reduction Act. Information requested from lobster permit applicants is standardized to consolidate into one form the different permits for fisheries in the Western Pacific Region. The public reporting burden for this collection of information is estimated to average 15 minutes per application, including the time to review and complete the form, and return it to NMFS. Corporations or partnerships filing permit applications will complete a supplementary information sheet listing the names of individual owners and their respective ownership shares in the vessel. The reporting burden for this information is estimated to be 30 minutes per application. The standardized permit application form was approved by OMB in conjunction with the Southwest Region Family of Permit Forms (OMB Control No. 0648–0204). A new section is required for reporting weather conditions in the currently approved fishing logbook. The estimated burden is 2 minutes per fishing day. A new information element (tail sizes) is added to the existing processing and sales report requirement. The public burden for completing the new section is estimated to be 5 minutes per trip (trips normally last 1.5 to 3 months). Periodic at-sea reports of catch and effort are required to monitor catches, revise quotas, and close the fishery when the quota is taken. The public burden for these reports is estimated to be 5 minutes per report, including establishing communications and reporting the catch. This may be weekly, daily, or otherwise. The final rule also requires vessel operators to notify NMFS if they are forced to leave traps on the fishing grounds due to an emergency situation. While no such emergencies are predicted, it is estimated that such a report would take less than 5 minutes. A request for clearance of these additional collections of information was approved by OMB (OMB Control No. 0648–0214). Send comments on the burden estimates or any other aspects of these collections of information, including suggestions on how to reduce the burden, to the Director, Southwest Region, NMFS, and the Office of Information Regulatory Affairs, OMB (see **ADDRESSES**).

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Hawaii. The State has agreed with this determination.

This final rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

The Administrative Procedure Act (5 U.S.C. 553) requires that, generally, final rules be published not less than 30 days before they become effective. This 30-day period may be shortened or waived if the rulemaking agency publishes with the rule an explanation of what good cause justifies an earlier date. This rule will establish a seasonal closure (January through June each year). To protect the spawning stocks of lobsters in the first half of 1992, it is desirable to implement this measure as soon as practicable. Therefore, it would be impracticable and contrary to the public interest to delay implementation of this measure any longer than the minimum time necessary. It is necessary to provide time to notify vessel owners and operators of the change in regulations, and to allow operators of vessels on the grounds to complete their trips, retrieve their gear, and return to port to unload their catch. Therefore, the rule balances practicability and the public interest in protecting spawning stocks by providing that further landings of lobster from NWHI will be prohibited 15 days after the date of publication. Other measures will be effective after the 30-day cooling off period.

List of Subjects in 50 CFR Part 681

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: March 20, 1992.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 681 is amended as follows:

PART 681—WESTERN PACIFIC CRUSTACEAN FISHERIES

1. The authority citation for part 681 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 681.2 the following definitions for *Final quota, Initial quota, Owner, Pacific Area Office* and *Receiving vessel* are added in alphabetical order, the definition of *Permit Number* is removed, and the definition of *Regional Director* is revised, to read as follows:

§ 681.2 Definitions.

* * * * *

Final quota means the total allowable number of spiny and slipper lobsters (combined) that may be caught and retained from Permit Area 1 by all permitted vessels in a given year. It is derived by adjusting the initial quota based on catch and effort data from the first month of fishing each year and is published after fishing begins in any year.

Initial quota means the initially determined total allowable number of spiny and slipper lobster (combined) that may be caught and retained from Permit Area 1 by all permitted vessels and is calculated, using the quota formula in the FMP, from previous years' catch and effort information, and published in February each year.

* * * * *

Owner means the person who is identified as the current owner of the vessel as described in the Certificate of Documentation (Form CG–1270) issued by the U.S. Coast Guard for a documented vessel or in a registration certificate issued by a State or Territory or the U.S. Coast Guard for an undocumented vessel.

Pacific Area Office means the Pacific Area Office, Southwest Region, National Marine Fisheries Service, 2570 Dole Street, Honolulu, Hawaii, 96822–2396.

* * * * *

Receiving Vessel means a vessel of the United States to which lobster taken in Permit Area 1 are transferred from another vessel.

Regional Director means the Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802–4213, or a designee.

* * * * *

3. In § 681.4, paragraphs (a)(1), (b), and (d) through (h) are revised to read as follows:

§ 681.4 Permits.

(a) *General.* (1) Any vessel of the United States engaged in commercial fishing for lobsters in the Management Area must have a permit issued under this part. Vessels engaged in commercial fishing for lobsters in Permit Area 2 or Permit Area 3 require only a permit issued under this section. Vessels engaged in commercial fishing for lobsters in Permit Area 1 require only a limited access permit issued under § 681.30.

* * * * *

(b) *Applications.* (1) An application for a permit under this section should be submitted to the Pacific Area Office by the vessel owner or a designee of the owner at least 15 days before the date the applicant desires to have the permit be effective.

(2) Each application must be submitted on an application form obtained from the Pacific Area Office and must provide the following information:

(i) Type of application; whether the application is for a new permit or a renewal; and what permit area it is for;

(ii) Owner's name, social security number, mailing address, and telephone numbers (business and home);

(iii) Name of the partnership or corporation, if the vessel is owned by such an entity;

(iv) Primary operator's name, social security number, mailing address, and telephone numbers (business and home);

(v) Relief operator's name;

(vi) Name of the vessel;

(vii) Official number of the vessel;

(viii) Radio call sign of the vessel;

(ix) Principal port of the vessel;

(x) Length of the vessel;

(xi) Engine horsepower;

(xii) Approximate fish hold capacity;

(xiii) Number of crew (excluding operator);

(xiv) Construction date;

(xv) Date vessel purchased;

(xvi) Purchase price;

(xvii) Type and amount of fishing gear carried on board the vessel;

(xviii) Position of the applicant in the corporation, if the vessel is owned by such an entity;

(xix) Signature of the applicant; and

(xx) Date of signature.

* * * * *

(d) *Change in application information.* Any change in the information specified in paragraph (b)(2) of this section must be reported to the Pacific Area Office at least 10 days before the effective date of the change, or if an unplanned change, within 10 days after the change. Failure to report such changes may result in termination of the permit.

(e) *Issuance.* (1) Within 15 days after receipt of a properly completed application, the Regional Director will determine whether to issue a permit.

(2) If an incomplete or improperly completed permit application is submitted, the Regional Director will notify the applicant in writing of the deficiency. If the applicant fails to correct the deficiency within 15 days following the date of notification, the application will be considered abandoned.

(f) *Expiration.* Permits issued under this section expire at 2400 hours local time on December 31 following the effective date of the permit.

(g) *Renewal.* An application for renewal of a permit must be submitted to the Pacific Area Office in the same manner as described in paragraph (b) of this section.

(h) *Alteration.* Any permit that has been altered, erased, or mutilated is invalid.

* * * * *

4. In § 681.5, paragraph (b)(2)(ix) is redesignated (b)(2)(x), paragraphs (c)(3)(iii) and (c)(3)(iv) are revised, and new paragraphs (b)(2)(ix), (c)(3)(v), and (d) are added to read as follows:

§ 681.5 Recordkeeping and reporting.

* * * * *

(b) * * *

(2) * * *

(ix) General condition of sea surface for each day fished (e.g., wave height, wind speed); and

* * * * *

(c) * * *

(3) * * *

(iii) Weight and revenue from sale of octopus by product type;

(iv) Weight and revenue from sale of other fishery products by type; and

(v) Number of lobsters, by tail weight (in 2-ounce intervals, i.e., 2.0–3.9, 4.0–5.9, etc.), by species.

* * * * *

(d) *Transshipment.* If any receiving vessel is used to transship lobsters from the harvesting vessel to port, then the operator of the receiving vessel must, within 72 hours of landing those lobsters, submit to the Regional Director the original copies of the NMFS Daily Lobster Catch Reports that were completed by the operator of the vessel that harvested the lobster.

§ 681.6 [Amended]

5. In § 681.6, in each place it occurs in paragraph (a), (b) and (c), the word "permit" is replaced by the word "official".

6. In § 681.7, paragraph (b)(1), (c)(1)(i), (c)(1)(ii), and (c)(2) through (c)(4) are revised and new paragraphs (b)(7) through (b)(13) are added, to read as follows:

§ 681.7 Prohibitions.

* * * * *

(b) * * *

(1) Fish for, take, or retain lobsters:

(i) Without a limited access permit issued under § 681.30;

(ii) By methods other than lobster traps or by hand for lobsters, as specified in § 681.24;

(iii) From closed areas for lobsters, as specified in § 681.23;

(iv) During a closed season, as specified in § 681.29; or

(v) After the date published in the Federal Register, as specified in § 681.31(c) (4) or (5), and until the fishery

opens again in the following calendar year.

* * * * *

(7) When fishing for lobster is prohibited as specified in §§ 681.23, 681.24, 681.29, 681.30, or 681.31, possess on a fishing vessel any lobster trap.

(8) Fail to report catch and effort data, as specified § 681.5.

(9) Leave a trap unattended in the Management Area except as provided in § 681.24(f).

(10) Maintain on board the vessel or in the water, more than 1200 traps per fishing vessel, of which no more than 1100 can be assembled traps, as specified § 681.24(e).

(11) Fail to mark legibly the vessel's official number on all traps and floats maintained on board the vessel or in the water, as specified in § 681.24(g).

(12) Land lobsters taken in Permit Area 1 after the closure date announced in the **Federal Register**, as specified in § 681.31(c) (4) and (5), and until the fishery opens again in the following calendar year.

(13) Fail to make a limited access permit available for inspection by an authorized officer upon request by that officer.

(c) * * *

(1) * * *

(i) By methods other than lobster traps or by hand, as specified in § 681.44; or

(ii) In the months of June, July, and August, as specified in § 681.43.

(2) Retain or possess on a fishing vessel any lobster taken in Permit Area 2 which is less than the minimum size specified in § 681.41.

(3) Possess on a fishing vessel any lobster or lobster part taken in Permit Area 2 in a condition where the lobster is not whole and undamaged as specified in § 681.45.

(4) Retain or possess on a fishing vessel, or remove the eggs from, any egg-bearing lobster, as specified in § 681.42.

7. In subpart B, in § 681.24, paragraphs (e) through (g) are added to read as follows:

§ 681.24 Gear restrictions.

* * * * *

(e) A maximum of 1200 traps per vessel may be maintained on board or in the water, provided that no more than 1100 assembled traps are maintained on board or in the water. If more than 1100 traps are maintained, the unassembled traps may be carried as spares only, in order to replace assembled traps that may be lost or become unusable.

(f) Traps shall not be left unattended in the Management Area, except in the event of an emergency, in which case the vessel operator must notify the NMFS Law Enforcement Office of the emergency that necessitated leaving the traps on the grounds, and the location and number of the traps, within 24 hours after the vessel reaches port. The NMFS Law Enforcement Office can be reached 24 hours a day by calling (808) 541-2727.

(g) The vessel's official number must be marked legibly on all traps and floats maintained on board the vessel or in the water by that vessel.

§§ 681.30 through 681.35 Redesignated as §§ 681.40 through 681.45

8. In subpart C, §§ 681.30 through 681.35 are redesignated §§ 681.40 through 681.45, respectively.

(9) Subpart B is amended by adding new §§ 681.29 through 681.32 to read as follows:

§ 681.29 Closed season.

Lobster fishing is prohibited in Permit Area 1 during the months of January through June, inclusive.

§ 681.30 Limited access management program.

(a) *General requirements.* (1) The owner of any vessel used to fish for lobster in Permit Area 1 must have a limited access permit issued for such vessel under this section. Only one permit will be assigned to any vessel.

(2) A limited access permit is valid for fishing only in Permit Area 1.

(3) The application form for a limited access permit is the same as the application form for a permit under § 681.4(b)(2). If the application is submitted on behalf of a partnership or corporation, the application must be accompanied by a supplementary information sheet obtained from the Pacific Area Office and contain the names and mailing addresses of all partners or shareholders and their respective percentage of ownership in the partnership or corporation.

(4) A maximum of 15 limited access permits can be valid at any time.

(5) No fee is required for a limited access permit.

(6) Any change in the information specified in the application form for a limited access permit must be reported to the Pacific Area Office at least 10 days after the change. Failure to report such changes may result in termination of the permit.

(7) If an incomplete or improperly completed application form is submitted, the Regional Director will notify the applicant in writing of the deficiency. If the applicant fails to correct the deficiency within 15 days following the notification, the application will be considered abandoned.

(8) A limited access permit expires at 2400 hours local time on December 31 following the effective date of the permit.

(9) A limited access permit that has been altered, erased, or mutilated is invalid.

(10) A limited access permit may be issued to replace a lost or mutilated permit. An application for a replacement permit is not considered a new application.

(11) A limited access permit must be on board the vessel at all times and is subject to inspection upon request of any authorized officer.

(12) Procedures governing permit sanctions and denials are found at subpart D of 15 CFR part 904.

(b) *Issuance of initial limited access permits.* (1) An application for an initial limited access permit must be submitted to the Pacific Area Office on the same form used for a permit under § 681.4(b)(2) within 90 days of the effective date of this rule.

(2) The Regional Director will issue initial limited access permits based on the eligibility criteria listed below. An initial permit issued under this paragraph will be issued to the person who owned the vessel when the vessel was last used to land lobsters from Permit Area 1 in 1990. Priority for initial permits will be given, in descending order, to an owner of a vessel that had made at least one landing of lobsters from Permit Area 1:

(i) Before August 8, 1985, and during every calendar year from 1985 through 1990;

(ii) Before August 8, 1985, and during calendar year 1990;

(iii) During 1990 only.

(3) If fewer than 15 initial limited entry permits are issued under paragraph (b)(2) of this section, then the remaining initial permits will be issued to vessel owners based upon a point system.

(i) One point shall be assigned for each calendar year prior to 1985 that the applicant was the owner or operator of a vessel that was used to land lobsters from Permit Area 1.

(ii) Under the point system, applicants will be ranked by the number of points. Available permits will be issued to applicants with the greatest number of points in descending order.

(iii) If two or more applicants have the same number of points and there are insufficient permits for all such applicants, the Regional Director shall issue permits to such applicants through a lottery.

(iv) No points shall be assigned under paragraph (b)(3)(i) of this section for lobster landings by a vessel for which a permit has been issued under paragraph (b)(2) of this section.

(c) *Renewal of limited access permits.* (1) A person filing an application for renewal of a limited access permit must submit the application by December 31 of the preceding year.

(2) The Regional Director will renew a limited access permit for a subsequent year if the permitted vessel was used to:

(i) Land the equivalent of at least four lobsters for each trap normally used, calculated over one calendar year, and

(ii) Make the landings under paragraph (c)(2)(i) of this section during at least one of the 2 years prior to the year for which the new permit will be valid.

(3) In paragraph (c)(2)(i) of this section, the number of lobsters "for each trap normally used" is calculated by taking the sum of all legal lobsters caught and retained by the harvesting vessel divided by the average number of traps deployed by the vessel based on the logbook records for the calendar year.

(d) *Transfer or sale of limited access permits.* (1) Permits may be transferred or sold, but no one individual, partnership or corporation will be allowed to hold a whole or partial interest in more than one permit, except that an owner who qualifies initially for more than one permit may maintain those permits so long as he or she satisfies the landings requirement in paragraph (c)(2)(i) of this section, but may not obtain additional permits. Layering of partnerships or corporations shall not insulate a permit holder from this requirement.

(2) If 50 percent or more of the ownership of a limited access permit is passed to persons other than those listed on the permit application, the Pacific Area Office must be notified of the change in writing and provided copies of the appropriate documents confirming the changes within 30 days.

(3) Upon the transfer or sale of a limited access permit, a new application must be submitted by the new permit owner according to the requirements of paragraph (a) of this section. The transferred permit is not valid until this process is completed.

(e) *Replacement of a vessel covered by a limited access permit.* An owner of a permitted vessel may, without limitation, transfer his or her limited access permit to another vessel of that owner provided that the replacement vessel is put into service within 12 months after declaring to the Regional Director his or her intent to transfer the permit

(f) *Issuance of limited access permits to future applicants.* (1) The Regional Director may issue limited access permits under this section when fewer than 15 vessel owners hold active permits.

(2) When the Regional Director has determined that limited access permits may be issued to new persons, a notice shall be placed in the **Federal Register**, and other means will be used to notify prospective applicants of the opportunity to obtain permits under the limited access management program.

(3) An application for a new limited access permit must be filed within 90 days following the publication of the **Federal Register** notice.

(4) Limited access permits issued under paragraph (f) of this section will be issued first to applicants qualifying under paragraph (f)(4)(i) of this section. If the number of limited access permits available is greater than the number of applicants that qualify under paragraph (f)(4)(i) of this section, then limited access permits will be issued to applicants under paragraph (f)(4)(ii) of this section.

(i) First priority to receive limited access permits under this paragraph goes to owners of vessels that were used to land lobster from Permit Area 1 during the period from 1983 through 1990, and who were excluded from the fishery by implementation of the limited access system. If there are insufficient permits for all such applicants, the new permits shall be issued by the Regional Director through a lottery.

(ii) Second priority to receive limited access permits under this paragraph goes to owners with the most points, based upon a point system. If two or more owners have the same number of points and there are insufficient permits for all such owners, the Regional Director shall issue the permits through a lottery. Under the point system, limited access permits will be issued, in descending order, beginning with owners who have the most points and proceeding to owners who have the least points, based on the following:

(A) Three points shall be assigned for each calendar year after August 8, 1985 that the applicant was the operator of a vessel that was used to land lobster from Permit Area 1;

(B) Two points shall be assigned for each calendar year or partial year after August 8, 1985, that the applicant was the owner, operator, or crew member of a vessel engaged in either commercial fishing in Permit Area 2 for lobster, or fishing in Permit Area 1 for fish other than lobster with an intention to sell all or part of the catch.

(C) One point shall be assigned for each calendar year or partial year after August 8, 1985, that the applicant was the owner, operator, or crew member of a vessel engaged in any other commercial fishing in the exclusive economic zone surrounding Hawaii.

(5) A holder of a new limited access permit must own at least a 50 percent share in the vessel that the permit would cover.

§ 681.31 Quota management program.

(a) An initial quota and a final quota will be set annually. The final quota for a calendar year shall:

(1) Apply to the total catch of spiny and slipper lobsters; and

(2) Be expressed in terms of numbers of lobsters. All lobsters caught and retained after April 10, 1992, shall count toward the final quota for the year in which they were caught and retained, regardless of the product form (e.g., alive and dead, whole and tails) in which they are landed.

(b) *Initial quota.* (1) The Regional Director shall use information in commercial fishing logbooks from previous years, and may use information from research sampling and other sources, to establish the initial quota, applying the quota formula of the fishery management plan.

(2) The Assistant Administrator shall publish a notice indicating the initial quota in the **Federal Register** by February 15 each year, and shall use other means to notify permit holders of the intital quota for the year.

(c) *Final quota.* (1) The Regional Director shall use the catch and effort information provided during July (or the first month of the open season) to determine any change needed to establish the final quota.

(2) If no fishing is conducted during July (or the first month of the open season), then the final quota shall equal the intital quota.

(3) The Assistant Administrator shall publish a notice in the **Federal Register** indicating the final quota, as soon after August 15 as practicable, and shall use other means to notify permit holders of the final quota for the year.

(4) If the total reported catch by the date that the final quota is announced exceeds the final quota, the Assistant Administrator will publish a notice in the **Federal Register** not less than 7 days prior to the effective date to prohibit further landings of lobster taken in Permit Area 1.

(5) The Regional Director shall determine on the basis of the evidence available to him the date upon which the quota will be reached or exceeded.

Notice of this determination, with a specification of the date after which further landings of lobster taken in Permit Area 1 will be prohibited, will be published in the **Federal Register** by the Assistant Administrator not less than 7 days prior to the effective date.

(d) *Monitoring and Adjustment.* The operator of each vessel fishing during the open season shall report lobster catch (by species) and effort (number of trap hauls) data while at sea to the NMFS in Honolulu. The Regional Director shall notify permit holders of the reporting method, schedule and logistics, at least 30 days prior to the opening of the fishing season.

§ 681.32 Conservation and management adjustments.

If the Regional Director determines that adjustments are warranted, the Regional Director may, with the Council's concurrence, initiate rulemaking to change the:

(a) maximum number of limited access permits that may be valid at any time;

(b) length of the closed season;

(c) maximum number of traps; or

(d) reporting requirements.

[FR Doc. 92-7025 Filed 3-25-92; 8:45 am]

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 57, No. 59
Thursday, March 26, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-CE-18-AD]

Airworthiness Directives; Beech T-34C, 90, 99, 100, 200, and 300 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would be applicable to certain Beech T-34C, 90, 99, 100, 200, and 300 series airplanes. The proposed action would require a one-time visual inspection of all engine truss-to-firewall bolts to determine whether bolts that could have been improperly heat treated (soft bolts) where installed, and replacement of any such bolts. The Federal Aviation Administration (FAA) has received several reports indicating that Dumont Aviation manufactured soft bolts and that these are the type of bolts utilized on the affected airplanes. The actions specified by the proposed AD are intended to prevent undetected failure of engine truss-to-firewall bolts, which could eventually lead to separation of the engine mount from the airplane.

DATES: Comments must be received on or before May 29, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201-0085. This information may also be examined at the Rules Docket at the address below.

Submit comments in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-18-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Don Campbell, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 946-4128; Facsimile (316) 946-4407.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 92-CE-18-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-18-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received reports where engine truss-to-firewall bolts were improperly heat treated (soft bolts). Dumont Aviation manufactured these soft bolts and the bolts are identified by the letters "DA" on the bolt head. The FAA does not know the number of soft bolts that may have been delivered as original or spare parts because Dumont Aviation is no longer in business, but the FAA does know that Beech T-34C, 90, 99, 100, 200, and 300 series airplanes utilize these type bolts. If installation of these bolts is not detected and corrected, they could break while in service and cause engine mount movement, which could result in damage to the cowling, engine, or propeller and eventually lead to separation of the engine mount from the airplane.

The manufacturer (Beech) has issued Service Bulletin (SB) No. 2432, dated February 1992, which specifies procedures for inspecting the engine truss-to-firewall bolts for corrosion and determining whether any bolts identified by the letters "DA" are installed on any of the affected airplanes. It also specifies procedures for replacing these bolts.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be taken to prevent undetected failure of engine truss-to-firewall bolts, which could eventually lead to separation of the engine mount from the airplane.

Since the condition described is likely to exist or develop in other Beech T-34C, 90, 99, 100, 200, and 300 series airplanes of the same type design, the proposed AD would require a one-time visual inspection of all engine truss-to-firewall bolts to identify any engine truss-to-firewall bolts that were manufactured by Dumont Aviation (identified by "DA" on the bolt head), and replacement of any installed bolt that is identified as being manufactured by Dumont Aviation. The proposed actions would be accomplished in accordance with Beech SB No. 2432, dated February 1992.

The inspection of the engine truss-to-firewall bolt and associated hardware for corrosion that is referenced in Beech SB No. 2432, dated February 1992, is recommended but would be required by the proposed AD.

The FAA estimates that 3,590 airplanes in the U.S. registry would be affected by the proposed AD, that it

would take approximately 2 work hours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts would be provided by the manufacturer at no cost to the operator. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $394,900.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(A), 1421 AND 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Beech: Docket No. 92-CE-16-AD.

Applicability: The following model and serial numbered airplanes, certificated in any category:

Models	Serial Nos.
T-34C	GP-1 through GP-50, GL-1 through GL-353, and GM-2 through GM-99.
65-90, 65-A90, 65-A90-1, 65-A90-2, 65-A90-3, 65-A90-4, B90, C90, C90A, E90, F90, and H90.	LJ-1 through LJ-1285, LW-1 through LW-347, LA-2 through LA 236, LM-1 through LM-141, LS-1, LS-2, LS-3, LT-1, LT-2, LU-1 through LU-15, and LL-1 through LL-51.
99, 99A, A99A, B99, and C99.	U-1 through U-239.
100, A100, and B100	B-1 through B-247 and BE-1 through BE-137.
200, 200C, 200CT, 200T, A200, A100-1, A200CT, B200, B200C, B300CT, and B200T.	BB-2 through BB-1405, BC-1 through BC-75, BD-1 through BD-30, BJ-1 through BJ-86, BL-1 through BL-137, BN-1 through BN-4, BP-1 through BP-71, BT-1 through BT-33, BU-1 through BU-12, BV-1 through BV-12, FC-1, FC-2, FC-3, FE-1 through FE-9, FG-1, and FG-2.
300, 300C, B300, and B300C	FA-1 through FA-217, FF-1 through FF-19, FL-1 through FL-60, and FM-1.

Compliance: Required as indicated, unless already accomplished.

To prevent undetected failure of engine truss-to-firewall bolts, which could eventually lead to separation of the engine mount from the airplane, accomplish the following:

(a) Within the next 150 hours time-in-service after the effective date of this AD, accomplish the following:

(1) Individually remove each engine truss-to-firewall bolt and determine whether the bolt is manufactured by Dumont Aviation as specified by Figure 2 and in accordance with paragraphs 1 and 2 of the ACCOMPLISHMENT INSTRUCTIONS in Beech Service Bulletin (SB) No. 2432, dated February 1992. Only one engine truss-to-firewall bolt should be removed at any given time.

(2) Prior to further flight, replace any bolt manufactured by Dumont Aviation as identified in paragraph (a)(1) of this AD with a new bolt part number (P/N) MS20006-20 /M/.

Note: The inspection of the engine truss-to-firewall bolts and associated hardware for corrosion that is referenced in Beech SB No. 2432, dated February 1992, is recommended but is not required by this AD.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the document referred to herein upon request to the Beech Aircraft Corporation, P.O. Box 85, Wichita, Kansas 67201-0085; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 20, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 217

RIN 0596-AB30

Review of and Comment on National Forest Plans and Project Decisions

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Department proposes to adopt new rules that focus on public notice of, and opportunity to comment on, proposed Forest Service actions described in an Environmental Assessment and Finding of No Significant Impact prior to the decision being made. Corollary to this proposed rule, the agency also proposes to revise its administrative appeal process at 36 CFR part 217 to limit appeals to only final decisions approving, revising, or significantly amending a National Forest Land and Resource Management Plan. Public review and comment is required for proposed actions having a significant environmental impact as described in a Draft Environmental Impact Statement under the National Environmental Policy Act. The intended effect is to expand opportunities for pre-decisional involvement of the public in Forest Service decisionmaking, achieve administrative efficiencies in agency decisionmaking, reduce the uncertainty for communities and workers dependent upon Forest Service goods and services by minimizing delay in providing a stable supply of resources, remove impediments to economic growth arising from the current appeals process, and provide a reasonable assurance that the Forest Service has the ability to carry out programs authorized and funded by the Congress. The provisions of this proposed change do not in any way affect either the opportunity that has always existed for people to contact a higher level line officer to express dissatisfaction with a final decision or the right of a higher level line officer to review a lower level line officer's decision. The appeal procedures at 36 CFR part 251, subpart C, are not affected by this proposed change. Public comment is invited.

DATE: Comments must be received in writing by April 27, 1992.

ADDRESSES: Send written comments to APPEALS STAFF (NFS), Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090.

The public may inspect comments received on this proposed rule in the Office of the Staff Assistant for Operations, National Forest System, 3d Floor, Northwest Wing, Auditors Building, 14th and Independence Avenues, Northwest, Washington, DC, between the hours of 8:30 a.m. and 4 p.m. Those wishing to inspect comments are encouraged to call ahead (202/205-1346) to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Kathryn Hauser, Office of the Staff Assistant for Operations, National Forest System, (202) 205-1346.

SUPPLEMENTARY INFORMATION: While there is no statutory requirement that the Forest Service provide an appeal procedure, the agency, at its own discretion, has provided an administrative appeal process since 1907. Until the enactment of several environmental statutes in the 1960's and 1970's, the appeal process was used primarily by those with a business relationship with the Forest Service.

Over the past 50 years, the administrative appeal process has shifted back and forth from an informal to a formal process, from adjudication by semi-independent boards to a wholly internal administrative review. Since 1965, the appeal process has undergone four major revisions. The most recent major revision, published on January 23, 1989, at 54 FR 3342, part VI, resulted in two separate and distinct appeal rules: 36 CFR part 251, subpart C for appeals by persons or organizations holding written instruments authorizing the use of National Forest System lands and 36 CFR part 217 for appeals of decisions relating to national forest land and resource management plans, projects, and activities. The decisions reviewable under part 217 arise from compliance with the National Environmental Policy Act (NEPA), the National Forest Management Act (NFMA), and implementing regulations, policies, and procedures.

The appeal process has long been envisioned as a simple, quick, informal process to provide a last administrative opportunity to resolve disputes between the agency and interested or affected parties after a decision was made but before a decision was implemented. Instead, it has become a significant generator of paperwork and a time-consuming, procedurally onerous, confrontational, and costly effort, diverting resources and energies that otherwise might be directed to substantive on-the-ground resource management needs and accomplishments.

In the traditional sense, an appeal process is adjudicatory, a process by which a party that has a legal right and that believes the right was violated, addresses the grievance. Whether in court or in an administrative context, the traditional process looks at the facts and judges the rightness or wrongness of a decision (within the defined limits of the standard of review) and prescribes a remedy. The agency offers this type of appeal process at 36 CFR part 251, subpart C for those decisions made by Forest Officers affecting a written instrument. No change is contemplated in this regulation as part of this rulemaking although minor technical changes may be proposed later.

The often-voiced purpose of the agency's 36 CFR part 217 appeal process has been to give the public an informal avenue for review and resolution of disputed agency decisions without the necessity of litigation. Contrary to the situation in the late 1960s, the public today is involved in National Forest System decisionmaking both before management decisions are made (pre-decisional) and after decisions are made (post-decisional).

The National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4332) has significantly changed the way Federal agencies make decisions because it requires that all Federal agencies must involve the affected and interested public in planning and analysis prior to making decisions. In addition, the opportunity for judicial review of Forest officers' decisions was not generally available to the public until the 1970's.

Just as NEPA significantly increased the public's rule in Federal decisionmaking, the National Forest Management Act of 1976 (NFMA) (16 U.S.C. 1600) further broadened the public's role by mandating public participation in the development of land and resource management plans for each administrative unit of the National Forest System. Today, individuals and organized interest groups are very much involved and play an important role in forest planning and pre-decisional activities related to project decisionmaking.

Despite this open planning process and involvement of affected and interested persons in Forest Service environmental analysis, land management planning, and associated decisionmaking, many final decisions involving land and resource uses made by Forest Service managers remain controversial. Many of the interested and/or affected person are not satisfied with the agency's resulting decisions. These disagreements are rooted in differing views about the priorities and values assigned to the agency's many wide-ranging and legislatively-mandated multiple-use management objectives. Potential conflicts over objectives coupled with easy access to decisionmakers afforded through the present appeal process has increased opportunities to contest decisions that National Forest users believe are counter to their interests. In short, the agency's appeal process has served to foster and encourage post-decisional questioning of priorities and actions. The same questioning does, and should, occur before decisions are made so that Forest officers can take into account public concerns.

The current appeal regulation adversely affects the agency's ability to implement projects by diverting the efforts of its workforce from on-the-ground resource management activities to processing administrative appeals. Appeals can increase the cost, and sometimes substantially diminish the cost-effectiveness, of a project through the time it takes the agency to complete an appeal, even though the original decision might ultimately be upheld. Also, administrative appeals adversely affect jobs, families, and communities by delaying or withdrawing projects which support the local economy, thus creating uncertainty for communities dependent upon Forest Service goods and services. Many communities dependent upon the National Forests for their economic livelihood depend upon the Forest Service being able to achieve congressionally funded programs in mining, grazing, timber, recreation, fisheries and wildlife. The current post-decisional appeal process creates uncertainty as to the Forest Service's ability to deliver those goods and services, impeding economic growth and development. Delays in delivery of National Forest System goods and services can place the economic viability of communities at risk. The

delays arising from the appeals process also can adversely affect the cost of homes, Federal payments for local schools and roads, and costs to the Federal government.

A recent internal review of the current appeal regulation has identified several areas which adversely affect the efficiency of the appeal process:

- Individuals, who have chosen not to become involved in NEPA generated public involvement, are routinely appealing decisions.
- New issues are being raised and must be addressed in appeal decisions, rather than during NEPA generated public involvement in the pre-decisional phase.
- Negotiating with appellants during an appeal excludes some interested parties—those that participated during the decisionmaking process but did not appeal.

In examining the efficiency of the current appeal process, the question is not whether the public should be involved in Forest Service decisionmaking but when (pre-decisionally or post-decisionally) and how such involvement can best be achieved for the benefit of everyone. The Department is committed to fostering a public participation climate that allows for the open expression of ideas and encourages the public to join with the agency in identifying and analyzing natural resource management alternatives that result in balanced multiple use management of the National Forests. The Department has concluded that the public interest is best served by mutual efforts to resolve differences during the decisionmaking process than by trying to resolve those differences after a decision has already been made. Finally, the Department believes better resource decisions and fewer challenges of those decisions will result if interested citizens and organizations become involved early and are provided a meaningful opportunity to comment.

Therefore, the Department proposes to expand opportunities for pre-decisional involvement of the public in its decisionmaking by adopting a process that focuses on public notice of, and opportunity to comment on, proposed projects. The proposed process would be codified in part 217 as subpart B. The current appeal procedures would be designated as subpart A. The current procedures would continue to apply to appeals already filed and to future final decisions, revisions, and significant amendments of Forest Land and Resource Management Plans, documented in a Record of Decision and accompanying Environmental Impact Statement.

Replacing the current project appeal process with a pre-decisional public notice and comment opportunity will reduce the time period of uncertainty for communities dependent upon Forest Service goods and services that is currently occurring as a result of post-decisional appeals and provide greater stability to those dependent communities. Currently, when the environmental analysis is completed and documented in an Environmental Assessment and Finding of No Significant Impact, a Decision Notice is published. Then there is a 45-day appeal period and, if an appeal is filed, the agency has 100 days to respond to that appeal. The proposed process would eliminate that 145-day delay after a decision is made. The Department sees this change as a natural evolution in NEPA compliance and decisionmaking that simply changes the timing of public comment, but not the opportunity to influence Forest Service decisionmaking. The proposed change will provide the public an opportunity to become involved before a decision is made and announced. It will open the bulk of the resource management projects made by Forest Service line officers to public notice and comment and provide a response to those public concerns, with the result being better resource decisions. And, it will provide a process consistent with that of other Federal agencies. It should be noted that nothing in the proposed rule precludes someone dissatisfied with a prospective project from also raising their concerns to a higher administrative level. Nor does it preclude a higher level line officer from exercising existing authority to review a decision of a lower level line officer.

The proposed change would include retitling part 217 as "Review of and Comment on National Forest Plans and Projects and titling the current appeal rules as "Subpart A—Appeals." A description of revisions to the proposed appeal procedures follows, keyed to the CFR section number:

Section 217.3 Decisions Subject to Appeal

This section would be revised to limit decisions subject to appeal to final decisions approving, revising, and significantly amending National Forest Land and Resource Management Plans (forest plan). A forest plan is a broad, programmatic document which establishes direction for how a National Forest will be managed, but it generally does not irretrievably commit the agency to final authorization of individual projects. Each forest plan includes land allocations and measures to ensure environmental protection. The land allocation identifies what uses are permissible and under what conditions; uses include wildlife, recreation, timber, grazing, and others. Because Forest plans set direction for 10–15 year periods and often involve making judgments on controversial and conflicting issues of major interest, it is appropriate to, and the agency does, provide extensive public involvement opportunities in forest plan decisionmaking. At this time, providing higher level review of the development, significant amendment, and revision of forest plans through administrative appeal to the Chief is appropriate and cost effective as the cost of delays associated with appeals of project-level decisions are not applicable to appeals of forest plans.

Section 217.4 Decisions Not Subject to Appeal

Because the proposed change to § 217.3 would make explicit that only National Forest Plan-related decisions are subject to appeal, it would no longer be necessary to list decisions that are not appealable. Therefore, the proposed rule would remove and reserve this section.

Section 217.19 Applicability and Effective Date

Paragraph (a) of this proposed section would provide that no appeals filed pursuant to 36 CFR part 217 would be accepted on decisions published after the effective date of the final rule except as noted in paragraph (b). Proposed paragraph (b) would provide that the rules at 36 CFR part 217, subpart A, would continue in force for decisions issued prior to the effective date of the final.

Subpart B would establish a new process for public notice and comment on proposed projects and would be titled "Comment on Proposed Forest Service Actions." Principal features of this subpart keyed to the CFR section number follow.

Section 217.20 Purpose and Scope

Agency decisionmaking and public participation are guided by the National Environmental Policy Act (NEPA) and the Council on Environmental Quality (CEQ) implementing regulations (40 CFR 1500–1508). Further guidance is provided by the Department of Agriculture regulations that require that policies and programs of the various Department of Agriculture agencies shall be planned, developed, and implemented to achieve

the goals and follow the procedures set forth in NEPA and the CEQ Regulations (7 CFR part 1(b)).

The CEQ regulations ensure that environmental information is available to public officials and the public before decisions are made and before actions are taken. The NEPA procedures require agencies to integrate the NEPA process with planning at the earliest possible time to head off conflicts. However, CEQ procedures for public notice and comment apply only to those projects with a significant environmental impact requiring a Draft and Final Environmental Impact Statement. The purpose of this proposed rule is to foster early and effective public participation in Forest Service decisionmaking.

Section 217.21 Applicability and Effective Date

As proposed, the rules would apply generally to proposed actions published for comment after the adoption of the final rule.

Section 217.22 Proposed Actions Subject to This Subpart

This section proposes that only proposed actions described in an Environmental Assessment and a Finding of No Significant Impact (EA/FONSI), as defined in the CEQ regulations at 40 CFR parts 1500–1508, will be subject to this subpart. The CEQ regulations at 40 CFR 1506.10(c) already require pre-decisional public involvement for proposed actions that have a significant environmental impact. Those regulations will continue to apply to proposed actions described in a Draft Environmental Impact Statement.

To facilitate the orderly transition from a post-decisional review process to a pre-decisional review and comment process, the Department also gives notice that the Forest Service is issuing interim direction to encourage agency officials to begin now the pre-decisional notice and comment that would be mandated should this rule be adopted in current form. Units that, during the rulemaking period, give legal notice of the availability of and a 30-day comment period on Environmental Assessments and Findings of No Significant Impact on proposed actions would be able to proceed with final decisions upon or after adoption of the final rule, and such decisions would not be subject to the current appeal process.

It should also be noted that if officials issue decisions during the rulemaking period, those decisions remain subject to the legal notice and other requirements of the current appeal rules, and any appeals filed on such decisions would continue to be processed under the existing rules after final adoption of this rulemaking.

Section 217.23 Giving Notice of Proposed Actions Subject to This Subpart

Under the proposed rule, the responsible official would announce that the EA/FONSI is completed and ready for public review and solicit public comment. That notice would be given through a legal notice in a previously designated newspaper of general circulation, except for proposed actions of the Chief which require **Federal Register** publication.

Paragraph (b) of the proposed rule outlines the format and content and proposed paragraph (c) would require bi-annual publication in the **Federal Register** of the newspaper to be utilized. These provisions are basically the same as current decision notice requirements in 36 CFR 217.5.

Section 217.24 Proposed Actions Not Subject to This Subpart

Paragraph (a) of the proposed rule would exclude proposed actions described in a draft EIS from this process. This exclusion is appropriate because the National Environmental Policy Act implementing regulations at 40 CFR parts 1500–1508 already require notice and comment requirements for these actions. Proposed paragraph (b) would exclude proposed actions related to emergency situations documented in an Environmental Assessment and Finding of No Significant Impact, when the Regional Forester or Chief has determined that good cause exists to exempt such proposed actions from formal public notice and comment and has given notice of this decision in the **Federal Register**. Paragraph (c) would exclude proposed actions categorically excluded from documentation in an Environmental Assessment or Environmental Impact Statement. Finally, to clearly make the point of the proposed change in the purpose and scope of the rule, paragraph (d) would exclude any proposed action not subject to environmental analysis and documentation in an Environmental Assessment and Finding of No Significant Impact.

Section 217.25 Comments

This section would provide a 30-day comment period on the EA/FONSI following publication of the legal notice described in proposed § 217.23. While this proposed change would replace the current post-decisional appeal of Forest officers' decisions, its effect is to merely shift the timing for expression of public concern and comment, by providing a pre-decisional opportunity for people who are interested in or affected by Forest Service management decisions to comment or question proposed actions instead of raising concerns/issues post-decisionally in an appeal. Moreover, it gives the decisionmaker the benefit of the public comments before the decision is made.

Paragraph (b) would continue the current practice of computing the period for comments by using calendar days and specify that the first day of the comment period is the day following publication of the legal notice.

Section 217.26 Decision

In addition to seeking and considering public comment on proposed decisions, the agency has a responsibility to respond to the public in a documented and visible manner and describe how the comments received were used in making the final decision. Proposed paragraph (a) would provide that a decision would be made on whether or not to proceed with the proposed action within 21 days of the close of the comment period unless a longer time period is necessary to make this determination. In such case, those providing comments will be notified of the delay in the decision. Paragraph (b) would provide that if the determination is made that further environmental analysis is needed, those providing comments shall be notified. Paragraph (c) proposes that if a decision is made, the public comments shall be addressed in the Decision Notice.

In conclusion, the Department, for the reasons noted in this preamble, is proposing to expand public participation in decisionmaking by providing constructive notice and oportunity for comment on the environmental assessments and findings of no significant impact which are prepared for such decisions. The responsible official would consider the comments received and address them in the formal decision document. Corollary with adoption of these expanded pre-decisional public involvement procedures, the Department also proposes to limit the existing post-decisional administrative appeal process to national forest land and resource management plans. A number of Forest Service units have for some time voluntarily adopted the pre-decisional notice and comment procedures that would be mandated by adoption of this rule. The results have shown the benefits of receiving comment prior to making decisions—early resolution of conflicting views over the proposed action, improved

decisions, and fewer post-decisional appeals of those decisions. By adopting this pre-decisional approach Servicewide, the Department is confident that the rule will result in more orderly implementation of agency projects and activities, reductions in administrative costs, redirection of significant agency funding and personnel to on-the-ground resource management, reduction in the uncertainty and delay that currently surrounds the flow of goods and services from National Forest System lands, and greater economic stability to communities and segments of the economy dependent on National Forest System programs and activities. Comments received in response to this rule will be considered in adoption of a final rule.

Regulatory Impact

This proposed rule has been reviewed under USDA procedures and Executive Order 12291 on Federal Regulations. It has been determined that this is not a major rule. The proposed rule will not substantially increase prices or costs for consumers, industry, or State or local governments, nor adversely affect competition, employment, investment productivity, innovation, or the ability of United States-based enterprises to compete in foreign markets. To the contrary, adoption of this proposed rule would have positive benefits to the economy by reducing economic uncertainty and delay for communities dependent upon the flow of Forest Service goods and services. Adoption of this rule would substantially reduce the disruption and delay arising from the current appeal rule and, thereby, provide a greater assurance that the Forest Service can carry out programs authorized and funded by the Congress. This rule also has been reviewed in light of the President's regulatory review guidance of January 28, and it has been determined that the expected benefits of this rule outweigh the expected costs to society, and that the rule is fashioned to maximize net benefits to society, and that the rule provides clarity and certainty to the regulated community and is designed to avoid needless litigation.

Moreover, this proposed rule has been considered inlight of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and it has been determined that this action will not have a significant adverse economic impact on a substantial number of small entities.

Civil Justice Reform Act

Executive Order No. 12778. The General Counsel has certified to the Office of Management and Budget that these proposed regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order No. 12778. By focusing on predecisional notice and comment, the proposed rule is fully consistent with the President's emphasis is implementing the Civil Justice Reform Act to use early and alternative methods to resolve conflicts and thereby reduce the potential of litigation.

Environmental Impact

Based on both experience and environmental assessment, this final rule would not have a significant effect on the human environment, individually or cumulatively. Therefore, it is categorically excluded from documentation in an environmental assessment or an environmental impact statement (7 CFR part 1(b)).

Controlling Paperwork Burdens on the Public

This rule does not contain any recordkeeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 and therefore imposes no paperwork burden on the public.

List of Subjects in CFR Part 217

Administrative practice and procedures, National forests.

Therefore, for the reasons set forth in the preamble, it is proposed to amend part 217 of title 36 of the Code of Federal Regulations as follows:

PART 217—REVIEW OF AND COMMENT ON NATIONAL FOREST PLANS AND PROJECTS

1. The authority citation for part 217 continues to read:

Authority: 16 U.S.C. 551, 472.

1A. The part heading is revised to read as set forth above.

2. Designate sections 217.1–217.19 as subpart A—Appeals.

Subpart A—Appeals

3. Revise § 217.3 as follows:

§ 217.3 Decisions subject to appeal.

(a) Effective [*insert effective date of final rule*], only written decisions, documented in a Record of Decision, approving, revising, or significantly amending a Forest Land and Resource Management Plan, are subject to appeal under this subpart.

(b) Appeals previously filed pursuant to 36 CFR part 217 will continue to be subject to the appeal procedures at 36 CFR part 217, subpart A.

§ 217.4 [Removed and reserved]

4. Remove and reserve § 217.4.

5. Revise § 217.19 as follows:

§ 217.19 Applicability and effective date.

(a) The appeal procedures established in this part apply to all appealable Records of Decision published after [*insert effective date of final rule*].

(b) Notices of appeal filed under 36 CFR part 217 prior to [*insert effective date of final rule*], remain subject to those procedures.

6. Establish a new subpart B to read as follows:

Subpart B—Comment on Proposed Forest Service Actions

Sec.

217.20 Purpose and scope.
217.21 Applicability and effective date.
217.22 Proposed actions subject to this subpart.
217.23 Giving notice of proposed actions subject to this subpart.
217.24 Proposed actions not subject to this subpart.
217.25 Comments.
217.26 Decision.

§ 217.20 Purpose and scope.

The purpose of this subpart is to establish a process for fostering early and effective public participation in Forest Service decisionmaking documented in an Environmental Assessment and Finding of No Significant Impact. This subpart expands the public participation requirements in the Forest Service's NEPA implementing procedures in Forest Service Manual 1950 and Forest Service Handbook 1909.15 (36 CFR part 200).

§ 217.21 Applicability and effective date.

The procedures established in this subpart apply to all proposed actions (§ 217.22) published after [*insert date of publication of final rule in* **Federal Register**.]

§ 217.22 Proposed actions subject to this subpart.

Only proposed actions described in an Environmental Assessment and Finding of No Significant Impact (EA/FONSI), as defined in 40 CFR parts 1500–1508, will be subject to review and comment under this subpart.

§ 217.23 Giving notice of proposed actions subject to this subpart.

(a) The responsible official shall give notice that a proposed action is ready for public review as follows:

(1) For all proposed actions of the Chief, notice shall be published in the **Federal Register.**

(2) For all other proposed actions, legal notice of the proposed action shall be published in a newspaper of general circulation identified pursuant to the requirements of paragraph (c) of this section.

(b) All notices published pursuant to this section shall include a concise description of the proposed action by title or subject matter, the date of the EA/FONSI, the name and title of the official making the decision, information on how to obtain a copy of the EA/FONSI, and state that the responsible official will accept comments for 30 days following publication of the legal notice.

(c) At least twice annually, in April and in October, each responsible Forest Service officer shall, through **Federal Register** notice, advise the public of the principal newspaper to be utilized for publishing legal notices required by this section.

§ 217.24 Proposed actions not subject to this subpart.

The following proposed actions are not subject to this subpart:

(a) Proposed actions described in a Draft Environmental Impact Statement (DEIS).

(b) Proposed actions related to emergency situations or rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena such as insect and disease infestation, wildfires, severe wind, earthquakes, and flooding when the Regional Forester or, in situations of national significance, the Chief of the Forest Service, determines and gives notice in the **Federal Register** that the action is exempt from formal public notice and comment because of the essence of time.

(c) Proposed actions categorically excluded from documentation.

(d) Any proposed action not subject to documentation in an Environmental Assessment and Finding of No Significant Impact.

§ 217.25 Comments.

(a) Upon completion of an EA/FONSI on a proposed action, the responsible official shall give notice that a proposed action is ready for public review and accept comments on the proposed action for a period of 30 days from date of publication of the legal notice. In submitting comments, persons or representatives of organizations shall list their name, address, and telephone number (if applicable), identify the proposed action by title and set forth any comments on the proposed action that they believe the decision-maker should consider or that the EA/FONSI does not adequately address. Comments will not be considered unless they are received by the responsible official before the close of business on the 30th day following publication of the legal notice.

(b) *Computation of comment period.* The day after the published legal notice required in section 217.23 is the first day of the comment period. The rest of the 30-day comment period shall be computed using calendar days. Saturdays, Sundays, and Federal holidays are included in computing all time periods in this subpart; however, when the time period would expire on a Saturday, Sunday, or Federal holiday, the period is extended to the end of the next Federal working day.

§ 217.26 Decision.

(a) Within 21 days of the close of the comment period, the responsible official shall consider the comments received and issue a decision, unless the responsible official makes one of the following determinations:

(1) Based on comments received, further environmental analysis and attendant documentation is needed; or

(2) The consideration of comments received cannot be completed within the 21 days.

(b) If the responsible official determines that further environmental analysis is needed or more time is needed to consider comment received, the official shall give written notice of such delay to those who submitted comments.

(c) Comments received on proposed actions in response to notice given pursuant to this subpart shall be addressed in the Decision Notice documenting the decision. A copy of the Decision Notice shall be promptly mailed to those filing comments or requesting the Decision Notice.

Dated: March 19, 1992.

James R. Moseley,

Assistant Secretary, Natural Resources and Environment.

[FR Doc. 92–7030 Filed 3–23–92; 4:03 pm]

BILLING CODE 3410–11–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AF80

Claims Based on Exposure to Ionizing Radiation

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its adjudication regulations concerning diseases claimed to be the result of exposure to ionizing radiation. This amendment is necessary to implement a recommendation by the Veterans Advisory Committee on Environmental Hazards (VACEH) that ovarian cancer be considered "radiogenic", and to clarify the other provisions under which service connection may be established for injury or disease claimed to be the result of exposure to ionizing radiation. The intended effect of this amendment is to add ovarian cancer to the list of radiogenic diseases, and to clarify the other provisions under which service connection may be established for injury or disease claimed to be the result of exposure to ionizing radiation.

DATES: Comments must be received on or before April 27, 1992. Comments will be available for public inspection until May 5, 1992. These amendments are proposed to be effective on the date of publication of the final rule.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 170, at the above address between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), until May 5, 1992.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, (202) 233–3005.

SUPPLEMENTARY INFORMATION: The Veterans' Dioxin and Radiation Exposure Compensation Standards Act, Public Law 98–542, 98 Stat. 2735 (1984), required VA to publish regulations for the adjudication of compensation claims in which disabilities or deaths of veterans are alleged to be the result of in-service exposure to ionizing radiation. It also required that the regulations be based on sound scientific and medical evidence. To assist VA in this effort, the law mandated the establishment of the VACEH. On December 1, 1988, VA published in the **Federal Register** (53 FR 48551–2) a proposal to amend 38 CFR 3.311a(g) and 3.311b(h) to specify the other provisions under which service connection may be established for injury or disease claimed

to be the result of exposure to ionizing radiation or to herbicides containing dioxin are those governing direct service connection, service connection by aggravation, or presumptive service connection. However, in *Nehmer v. United States Veterans Administration*, 712 F. Supp. 1404 (N. D. Cal. 1989), the court concluded that VA incorrectly required that, in determining whether diseases would be service connected based on dioxin exposure, scientific evidence demonstrate a cause-and-effect relationship between the disease and exposure, rather than only a significant statistical association. In view of that decision, VA withdrew the proposed amendments of §§ 3.311a(g) and 3.311b(h) as they made reference to the causal relationship standard (See 54 FR 42802–3).

VA is now proposing to amend § 3.311b(h) to clarify when service connection can be established based upon exposure to ionizing radiation. The list of radiogenic conditions that appears at § 3.311b(b)(2) is meant to be exclusive. The current wording of § 3.311b(h), however, might be misinterpreted to mean that a veteran may attempt to prove that a disease not included on that exclusive listing resulted from exposure to ionizing radiation and is service connected based on "sound scientific or medical evidence." This interpretation of § 3.311b(h) would not conform to section 5(b)(2) of Public Law 98–542 which contemplates that VA will employ regulations which list each disease for which VA finds sound scientific or medical evidence of a connection to ionizing radiation.

Under 38 CFR 1.17(c), when VA determines that a significant statistical association exists between exposure to ionizing radiation and any disease, 38 CFR 3.311b is amended to provide guidelines for the establishment of service connection for that disease. This determination is made after receiving the advice of the VACEH based on its evaluation of scientific or medical studies.

In a public meeting on August 22–23, 1990, the VACEH met in Washington, DC. At that meeting, the VACEH considered 11 papers relating to the health effects of exposure to ionizing radiation focusing primarily on the fifth report of the Committee on Biological Effects of Ionizing Radiation (BEIR V). Based on its review of this literature, VACEH recommended that ovarian cancer be added to the list of diseases that VA will recognize as being radiogenic. The Secretary has accepted that recommendation and we propose to amend 38 CFR 3.311b(b)(2) to implement the Secretary's decision effective the date of publication of the final rule.

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. sections 601–612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. section 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.109 and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedures, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: February 28, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3 is proposed to be amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, is revised to read as follows:

Authority: 105 Stat. 386; 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.311b, add paragraph (b)(2)(xviii) and revise paragraph (h) to read as follows:

§ 3.311b Claims based on exposure to ionizing radiation.

* * * * *

(b) * * *

(2) * * *

(xviii) Ovarian cancer.

* * * * *

(h) *Service connection under other provisions.* Nothing in this section will be construed to prevent the establishment of service connection for any disease or injury shown to have been incurred or aggravated during active service in accordance with §§ 3.304, 3.306, 3.307, or 3.309. However service connection will not be established under this section, or any other section except for §§ 3.309(d) or 3.310(a), on the basis of exposure to ionizing radiation and the subsequent development of any disease not specified in paragraph (b)(2) of this section.

38 CFR Part 4

RIN 2900–AE72

Schedule for Rating Disabilities—The Gynecological System

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its rating schedule for the gynecological system. This change is based on a General Accounting Office (GAO) study and recommendation that medical criteria in the rating schedule be reviewed and updated. The intended effect is to update the Schedule for Rating Disabilities of the gynecological system to ensure that it uses current medical terminology and criteria for evaluating disabilities of that system.

DATES: Comments must be received on or before April 27, 1992. Comments will be available for public inspection until May 5, 1992. This change is proposed to be effective 30 days after the date of publication of the final rules.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding this change to Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments will be available for public inspection only in the Veterans Services Unit, room 170, at the above address between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), until May 5, 1992.

FOR FURTHER INFORMATION CONTACT: Bob Seavey, Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, (202) 233–3005.

SUPPLEMENTARY INFORMATION: In December 1988, GAO published a report entitled "Veterans' Benefits: Need to Update Medical Criteria Used in VA's Disability Rating Schedule" (GAO/HRD–89–28). After consulting numerous medical professionals and VA rating specialists, GAO concluded that a comprehensive and systematic plan was needed for reviewing and updating VA's Schedule for Rating Disabilities (38 CFR part 4). The medical professionals noted outdated terminology, ambiguous impairment classifications and the need to add a number of medical conditions not presently in the rating schedule. GAO recommended that VA prepare a plan for a comprehensive review of the rating schedule and, based on the results, revise the medical criteria accordingly. VA agreed to these recommendations.

In the **Federal Register** of August 20, 1990, VA published an advance notice of proposed rulemaking advising the public that it was preparing to revise and update the rating schedule for gynecological disabilities. A number of comments and suggestions were received from interest groups and VA employees. VA also contracted an outside consultant to suggest revisions to the gynecological portion of the rating schedule and requested recommendations from the VA Advisory Committee on Women Veterans. The primary objective of this review is to update the medical terminology and criteria used to evaluate disabilities rather than to amend the percentage evaluations assigned to each level of severity, albeit some changes in evaluation are proposed.

Several commenters recommended that diagnostic codes be added for benign growths affecting the gynecological system or breasts, and also for endometriosis. These suggestions have been addressed in this proposal.

The title of § 4.116 is currently "Gynecological Conditions." We propose to amend this title to read "Gynecological Conditions and Disorders of the Breast." The title of § 4.116a will be changed in the same manner. This change will more clearly indicate that the schedule of ratings which follows is applicable to disorders of the breast as well as disabilities of the female reproductive system.

Section 4.116 explains the principles of service connection relevant to the gynecological system. We are proposing to substitute the word "neoplasm" for "new growth" at the beginning of the penultimate sentence of this section. The word "neoplasm" better connotes a pathological abnormality than the term "new growth." It will therefore be used in this paragraph as well as under diagnostic codes 7627 and 7628, which will pertain to malignant and benign neoplasms respectively. In order to ensure a more consistent use of terminology, the word "removal" will be substituted for both the word "excision" and the phrase "resection or excision" in the last two sentences of § 4.116. Similarly, the word "removal" will be substituted for the words "excision" and "extirpation" under diagnostic code 7619 for removal of the ovaries.

Diagnostic codes 7610 through 7615 currently classify inflammation of the female reproductive organs as follows: Diagnostic code 7610, "Vulvovaginitis"; diagnostic code 7611, "Vaginitis"; diagnostic code 7612, "Cervicitis"; diagnostic code 7613, "Metritis"; diagnostic code 7614, "Salpingitis"; and diagnostic code 7615, "Oophoritis." We propose to expand the rating of disorders in these affected areas to include disease or injury in general. In the case of the uterus, fallopian tube and ovary, adhesions will also be included. Our proposed revision of the headings will therefore read as follows: Diagnostic code 7610, "Vulva, disease or injury of"; diagnostic code 7611, "Vagina, disease or injury of"; diagnostic code 7612, "Cervix, disease or injury of"; diagnostic code 7613, "Uterus, disease, injury, or adhesions of"; diagnostic code 7614, "Fallopian tube, disease, injury, or adhesions of"; and diagnostic code 7615, "Ovary, disease, injury, or adhesions of." Under diagnostic code 7610, "Vulva, disease or injury of," we propose to add the words "To include rating of vulvovaginitis." In a similar manner, "To include rating of Pelvic inflammatory disease (PID)" will be added after diagnostic code 7614, "Fallopian tube, disease, injury, or adhesions of." These proposed changes will clarify the proper classification of gynecological conditions, and reduce reliance on the uncertain practice of rating by analogy.

The formula for evaluating diagnostic codes 7610 through 7615 is currently divided into levels of 30, 10 and 0%, and each percentage level is determined by whether the disability is "severe," "moderate," or "mild." No elaborating criteria are provided to explain what these words are intended to mean in this context. Under the heading of "General Rating Formula for Disease, Injury, or Adhesions of Female Reproductive Organs (diagnostic codes 7610 through 7615)," we propose to specify objective criteria in terms of the need for or response to treatment. Symptoms of disability not controlled by treatment would warrant a 30% evaluation; symptoms requiring continuous treatment would be evaluated as 10% disabling; and symptoms of disability not requiring continuous treatment would be non-compensable in evaluation. These criteria will ensure that comparable medical conditions are assigned comparable evaluations.

The rating schedule currently allows a total evaluation because of the need for convalescence after surgery for removal of the uterus and ovaries. A six-month period of total evaluation is provided following surgery under diagnostic code 7617, "Uterus and both ovaries, removal of, complete." Advances in therapeutic medicine have significantly reduced the length of convalescent periods required following these surgeries. Under diagnostic code 7617, "Uterus and both ovaries, removal of, complete," we are therefore proposing to change this six-month period to three months.

A six-month period of total evaluation is also currently specified for removal of both ovaries under diagnostic code 7619, "Ovaries, removal of both." In addition to amending this period to three months because of improved surgical techniques, we propose to make the same convalescent period of three months applicable to removal of one ovary as well as two, since the need for immediate post-surgical convalescence does not significantly differ in either instance. We also propose to amend the heading of diagnostic code 7619 to read "Ovary, removal of," in order to make this diagnostic code explicitly applicable to the removal of one ovary as well as to the removal of two ovaries.

A 10% evaluation is currently specified for loss of a single ovary under diagnostic code 7619. The loss of one ovary does not compromise endocrine or reproductive function to such an extent that an impairment of earning capacity ordinarily results. Accordingly, we propose that the removal of one ovary be non-compensable in evaluation.

For malignancies of the gynecological system or of the breast, diagnostic code 7627 currently provides a 100% evaluation for one year following surgery or the cessation of antineoplastic therapy. This provision is applied at the time of rating by assignment of a one-year total evaluation with a prospective reduction consistent with the protected, known or minimum evaluation. Due to improvements in the administration of

chemotherapy and radiation treatments, we believe that a one-year convalescent evaluation is no longer warranted, but that it is reasonable to assess residual disability six months after treatment terminates. Not every patient will recover in a set period of time, however, so a decision to reduce an evaluation after six months should be based on medical findings rather than a regulatory assumption that there has been an improvement.

We propose to change the period of convalescence under diagnostic code 7627 for malignancies from one year to six months. The total evaluation will continue until the veteran is examined and the results of this examination have been reviewed by a rating board. At that time, if a reduction in evaluation is warranted, it would be implemented under the provisions of 38 CFR 3.105(e). This instruction has been included in the note following diagnostic code 7627. No minimum rating is proposed following expiration of the 100% convalescent evaluation.

These changes in the length of convalescent periods will permit a more accurate and timely determination of the veteran's remaining chronic impairment. These changes have been suggested by physicians who are experienced in the treatment of gynecological conditions, and are designed to reflect the period during which most patients can be expected to recover.

The words "severe" and "moderate" now precede the evaluation criteria for the 30% and 10% levels under diagnostic code 7622, "Uterus, displacement of." These words will be removed since they do not significantly help to explain or clarify the specific evaluation criteria which they precede. For the same reason, the words "severe" and "moderate" will be removed in the evaluation criteria following diagnostic code 7623, "Pregnancy, surgical complications of." The 0% level under diagnostic code 7622 which is currently shown as "Mild; slight symptoms," and the 0% level under diagnostic code 7623 shown as "Mild" will be eliminated since the criteria provided are not substantially meaningful. Criteria for non-compensable levels will no longer be specified under these codes. As with every instance in the rating schedule, when the criteria for compensable evaluations are not met, a 0% evaluation will be assigned.

Evaluation criteria under diagnostic code 7624, "Fistula, rectovaginal," currently direct the rater to criteria under diagnostic code 7335, "Ano, fistula in." Diagnostic code 7335, in turn, points to criteria for rating under diagnostic code 7332, "Rectum and anus, impairment of sphincter control." In effect, therefore, the criteria relevant to evaluation of rectovaginal fistulas are contained under diagnostic code 7332. We propose to make this instruction straightforward under diagnostic code 7624.

The rating schedule currently directs that urethrovaginal fistulas under diagnostic code 7625 be rated as "Urethra, fistula of," under diagnostic code 7519. This direction will be amended to conform to proposed revisions in the genitourinary section of the rating schedule and will read "Rate as voiding dysfunction under the genitourinary schedule." Multiple urethroperineal fistulas are evaluated as 100% disabling, which also conforms to criteria under diagnostic code 7519.

Diagnostic code 7628 is now titled "Mammary glands, removal of." We propose to amend this heading to "Breast, removal of," and substitute the word "breast" for "mammary gland" wherever the latter term now occurs. The word "breast" is more commonly used in medical practice, and is consistent with language used in other regulations such as those pertaining to radiogenic disease (see §§ 3.309(d)(2)(iii) and 3.311b(b)(2)(iii)).

Evaluation criteria under diagnostic code 7628 for removal of the breast will be amended to include the terms "radical mastectomy" and "modified radical mastectomy" in the disability levels of 80%/50% and 60%/40%, respectively. These terms are used in modern medical practice, and will clarify application of the rating schedule for these levels of disability.

There has been an increasing tendency in recent years to more conservatively manage neoplasms of the breast without resorting to radical or modified radical mastectomies. For the 50%/30% level, we propose to amend wording of the evaluation criteria to read "Following mastectomy with significant alteration of size or form but without removal of axillary lymph nodes." This language indicates that the application of these percentage levels for a partial mastectomy will depend upon a change in the essential size or shape of the breast. A mastectomy or lumpectomy which does not significantly change the size or form of the breast will be non-compensable.

Two disabilities have been added: diagnostic code, 7628, "Benign neoplasms of the gynecological system or breast"; and diagnostic code 7629, "Endometriosis." The arrangement of separate diagnostic codes for malignant and benign neoplasms is consistent with other systems covered by the rating schedule, and we propose to continue that arrangement in future revisions. Evaluations of benign neoplasms will be determined according to dysfunctions of the genitourinary or gynecological systems, or of the skin.

Endometriosis is a seriously disabling condition and warrants a distinct diagnostic code with rating criteria. Under diagnostic code 7629, disability levels of 50, 30 and 0% are proposed. For the level evaluated as 50% disabling, necessary findings would include endometriomas larger than 2 x 2 cm., ovary or tubes bound down or obstructed by adhesions, or obliteration of the cul-de-sac determined by laparoscopy. At the level of 30%, disabling criteria will consist of several lesions or minimal adhesions, accompanied by side effects such as headaches, muscle cramps, or edema despite treatment. The 0% level would be asymptomatic. Initial diagnosis of endometriosis would require confirmation by laparoscopy.

We are not proposing to change diagnostic codes 7618, 7620 and 7621 in the use of terminology or assigned evaluations. As currently shown, they adequately describe the designated disabilities and levels of severity.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual impact on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance numbers are 64.104 and 64.109.

List of Subjects in 38 CFR Part 4

Handicapped, Pensions, Veterans.

Approved: November 13, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 4, subpart B, is proposed to be amended as set forth below:

PART 4—SCHEDULE FOR RATING DISABILITIES

Subpart B—Disability Ratings

1. The authority citation for part 4 is revised to read as follows:

Authority: 72 Stat. 1125; 38 U.S.C. 1155.

2. The undesignated center heading appearing before § 4.116 and § 4.116a are revised to read as follows:

Gynecological Conditions and Disorders of the Breast

4.116. Rating gynecological conditions.

In rating disability from gynecological conditions the following will not be considered as ratable conditions:

(a) the natural menopause,

(b) amenorrhea, when this is based upon developmental defect or abnormality, and

(c) pregnancy and childbirth and their incidents, except surgical complications under certain circumstances. The surgical complications of pregnancy will not be held the result of service except when additional disability resulted from treatment therein or they are otherwise directly attributable to unusual circumstances of service. Congenital malformations are not ratable conditions. Neoplasms are to be rated in accordance with the effect upon parts or organs involved whose function is impaired or whose removal is indicated. The removal of uterus, ovaries, etc., prior to the natural menopause is considered disabling.

§ 4.116a Schedule of ratings—gynecological conditions and disorders of the breast.

	Rating (percent)
7610 Vulva, disease or injury of:	
To include rating of vulvovaginitis.	
7611 Vagina, disease or injury of.	
7612 Cervix, disease or injury of.	
7613 Uterus, disease, injury, or adhesions of.	
7614 Fallopian tube, disease, injury, or adhesions of:	
To include rating of Pelvic inflammatory disease (PID).	
7615 Ovary, disease, injury, or adhesions of:	
General rating formula for disease, injury, or adhesions of female reproductive organs (diagnostic codes 7610 through 7615):	
Symptoms not controlled by treatment	30
Symptoms that require continuous treatment	10
Symptoms that do not require continuous treatment	0
7617 Uterus and both ovaries, removal of, complete:	
For three months after removal	100
Thereafter	50
7618 Uterus, removal of, including corpus:	
For three months after removal	100
Thereafter	30
7619 Ovary, removal of:	
For three months after removal	100
Thereafter:	
Complete removal of both ovaries	30
Removal of one with or without partial removal of the other	0
7620 Ovaries, atrophy of both, complete	20
7621 Uterus, prolapse:	
Complete, through vulva	50
Incomplete	30
7622 Uterus, displacement of:	
With marked displacement and frequent or continuous menstrual disturbances	30
With adhesions and irregular menstruation	10
7623 Pregnancy, surgical complications of:	
With rectocele or cystocele	50
With relaxation of perineum	10
7624 Fistula, rectovaginal:	
Rate as Rectum and anus, impairment of sphincter control, diagnostic code 7332.	
7625 Fistula, urethrovaginal:	
Rate as voiding dysfunction under the genitourinary schedule.	
Multiple urethroperineal	100
7626 Breast, removal of:	
Following radical mastectomy with removal of pectoral muscles and axillary lymph nodes:	
Both	80
One	50
Following modified radical mastectomy with removal of axillary lymph nodes:

BILLING CODE 8320–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 18

[ET Docket No. 91–313; DA 92–283]

Conformance of FCC Regulations With International Standards for Industrial, Scientific, and Medical (ISM) Equipment

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The comment periods of ET Docket No. 91–313 56 FR 58863 (November 22, 1991) are extended at the request of The National Electrical and Manufacturing Association to allow a more comprehensive input from the manufacturers of ISM equipment.

DATES: Comments must now be submitted by May 13, 1992. Reply comments must be submitted by June 15, 1992.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Richard B. Engelman, Office of Engineering and Technology, 202–653–6288.

SUPPLEMENTARY INFORMATION:

In the matter of Commission of FCC Regulations with International Standards for ISM Equipment

Order Extending Time to File Comments

Adopted: March 11, 1992.
Released: March 12, 1992.
By the Chief Engineer:

1. A notice of inquiry (NOI) in the above entitled proceeding was adopted by the Commission on October 22, 1991 and released on November 6, 1991 (56 FR 58863, November 22, 1991). Comments in this proceeding are due on March 13, 1992. Reply comments are due on April 13, 1992.

2. The National Electrical Manufacturers Association (NEMA) filed with the Commission, on March 4, 1992, a request for extension of the comment period. NEMA indicates that additional time is needed to allow several of its committees to meet and complete their comments.

Because of the many questions raised in the NOI and the need to have a comprehensive input from the manufacturers of ISM equipment, it has been determined that an extension of the comment and reply dates is appropriate. Accordingly, it is ordered, pursuant to the delegated authority contained in 47 CFR 0.241(a), that the period of time for filing comments in the above proceeding is extended until May 13, 1992, and the period for filing reply comments is extended until June 15, 1992.

Federal Communications Commission.

Thomas P. Stanley,

Chief Engineer.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 92-53, RM-7936]

Radio Broadcasting Services; Edmond, OK

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Porter H. Davis, d/b/a Life Broadcasting, Inc., seeking the substitution of Channel 250A for Channel 249A at Edmond, Oklahoma, and the modification of Station KTNT-FM's license to specify operation on the alternate Class A channel. Operation on Channel 250A can permit Station KTNT-FM to operate with maximum Class A power of 6 kW. Channel 250A can be allotted to Edmond in compliance with the Commission's minimum distance separation requirements at Station KTNT-FM's presently licensed site, at coordinates North Latitude 35-34-11 and West Longitude 97-30-01.

DATES: Comments must be filed on or before May 11, 1992, and reply comments on or before May 26, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Porter H. Davis, President, Life Broadcasting, Inc., 9400 North Broadway Street, suite 515, Oklahoma City, Oklahoma 73114 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-53, adopted March 12, 1992, and released March 20, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

GENERAL SERVICES ADMINISTRATION

48 CFR Part 509

[GSAR Notice No. 5-322]

General Services Administration Acquisition Regulation; Administrative Records for Debarment and Suspension

AGENCY: General Services Administration.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR), chapter 5 (APD 2800.12A), that would amend the regulation to revise § 509.406-3(b) to add a new paragraph (6) to provide for furnishing parties a copy of the administrative record in a debarment proceeding, and to renumber current paragraphs (6) through (9) as (7) through (10); to revise section 509.407-3(b) to add a new paragraph (5) to provide for furnishing parties a copy of the administrative record in a suspension proceeding, and to renumber current paragraphs (5) and (6) as (6) and (7), respectively. The intended effect is to simplify the process for releasing documents in the administrative record to parties proposed for debarment or suspension.

DATES: Comments are due in writing on or before April 27, 1992.

FOR FURTHER INFORMATION CONTACT: Juan Smith, Office of GSA Acquisition Policy (202) 502-1224.

A. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive order 12291. The exemption applies to this rule.

B. Regulatory Flexibility Act

An Initial Regulatory Flexibility Analysis has not been prepared because the proposed rule does not appear to have a significant economic impact on a substantial number of small entities, and a waiver of the requirement for both an initial and final Regulatory Flexibility Analysis is believed to be appropriate. Comments from small entities concerning the proposed rule will be considered in accordance with 5 U.S.C. 610, however.

C. Paperwork Reduction Act

This rule does not contain information collection requirements that require the

approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Part 509

Government procurement.

Accordingly, it is proposed to amend 48 CFR part 509 as follows:

1. The authority citation for 48 CFR part 509 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 509—CONTRACTOR QUALIFICATIONS

2. Section 509.406-3 is amended by redesignating paragraphs (b) (6), (7), (8), and (9) as paragraphs (b) (7), (8), (9), and (10) respectively, and by adding a new paragraph (b)(6) to read as follows:

§ 509.406-3 Procedures.

* * * * *

(b) * * *

(6) Upon request, the affected party will be furnished a copy of the administrative record which formed the basis for the decision to propose debarment. If there is a reason to withhold from the party any portion of the record, the party will be notified that a portion of the record is being withheld and will be informed of the reasons for the withholding.

* * * * *

3. Section 509.407-3 is amended by redesignating paragraphs (b) (5) and (6) as paragraphs (b) (6) and (7) respectively, and by adding a new paragraph (b) (5) to read as follows:

509.407-3 Procedures.

* * * * *

(b) * * *

(5) Upon request, a copy of the administrative record will be furnished to the affected party under the guidelines set forth at 509.406-3(b)(6).

* * * * *

Dated: March 17, 1992.

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

Joint Council on Food and Agricultural Sciences; Meeting

According to the Fedeal Advisory Committee Act of October 6, 1972, (Pub. L. 92-463, 86 Stat. 770-776), as amended, the Office of Grants and Program Systems, Cooperative State Research Service, announces the following meeting:

Name: Joint Council on Food and Agricultural Sciences.

Date: April 22-24, 1992.

Time: 1 p.m.-5 p.m., April 22, 1992; 8 a.m.-5 p.m., April 23, 1992; 8 a.m.-12 noon, April 24, 1992.

Place: Capitol Park Suites, 800 Fourth Street, SW., Washington, DC 20024.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person named below.

Purpose: The purposes of the meeting are to: Review and update 5-Year Plan issues and content; review and select topics for 1992 accomplishments report; finalize UAB/JC white paper; follow-up on Human Nurition Panel from previous meeting; receive briefing on Food Animal Integrated Research for 1995 (FAIR 95) from the American Society of Animal Science; and other business as may be raised.

Contact Person for Agenda and More Information: Dr. Mark R. Bailey, Executive Secretary, Joint Council on Food and Agricultural Sciences, suite 302, Aerospace Building, U.S. Department of Agriculture, Washington, DC 20250-2200; Telephone (202) 401-4662.

Done in Washington, DC, this 12th day of March 1992.

John Patrick Jordan,

Administrator.

BILLING CODE 3410-22-M

Food Safety and Inspection Service

[Docket No. 92-006N]

Exemption for Retail Stores; Adjustment of Dollar Limitations

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces that the dollar limitations currently in effect on the annual sales of meats and poultry products that can be sold by retail stores exempt from Federal inspection requirements to consumers other than household consumers, such as hotels, restaurants and similar institutions, have been adjusted to conform with price changes for meat and poultry products as indicated by the Consumer Price Index. The dollar limitation for meat products increases from $37,100 to $38,300 for calendar year 1992 and the dollar limitation for poultry products remains at $33,100 for calendar year 1992.

EFFECTIVE DATE: March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Stafko, Director, Policy Office, Policy Evaluation and Planning Staff, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-8168.

Background

Federal inspection of meat and poultry products prepared for sale or distribution in commerce or in States designated under section 301(c) of the Federal Meat Inspection Act (FMIA) (21 U.S.C. 661(c)) and section 5(c) of the Poultry Products Inspection Act (PPIA) (21 U.S.C. 454(c)) is required by law and administered by the Food Safety and Inspection Service (FSIS). However, section 301(c)(2) of the FMIA (21 U.S.C. 661(c)(2)) and section 5(c)(2) of the PPIA (21 U.S.C. 454(c)(2)) state that the general requirements of routine Federal Inspection "* * * shall not apply to operations of types traditionally and usually conducted at retail stores * * * when conducted at any retail store * * * for sale in normal retail quantities * * * to consumers * * *."

FSIS regulations (9 CFR 303.1(d) and 381.10(d)) define retail stores that qualify for exemption from routine Federal inspection under the FMIA or PPIA. Under the regulations, for an establishment to be an exempt retail establishment depends, in part, upon the percentage and volume of its trade with consumers other than household consumers, such as hotels, restaurants and similar institutions. Accordingly, the Federal meat and poultry products inspection regulations state in terms of dollars the maximum amount of meat the poultry products which may be sold to nonhousehold consumers if the establishment is to remain an exempt retail establishment. During calendar year 1991, the maximum amount for meat products was $37,100; for poultry products, the amount was $33,100.

The Federal meat and poultry products inspection regulations (9 CFR 303.1(d)(2)(iii)(*b*) and 381.10(d)(2)(iii)(*b*)) further provide that the dollar limitation on product sales by retail stores to consumers other than household consumers will be automatically adjusted during the first quarter of each calendar year whenever the Consumer Price Index, published by the Bureau of Labor Statistics (BLS), Department of Labor, indicates a change during the previous year in the price of the same volume of product exceeding $500, upward or downward. The regulations also require that notice of the adjusted dollar limitation be published in the **Federal Register**.

The BLS Consumer Price Index for 1991 indicates an average annual price increase in meat products of 3.1 percent and an average annual price decrease in poultry products of 0.8 percent. When rounded off to the nearest $100, the price increase for meat products amounts of $1,200, and the price decrease for poultry products amounts of $300. As a percentage of the existing dollar limitation, change in excess of $500 is indicated for meat products only.

Accordingly, FSIS, in accordance with §§ 303.1(d)(2)(iii)(*b*) and 381.10(d)(2)(iii)(*b*) of the regulations, has automatically raised the dollar limitation of permitted sales of meat products from $37,100 to $38,000 and maintained the dollar limitation of permitted sales for poultry products at $33,100.

Done at Washington, DC, on: March 19, 1992.

H. Russell Cross,

Administrator, Food and Safety Inspection Service.

[FR Doc. 92-7024 Filed 3-25-92; 8:45 am]

BILLING CODE 3410-DM-M

Forest Service

Exemption of Char Salvage Fire Recovery Project From Appeal

AGENCY: Forest Service, Northern Region, USDA.

ACTION: Notification that a fire recovery and salvage timber sale project is exempted from appeals under provisions of 36 CFR part 217.

SUMMARY: In the spring of 1991, 16 acres of timber adjacent to several harvested units of the Lower Deadman Timber Sale on the Clearwater National Forest were killed during a prescribed burn. In June 1991, the Lochsa District Ranger proposed a salvage and reforestation project for the burned area.

The District Ranger has determined, through an environmental analysis documented in the Char Salvage Timber Sale Environmental Assessment (EA), that there is good cause to expedite these actions in order to rehabilitate National Forest System lands and recover damaged resources. Salvage of commercial sawtimber within the fire area must be accomplished within the spring and summer of 1992 in order to avoid further deterioration of sawtimber

EFFECTIVE DATE: Effective on March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Jon Bledsoe, District Ranger, Lochsa Ranger District, Clearwater National Forest, Route 1, box 398, Kooskia, ID 83539.

SUPPLEMENTARY INFORMATION:

Background

The Lower Deadman Timber Sale was logged during the period of 1988 to 1990. Units were treated with a prescribed burn in the spring of 1991. Approximately 16 acres of timber outside the harvest units was killed during the prescribed burning. The fire-killed timber is within a management area (Clearwater Forest Plan, September 23, 1987) which is to be managed for big game winter range and timber. In June 1991, the Lochsa District Ranger proposed the salvage harvest of the trees which were killed by fire. This proposal was designed to: (a) Salvage merchantable timber products, (b) contribute to a continuing supply of timber for industry, and (c) fully restock the area to allow rapid recovery of thermal cover for big game. An interdisciplinary team was convened and scoping began in June 1991. After contacting several individuals and State agencies, four environmental issues were identified, and were the basis for the analysis of effects in the EA.

The interdisciplinary team developed two action alternatives and a no action alternative. The effects of these alternatives are disclosed in an EA which was prepared for the proposal. The alternatives ranged from no harvest to salvaging 12 acres of the burned area.

Planned Actions

The selected alternative (Alternative 3) would harvest 140 MBF of timber on 6 acres. No road construction is planned for this sale.

The sale and accompanying work is designed to accomplish the objectives as quickly as possible, minimize salvage volume lost, reduce risk of injury to naturally regenerating seedlings, and return the area to hiding cover as rapidly as possible. To expedite this fire recovery project and accompanying work, procedures outlined in 36 CFR part 217(a)(11) are being followed. Under this Regulation the following may be exempt from appeal:

> Decisions related to rehabilitation of National Forest System lands and recovery of Forest Resources from natural disasters or other natural phenomena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good causes exist to exempt such decisions from review under this part.

Based on the environmental analysis documented in the Char Salvage Timber Sale EA and the District Ranger's Decision Notice for this project, I have determined that good cause exists to exempt this decision from administrative review. Therefore, upon publication of this notice, this project will not be subject to review under 36 CFR part 217.

Dated: March 20, 1992.

Christopher Risbrudt,

Deputy Regional Forester, Northern Region.

[FR Doc. 92-6969 Filed 3-25-92; 8:45 am]

BILLING CODE 3410-11-M

Soil Conservation Service

Uintah Basin Unit Expansion, Colorado River Basin Salinity Control Program, Utah

AGENCY: Soil Conservation Service, Agriculture.

ACTION: Notice of availability of a record of decision.

SUMMARY: Francis T. Holt, responsible federal official for projects administered under the provisions of Public Law 93-320 in the State of Utah, is hereby providing notification that a record of decision to proceed with the installation of the Uintah Basin Unit Expansion, Colorado River Basin Salinity Control Program, is available. Single copies of this record of decision may be obtained from Francis T. Holt at the address shown below.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; A. Rosenthal (Pty) Ltd.; Order Temporarily Denying Export Privileges

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (Department), pursuant to the provisions of § 788.19 of the Export Administration Regulations (currently codified at 15 CFR parts 768-799 (1991)) (the Regulations), issued pursuant to the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. 2401-2420 (1991)) (the Act),[1] has asked the Assistant Secretary for Export Enforcement to enter an order temporarily denying all United States export privileges to A. Rosenthal (Pty) Ltd., with locations Namibia and South Africa,[2] and two of its employees, Karl Cording and Ian Ace (collectively referred to hereinafter as respondents).

In its request, the Department states that it has reason to believe that an order temporarily denying the export privileges of respondents is necessary in the public interest to prevent an imminent violation of the Regulations.

The Department stated that it has reason to believe that respondents have obtained and may continue to obtain U.S.-origin shotguns, having a barrel length of 18 inches or more, by misrepresenting the shotguns' end user and ultimate destination. The Department further stated it has reason to believe that the shotguns may have been diverted from their licensed destination to South Africa, either

[1] The Act expired on September 30, 1990. Executive Order 12730 (55 FR 40373, October 2, 1990) continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. 1701-1706 (1991)).

[2] The location in Cape Town, South Africa, does business under the name A. Rosenthal (Cape) (Pty) Ltd.

directly, or indirectly through other African nations without the required licenses.

Specifically, the Department stated that it has reason to believe that, in 1990 and 1991, Cording and Ace, on behalf of respondents, negotiated for and bought various makes of U.S.-origin shotguns from a sporting goods dealer located in California. In order to facilitate respondents' purchase of shotguns, the California exporter, on behalf of respondents, sought and obtained from the Department licenses authorizing the export of the U.S.-origin shotguns to Botswana.[3] However, respondents knew that the shotguns were not for delivery to or use in Botswana. Moreover, the Botswana end user apparently does not exist. The Department believes, therefore, that the shotguns were exported from the United States under licenses that were obtained based on false representations.

The Department believes that respondents' activities were deliberate and covert and are likely to occur again unless a temporary denial order naming respondents is entered. In addition, the Department believes that a temporary denial order is necessary to give notice to companies in the United States and abroad that they should cease dealing with respondents in transactions involving U.S.-origin goods.

Therefore, based on the showing made by the Department, I find that an order temporarily denying the export privileges of respondents is necessary in the public interest to prevent an imminent violation of the Act and the Regulations and to give notice to companies in the United States and abroad to cease dealing with respondents in goods and technical data subject to the Act and the Regulations, in order to reduce the substantial likelihood that respondents will continue to engage in activities that are in violation of the Act and the Regulations. This order is issued on an *ex parte* basis without a hearing based on the Department's showing that expedited action is required.

Accordingly, it is hereby Ordered.

I. All outstanding individual validated licenses in which A. Rosenthal (Pty) Ltd., with locations in Namibia and South Africa, or two of its employees, Karl Cording and Ian Ace, appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of respondents' privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

II. For a period of 180 days from the date of entry of this order:

A. Rosenthal (Pty) Ltd. with addresses at: 292 Independence Avenue Windhoek, Namibia

and

65–75th Street Denmyr Building 2104 Linden, South Africa

and

Karl Cording, c/o A. Rosenthal (Pty) Ltd., 292 Independence Avenue, Windhoek, Nambia

and

A. Rosenthal (Cape) (Pty) Ltd., 139 Longmarket Street, Cape Town, South Africa

and

Ian Ace, c/o A. Rosenthal (Cape) (Pty) Ltd., 139 Longmarket Street, Cape Town, South Africa.

and all their successors, assignees, officers, partners, representatives, agents, and employees, hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States, and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. After notice and opportunity for comment, as provided in § 788.3(c) of the Regulations, any person, firm, corporation, or business organization related to one or more of the respondents by affiliation, ownership, control, or position of responsibility or other connection in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. As provided in § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may, directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate (a) in any transaction which may involve any commodity or technical data exported or to be exported from the United States, (b) in any reexport thereof, or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

V. In accordance with the provisions of § 788.19(e) of the Regulations, any respondent may, at any time, appeal this temporary denial order by filing with the Office of the Administrative Law Judge, U.S. Department of Commerce, room H–6716, 14th Street and Constitution Avenue, NW., Washington, DC 20230, a full written statement in support of the appeal.

VI. This order is effective immediately and shall remain in effect for 180 days.

VII. In accordance with the provisions of § 788.19(d) of the Regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose a request to renew this temporary denial order by filing a written submission with the Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

A copy of this order shall be served on each respondent and this order shall be published in the **Federal Register**.

Dated: March 19, 1992.

Douglas E. Lavin,

Acting Assistant Secretary for Export Enforcement.

[FR Doc. 92–7008 Filed 3–25–92; 8:45 am]

BILLING CODE 3510–DT–M

[3] A validated export license or reexport authorization is required for shipments of shotguns to certain African nations. There is a presumption of denial for any export license application to ship shotguns to South Africa because a strict U.S. arms embargo is in effect, despite the recent relaxation of certain other export controls for South Africa. 15 CFR 785.4(a).

Until march 21, 1990, when it received its independence from South Africa, Namibia was also subject to the South African arms embargo, because Namibia was under the control of South Africa. The Department's amendments to the Regulations deleting Namibia from the South Africa controls were published in the **Federal Register** on August 20, 1990, 55 FR 33896.

Although there is no embargo on shotgun shipments to Botswana, nevertheless a validated export license is required.

Action Affecting Export Privileges; Ahmed Modarressi; Order Denying Permission To Apply for Or Use Export Licenses

In the matter of: Ahmad Modarressi number 11, Oztu Gap 04 Murettip Sok findikzade, Istanbul, Turkey.

On November 7, 1988, Ahmad Modarressi was convicted in the United States District Court for Masachusetts of violating section 38 of the Arms Export Control Act (currently codified at 22 U.S.C.A. 2778 (1991)) (AECA).

Section 11(h) of the Export Adminstration Act, as amended (currently codified at 50 U.S.C.A. app. 2401–2420 (1991)) (EAA),[1] provides that, at the discretion of the Secretary of Commerce, [2] no person convicted of a viloation of section 38 of the AECA, or certain other provisions of the United States Code, shall be eligible to apply for or use any export license issued pursuant to, or provided by, the EAA or the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1991)) (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any export license issued pursuant to the EAA in which such a person had any interest at the time of his conviction may be revoked.

Pursuant to §§ 770.15 and 772.1(g) of the Regulations, upon notification that a person has been convicted of violating section 38 of the AECA, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any export license issued pursuant to, or provided by, the EAA and the Regulations and shall also determine whether to revoke any export license previously issued to such a person. Having received notice of Modarressi's conviction for violating Section 38 of the AECA, and following consultations with the Director, Office of Export Enforcement, I have decided to deny Modarressi permission to apply for or use any export license, including any general license, issued pursuant to, or provided by, the EAA and the Regulations, for a period of 10 years from the date of his conviction. The 10-year period ends on November 7, 1998. I have also decided to revoke all export licenses issued pursuant to the EAA in which Modarressi had an interest at the time of his conviction.

Accordingly, it is hereby Ordered.

I. All outstanding individual validated licenses in which Modarressi appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Licensing for cancellation. Further, all of Modarressi's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

II. Until November 7, 1998, Ahmad Modarressi, Number 11, Oztu Gap, 04 Murettip Sok, Findikzade, Istanbul, Turkey, hereby is denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering buying selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. After notice and opportunity for comment as provided in § 770.15(h) of the Regulations, any person, firm, corporation, or business organization related to Modarressi by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. As provided in § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any comodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Adminstration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

V. This Order is effective immediately and shall remain in effect until November 7, 1998.

VI. A copy of this Order shall be deliverd to Modarressi. This order shall be published in the **Federal Register**.

Dated: March 17, 1992.

Iain S. Baird,

Director, Office of Export Licensing.

[FR Doc. 92–7010 Filed 3–25–92; 8:45 am]

BILLING CODE 3510–DT–M

[1] The EAA expired on September 30, 1990. Executive Order 12730 (55 FR 40373, October 2, 1990) continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. 1701–1706 (1991)).

[2] Pursuant to appropriate delegations of authority that are reflected in the Regulations, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by section 11(h) of the EAA.

International Trade Administration

[C–570–817]

Rescission of Initiation of Countervailing Duty Investigation and Dismissal of Petition: Chrome-Plated Lug Nuts and Wheel Locks From the People's Republic of China ("PRC")

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Stephanie L. Hager or Paulo F. Mendes, Investigations, Import Administration,

International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377–5055 or 377–5050, respectively.

SUPPLEMENTARY INFORMATION:

Rescission of Initiation

Based on the Department's findings in the March 20, 1992, Redetermination on Remand of Final Antidumping Duty Investigation Pursuant to Court Remand: Chrome-Plated Lug Nuts from the People's Republic of China ("PRC") ("Lug Nuts Redetermination"), we determine that the PRC chrome-plated lug nuts and wheel locks ("lug nuts") industry is not market-oriented and, therefore, our initiation of this countervailing duty investigation is being rescinded and the proceeding terminated.

Case History

Since the publication of our notice of initiation (57 FR 877, January 9, 1992), the Department presented its questionnaire to the Government of the PRC on January 28, 1992.

Scope of Investigation

The merchandise that was covered by this investigation consisted of chrome-plated lug nuts and wheel locks from the PRC, as defined in the "Scope of Investigation" section of our notice of initiation (57 FR 877, January 9, 1992).

The PRC Lug Nuts Industry

In Preliminary Determination of Sales at Less than Fair Value: Sulfanilic Acid from the People's Republic of China (57 FR 9409, 9411, March 18, 1992), the Department articulated its criteria for determining whether a market-oriented industry exists in an economy which will otherwise be considered nonmarket:

- For merchandise under investigation, there must be virtually no government involvement in setting prices or amounts to be produced. For example, state-required production or allocation of production of the merchandise, whether for export or domestic consumption in the nonmarket economy country, would be an almost insuperable barrier to finding a market-oriented industry.
- The industry producing the merchandise under investigation should be characterized by private or collective ownership. There may be state-owned enterprises in the industry but substantial state ownership would weigh heavily against finding a market-oriented industry.
- Market-determined prices must be paid for all significant inputs, whether material or non-material (*e.g.*, labor and overhead), and for an all but insignificant proportion of all the inputs accounting for the total value of the merchandise under investigation. For example, an input price will not be considered market-determined if the producers of the merchandise under investigation pay a state-set price for the input or if the input is supplied to the producers at government direction. Moreover, if there is any state-required production in the industry producing the input, the share of state-required production must be insignificant.

If these conditions are not met, the producers of the merchandise under investigation will be treated as nonmarket economy producers and the countervailing duty law may not be applied. See also, the soon to be published Preliminary Negative Countervailing Duty Determinations: Oscillating and Ceiling Fans from the PRC (signed on March 13, 1992).

In the Lug Nuts Redetermination, we applied these criteria to the PRC chrome-plated lug nut industry and found that a significant input (*i.e.*, steel) is not purchased at a market-determined price because of the extent of state-required production of that input. During the antidumping investigation, we verified the factual premises to this finding. Therefore, the third criteria for finding a market-oriented industry was not met.

Consistent with the Lug Nuts Redetermination, we determine that the PRC producers of lug nuts are nonmarket economy producers to which the countervailing duty law cannot be applied. See *Georgetown Steel Corp.* v. *United States*, 801 F.2d 1308 (Fed. Cir. 1986). Accordingly, we are rescinding our initiation of the countervailing duty investigation of lug nuts from the PRC.

This determination is published pursuant to section 702(c)(3) of the Tariff Act of 1930, as amended, and 19 CFR 355.13(c).

Dated: March 20, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C–351–062]

Pig Iron From Brazil; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On January 28, 1992, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on pig iron from Brazil. We have now completed this review and determine the net subsidy to be 0.06 percent *ad valorem* for all firms for the period January 1, 1990 through December 31, 1990. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

EFFECTIVE DATE: March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Dana Mermelstein or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On January 28, 1992, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 64763) the preliminary results of its administrative review of the countervailing duty order on pig iron from Brazil (45 FR 23045; April 4, 1980). The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by this review are shipments from Brazil of pig iron of basic, malleable, and low phosphorous grades. During the review period, such merchandise was classifiable under item numbers 7201.10.00, 7201.30.00, and 7206.10.00 of the Harmonized Tariff Schedule (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. The review covers the period January 1, 1990 through December 31, 1990 and seven programs: (1) Income Tax Reduction for Export Earnings; (2) CACEX preferential Working Capital Financing for Exports; (3) FINEX preferential financing; (4) EST preferential financing; (5) EGF preferential financing; (6) BEFIEX Reduction of Taxes and Import Duties; and (7) FINEP Preferential financing. Nineteen companies produced and exported the subject merchandise to the United States during the review period.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

Final Results of Review

As a result of our review, we determine the net subsidy to be 0.06 percent *ad valorem* for all firms for the period January 1, 1990 through December 31, 1990. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

Therefore, the Department will instruct the Customs Service to liquidate, without regard to countervailing duties, shipments of this merchandise from Brazil exported on or after January 1, 1990 and on or before December 31, 1990. The Department will also instruct the Customs Service to waive the collection of cash deposits of estimated countervailing duties on all shipments of the subject merchandise from Brazil entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: March 19, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 92–7042 Filed 3–25–92; 8:45 am]

BILLING CODE 3510-DS-M

U.S. Geological Survey; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 91–179. *Applicant:* U.S. Geological Survey, Menlo Park, CA 94025. *Instrument:* Electronics for Hydrogen-Water Equilibrium Device and Auto Freezing Microvolume Inlet System. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* See notice at 57 FR 400, January 6, 1992.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* This is a compatible accessory for an instrument previously imported for the use of the applicant. The instrument and accessory were made by the same manufacturer. The accessory is pertinent to the intended uses and we know of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 92–7043 Filed 3–25–92; 8:45 am]

BILLING CODE 3510-DS-M

University of Illinois at Urbana-Champaign, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 91–185. *Applicant:* University of Illinois at Urbana-Champaign, Urbana, IL 61801. *Instrument:* Mass Spectrometer, Model IMS–5F. *Manufacturer:* Cameca, France. *Intended Use:* See notice at 57 FR 1725, January 15, 1992. *Reasons:* The foreign instrument provides: (1) A double-focussing magnetic sector for microbeam imaging at submicrometer resolution, (2) mass resolution to 20,000 and (3) both oxygen and cesium ion guns. *Advice Received From:* National Institutes of Health, February 20, 1992.

Docket Number: 91–187. *Applicant:* The Pennsylvania State University, University Park, PA 16802–4801. *Instrument:* CCD Microscope System. *Manufacturer:* Japan High Tech Co., Ltd., Japan. *Intended Use:* See notice at 57 FR 1725, January 15, 1992. *Reasons:* The foreign instrument provides: (1) A stage-mounted chamber which can cool or heat specimens from −185°C to 1500°C at a precisely controlled rate (0.1°C/minute to 90°C/minute) and (2) a high resolution CCD image for photographing or videotaping specimen changes. *Advice Received From:* National Institute of Standards and Technology, February 24, 1992.

The National Institutes of Health and National Institute of Standards and Technology advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Institute of Standards and Technology

[Docket No. 920364–2064]

National Voluntary Laboratory Accreditation Program

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of Change—NVLAP Thermal Insulation Materials (TIM) Testing Program.

SUMMARY: The National Voluntary Laboratory Accreditation Program (NVLAP), National Institute of Standards and Technology (NIST) announces that the Thermal Insulation Materials Testing Program (TIM) is changed to the Thermal Insulation and Building Envelope Materials Testing Program (TIB). The scope of the laboratory accreditation program is revised to include testing products and materials that affect the thermal integrity, energy performance, and quality of building envelopes. The test methods in the expanded program will apply to testing of Thermal Insulation Materials, Fenestration Products (Windows and Doors), Building Seals and Sealants and other appropriate materials that comprise the building envelope.

FOR FURTHER INFORMATION CONTACT: Lawrence Galowin, Program Manager, National Voluntary Laboratory Accreditation Program, national Institute of Standards and Technology, Building 411, A146, Gaithersburg, MD 20899, (301) 975–4022.

SUPPLEMENTARY INFORMATION:

Background

This notice is issued in accordance with §§ 7.2 and 7.18 of the NVLAP procedures (15 CFR, part 7). The Thermal Insulation Materials Testing Program (TIM) was established in 1979 at the request of three private sector thermal insulation trade associations. The purpose of the program was to develop a list of accredited laboratories

that produce reliable thermal insulation test data. The Thermal Insulation Materials Testing Program was the first of the NVLAP Laboratory Accreditation Programs.

The scope of the TIM program was to provide consumers with reliable data on the ability of thermal products to resist heat flow. The efficient use of these materials contributes to the nation's need to conserve energy consumed in heating and cooling buildings; the added products and materials augment that goal.

Need for Change

One of the continuing goals of NVLAP is to streamline the program where possible to increase efficiency and reduce costs and be responsive to its laboratory constituency. NVLAP, also, aims to carry out its program to be compatible with and recognized by domestic, foreign, and international systems for laboratory accreditation so as to enhance the universal acceptance of test data produced by NVLAP-accredited laboratories. As Federal, state and local governments pass legislation requiring buildings to be more energy-efficient, the performance of the entire building envelope becomes more important. Building owners, architects and heating and cooling engineers need to know the energy performance of the entire building envelope, including thermal insulation, fenestration elements (windows and doors), building seals and sealants, and other appropriate materials, to determine the thermal integrity, energy efficiency and quality of the building envelope.

The purpose of the Thermal Insulation Materials Laboratory Accreditation program, when established in 1979, was to provide consumers with reliable data on the ability of thermal insulation to resist heat flow. The initial program encompassed specific tests on materials such as: batts, blankets, loose fill and pre-formed board thermal insulations.

The request to add the testing of fenestration products (windows and doors) to the NVLAP accreditation was submitted by a NVLAP accredited independent testing laboratory, Warnock Hersey International, Inc. The request initially suggested the window and door program be included in the NVLAP Commercial Products Testing Program. After discussion with NVLAP, the requestor agreed that the program to test window and door products is to include data on the thermal performance and quality of the installed products. Therefore, the request was changed to bring the fenestration testing program into the Thermal Insulation Materials Program and to expand the program to include other building envelope materials. Also, Building Seals and Sealants will be included in TIB (previously only in the Commercial Products Testing Program and to be continued for laboratory interests in that program).

The requestor submitted the following list of test methods for which laboratories may apply for accreditation for testing fenestration products:

(NVLAP Application Test Methods Codes 01/W01—01/W09 and 01/P01 & 01/P02)

01/W01 ASTM E283 Air Leakage Rate—Windows, Curtain Walls and Doors

01/W02 ASTM E330 Structural Performance by Uniform Static Air Pressure Differential—Windows, Curtain Walls and Doors

01/W03 ASTM E331 Water Penetration by Uniform Static Air Pressure Difference—Windows, Curtain Walls and Doors

01/W04 ASTM E424 Solar Energy Transmittance and Reflectance—Sheet Materials

01/W05 ASTM E546 Frost Point of Sealed Insulating Glass Units

01/W06 ASTM E547 Water Penetration—Cyclic Static Air Pressure Difference—Windows, Curtain Walls and Doors

01/W07 ASTM E773 Durability of Sealed Insulating Glass Units

01/W08 ASTM C976 Thermal Performance Calibrated Hot Box

The addition of ASTM C976 "Thermal Performance Calibrated Hot Box" to the expanded TIM Program was recommended by Technical Experts who conduct on-site assessments for NVLAP, the above mentioned laboratory, and by R. G. Miller and W. P. Goss in the paper, "Hot Box, Instrumentation, Calibration and Error Estimate-A Survey" presented at the ASTM Committee C-16 Second Symposium on Insulation Materials: Testing and Applications, October 10-12, 1991 in Gatlinburg, Tennessee.

For comprehensive window programmatic needs the list of methods will also include the new standard ASTM C1199 and Computer Computational Methods:

01/W09 ASTM C1199—91—Test Method for Measuring the Steady State Thermal Transmittance of Fenestration Systems Using Hot Box Methods

01/P01 LBL Report 25685 Window 3.1 A PC Program for Analyzing Window Thermal Performance

01/P02 Frame 2.2 (Carpenter, S. & McGowan, A.G., Waterloo, Ontario, Canada)

The test methods of C976 and C236 "Steady State Thermal Performance of Building Assemblies by Means of a Guarded Hot Box" (already in the TIM program) in the expanded program are referenced for application to window testing.

The National Research Council of Canada (NRC), Canadian Construction Materials Centre (CCMC) has under consideration a policy statement as a guideline for recognition of only NVLAP accredited laboratories for particular tests under the NIST/NVLAP—Canadian Standards Association bi-lateral agreement. The CCMC has indicated (in discussions) their strong interest in the fenestration products addition to the Thermal Insulation Program.

The National Fenestration Research Council (NFRC) is developing a certification, rating and labeling program for window and door products that may include test standards and methods for accreditation as it relates to certification to meet their requirements for energy ratings and labeling.

Recognition of NVLAP accreditation in support of, and in collaboration with, NFRC programs has been proposed.

Fenestration products (windows and doors) are parts of the building envelope; those components contribute to the energy-efficient performance of buildings and provide resistance to external variable conditions. This announcement provides for testing laboratories to apply for accreditation for testing thermal insulation materials, fenestration products (windows and doors), building seals and sealants, under the Thermal Insulation and Building Envelope Materials Testing Program. Other appropriate fields and test methods for building envelope parameters and performance of materials may be requested and added to the Program following NVLAP Procedures through letter submittals.

Dated: March 20, 1992.

John W. Lyons,

Director.

[FR Doc. 92-7039 Filed 3-25-92; 8:45 am]

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Availability of Proposed Environmental Assessment, Request for Public Comments and Notice of Public Hearing

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of availability of proposed environmental assessment; request for public comments and, notice of public hearing.

SUMMARY: The National Oceanic and Atmospheric Administration announces the availability of a proposed Supplemental Environmental Assessment (SEA) of the potential bioeffects of non-ionizing radio frequency radiation (RFR) generated by deployment and operation of Weather Surveillance Radars 88 Doppler (WSR-88D) throughout the United States to support the National Weather Service modernization program, requests comment on the proposed SEA, and gives notice of a public hearing to receive comments on the proposed SEA.

DATES: Comments are requested until May 26, 1992.

A public hearing shall be held on April 21, 1992, at 10 a.m.

ADDRESSES: Comment should be directed to: Mr. David Smiley (SPO121), SEA Coordinator NOAA, 1325 East West Highway, room 15166, Silver Spring, MD 20910, Attn: J. Wargo.

The hearing will be held in the Auditorium, Herbert C. Hoover Building, 14th and Constitution Avenue, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Inquiries or requests for copies of the proposed SEA should be directed to: Mr. David Smiley (SPO121), SEA Coordinator NOAA, 1325 East West Highway, room 15166, Silver Spring, MD 20910, 301-713-1000. Questions on hearing procedures should be directed to the Office of the Administrative Law Judge, 14th Street and Constitution Avenue NW., room 6716, Washington, DC 20230, 202-377-3135.

SUPPLEMENTARY INFORMATION: In November 1984 a Programmatic Environmental Impact Statement (PEIS) was adopted regarding the deployment and operation of the WSR-88D, also known as Next Generation Weather Radars (NEXRADs) being developed jointly by the Departments of Commerce, Defense and Transportation. After public review, the PEIS concluded that deployment and operation of the NEXRADs throughout the United States would have no significant adverse environmental or health impacts.

A proposed SEA has been drafted to update that portion of the PEIS dealing with the potential bioeffects of WSR-88D. The proposed SEA takes into account studies conducted since 1984 on the potential bioeffects of RFR and the specific energy characteristics of WSR-88D. The proposed SEA confirms that there will be no significant impacts.

On April 21, 1992, at 10 a.m. there will be an informal hearing to receive comments on the proposed SEA. This hearing will be held in the Auditorium of the Herbert C. Hoover Building, Department of Commerce, 14th St. and Constitution Avenue NW., Washington, DC. The hearing will continue until all persons desiring to be heard have had an opportunity to present their views. The hearing will be conducted by a member of the Department of Commerce Office of The Administrative Law Judge, who shall make all rulings appropriate for the expeditious conduct of the proceedings for insuring a fair opportunity for all interested persons to be heard. A verbatim transcript of the hearing shall be prepared and considered along with public comments timely submitted.

Persons desiring to comment in writing on the proposed SEA should send comments to the address indicated above to be received on or before the date indicated above.

After taking into account written comments and comments received at the hearing, the final version of the SEA will be prepared.

Dated: March 20, 1992.

Mark A. McCloy,

Deputy Program Manager, NEXRAD Joint System Program Office.

BILLING CODE 3510–04–M

Patent and Trademark Office

Advisory Commission on Patent Law Reform; Meeting

AGENCY: Patent and Trademark Office, Commerce.
ACTION: Notice of meeting.

SUMMARY: The Commission was chartered on August 15, 1990, to advise the Secretary of Commerce on the state of, and need for, any reform in the United States patent system, as well as the need for any changes in the U.S. laws relating to the enforcement and the licensing of U.S. patents. This meeting will provide an opportunity for a discussion of the findings and draft final report of the Advisory Commission.

DATES: The Advisory Commission on Patent Law Reform will meet on April 27, 1992, from 9 a.m. to 5:30 p.m.

PLACE: Crystal Park Three, Eleventh Floor, 2131 Crystal Drive, Arlington, Virginia 22202.

MATTERS TO BE CONSIDERED: 1. Presentation and discussion of the draft report of the Advisory Commission.

2. Set administrative agenda for further Advisory Commission proceedings and report preparation.

BACKGROUND: As part of its goal of providing the Secretary of Commerce with an assessment of the United States patent system, the Advisory Commission has been studying an agenda of fourteen issues. The Commission has sought public input on the issues through an invitation for public comment published May 16, 1991 (56 FR 22702), and received a substantial response. During the last meeting, the four Working Groups of the Advisory Commission presented draft reports containing their initial findings and recommendations on the fourteen issues. Since that point, the outstanding issues have been addressed, and the findings and recommendations of the four reports have been integrated into a draft final report. The current meeting will provide an opportunity for the Advisory Commission to present the draft final report, and to hold discussions on the findings and recommendations therein.

SUPPLEMENTARY INFORMATION: The meeting will be open to public observation. Approximately 45 seats have been reserved for the public on a first-come, first-served basis. Efforts will be made to accommodate all requests for attendance; however, to ensure that adequate seating will be available, parties wishing to attend should request a reservation by April 25, 1992. Reservations for attendance should be made through the contact person indicated below. If time permits, the Chairperson may allow oral comments or questions from the public attendees. Written comments and suggestions will be accepted before or after the meeting on any of the agenda matters.

FOR FURTHER INFORMATION CONTACT: E.R. Kazenske, Executive Assistant to the Commissioner, Box 15, Patent and Trademark Office, Washington, DC 20231; (703) 305–8600.

Dated: March 20, 1992.

Harry F. Manbeck, Jr.,

Assistant Secretary and Commissioner of Patents and Trademarks.

BILLING CODE 3510–16–M

CONSUMER PRODUCT SAFETY COMMISSION

Commission Agendas and Priorities; Public Hearing

AGENCY: Consumer Product Safety Commission.
ACTION: Notice of public hearing.

SUMMARY: The Commission will conduct a public hearing to receive views from all interested parties about its agenda and priorities for Commission attention during fiscal year 1994, which begins October 1, 1993. Participation by members of the public is invited. Written comments and oral presentations concerning the Commission's agenda and priorities for fiscal year 1994 will become part of the public record.

DATES: The hearing will begin at 10 a.m. on April 28, 1992. Written comments will be accepted until April 21, 1992. Requests from members of the public desiring to make oral presentations must be received by the Office of the Secretary not later than April 14, 1992. Persons desiring to make oral presentations at this hearing must submit a written text or summary of their presentations not later than April 21, 1992.

ADDRESSES: The hearing will be in room 556 of the Westwood Towers Building, 5401 Westbard Avenue, Bethesda, Maryland. Written comments, requests to make oral presentations, and texts or summaries of oral presentations should be captioned "Agenda and Priorities" and mailed to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, or delivered to that office, room 420, 5401 Westbard Avenue, Bethesda, Maryland.

FOR FURTHER INFORMATION CONTACT: For information about the hearing or to request an opportunity to make an oral presentation, call or write Sheldon Butts, Deputy Secretary, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0800; telefax (301) 504–0127.

SUPPLEMENTARY INFORMATION: Section 4(j) of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2053(j)) requires the Commission to establish an agenda for action under the laws it administers, and priorities for action at least 30 days before the beginning of each fiscal year. Section 4(j) of the CPSA provides further that before establishing its agenda and priorities for action, the Commission shall conduct a public hearing and provide an opportunity for the submission of comments.

Selection of priorities from the Commission's agenda of projects and programs is a crucial step in the development of the Commission's budget for each fiscal year. The Office of Management and Budget requires all Federal agencies to submit their budget requests 13 months before the beginning of each fiscal year. The Commission is beginning the process of formulating its budget request for fiscal year 1994, which begins on October 1, 1993.

For this reason, the Commission will conduct a public hearing on April 28, 1992, to receive comments from the public concerning its agenda and priorities for fiscal year 1994. The Commissioners desire to obtain the views of a wide range of interested persons including consumers; manufacturers, importers, distributors, and retailers of consumer products; members of the academic community; and health and safety officers of state and local governments.

The Commission is charged by Congress with protection of the public from unreasonable risks of injury associated with consumer products. The Commission enforces and administers the Consumer Product Safety Act (15 U.S.C. 2051 *et seq.*); the Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*); the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*); the Poison Prevention Packaging Act (15 U.S.C. 1471 *et seq.*); and the Refrigerator Safety Act (15 U.S.C. 1211 *et seq.*). Standards and regulations issued under provisions of those statutes are codified in the Code of Federal Regulations, title 16, chapter II.

While the Commission has broad jurisdiction over products used by consumers in or around their homes, in schools, in recreation, and other settings, its staff and budget are limited. Section 4(j) of the CPSA expresses Congressional direction to the Commission to establish an agenda for action each fiscal year and to select from that agenda a limited number of projects for priority attention.

Commission priorities are selected in accordance with the Commission statement of policy governing establishment of priorities codified at 16 CFR 1009.8. That policy statement includes the following factors to be considered by the Commission when selecting its priorities:

1. Frequency and severity of injuries associated with consumer products.
2. Amenability of a product hazard to injury reduction through regulation, information and education, or other action by the Commission.
3. Likelihood of future illness or injury resulting from chronic hazards which may be associated with consumer products.
4. Costs and benefits of Commission action.
5. Unforeseen nature of a risk of injury.
6. Vulnerability of children, the elderly, or persons with disabilities to a risk of injury.
7. Probability of exposure to a hazard associated with consumer products.

Persons who desire to make oral presentations at the hearing on April 28, 1992, should call or write Sheldon Butts, Deputy Secretary, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 504–0800, telefax (301) 504–0127, not later than April 14, 1992.

Presentations should be limited to approximately ten minutes. Persons desiring to make presentations must submit the written text or a summary of their presentations to the Office of the Secretary not later than April 21, 1991. The Commission reserves the right to impose further time limitations on all presentations and further restrictions to avoid duplication of presentations. The hearing will begin at 10 a.m. on April 28, 1992, and will conclude the same day.

Written comments on the Commission's agenda and priorities for fiscal year 1994, should be received in the Office of the Secretary not later than April 21, 1992.

Dated: March 23, 1992.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD Advisory Panel on Streamlining and Codifying Acquisition

AGENCY: Defense Systems Management College.
ACTION: Notice of meeting.

SUMMARY: Open to the public on April 9, 1992, starting at 8:30 a.m. in the Office of Technology Assessment (OTA) Conference Center, 600 Pennsylvania Ave., SE., Washington DC. The panel will hear presentations/recommendations by the task force on its review of the lower priority laws, and by the various panel working groups on the statutes they have reviewed to date.

For further information contact Major Jean Kopala at (703) 355–2665.

Dated: March 23, 1992.

Linda M. Bynum,

Alternative OSD Federal Register Liaison Officer, Department of Defense.

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form and Applicable OMB Control Number: *TRICARE Program Evaluation Survey.*

Type of Request: New Collection.

Average Burden Hours/Minutes Per Response: 40 minutes.

Responses Per Respondent: 2.

Number of Respondents: 750.

Annual Burden Hours: 1,000.

Annual Responses: 1,500.

Needs and Uses: The TRICARE coordinated care program will substantially alter the delivery of health care to all military beneficiaries, including retiree dependents, residing in the Tidewater area of Virginia. Evaluation of TRICARE requires survey information on beneficiary satisfaction, health status, access to care, and family background because DOD does not routinely collect this information.

Affected Public: Individuals or households.

Frequency: One time with one follow-up survey.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Joseph F. Lackey.

Written comments and recommendations on the proposed information collection should be sent to Mr. Lackey at the Office of Management and Budget, Desk Officer for DOD, room 3002, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. William P. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, VA 22202–4302.

Dated: March 23, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee At

(Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 15 April 1992.

Time: 0800–1700 hours daily.

Place: Ft. Leavenworth, KS.

Agenda: Members of the 1992 ASB Summer Study, "C2 on the Move" will meet to continue work on the study. The purpose of this Classified meeting is directed to interviews with commanders who participated in Desert Storm and Just Cause. Areas of interest are in both "real world" operational concerns and command and control areas. This meeting will be closed to the public in accordance with section 552(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

Army Science Board, Partially Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 8–9 April 1992.

Time: 8 April 1992: 0800–1630 hours Open. 1930–2300 hours Closed. 9 April: 0800–1700 hours Open.

Place: Fort Belvoir, Virginia.

Agenda: The Army Science Board Spring General Membership Meeting will be conducted 8–9 April 1992 at Fort Belvoir, Virginia. This annual meeting consists of Issue Group Meetings, Membership Review Committee Meetings, Steering Group Meetings and general ASB planning discussions for the conduct of business in the near future. This meeting will be closed to the public (where indicated) in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening all portions of the meeting. The open portion of the meeting will be open to the public. Any person may attend, appear before or file statements with the committee at the time and in the matter permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

SYSTEM NAME:

Nonappropriated Fund Accounts Receivable System (53 FR 28430, July 28, 1988)

CHANGES:

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Add "and any other debtor to a nonappropriated fund instrumentality." to the end of the entry.

* * * * *

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with "31 U.S.C. 3511, 3512, 3513, 3514; 10 U.S.C. 2481 and 3012; 5 U.S.C. 5514 and 5101; 26 U.S.C. 6103(m)(2) IRC; 31 U.S.C. 3716; and Executive Order 9397."

* * * * *

PURPOSE(S):

Add "To permit collection of debts owed to a nonappropriated fund instrumentality. Records in this system of records are subject to use in authorized approved computer matching programs regulated under the Privacy Act of 1974 (5 U.S.C. 552a), as amended, for debt collection." to the end of the entry.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USERS:

Delete the entry and replace with "Records on individuals contained in this system of records may be disclosed:

To the General Accounting Office and the Department of Justice for collection action for any delinquent account when circumstances warrant.

To a commercial credit reporting agency for the purpose of either adding to a credit history file or obtaining a credit history file for use in the administration of debt collection.

To a debt collection agency for the purpose of collection services to recover indebtedness owed to an Army nonappropriated fund instrumentality.

To any other Federal agency for the purpose of effecting salary offset procedures under the provisions of 5 U.S.C. 5514, against a person employed by that agency when any creditor Army nonappropriated fund instrumentality has a claim against the person.

To any other Federal agency including, but not limited to, the Internal Revenue Service and Office of Personnel Management for the purpose of effecting an administrative offset of a debt, as defined at 31 U.S.C. 3701.

To the Internal Revenue Service (IRS) under the provisions of 26 U.S.C. 6103(m)(2) IRC to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim against the taxpayer. (NOTE: Disclosure of a mailing address from the IRS may be made only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a Federal claim under the Debt Collection Act of 1982, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the IRS will not be used or shared for any other DOD purpose or disclosed to another Federal, state or local agency which seeks to locate the same individual for its own debt collection purpose.)

To any other Federal, state or local agency for the purpose of conducting an authorized computer matching program to identify and locate delinquent debtors for recoupment of debts owed the Army nonappropriated fund instrumentality.

Any information in this system concerning an individual may be disclosed to a creditor Federal agency requesting assistance for the purpose of initiating debt collection action by way of a salary or administration offset against the individual.

The "Blanket Routine Uses" set forth at the beginning of the Army's compilation of system of records notices apply to this system."

ADD A NEW CATEGORY "DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act of 1966 (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The disclosure is limited to information necessary to establish the identity of the individual, including name, address, and taxpayer identification number (SSN); the amount, status, and history of the claim; and the agency or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report."

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Director, Defense Finance and Accounting Service-Indianapolis Center, ATTN: DFAS-IN-PN, Indianapolis, IN 46249–1056."

* * * * *

RECORD SOURCE CATEGORIES:

Add "from the Department of the Treasury and the Defense Manpower Data Center." to the end of the entry.

SYSTEM NAME:

Nonappropriated Fund Accounts Receivable System

SYSTEM LOCATION:

Nonappropriated Fund (NAF) activities at Army installations worldwide. Official mailing addresses are published as an appendix to the Army's compilation of system of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and past users of nonappropriated fund instrumentalities (NAFI) whose accounts show balances other than zero. Persons using Post billeting facilities on a fee paid basis (bachelor officer quarters, visitor officer quarters and guest house facilities) and persons no longer using such facilities whose accounts have other than zero balances. Any individual having a statement of account for the billing period, individuals occupying government housing at any military installation. Individual class B telephone subscribers. Members, customers or civilians having 30 day credit terms for 'charge sales and/or dues obligations to NAF activities. All persons whose accounts have been dishonored by banking institutions and their checks returned to NAF activities. Individuals who have cash loans charged to their accounts and any other debtor to a nonappropriated fund instrumentality (NAFI).

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, SSN, rank, amount of charges, billings of items or services furnished, subsidiary ledgers containing detail of services billed and paid by individual; work order forms, invoice listings, monthly receipt vouchers, date and method of payment, file of billings associated with returned/dishonored checks, and relevant similar documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C. 3511, 3512, 3513, 3514; 10 U.S.C. 2481 and 3012; 5 U.S.C. 5514 and 5101; 26 U.S.C. 6103(m)(2) IRC; 31 U.S.C. 3716; and Executive Order 9397.

PURPOSE(S):

To maintain current rosters as subsidiary records for accounts receivable and cash accountability control; to provide monthly statements to customers. To provide ledger balances for activity financial statements. To prepare aged listing of accounts receivable, 30, 60, and 90 days. To answer inquiries of members on account status and specific transactions.

To permit collection of debts owed to a nonappropriated fund instrumentality.

Records in this system of records are subject to use in authorized approved computer matching programs regulated under the Privacy Act of 1974 (5 U.S.C. 552a), as amended, for debt collection.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USERS:

Records on individuals contained in this system of records may be disclosed:

To the General Accounting Office and the Department of Justice for collection action for any delinquent account when circumstances warrant.

To a commercial credit reporting agency for the purpose of either adding to a credit history file or obtaining a credit history file for use in the administration of debt collection.

To a debt collection agency for the purpose of collection services to recover indebtedness owed to an Army nonappropriated fund instrumentality.

To any other Federal agency for the purpose of effecting salary offset procedures under the provisions of 5 U.S.C. 5514, against a person employed by that agency when any creditor Army nonappropriated fund instrumentality has a claim against the person.

To any other Federal agency including, but not limited to, the Internal Revenue Service and Office of Personnel Management for the purpose of effecting an administrative offset, as defined at 31 U.S.C. 3701, of a debt.

To the Internal Revenue Service (IRS) under the provisions of 26 U.S.C. 6103(m)(2) IRC to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim against the taxpayer. (NOTE: Disclosure of a mailing address from the IRS may be made only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a Federal claim under the Debt Collection Act of 1982, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the IRS will not be used or shared for any other DOD purpose or disclosed to another Federal, state or local agency which seeks to locate the same individual for its own debt collection purpose.)

To any other Federal, state or local agency for the purpose of conducting an authorized computer matching program to identify and locate delinquent debtors for recoupment of debts owed an Army nonappropriated fund instrumentality.

Any information in this system concerning an individual may be disclosed to a creditor Federal agency requesting assistance for the purpose of initiating debt collection action by way of a salary or administration offset against the individual.

The "Blanket Routine Uses" set forth at the beginning of the Army's compilation of system of records notices apply to this system.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act of 1966 (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)). The disclosure is limited to information necessary to establish the identity of the individual, including name, address, and taxpayer identification number (SSN); the amount, status, and history of the claim; and the agency or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, DISPOSING AND REPORTING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tapes and/or discs by account in numerical and alphabetical order; computer hard copy printouts filed in binders; copies of statements filed in folders.

RETRIEVABILITY:

By customer name and SSN.

SAFEGUARDS:

Records are maintained in lock-type cabinets within storage areas accessible only to authorized personnel. Personnel having access are limited to those having an official need-to-know who have been trained in handling personal information subject to the Privacy Act.

RETENTION AND DISPOSAL:

Destroyed after 10 years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Defense Finance and Accounting Service - Indianapolis Center, ATTN: DFAS-IN-PN, Indianapolis, IN 46249-1056.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system of records should address written inquiries to the custodian of nonappropriated funds activities at the installation where record is believed to exist. Official mailing addresses are published as an appendix to the Army's compilation of system of records notices.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records contained in this system of records should address written inquiries to the appropriate nonappropriated fund activity custodian. Official mailing addresses are published as an appendix to the Army's compilation of system of records notices.

Individual should furnish their full name, SSN, and account number.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340-21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From daily transaction registers/ journals received from billeting officer, signal officer, and/or club officers; from the Department of the Treasury and the Defense Manpower Data Center.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810-01-F

Defense Investigative Service

Privacy Act of 1974; Amend a Record System

AGENCY: Defense Investigative Service, DOD.

ACTION: Amend a record system.

SUMMARY: The Defense Investigative Service proposes to amend one record system notice subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The proposed amendment will be effective April 27, 1992, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Chief, Office of Information and Public Affairs, Defense Investigative Service, 1900 Half Street, SW., Room 6115, Washington, DC 20324-1700.

FOR FURTHER INFORMATION CONTACT: Mr. Dale Hartig at (202) 475-1062.

SUPPLEMENTARY INFORMATION: The complete Defense Investigative Service system of records notices inventory subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, has been published in the **Federal Register** as follows:

50 FR 22943, May 29, 1985 (DOD Compilation, changes follow)
55 FR 22390, Jun 1, 1990
56 FR 12716, Mar 27, 1991
56 FR 46163, Sep 10, 1991
57 FR 1155, Jan 10, 1992
57 FR 5421, Feb 14, 1992

The amendment is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of an altered system report. The specific changes to the notice being amended are set forth below followed by the system notice, as amended, published in its entirety.

Dated: March 18, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

V1-01

CHANGES:

SYSTEM NAME:

Privacy and Freedom of Information Request Records (50 FR 22944, May 29, 1985)

* * * * *

SYSTEM LOCATION:

Add "Privacy Act records are located at the Defense Investigative Service, Privacy Act Office, P.O. Box 1211, Baltimore, MD 21203-1211." to the end of the entry.

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

On line 2 after "requesters" insert a semicolon (;). Delete the rest of line 2 and all of line 3 and replace with "correspondence and other documentation pertaining to requests for information released or withheld;".

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Add "DOD Regulation 5400.7-R, Freedom of Information Act Program (32 CFR part 286); and DOD Regulation 5400.11-R, DOD Privacy Program (32 CFR part 286a)." to the end of the entry.

PURPOSE(S):

Delete entry and replace with "The system contains records documenting requests for information and DIS responses to those requests; actions taken in subsequent requests (including correction and amendment actions), appeals, or litigation. The records are also used as a basis for reports and implementing directives."

* * * * *

STORAGE:

At the end of the first line delete "and" insert a period (.). On line 2, delete "microfilm" and replace with "Backup copies exist on microfilm or other machine-readable media."

RETRIEVABILITY:

Delete lines 2 and 3.

SAFEGUARDS:

On line 4, add a period (.) after "personnel". Delete the rest of line 4 and line 5.

RETENTION AND DISPOSAL:

Delete entry and replace with "Records are destroyed two years after date of reply EXCEPT when access to all or any part of the information requested has been denied, destruction occurs 5 years after date of reply; when subsequent administrative action has occurred under the governing act, all originals and copies shall be destroyed 4 years after final denial by the agency or 3 years after final adjudication by the courts, whichever is later. Destruction of paper records is accomplished by shredding, burning or pulping. Machine readable media are erased or overwritten."

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Defense Investigative Service, Office of Information and Public Affairs, 1900 Half St, SW, Washington, DC 20324-1700 for Freedom of Information Request records.

Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224-6603 for Privacy Act records."

NOTIFICATION PROCEDURE:

Delete the entry and replace with "Individuals seeking to determine if information about themselves is contained in this system of records should address written inquiries to the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW, Washington, DC 20324-1700 for Freedom of Information request records and the Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224-6603 for Privacy Act records."

RECORD ACCESS PROCEDURES:

Delete the entry and replace with "Individuals seeking access to information about themselves contained in this system of records should address written inquiries to the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW, Washington, DC 20324-1700 for Freedom of Information request records and the Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224-6603 for Privacy Act records.

A request for information must contain the full name of the subject individual.

Personal visits will require a valid driver's license or other picture identification and are limited to the Privacy Act Office."

CONTESTING RECORD PROCEDURES:

Delete entry and replace with "The agency's rules for accessing records, contesting contents, and appealing initial determinations by the individual concerned are contained in DIS Regulation 28-4, Access to and Maintenance of DIS Personal Records; 32 CFR part 321; or may be obtained from the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW., Washington, DC 20324-1700".

* * * * *

V1-01

SYSTEM NAME:

Freedom of Information and Privacy Request Records.

SYSTEM LOCATION:

Freedom of Information records are located at the Defense Investigative Service, Information and Public Affairs Office, 1900 Half Street, SW, Washington, DC 20324-1700.

Privacy Act records are located at the Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224-6603.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have submitted requests or who were the subject of requests under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

CATEGORIES OF RECORDS IN THE SYSTEM:

Copies of all correspondence by requesters; correspondence and other documentation pertaining to requests for information released or withheld; summaries and logs of actions taken regarding requests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations; 5 U.S.C. 552 as amended by Pub. L. 93-502, Freedom of Information Act; 5 U.S.C. 552a, Pub. L. 93-579, the Privacy Act of 1974, as amended; Department of Defense Regulation 5400.7-R, Freedom of Information Act Program (32 CFR part 286); and Department of Defense Regulation 5400.11-R, DOD Privacy Program (32 CFR part 286a).

PURPOSE(S):

To facilitate responses to individual requests for information; to document actions taken in subsequent requests (including correction and amendment actions), appeals, or litigation; to provide a basis for reports and implementing directives.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The "Blanket Routine Uses" published at the beginning of DIS' compilation of record system notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are maintained in file folders, backup copies exist on diskettes or other machine-readable media.

RETRIEVABILITY:

Information is retrieved by the name of the subject of the request.

SAFEGUARDS:

Records are maintained in security containers and only authorized personnel are permitted access.

RETENTION AND DISPOSAL:

Records are destroyed two years after date of reply EXCEPT when access to all or any part of the requested information has been denied, destruction occurs 5 years after date of reply; when subsequent administrative action has occurred under the governing act, all originals and copies shall be destroyed 4 years after final denial by the agency or 3 years after final adjudication by the courts, whichever is later. Destruction of paper records is accomplished by shredding or burning. Machine readable media are erased or overwritten.

SYSTEM MANAGER(S) AND ADDRESS:

Defense Investigative Service, Deputy Director (Resources), 1900 Half Street, SW., Washington, DC 20324–1700.

NOTIFICATION PROCEDURES:

Individuals seeking to determine if information about themselves is contained in this system of records should address written inquiries to the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW, Washington, DC 20324–1700 for Freedom of Information request records and the Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224–0603 for Privacy Act records.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system of records should address written inquiries to the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW, Washington, DC 20324–1700 for Freedom of Information request records and the Defense Investigative Service, Privacy Act Office, 2200 Van Deman Street, Baltimore, MD 21224–0603 for Privacy Act records.

A request for information must contain the full name of the subject individual.

Personal visits will require a valid driver's license or other picture identification and are limited to the Privacy Act Office.

CONTESTING RECORD PROCEDURES:

The agency's rules for accessing records, contesting contents, and appealing initial determinations by the individual concerned are contained in DIS Regulation 28–4, Access to and Maintenance of DIS Personal Records; 32 CFR part 321; or may be obtained from the Defense Investigative Service, Office of Information and Public Affairs, 1900 Half Street, SW., Washington, DC 20324–1700.

RECORD SOURCE CATEGORIES:

Information in this system is obtained from requesters, from other federal agencies with collateral interest in a request, and from records which were the subject of requests.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this system of records may be exempt pursuant to 5 U.S.C. 522a(k)(2), (k)(3), and (k)(5), as applicable.

An exemption rule for this record system has been promulgated in accordance with the requirements of 5 U.S.C. 553(b)(1), (2), and (3), (c) and (e) and published in 32 CFR part 321. For additional information contact the system manager.

BILLING CODE 3810–01–F

Department of the Navy

Board of Advisors to the Superintendent, Naval Postgraduate School; Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. 2), notice is hereby given that the Board of Advisors to the Superintendent, Naval Postgraduate School, Monterey, California, will meet on 7-8 May 1992, in Herrmann Hall (Building 220) at the school. All sessions will be open to the public.

The purpose of the meeting is to elicit the advice of the board on the Navy's Postgraduate Education Program. The board examines the effectiveness with which the Naval Postgraduate School is accomplishing its mission. To this end, the board will inquire in the curricula; instruction; physical equipment; administration; state of morale of the student body, faculty, and staff; fiscal affairs; and any other matters relating to the operation of the Naval Postgraduate School as the board considers pertinent.

For further information concerning this meeting, contact: Captain Gary K. Iversen, USN (Code 007), Naval Postgraduate School, Monterey, California, 93943-5001, Telephone: (408) 646-2512.

Dated: March 18, 1992.

Wayne T. Baucino,

Lieutenant, JAGC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

[FR Doc. 92–7005; Filed 3–25–92; 8:45 am]

BILLING CODE 3810–AE–F

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. 2), notice is hereby given that the Naval Research Advisory Committee Panel on STOVL (Short Take-Off/Vertical Landing) Strike Fighter (SSF) Replacement Aircraft in the 2010-2020 Timeframe will meet on April 22 and 23, 1992. The meeting will be held at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria Virginia. The meeting will commence at 8:30 am and terminate at 5:30 pm on April 22; and commence at 8:00 am and terminate at 3:30 pm on April 23, 1992.

The purpose of the meeting is to provide the Navy with an assessment of the need for an SSF as a multi-mission replacement aircraft for the 2010-2020 timeframe, and identify the key technology issues and trade-offs associated with the SSF versus Convential Take-Offs and Landing (CTOL) aircraft. The agenda will include briefings and discussions related to the projected threat and future requirements, including an SSF Operational Utility Analyses briefing, U.S. Navy program and acquision sponsor perspectives, and threat projections and future requirements of the U.S. Air Force and National Aeronautics and Space Administration. These briefings and discussions will contain classified information that is specifically authorized under critera established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassied matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matter listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander John Hrenko, USN, Office of the Chif of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000, Telephone Number: (703) 696-4870.

Dated: March 18, 1992.

Wayne T. Baucino,

Lieutenant, JAGC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

BILLING CODE 3810–AE–F

Government Owned Inventions; Intent to Grant Exclusive Patent License

AGENCY: Department of the Navy, DoD.

ACTION: Intent to Grant Exclusive Patent License: Focal Technologies Inc.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Focal Technologies Inc. a revocable, nonassignable, exclusive license to practice the Government-owned invention described in U.S. Patent No. 4,027,945 "Optical Sliprings", issued June 7, 1977.

Anyone wishing to object to the grant of this license has 60 days from the date of this notice to file written objections along with supporting evidence, if any. Written objections are to be filed with the Office of the Chief of Naval Research (Code OOCCIP), Arlington, Virginia 22217-5000.

FOR FURTHER INFORMATION CONTACT: Mr. R. J. Erickson, Staff Patent Attorney, Office of the Chief of Naval Research (Code OOCCIPP), 800 North Quincy, Arlington, Virginia 22217-5000, telephone (703) 696-4001.

Dated: March 18, 1992.

Wayne T. Baucino,

Lieutenant, JAGC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

BILLING CODE 3810–AE–F

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before April 27, 1992.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Wallace R. McPherson, Jr., Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Wallace R. McPherson, (202) 708–5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Wallace R. McPherson, Jr. at the address specified above.

Dated: March 20, 1992.

Wallace R. McPherson, Jr.,

Acting Director, Office of Information Resources Management.

Office of Elementary and Secondary Education

Type of Review: Reinstatement.
Title: State Plan Operated by State Educational Agencies Under the Even Start Program and Application and Continuation Applications for Indian Tribes and Tribal Organizations Under the Even Start Program.
Frequency: Annually.
Affected Public: State or Local Government.
Reporting Burden: Responses—95; Burden Hours—1,495.
Recordkeeping Burden: Recordkeepers—0; Burden Hours—0.
Abstract: This State Plan will be used by the Department to make awards and to ensure the states meet the requirements of the statutes and regulations. Indian tribes and tribal organizations are required to submit applications for new and continuation grants to operate Even Start projects.

Office of Educational Research and Improvement

Type of Review: Reinstatement.
Title: Star School Program.
Frequency: Quarterly.
Affected Public: State or local governments, Business or other for profit, Non-profit institutions, Small businesses or organizations.
Reporting Burden: Responses—75; Burden Hours—7,500.
Recordkeeping Burden: Recordkeepers—0; Burden Hours—0.
Abstract: This application will be used by telecommunication partnership grantees who apply for funding. The information will be used to make grants awards.

BILLING CODE 4000–01–M

Office of Administrative Law Judges; Intent To Compromise a Claim, Washington State Board for Vocational Education

AGENCY: Department of Education.

ACTION: Notice of intent to compromise a claim.

SUMMARY: The Department intends to compromise a claim against the Washington State Board for Vocational Education now pending before the Office of Administrative Law Judges (OALJ), Docket No. 91–27–R. (20 U.S.C. 1234a(j)).

DATES: Interested persons may comment on the proposed action by submitting written data, views, or arguments on or before May 11, 1992.

ADDRESSES: Comments should be addressed to Kathleen Ryan, Esq., Office of the General Counsel, U.S. Department of Education, 400 Maryland Avenue, SW., (room 4099, FOB–6), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Kathleen Ryan, Esq., Telephone: (202) 401–0807. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The claim in question arose from an audit of

the financial affairs and operations of the State of Washington Department of Education (State) for the fiscal year ending June 30, 1989. The audit was performed by the Washington State Auditor, to fulfill the requirements of Office of Management and Budget Circular A-128. The audit included the evaluation of the internal control systems, including applicable internal administrative controls, used in administering Federal financial assistance programs. Among the systems examined were the State community colleges' procedures for ensuring that funds reserved under section 202 of the Carl D. Perkins Vocational Education Act (Perkins Act), 20 U.S.C. 2332 (1988), for handicapped and disadvantaged vocational education students were being used to pay only for the Federal share of the "excess costs" of serving handicapped and disadvantaged students enrolled in vocational programs.

Sections 201(c) (1) and (2) of the Perkins Act (20 U.S.C. 2331(c) (1) and (2)) and the implementing regulations (34 CFR 401.52(a) and 401.53(a)(1)) provide that funds reserved for the handicapped and disadvantaged may only be used for the Federal share of the costs of providing "supplemental or additional staff, equipment, materials, and services not provided to other individuals in vocational education that are essential for handicapped (and disadvantaged) individuals to participate in vocational education." Pursuant to section 201(h)(1) of the Act (20 U.S.C. 2331(h)(1)) and the implementing regulations (34 CFR 401.58(a)(1)), these excess costs may include the cost of providing basic skills instruction for handicapped and disadvantaged individuals who are enrolled in vocational education programs.

During the course of the audit, the auditors were unable to find documentation to show that the handicapped and disadvantaged students being served in the projects supported by Perkins funds—which included counseling and basic skills instruction—were also enrolled in vocational programs. In addition, the auditors questioned whether the funded activities and services were limited to the excess costs of enabling the handicapped and disadvantaged to participate in vocational education. Based on these findings, and on a finding that some of the community colleges had violated the assurance made in the State plan and required by section 113(b)(16) of the Perkins Act (20 U.S.C. 2323(b)(16)) that the State would use Perkins funds to supplement, and not supplant, State and local funds available for vocational education, the Assistant Secretary for Vocational and Adult Education (Assistant Secretary) notified the State Board for Vocational Education in a program determination letter dated March 29, 1991, that it had to repay a total of $192,354 for disallowed costs charged to the Perkins Act grant. The State appealed the Assistant Secretary's determination to the Office of the Administrative Law Judges.

The Department proposes to compromise the full amount of the $192,354 claim for $49,500. In mediation sessions before the Federal Mediation and Conciliation Service, the State provided additional information and documentation concerning the numbers of handicapped or disadvantaged vocational education students being served and the types of services and activities involved. The State also submitted documentary evidence concerning the necessity of the services and activities to the participation of the handicapped and disadvantaged students in vocational education, and the non-availability of these services and activities to non-handicapped and non-disadvantaged vocational students.

The State has also indicated that corrective action has been taken to ensure that the community colleges will keep documentation sufficient to show, where necessary, that students being served with Perkins funds are enrolled in vocational programs. Information contained in the Washington State plan for vocational education submitted under the current statute, the Carl D. Perkins Vocational and Applied Technology Education Act of 1990, Public Law No. 101-392, 104 Stat. 753, indicates that the community colleges have a system for keeping records of the members of special populations, including the handicapped and disadvantaged, enrolled in vocational education programs. Given these factors, and the litigation risks and costs of proceeding through the appeal process, the Department has determined that it would not be practical or in the public interest to continue this proceeding. Moreover, the Department is satisfied that the practices that resulted in the claim have been corrected and will not recur.

The public is invited to comment on the Department's intent to compromise this claim. Additional information may be obtained by writing to Kathleen Ryan, Esq. at the address given at the beginning of the notice.

Program Authority: 20 U.S.C. 1234a(f).

Dated: March 19, 1992.

Donald A. Laidlaw,

Assistant Secretary for Human Resources and Administration.

BILLING CODE 4000-01-M

National Education Commission on Time and Learning; Meeting

AGENCY: National Education Commission on Time and Learning, Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Education Commission on Time and Learning. This notice also describes the functions of the Commission. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE AND TIME: April 13, 1992 from 9 a.m. to 4 p.m.

ADDRESSES: Vista Hotel, 1400 M Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Julia Anna Andetson, Special Assistant, 555 New Jersey Ave., Capitol Place Room 610B, Washington, DC 20208. Telephone: (202) 219-2249.

SUPPLEMENTARY INFORMATION: The National Education Commission on Time and Learning is established under section 102 of the Education Council Act of 1991 (20 U.S.C. 1221-1). The Commission is established to examine the quality and adequacy of the study and learning time of elementary and secondary students in the United States, including issues regarding the length of the school day and year, the extent and role of homework, how time is being used for academic subjects, year-round professional opportunities for teachers, and the use of school facilities for extended learning programs.

The meeting of the Commission is open to the public. The proposed agenda includes: Swearing in Commissioners, Briefings from the Department's Ethics Counsel Staff and from the Department's Committee Management Staff, Nomination and Election of Officers, Determination of selection process for an Executive Director, Administration issues, Presentation on current "Uses of Time" project, and Discussion of action plan.

Records are kept of all Commission proceedings, and are available for public inspection at the Office of the Commission at 555 New Jersey Ave., NW., Capitol Place Room 610B, Washington, DC 20208 from the hours of 9 a.m. to 5:30 p.m.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Floodplain and Wetland Involvement Notification for Proposed Environmental Restoration Action at the Department of Energy's Oak Ridge Reservation, Oak Ridge, TN

AGENCY: Department of Energy (DOE).

ACTION: Notice of floodplain and wetland involvement and opportunity for comment.

SUMMARY: The Department of Energy (DOE) proposes to perform environmental restoration activities in Waste Area Grouping (WAG) 6 at Oak Ridge National Laboratory (ORNL). DOE would take the proposed action under sections 104 and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and 40 CFR 300.435. WAG 6, located approximately 2 miles southwest of the ORNL main plant, has been used for shallow land burial of low-level radioactive waste and other hazardous material. Approximately one-half acre of WAG 6 lies below the 754 ft. contour, which marks the 100-year floodplain. The floodplain area within WAG 6 consists of land along the unnamed tributary that drains the western portion of the WAG. The Emergency Waste Basin, which will be remediated as part of WAG 6, could be classified as a wetland. In addition, wetlands present along the southern and eastern edges of WAG 6 could be hydrologically affected by the proposed action.

The proposed action, if implemented, would be carried out with the concurrence of the U.S. Environmental Protection Agency and the Tennessee Department of Environment and Conservation. The proposed action is intended to stabilize and isolate the wastes, possibly including the following steps: grouting and dynamic compaction of the waste burial areas; diversion of surface and subsurface stormwater flows away from waste disposal sites; placement of low-permeability, multi-layer caps over disposal sites; and, if necessary, collection and treatment of groundwater downgradient from disposal sites and within the WAG boundaries.

The proposed action would be performed in such a manner as to avoid or minimize potential impacts on the floodplain and adjacent wetlands. In accordance with DOE regulations 10 CFR 1022, DOE will prepare a floodplain/wetland assessment and publish a floodplain statement of findings in accordance with § 1022.15 of said regulations. Maps and further information are available from DOE at the Information Resources Center, 105 Broadway Avenue, Oak Ridge, Tennessee.

DATES: Comments are due by April 10, 1992.

ADDRESSES: Send comments to Robert C. Sleeman, Director, Environmental Restoration Division (EW-91), U.S. Department of Energy, Post Office Box 2001, Oak Ridge, Tennessee 37831-8541. Fax Comments to FTS 626-7042.

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

[FR Doc. 92-7051 Filed 3-25-92; 8:45 am]

BILLING CODE 6450-01-M

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. No. 96-511, 44 U.S.C. 3501 *et seq.*). The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reductions Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (a DOE component which term includes the Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed by April 27, 1992. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards, (EI-73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254-5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Civlian Radioactive Waste Management.
2. NWPA-830R A/C.
3. 1901-0260.
4. Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste.
5. Revision—This request is for approval of Appendix C where contract holders will designate the facility where DOE will accept their fuel, the number of assemblies to be accepted, and the mode of transportation to ship the assemblies. The information collected will be used to determine the Federal waste transportation cask mix needed to meet DOE's commitments.
6. Quarterly, Annually, and On occasion.
7. Mandatory.
8. Businesses or other for profit.
9. 100 respondents.
10. 4.25 responses.
11. 37.94 hours per response.
12. 16.125 hours.

13. NWPA–830R A/G is designated to serve as the service document for entries into the Department of Energy (DOE) accounting records to transmit data from "utilities" concerning payment of their contribution to the Nuclear Waste Fund. This form is used by electric utilities, vendors, and owners of nuclear fuel to purchase the services of the DOE for disposal of their spent nuclear fuel and high-level waste.

Statutory Authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. No. 93–275, Federal Energy Administration Act of 1974, 15 U.S.C. § 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, March 19, 1992.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. GP92–8–000; FERC No. JD91–08540T]

State Oil and Gas Board of Alabama, Tight Formation Determination—Alabama-3, Pottsville Series Sandstones; Preliminary Finding

March 19, 1992.

The State Oil and Gas Board of Alabama (Alabama) determined that the sandstones of the Pottsville Series, in the Black Warrior Coal Basin, qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978.

For the reasons discussed below, the Commission issues this notice preliminarily finding that the determination is not supported by substantial evidence.

Alabama's Determination

On August 12, 1991, Alabama submitted an affirmative tight formation area determination for the Pottsville Series sandstones in the Black Warrior Coal Basin.[1] The determination covers almost one million acres in portions of Hale, Tuscaloosa, Pickens, and Greene Counties, Alabama. The recommended interval ranges in thickness from 2,000 to 2,500 feet within the recommended area and consists of the Pottsville sandstones found beneath the top of the Mary Lee coal interval. Coal seams occurring within the subject Pottsville interval are excluded from Alabama's tight formation determination.

Alabama concluded that the Pottsville sandstones meet the Commission's 0.1 millidarcy (md) permeability guideline based on data from two wells in the recommended area, the Skelton #6–16 (#6–16) and Brown #8–7 (#8–7) wells. The notice also indicates that both wells do not produce from the Pottsville sandstones and are considered dry holes.

The notice does not contain any natural gas or crude oil flow rate data. Alabama asserts that the recommended interval meets the Commission's natural gas and crude oil flow rate guidelines because there has been no production of the Pottsville sandstones from any of the wells that have penetrated the formation.

The record also indicates that hundreds of shallow coalbed methane wells drilled into the Mary Lee Coal interval penetrated the upper part of the Pottsville Series in the recommended area and that all of these wells are considered to be dry holes with respect to the Pottsville sandstones since they do not produce from these sandstones.

Staff's Tolling Letter and Alabama's Response

By letter dated September 26, 1991, staff requested Alabama to explain why it believed that the existing well data from the two dry holes meets the Commission's *in situ* permeability and flow-rate guidelines and supports the designation of the entire vertical and geographical area as a tight formation.

Alabama's February 3, 1992 response does not provide any additional data for wells drilled in the recommended area. The response provides additional data that the applicant (Hawkeye Oil & Gas, Inc.) provided for 18 wells located outside and immediately adjacent to the recommended area. The data includes a core report for one Pottsville sandstones well (the Justiss-Curry #14–16) and a summary of the interpretation of 69 drill stem tests conducted on the 18 wells.[2] Of the 18 new data wells, 16 are Pottsville sandstones producers and 2 are dry holes.

Alabama believes that this additional data indicates that the Pottsville sandstones inside the recommended area would meet the 0.1 md permeability guideline because:

- Only 1 of the 34 Pottsville sandstones core samples recovered from the Justiss-Curry #14–16 well exceeds 0.1 md; and
- 41 of the 69 drill-stem tests (59.4%) resulted in permeabilities below 0.1 md and only 12 of 69 (17.4%) resulted in permeabilities in excess of 0.1 md.[3]

Alabama also submitted a map and states that the map "indicates the fields adjacent to the proposed area which produce from the proposed tight sands interval. The subject fields are Snead's Creek, Woolbank Creek, and Big Creek, all of which produce from the subject sandstones located along faults which enhance permeability through the fracture systems."

Discussion

The determination does not contain substantial evidence to support the conclusion that the estimated average *in situ* permeability meets the Commission's guideline.

Section 271.703(c)(2) of the Commission's regulations establishes guidelines that a formation must meet the qualify as a tight formation. Among other things, the estimated average *in situ* gas permeability, throughout the day section, must be expected to be 0.1 md or less.

Our review shows that the record contains extremely limited permeability data. There is permeability data for only two wells in the recommended area but each well is a dry hole in the Pottsville sandstones and was never completed for production from these sandstones. Therefore, the permeability values do not reflect *in situ* permeabilities within pay sections. In addition, the permeability data for the 18 wells outside the recommended area come from two clusters of wells in relatively small areas along fault and fracture systems. Moreover, 41 of the drill-stem test results seems to indicate that a pay section doesn't exist and the remaining 12 drill-stem test results indicate permeabilities in excess of the 0.1 md limit. Finally, although the data for these 18 wells may indicate permeability for the Pottsville sandstones, these permeabilities apply to the relatively narrow confines of the fault and fracture systems where the 18 wells are located. There is no evidence showing that this is characteristic of the rest of the formation.

Therefore, in view of the geographical size and vertical extent of the recommended formation, the Commission finds that the record does not contain substantial evidence showing that the formation meets the Commission's permeability guideline.

The determination does not contain substantial evidence showing that the expected stabilized pre-stimulation flow rate meets the Commission's guidelines.

Section 271.703(c)(2)(i)(B) of the regulations requires Alabama to determine that the formation's pre-stimulation stabilized flow rate against atmospheric pressure of wells completed for production therein is not expected to exceed a applicable maximum allowable flow rate specified in the regulations.

Since no wells have been completed for production in the Pottsville Series within the recommended area, the record contains no production data. Additionally, Alabama's response to the tolling letter did not provide any natural gas or crude oil flow rate information for the 18 wells outside the recommended area. Moreover, the record shows that the only production obtained from the recommended formation has been from the hundreds of shallow Pottsville coal seam wells, which typically will only penetrate roughly the upper 20 percent of the recommended Pottsville interval, and whose production is excluded because the determination does not include the Pottsville coal seams. The coal seam producing wells are considered to be dry with respect to the Pottsville sandstones, since they don't produce from the sandstones.

Since the record provides no indication whatsoever as to the pre-stimulation natural gas and crude oil production characteristics of the subject sandstones, we find that the record does not contain substantial evidence showing that the expected stabilized pre-stimulation flow rate meets the Commission's guidelines.

Under § 275.202(a) of the regulations, the Commission may make a preliminary finding, before any determination becomes final, that the determination is not supported by substantial evidence in the record. Based on the foregoing facts, the Commission hereby makes a preliminary finding that Alabama's determination is not supported by substantial evidence in the record upon which it was made. Alabama or the applicant may, within 30 days from the date of this preliminary finding, submit written comments and request an informal conference with the Commission pursuant to § 275.202(f) of the regulations. A final Commission order will be issued within 120 days after the issuance of this preliminary finding.

By direction of the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. JD92–04475T Colorado–33 Amendment]

State of Colorado; Determination by Jurisdictional Agency Designating Tight Formation

March 19, 1992.

Take notice that on March 11, 1992, the Oil and Gas Conservation Commission of the State of Colorado (Colorado), submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that a portion of the Shannon Formation in Boulder and Weld Counties, Colorado, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The proposed area was previously recommended for designation as a tight formation; however, withdrawal of that recommendation was granted by Commission Order dated May 12, 1987 in Docket No. RM79–76–174 (Colorado-33). The area of application is described as follows:

Township 1 North, Range 68 West, 6th P.M.
Sections 1 through 16: All
Township 1 North, Range 69 West, 6th P.M.
Sections 1 through 3 and 10 through 15: All
Township 2 North, Range 68 West, 6th P.M.
Sections 19 through 36: All
Township 2 North, Range 69 West, 6th P.M.
Sections 22 through 27 and 34 through 36: All

The notice of determination also contains Colorado's findings, as amended on March 17, 1992, that the referenced portion of the Shannon Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 92–6971 Filed 3–25–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. JD92–04473T Colorado–34 Amendment]

State of Colorado; NGPA Determination by Jurisdictional Agency Designating Tight Formation

March 19, 1992.

Take notice that on March 11, 1992, the Oil and Gas Conservation Commission of the State of Colorado (Colorado) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that a portion of the Sussex Formation in Boulder and Weld Counties, Colorado, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The proposed area was previously recommended for designation as a tight formation; however, withdrawal of the recommendation was granted by Commission Order dated May 12, 1987 in Docket No. RM79–76–175 (Colorado–34). The area of application is described as follows:

Township 1 North, Range 68 West, 6th P.M.
Sections 1 through 16: All
Township 1 North, Range 69 West, 6th P.M.
Sections 1 through 3 and 10 through 15: All
Township 2 North, Range 68 West, 6th P.M.
Section 19 through 36: All
Township 2 North, Range 69 West, 6th P.M.
Sections 22 through 27 and 34 through 36: All

The notice of determination also contains Colorado's findings, as amended on March 17, 1992, that the referenced protion of the Sussex Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CI85–513–014]

El Paso Natural Gas Co. Report of Refunds and Request for Termination of Refund Obligation

Take notice that on February 20, 1992, El Paso Natural Gas Company, P.O. Box 1492, El Paso, Texas 79978, filed with the

[1] The Black Warrior Basin is an active coalbed methane area due, in part, to the tax credit for coal seam gas. Gas in the area is produced from the Pottsville coal seams, which occur in discrete groups and are separated by the Pottsville sandstones and shales.

[2] The actual drill stem test results have not been provided.

[3] The remaining 16 tests either failed mechanically or were deemed to be inconclusive.

Federal Energy Regulatory Commission a refund report showing that during calendar year 1991, El Paso did not receive additional refunds from remaining small working interest owners; therefore El Paso did not flow-through any refunds to its customers. El Paso states that the Commission's October 17, 1990 order in Docket No. CI85-513-012 requires El Paso to make annual flow-through refunds and file a refund report of additional amounts received from small working interest owners.

El Paso is also requesting that it be relieved of any further refund obligation under Docket No. CI85-513-000 because no further flow-through refunds are likely and the remaining amounts involved are *de minimis*. By letter dated February 28, 1992, the Public Utilities Commission of the State of California filed comments indicating that it does not oppose El Paso's request.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such protests should be filed on or before March 27, 1992. Protest will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6976 Filed 3-25-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA92-1-46-000]

Kentucky West Virginia Gas Co. Proposed change in Tariff

March 19, 1992.

Take notice that Kentucky West Virginia Gas Company ("Kentucky West") on March 17, 1992, tendered for filing with the Federal Energy Regulatory Commission ("Commission") its Thirty-Sixth Revised Sheet No. 41 to become effective on May 1, 1992. The tariff sheet implements Kentucky West's annual PGA filing and reflects a deferred gas cost adjustment of ($0.0175) and a ($0.9384) current adjustment decrease based on an average cost of purchased gas effective May 1, 1992, of $1.0098 per dth.

Kentucky West states that, by its filing, or any request or statement made therein, it does not waive any rights to collect amounts, nor the right to collect carrying charges applicable thereto, to which it is entitled pursuant to the mandate of the United States Court of Appeals for the Fifth Circuit issued on March 6, 1986, in *Kentucky West Virginia Gas Co., v. FERC*, 780 F.2d 1231 (5th Cir. 1986), or to which it becomes entitled pursuant to any other judicial and/or administrative decisions.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 30426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure 18CFR 385.211 and 385.214. All such motions of protests should be filed on or before April 3, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make Protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP78-124-019]

Northern Border Pipeline Co.; Petition to Amend

March 20, 1992.

Take notice that on March 9, 1992, Northern Border Pipeline Company (Northern Border), 1111 South 103rd Street, Omaha, Nebraska 68124-1000, filed in Docket No. CP78-124-019 pursuant to section 7(c) of the Natural Gas Act a petition to amend the certificate of public convenience and necessity issued on April 28, 1980, and June 20, 1980, in Docket No. CP78-124 to add various new receipt and delivery points to shipper contracts, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern Border states that in 1989, it filed a petition to amend in Docket No. CP78-124-010 requesting authority to implement an amended service agreement with one of its customers. It is explained that the amended service agreement provided for an increase in service at one delivery point. Northern Border further states that the Commission issued an order on June 27, 1989, dismissing the petition to amend, reasoning that Northern Border already had the authority to implement the change in service under its Subpart G blanket certificate in Docket No. CP86-395-000. Northern Border explains that it subsequently undertook to implement amended service agreements covering the addition of secondary receipt and delivery points and an increase in service at one delivery point by making tariff filings on April 23, 1991, and January 31, 1992. It is indicated that the Commission, by order dated February 28, 1992, rejected the service agreement amendments without prejudice to Northern Border refiling the amended exhibits after receiving requisite section 7 certificate authority.

Northern Border asserts that it has filed for rehearing of the Commission's February 28, 1992, rejection order. In the alternative, it is indicated, Northern Border requests authority to amend its certificate to allow it to implement the amended service agreements. However, Northern Border stresses that it seeks to amend its certificate only to the extent that the Commission fails to grant its rehearing request and determines that a certificate amendment is necessary.

In its petition to amend, Northern Border specifies six contract amendments that have been executed with its United States shippers—Northern Natural Gas Company (Northern), Panhandle Eastern Pipe Line Company, and Natgas (U.S.) Inc. Northern Border states that all but one of the amendments involve the addition of either secondary receipt points or secondary delivery points, and as such, have no effect on the allocation of Northern Border's cost of service or the total volumes of service provided. Northern Border states that the other amendment involves an increase of 5,000 Mcf per day of primary delivery point volumes for Northern at the Welcome, Minnesota, delivery point. Northern Border explains that the purpose of this amendment is to provide operational flexibility to Northern Natural. Northern Border states that Northern's total contract volumes remain unchanged, but that Northern's allocation of Northern Border's cost of service would increase slightly due to the amendment. Northern Border asserts that the allocation of its cost of service to all other customers would be reduced by the same amount.

Northern Border requests that Commission authorization be granted retroactivity to the dates of initial receipts and deliveries pursuant to the amended contracts and that the authorization extend for the full terms of the amended agreements.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before March 30, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-141-000]

Northwest Pipeline Corp.; Changes in FERC Gas Tariff

March 19, 1992.

Take notice that on March 17, 1992 Northwest Pipeline Corporation ("Northwest") tendered the following for filing and acceptance to be a part of its FERC Gas Tariff:

Second Revised Volume No. 1

First Revised Sheet No. 108
Original Sheet No. 108-A

First Revised Volume No. 1-A

Thirteenth Revised Sheet No. 201
First Revised Sheet No. 304-B
Original Sheet No. 304-C
Second Revised Sheet No. 305
First Revised Sheet No. 317-B
First Revised Sheet No. 317-C
Original Sheet No. 317-D
First Revised Sheet No. 403
First Revised Sheet No. 404
First Revised Sheet No. 411
Original Sheet No. 411-A
Original Sheet No. 508
Sheet No. 509
Original Sheet No. 517
Sheet Nos. 518 through 600

Northwest states that the purpose of this filing is to propose language in Northwest's tariff to revise (1) the "Facilities Reimbursement" provisions in Rate Schedules TI-1 and TF-1, (2) the "Failure to Pay Bills" sections of the Tariff, and (3) the Tariff definitions of "Receipt Points" and "Delivery Points."

Northwest has requested an effective date of April 17, 1992 for the tendered sheets. Northwest states that a copy of the filing is being served on Northwest's jurisdictional customer listed and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before March 26, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Office of Fossil Energy

[FE Docket No. 92-19-NG]

Oregon Natural Gas Development Corp.; Application for Blanket Authorization to Import Natural Gas From Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy of the Department of Energy (DOE) gives notice of receipt on February 18, 1992, as amended, of an application filed by Oregon Natural Gas Development

Corporation (ONGDC) requesting blanket authorization to import from Canada up to 10 Bcf of natural gas over a two-year period commencing with the date of first delivery ONGDC intends to use only existing pipeline facilities within the United States and states that it will submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 27, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Room 3F–056, FE–50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9482.

FOR FURTHER INFORMATION:

Charles E. Blackburn, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–7751.

Diane Stubbs, Office of General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: ONGDC, an Oregon corporation with its principal place of business in Portland, Oregon, is a wholly-owned subsidiary of Northwest Natural Gas Company. ONGDC is engaged in the marketing and production of natural gas in the Western United States. ONGDC requests authority to import gas on its own behalf as well as on behalf of suppliers and purchasers for whom ONGDC may act as an agent. The gas ONGDC proposes to import would enter the U.S. at points on the international border near Sumas, Washington, and Kingsgate, British Columbia. The terms of each spot on short-term transaction will be determined by competitive factors in the natural gas marketplace.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties, especially those that may oppose this application, should comment on the issue of competitiveness as set forth in the policy guidelines regarding the requested import authority. The applicant asserts that imports made under the proposed arrangement will be competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notice of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notice of intervention, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the fact.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of ONGDC application is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on March 16, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92–7052 Filed 3–25–92; 8:45 am]

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[530Z92005; FRL–4117–7]

Proposing to Grant a Variance from Land Disposal Restrictions to Exxon Company, U.S.A., Billings, MT

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed decision.

SUMMARY: The Environmental Protection Agency (EPA or Agency) is today proposing to grant a no-migration variance to Exxon Company U.S.A. (Exxon). This variance would allow Exxon to place untreated hazardous wastes, subject to the land disposal restrictions of the Resource Conservation and Recovery Act (RCRA) (42 U.S.C. 36901 *et. seq.*), in the Exxon Billings Refinery's New South Land Treatment Unit (NSLTU) in Billings, Montana. Exxon submitted a petition to EPA under 40 CFR 268.6 requesting a no-migration variance from the RCRA land disposal treatment standards on the grounds that treatment was unnecessary to protect human health and the environment because there would be no migration of hazardous constituents from the land disposal unit. After a review of Exxon's petition and supporting information, EPA has tentatively concluded that Exxon has demonstrated, to a reasonable degree of certainty, that hazardous constituents will not migrate out of the land treatment facility for as long as the wastes remain hazardous. The Agency is placing certain conditions on the variance to ensure compliance with the no-migration demonstration.

DATES: Comments on today's proposed rule must be received on or before May 11, 1992.

ADDRESSES: Three copies of your comments on today's proposal should be sent to EPA. Two copies should be sent to the docket clerk at the following address: U.S. Environmental Protection Agency, RCRA Docket (OS–305), 401 M Street, SW., Washington, DC 20460. A third copy should be sent to Allyson Ugarte, Office of Solid Waste (OS–343), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with the regulatory docket number F–92–NEBP–FFFFF.

The RCRA regulatory docket for this proposed notice is located at the U.S. Environmental Protection Agency (room M2427), 401 M Street, SW., Washington, DC 20460, and is available for viewing from 9 a.m. to 4 p.m., Monday through Friday, except on Federal holidays. Call (202) 260–9327 for appointments. Up to 100 pages may be copied free of charge from any one regulatory docket. Additional copies are $0.15 per page.

A copy of the record supporting this proposal is also available to the public in Helena, Montana, at the EPA Region VIII, Montana Operations Office, Federal Building, 301 South Park. The public may make arrangements to view the documents by calling Stephanie Wallace at (406) 449–5414. This docket is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at (800) 424–9346 toll free or at (703) 920–9810 in the Washington, DC area. For technical information concerning this notice, contact Athena Rodbell, Office of Solid Waste (OS–343), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, at (202) 260–4519.

SUPPLEMENTARY INFORMATION:

I. Background

A. RCRA Land Disposal Restrictions: No-Migration Variances

The Hazardous and Solid Waste Amendments (HSWA) of 1984, which amend the Resource Conservation and Recovery Act (RCRA), impose substantial new requirements on the land disposal of hazardous waste. In particular, the amendments prohibit the continued land disposal of specified hazardous wastes, unless the wastes meet treatment standards specified by EPA before land disposal occurs, or unless a demonstration is made to EPA that "there will be no migration of hazardous constituents from the disposal unit for as long as the wastes remain hazardous" (RCRA section 3004(d), (e) and (g)). (A positive determination under this authority is referred to as a "no-migration" variance.) The term "land disposal" includes placement of hazardous waste "in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, or underground mine or cave" (RCRA section 3004(k)).

The HSWA amendments provided for a schedule according to which specific wastes become subject to the land disposal restrictions. In the case of certain petroleum refining wastes (EPA Hazardous Waste Nos. K048–K052) the restrictions went into effect on November 8, 1990. As of that date, K048–K052 wastes that have not been treated to specified levels (Best Demonstrated Available Technology) may not be placed in a land disposal unit, unless EPA grants a no-migration variance specific to that waste and that unit. In the case of hazardous wastes listed after enactment of the 1984 HSWA amendments, EPA is required to make a Land Disposal Restrictions (LDR) determination within six months after the listing is promulgated. Best Demonstrated Available Technology (BDAT) levels are expected to be promulgated in 1993 for newly listed organic TC wastes.

The Agency first promulgated no-migration standards for land disposal units, other than underground injection wells, on November 7, 1986 (51 FR 40572).[1] These regulations (40 CFR 268.6) codify the statutory standards, specify information to be included in a variance petition, and establish procedures for granting or denying a variance. EPA amended the regulations on August 17, 1988 (53 FR 31138) to add further procedural requirements and standards. EPA is now developing further amendments, including a generic definition of "no-migration," for land disposal units other than underground injection wells. The Agency expects to propose these amendments in the near future. In conjunction with this forthcoming proposal, EPA has developed the document "No-Migration Variances to the Hazardous Waste Land Disposal Prohibitions: A Guidance Manual for Petitioners" (Draft Interim Final), March 1990 (the Guidance Manual), a copy of which is available in the RCRA regulatory docket for today's notice.

The current standards and procedures for no-migration variances require persons seeking a no-migration variance to submit a petition to the Administrator that clearly identifies the wastes and the specific unit that is the subject of the petition; provides waste characterization data; characterizes the unit, including background conditions; provides monitoring plans for environmental media and monitoring results; and demonstrates compliance with other Federal, State, and local laws. (See 40 CFR 268.6 and the Guidance Manual for a complete listing of the types of information that must be presented in a variance petition.)

As required in 40 CFR 268.6(j), the Administrator must give public notice in the **Federal Register** of the intent to approve or deny a petition and provide an opportunity for public comment. After reviewing public comments, the Agency must then grant or deny a variance petition and publish its final decision in the **Federal Register**. As specified by 40 CFR 268.6(k), variances may be valid for up to 10 years, but for no longer than the term of the RCRA facility permit. (Variances may be reissued after their term has expired.) Petitioners receiving a no-migration variance, in accordance with 40 CFR 268.6(e), must report any significant changes in operating conditions from those described in the original petition within ten days after discovering a change from what was modeled or predicted in the petition or at least 30 days in advance of initiating any change at or to the unit. The Administrator will determine the appropriate response, including termination of waste acceptance and revocation of the variance, variance modification, or other response. Furthermore, as stipulated by 40 CFR 268.6(f), petitioners must report instances of constituent migration within ten days of detection of the release and immediately suspend

[1] On July 26, 1988, the Agency promulgated standards under 40 CFR 148 for no-migration variances for underground injection wells (53 FR 28122).

receipt of restricted wastes to the petitioned unit. Again, the Administrator, within sixty days, will determine the appropriate response, including whether the petitioner can continue to place restricted wastes in the petitioned unit and whether the variance should be revoked. Lastly, in accordance with 40 CFR 268.6(m), petitioners receiving a no-migration variance are still subject to all the applicable subtitle C provisions (40 CFR part 260 through part 270) regarding the management of RCRA hazardous wastes.

B. Approach Used To Evaluate No-Migration Petitions

Section 268.6(a) requires that petitioners for a no-migration variance demonstrate, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit for as long as the wastes remain hazardous. In evaluating the no-migration demonstration, the Agency considers all possible pathways of exposure, i.e., ingestion of ground water, surface water and soil, and inhalation of air at the unit boundary. The Agency proposes in today's notice to use the same definition of no-migration as used in its final standards for underground injection wells under 40 CFR 148 (53 FR 28122, July 26, 1988). (This definition was recently upheld in *NRDC* v. *EPA*, 907 F.2d 1146 (D.C. Cir. 1990).) That is, we propose to interpret the no-migration standard to mean that concentrations of hazardous constituents shall not exceed Agency-approved health-based levels (HBLs) in any environmental medium (ground water, surface water, soil, or air), at the boundary of the land disposal unit. This same definition of the no-migration standard was used in EPA's no-migration determination for DOE's Waste Isolation Pilot Plant (WIPP) (55 FR 13068, April 6, 1990 and 55 FR 47700, November 14, 1990).

1. Health-Based Levels

In establishing health-based levels (HBLs) of hazardous constituents (i.e., the levels of constituents at the unit boundary that would fail the no-migration standard), EPA proposes to rely on procedures that involve: (1) Determining allowable dose levels from various Agency data bases using a hierarchical search system and (2) using Agency exposure factors to develop media-specific concentrations. There are essentially two types of data from which allowable dose levels may be obtained. One has been thoroughly peer-reviewed and accepted by the Agency; these are often referred to as verified values. The Integrated Risk Information System (IRIS) contains all the Agency verified values. IRIS is a computer-housed, electronically communicated catalogue of Agency risk assessment and risk management information for chemical substances. It is designed especially for Federal, State and local environmental health personnel and is the source of the latest information about Agency health assessments and regulatory decisions for specific chemicals. In the absence of IRIS data, the Agency generally relies on data developed by individual programs or other offices within the Agency.

IRIS values are usually used before the other values. However, since we are interested in protecting at the lowest dose level which has an effect, in some cases slope factors for carcinogens, undergoing development, will be used instead of reference doses in IRIS. For drinking water, MCLs and then proposed MCLs take precedence over all other values.

The Office of Emergency and Remedial Response (OERR) and the Office of Solid Waste (OSW) have produced an information source that contains the values for constituents of concern to the two offices but for which there are no values in IRIS. This source is referred to as the Health Effect Assessment Tables (HEAST) and is available from EPA (OERR 9200.6–303 (91–1)) or the National Technical Information Service (NTIS No. PB91–921100, January 1991). While these tables are an excellent source for other values, they are still undergoing development. Therefore, other data sources, such as the Office of Research and Development's (ORD) draft Health and Environmental Effects Documents (HEEDs), may be used.

EPA typically combines the carcinogenic slope factor or reference dose with standard exposure assumptions for the ingestion of water and soils and inhalation of air by affected individuals to obtain HBLs. These standard exposure assumptions assume only direct human exposure at the point of compliance (i.e., the unit boundary). Specifically, HBLs are calculated for the soil, water, and air pathways under the following exposure assumptions.

1. In deriving HBLs for hazardous constituents in ground water, assume a water intake of 2 liters/day for 70 kg adult/70 year lifetime exposure period.

2. In deriving HBLs for hazardous constituents in air, assume air intake of 20 cubic meters/ day for 70 kg adult/70 year lifetime exposure period.

3. In deriving HBLs for hazardous constituents in soil, which are known or suspected to be carcinogens, assume soil intake of 0.1 gram/day for 70 kg adult/70 year lifetime exposure period.

4. In deriving HBLs for hazardous constituents in soil, other than those which are known or suspected to be carcinogens, assume soil intake of 0.2 gram/day for 16 kg child/5 year exposure period (age 1–6). This is not to be averaged over a 70 year lifetime.

This is consistent with the approach EPA promulgated in 40 CFR 148 for evaluating no-migration petitions for underground injection wells and in the Agency's no-migration determination for the WIPP. The Agency proposes to use the levels (derived through the above procedures) for approving or disapproving Exxon's no-migration petition. A list of currently-applicable health-based levels is provided in the RCRA regulatory docket for today's notice.

2. Unit Boundary Definition

EPA interprets the no-migration standard to mean that health-based levels of hazardous constituents cannot be exceeded at the unit boundary in any environmental medium: Ground water, surface water, soil, or air. Thus, the definition of the land disposal unit's boundary is critical to any decision on a no-migration variance. The unit boundary defines the point of compliance; that is, the point at which migration is measured. If hazardous constitutents have migrated or are likely to migrate, based on predictive models, beyond the unit boundary the unit boundary at hazardous levels, a variance will not be granted. Movement of wastes within the boundaries of the land disposal unit (as long as there is no predicted likelihood of outward migration) is acceptable for the purposes of a no-migration variance since it is consistent with the statutory requirement of no migration from the disposal unit (RCRA § 3004 (d)(1), (e)(1) and (g)(5)).

For no-migration compliance purposes, EPA generally believes that the unit boundary (or point of compliance) at units with engineered barriers should be the outermost extent of the engineered barrier. Engineered barriers include liners (synthetic and clay), berms, dikes, and ditches. Thus, the boundary at the surface of a landfill, surface impoundment or land treatment unit would be the outside edge of any berms, dikes, or ditches that surround the area of waste placement. The subsurface unit boundary would be the outermost extent of any subsurface liner (e.g., recompacted clay or synthetic material).

The majority of land treatment units, including Exxon's NSLTU, the subject of today's proposed no-migration variance, do not have liners. In this case, the subsurface point of compliance is proposed to be set at the base of the maximum treatment zone depth and the surface boundary of the unit would be at the outer edge of the berms or dikes surrounding the unit.

In the case of releases via air, EPA further proposes that the point of compliance be set at a height of 1.5 meters above the ground surface at the downwind edge of the unit. (A height of 1.5 m corresponds with a typical inhalation height. This height also is proposed because it would facilitate monitoring of particulate emissions, which cannot be accurately monitored close to the soil surface without effectively vacuuming large and small particles into the apparatus.) For air demonstration purposes, any berms, dikes, or ditches that surround the area of waste placement define the edge of the unit.

3. Waste Transformation, Immobiliation and Degradation

The statute requires the petitioner to demonstrate no migration for as long as the waste remains hazardous. Typically, in the case of a land treatment unit, EPA proposes to judge this demonstration on the basis of an understanding of the waste transformation, immobilization, and degradation processes in the treatment zone and of the past performance of the disposal site, in combination with predictive modeling.

Land treatment facilities are specifically designed to degrade organic materials through microbial action and/or physical processes. EPA recognizes that the purpose of a land treatment unit is to allow some movement of waste down into the soil, as it is being transformed, immobilized, or degraded within the treatment zone. However, if constituents move out of the treatment zone at hazardous levels, EPA believes that migration from the unit has occurred.

A no-migration demonstration for a land treatment unit should include modeling of time periods (e.g., months or years) that are commonly acknowledged as sufficient for land treatment to degrade all of the hazardous organics in the applied waste to non-hazardous levels (i.e., below health-based levels). EPA recommends that petitioners utilizing land treatment use either the Regulatory Investigative Treatment Zone Evaluation (RITZ) model or the Vadose Zone Interactive Processes (VIP) model to show that the organic constituents are degraded in the treatment zone. Both of these models were developed to determine the fate and transport of organic constituents in a land treatment operation. We note that EPA also uses these models to evaluate RCRA permit applications for land treatment facilities. The User's Manuals for these models are available in the RCRA regulatory docket for today's notice. The models use chemical specific data on half lives, partition coefficients, etc., and facility specific data on climate, soil conditions, constituent concentrations, waste loading rates, etc., to predict whether a constituent will be degraded before it reaches the bottom of the treatment zone of a land treatment unit. As with any modeling exercise, petitioners are advised to use conservative input parameters, particularly for those values which are taken from the literature and are not determined from actual site—and waste-specific conditions. EPA believes that the use of conservative values is justifiable in order to support a determination, to a reasonable degree of certainty, that there will be no migration of hazardous constituents beyond the unit boundary, and in light of the uncertainties enumerated in the statute in evaluating the safety of land disposal (RCRA 3004 (d)(1)(a)).

For inorganic constituents, such as chromium or lead, which will not degrade, and will remain hazardous virtually indefinitely, the use of the models described above is not applicable. Therefore, the Agency believes it is appropriate for petitioners to demonstrate that their wastes will not migrate at hazardous levels and/or are immobilized on the basis of a showing of chemical transformation (e.g., precipitation and solubility) or fate and continued monitoring. For example, a petitoner might discuss the effects of changes in the oxidation states of metals on mobility, and describe operational practices employed to control the factors that may bring about those changes (e.g., organic content of waste-soil, liming, fertilizing, moisture control).

In addition, petitioners must also demonstrate through a modeling exercise that there will be no migration of constituents above applicable health-based levels through the air pathway. Petitioners, in conducting air modeling, should use a methodology that takes into account the emission and atmospheric dispersion potential of gaseous and particulate air contaminants from land disposal units. EPA has documented a recommended methodology in the "Air Pathway Assessment Methodology" (APAM), February 1991, appendix to the Guidance Manual. This methodology has been internally peer reviewed and approved by the EPA Office of Air Quality Planning and Standards (OAQPS). The Agency considers it appropriate for use in the evaluation of a no-migration petition since the combination of emission and dispersion modeling allows for the calculation of average annual concentrations of hazardous constituents at the unit boundary.

EPA recommends that petitioners model both the emission rate and the rate of dispersion for individual hazardous constituents in order to calculate the maximum average annual concentration at or beyond the unit boundary. (EPA notes that, under certain conditions, maximum concentrations can occur past the unit boundary.)

4. Summary of Review Process

In making a determination of whether there will be any migration of hazardous constituents at hazardous concentrations, for as long as the waste remains hazardous, EPA first reviews a petition to ascertain whether the petitioner has provided all of the information required under 40 CFR 268.6. EPA then reviews the actual monitoring data provided in the petition (in the case of an existing unit) and compares these data to the health-based levels used in no-migration decision-making. Finally, EPA evaluates the petitioner's predictive modeling to determine whether conservative inputs and appropriate methodologies were employed. A successful no-migration demonstration for a land treatment unit must show, to a reasonable degree of certainty, through predictive modeling and actual monitoring data, that all of the hazardous constituents of concern have been degraded, immobilized or transformed within the treatment zone to non-hazardous levels (i.e., below health-based levels).

In cases where monitoring data show that migration of hazardous constituents at hazardous concentrations has already occurred, EPA believes it would be difficult to grant a petition for a no-migration variance. In such cases, it is documented that the migration has occurred. Therefore, a successful petition would have to show convincingly that conditions had changed, and migration would not reoccur.[2] Similarly, if modeling predicts

[2] In fact, the major problem with most land treatment no-migration petitions reviewed by EPA to date is the presence of hazardous constituents above health-based levels in ground water, soil-pore liquids, or soil outside the unit boundary. In such cases, it is difficult to rebut the presumption that the constituents represent migration from the unit and

Continued

that migration will occur, EPA would be required to deny a petition for a no-migration variance, even if available monitoring data indicated that there had not yet been migration of hazardous constituents at hazardous concentrations. In such cases, the petitioner would have failed to demonstrate, to a reasonable degree of certainty, that there would be no migration at some time in the future.

Based on this review process, the Agency either agrees or disagrees with the petitioner's claim that there has not been (nor will be in the future) any migration of hazardous constituents at hazardous concentrations beyond the unit boundary. As required by 40 CFR 268.6(j), EPA must provide for public comment on a proposed decision. A final decision will be made after considering and responding to public comments.

II. Disposition of No-Migration Petition

A. No-Migration Variance Petition

On July 31, 1989 Exxon submitted a no-migration petition for its New South Land Treatment Unit (NSLTU). Since then, in response to requests by EPA, Exxon provided supplemental information in the form of attachments and letters. Together, the original petition and the supplemental documents are referred to as "the petition" throughout this notice and are located in the RCRA regulatory docket for today's notice. Exxon petitioned the Agency for a no-migration variance to allow it to continue the land treatment of hazardous wastes generated at its Billings Refinery, EPA Hazardous Waste Nos. K049 (Slop Oil Emulsion Solids from the petroleum refining industry) and K051 (API Separator Sludge from the petroleum refining industry). In accordance with 40 CFR 268.33(b), these wastes are prohibited from land disposal unless they meet BDAT treatment standards set by EPA for these wastes, or unless no-migration variance has been granted.

In addition to these listed hazardous wastes, Exxon disposes of two wastestreams at the NSLTU that are hazardous for the Toxicity Characteristic (TC): Contaminated Soils and Intermediate Tank Bottoms. These wastes fail the Toxicity Characteristic Leachate Procedure (TCLP) for benzene and as such are considered EPA Hazardous Waste No. D018 (see 55 FR 11798, March 29, 1990). These "newly listed" wastes are not currently prohibited from land disposal. However, the Agency is developing proposed BDAT treatment standards for these TC wastes and expects to publish a final rule prohibiting their land disposal in 1993. Exxon did not specifically request a no-migration variance for these particular hazardous wastes, but the Agency proposes to consider the TC contaminated soils, in addition to K049 and K051 wastes, to be covered by today's proposed variance. This action would obviate the need to amend the variance (if granted) to include this newly listed wastestream once the land disposal restrictions (LDRs) become effective for them in 1993. EPA is not proposing to include the TC-hazardous intermediate tank bottoms because of limitations in waste characterization data. However, if sufficient date are submitted in the future, EPA may amend the variance to include them later (after providing an opportunity for public comment).

In any case, Exxon can continue to dispose of both TC wastestreams according to the conditions of its Montana Hazardous Waste Permit, with or without a non-migration variance, until land disposal restrictions are promulgated for the "newly listed" TC wastes.

Exxon's petition included the following components: (a) Facility description, (b) site characterization, (c) waste characterization, (d) discussion of waste mobility, transformation, and immobilization, (e) fate and transport modeling, (f) air pathway assessment, (g) human-health and environmental risk assessment, (h) monitoring program, and (i) an uncertainty analysis.

EPA's evaluation of this petition included an in-depth review of all aspects of the petition. The Agency's evaluation also relied heavily on actual monitoring results collected since Exxon's start-up of the NSLTU in 1980. (A list has been placed in the RCRA regulatory docket for today's notice which identifies the specific location in the petition of the information that supports critical elements of EPA's review and forms the basis of proposed findings.) Based on this review and evaluation, the Agency concludes that there has not been, nor is there a reasonable likelihood in the future of, any migration of hazardous constituents beyond the unit boundary of the NSLTU and is proposing today to grant this petition for a no-migration variance for hazardous wastes K049, K051 and TC-hazardous contaminated soils.

B. Facility Description

1. Facility Overview

Exxon's New South Land Treatment Unit (NSLTU) is located on Exxon Refinery property in Yellowstone County, 5 kilometers east of Billings, Montana. The rate of precipitation in this region is approximately 39 cm/year. The NSLTU covers an area of approximately 6.1 hectares and is expected to be in operation until the year 2013. A Montana Hazardous Waste Permit was issued in October 1988 by the Montana Department of Health and Environmental Sciences for the disposal of hazardous wastes at the NSLTU for a period of ten years.

The Exxon Billings Refinery processes primarily heavy domestic crude, heavy Canadian crude, and varying quantities of light Canadian crude to produce a full line of refined hydrocarbon products, by-products, and intermediates. The refinery has a capacity of 50,000 barrels/day. Only hazardous and solid wastes generated on-site will be disposed of at the NSLTU. Currently only non-restricted hazardous wastes and other solid wastes are disposed of at the land treatment unit.

Waste application occurs generally during April through October, depending on weather conditions. Exxon uses a computer-based decision matrix to determine the volume of waste which can be applied to any one of the 14 sectors of the land treatment unit during any part of the application season. The decision on sector destination for a specific waste application is based on monthly analysis of Zone of Incorporation (ZOI) soils (the top 23 centimeters of the treatment zone) for freon-extractable hydrocarbons, soil moisture conditions, climatic conditions, and continuous management data. No more than five percent freon-extractable oil and grease, on a dry-weight basis, is allowed to accumulate within the ZOI and no more than 70 metric tons freon-extractable oil and grease per hectare per year are allowed during any one application season.

Exxon trucks wastes directly from the points of generation to the land treatment unit in either dump trucks or vacuum trucks. The wastes are then spread, either by bar tools and bulldozers, if dump trucks were used, or by a distribution manifold, if vaccum trucks transported the wastes. Microbial and chemical transformations are enhanced by monthly tillage with a tool-bar or disk-harrow during the active season. The NSLTU does not currently have a decontamination facility for vehicles leaving the unit. (See sections III.(5) and IV. for discussion on the proposed vehicle decontamination facility.)

The unit boundaries (i.e., points of compliance for no-migration purposes) of the petitioned unit are proposed to be: 1.2 meters below the original ground surface, the maximum depth of the treatment zone; the outermost edges of the dikes surrounding the unit; and 1.5 meters above the ground surface at the downwind edge of the NSLTU dikes.

2. Waste Characterization

a. *Waste types and volumes.* In accordance with 40 CFR 268.6(a)(1), Exxon indicated that the following hazardous and non-hazardous wastes will be managed at the NSLTU: (1) API Separator Sludges (K051), (2) Slop Oil Emulsion Solids K049), (3) Boiler House Lime Sludge, (4) Contaminated Soils (Toxicity Characteristic for benzene—D018)), (5) Contaminated Soils (non-characteristic), (6) Cooling Tower Sludges, (7) DEA Sludges, (8) Tank Bottoms (Toxicity Characteristic for benzene—D018) and (9) Tank Bottoms (non-characteristic). Exxon provided information on the quantities of the above wastes managed at the NSLTU since 1980, and the quantities and frequencies expected to be managed at the NSLTU over the expected remaining operational lifetime. This latter information is summarized on an annual basis in Table 1. Exxon states that it will manage approximately 46,000 metric tons of hazardous wastes and approximately 41,400 metric tons of non-hazardous wastes at the NSLTU over the projected remaining life of the facility.

TABLE 1.—SUMMARY OF WASTE GENERATION RATES AND FREQUENCIES

Waste stream	Generation frequency (per year)	Estimated annual volume (metric tons/year)
API separator sludges (K051)	2	1,025
Slop oil emulsion solids (K049)	2	275
Contaminated soil—TC hazardous (D018)	2	500
Contaminated soil—non-hazardous	2	500
Cooling tower sludges	0.5	40
DEA sludge	2	60
Tank bottoms—TC hazardous (D018)	2	200
Tank bottoms—Non-hazardous	2	200
Boiler house lime sludge	0.5	1,000
Total		3,800

b. *Waste characterization information.* As required by 40 CFR 268.6(a)(2), Exxon characterized the subject wastes to be disposed of at the NSLTU. Exxon provided analytical data on several representative waste samples collected between 1985 and 1990 for its API Separator Sludges (K051) and Slop Oil Emulsion Solids (K049). Analytical data on several representative samples of TC-hazardous contaminated soils, collected between 1985 and 1991, were also provided. All of these wastes were analyzed for those constituents previously identified by EPA as potentially being present in wastes from petroleum refining operations (known as the "Modified Skinner List").[3] The results of these analyses are provided in the "Waste Analysis Summary Tables" located in the RCRA regulatory docket for today's notice. These compositional data show that Exxon's restricted wastes are typical of this type of petroleum refinery wastes. For the reasons discussed below, the Agency believes that Exxon has fully characterized the K049 and K051 wastes for which the petition is being made and the TC-hazardous contaminated soils which is also included in this proposed variance. Specifically, Exxon provided six samples of API Separator Sludge, four samples of Slop Oil Emulsion Solids, and four samples of TC-hazardous contaminated soils (created by accidental spills of material and products in the crude oil, aviation gasoline, transportation, transportation ditch, Tank 5, and E–29 process areas).

At the NSLTU, Exxon also manages other hazardous and non-hazardous wastes which are not restricted from land disposal. Although a no-migration variance petition is not necessary for Exxon to continue disposing of these wastes, the Agency requested Exxon to provide waste characterization data for these wastes as they may contain significant levels of oil and one or more of the organic and inorganic constituents of concern. Thus, they have some potential to affect the overall operation of the land treatment facility and conceivably the results of any no-migration demonstration. In addition, it would be virtually impossible to determine from which waste stream (hazardous or not) a particular constituent came. If a hazardous constituent were detected above its HBL in any medium, the Agency therefore would presume, subject to rebuttal, that it came from a restricted waste and that migration had occurred, at least in the context of the no-migration standard.

In response to EPA's request, Exxon provided waste characterization information for the non-restricted hazardous and the non-hazardous wastes that had been collected per the Montana Hazardous Waste Permit. Specifically, Exxon submitted analytical data for six samples each of the non-TC contaminated soils and tank bottoms for all the inorganic constituents expected to be found in petroleum wastes, plus two samples for all organics of concern. Analytical data for the same inorganic constituents from ten samples of TC-hazardous tank bottoms were provided and two samples were analyzed for the organics of concern. In addition, Exxon provided analytical data for one sample of each of the infrequently generated, non-hazardous wastes (low-volume cooling tower sludges and DEA sludges and the large-volume boiler house lime sludge that is used for pH control) for all inorganic constituents of concern. The results of the analyses of these non-restricted wastes are summarized in the "Waste Analysis Summary Tables" located in the RCRA regulatory docket for today's notice.

EPA believes that the methods used by Exxon to characterize the wastes managed at the NSLTU are adequate because: (1) Representative samples of pumpable material (such as the slop oil emulsion solids and tank bottoms) were collected from the vacuum truck transporting the materials to the NSLTU; (2) representative samples of solid material (such as API Separator Sludges and oil contaminated soils) were collected from the material after it was piled at the NSLTU prior to application; (3) the wastes were typically accumulated over extended periods of time in the process unit (e.g., a tank or the API Separator) prior to sampling and application (therefore, any potential variation in constituent concentrations was minimized); (4) the waste was analyzed for all constituents likely to be found in petroleum wastes typically produced by petroleum refineries and Exxon does not produce wastes which would differ from a typical petroleum refinery (i.e., the Billings Refinery is not a petrochemical facility and Exxon's wastewater treatment system does not handle wastes from other industrial facilities); and, (5) Exxon used test methods found in the third edition of Test Methods for Evaluating Solid Waste Physical/Chemical Methods, EPA, SW–846, (available from the Government Printing Office (GPO)) and adhered to all SW–846 Quality

that migration will not occur again in the future. Furthermore, the presence of contamination in ground water and other media make monitoring of future releases difficult.

[3] This list is found in "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste, (EPA/530–SW–85–003), April 1985, at page 19.

Assurance (QA) and Quality Control (QC) protocols.

These analyses of the non-restricted hazardous and non-hazardous wastes show that a number of hazardous constituents have been identified in these wastes. The identified constituents and constituent concentrations were similar to those found in the restricted hazardous wastes (K049 and K051). Concentrations were generally within an order of magnitude. The sampling and analysis information also indicate that the composition of these wastes is consistent with our knowledge of petroleum refinery wastes.[4]

The Agency concludes that Exxon has provided sufficient information in its petition on the non-hazardous wastes and non-restricted TC-hazardous tank bottoms to assess the possibility of migration. The Agency's conclusion is based on several considerations: (1) The unit has been in operation for 11 years and monitoring data, to date, indicate that no hazardous constituents have migrated below the treatment unit at hazardous levels; (2) the available analytical data confirms that these non-restricted wastes do not contain significantly higher concentrations of hazardous constituents than the restricted hazardous wastes, as expected based on the samples provided and the Agency's knowledge of petroleum wastes; (3) only very small volumes of DEA Sludge and Cooling Tower Sludge are applied to the NSLTU on an infrequent basis; (4) the Boiler House Lime Sludge (which is applied in larger volumes) has little or no oil content and is used solely for pH control; and (5) the TC tank bottoms show little difference in constituent concentration when compared to non-TC tank bottoms.

Nevertheless, because Exxon's Montana Hazardous Waste Permit does not require continued analysis of non-hazardous and non-restricted hazardous wastes for the constituents of concern (for no-migration purposes), the Agency is proposing that Exxon collect four representative samples of the following non-restricted hazardous or non-hazardous wastestreams (TC-hazardous tank bottoms; Boiler House Lime Sludge; Cooling Tower Sludge; and DEA Sludge), or where these wastes are infrequently generated, a sample each time these wastes are generated for a period of two years from variance issuance. These samples must be analyzed for all of the constituents on the list of "Petroleum Constituents of Concern," an update of previous lists used and is provided in today's RCRA regulatory docket. The updated list is all of the hazardous constituents believed to be consistently present in petroleum wastes and for which analytical methods are available.

The results of the analyses must be provided in a written report to the EPA Region VIII, Montana Operations Office, Federal Office Building, 301 South Park, Helena, MT 59626 within 60 days after the last non-restricted waste has been applied to the NSLTU during each operating season (see section IV. Conditions of Variance). If an analysis of the waste characterization data for the non-hazardous wastestreams and the TC tank bottoms does not confirm EPA's conclusion of no-migration, Exxon would be required to stop disposing of these wastes at the NSLTU.

3. Site Characterization

To satisfy 40 CFR 268.6(a)(3), Exxon provided a comprehensive characterization of the land treatment unit. Exxon provided information on the site soils, geology, hydrogeology, surface water hydrology, and meteorology/climatology. Exxon also included information on background soil and ground water quality. A brief summary of the soils and hydrogeology at the NSLTU is provided in this section. For more information, see the petition in the RCRA regualtory docket for today's notice.

a. *Soils.* The soils at the NSLTU belong to the Fort Collins Series. This Series is predominantly a sandy clay underlain by irregular thicknesses of sandy loam, loam, and silty clay loam below 0.6 meters. Together, these layers exist to depths ranging from 8.5 meters to 11 meters below the ground surface. An alluvial sandy gravel zone, about six meters thick, underlies these soils. The upper 1.5 meters of the NSLTU consists mostly of sandy clay with a small area of clay loam in the southeast corner.

b. *Hydrogeology.* The uppermost aquifer at the NSLTU is located in the sand and gravel alluvium about nine meters from the ground surface, providing adequate separation from the bottom of the treatment zone. It is confined by the overlying clay and silt layers of the Fort Collins Series and the underlying Clagget Formation acts as a lower confining bed. The ground water at the NSLTU generally flows from the southeast to the northwest toward the Yellowstone River with an average gradient of about 10 meters per 1000 meters. The land treatment unit is about 1.2 kilometers from the Yellowstone River.

4. *Monitoring.* Regulations at 40 CFR 268.6(a)(4) and 268.6(c) require petitioners to provide a monitoring plan that detects migration at the earliest practicable time and to describe the monitoring program installed at the unit to verify compliance with the conditions of the variance.

Exxon routinely monitors, as required by its Montana Hazardous Waste Permit, the environmental media and the waste. The media (ground water, soils, and soil-pore liquids) are monitored for a set of constituents called the Principal Hazardous Constituents (PHCs), as specified in the permit. The PHCs were selected because they are found in significant quantities in the wastes and provide a reliable indication of the presence of hazardous constituents in the environmental media at the NSLTU. Exxon also analyzes representative samples of the listed hazardous wastes (K049 and K051) for the "Modified Skinner List" of petroleum refinery constituents. Representative samples of the non-hazardous wastes in the past have been analyzed for a subset of this list, as discussed above. All analytical methods for analyses of waste, soils, soil-pore liquids, and ground water are either derived from or are consistent with analytical methodology listed in SW-846.

The PHCs are: Benzene, ethylbenzene, toluene, xylenes, anthracene, benzo(a)anthracene, benzo(b)fluoranthene, benzo(a)pyrene, chrysene, flouranthene, 1-methylnaphthalene, naphthalene, phenanthrene, pyrene, cresols, 2,4-dimethylphenol, phenol, lead, and chromium. Also, pH, specific conductance (ground water and soil-pore liquids only) and freon-extractable oil and grease are determined.

EPA believes that Exxon's monitoring program, as described below and in the Montana Hazardous Waste Permit, is adequate for purposes of detecting migration at the earliest practicable time and to demonstrate no-migration. This program was carefully reviewed during the permit process and was subject to public comment. It is consistent with EPA regulations found in 40 CFR parts 260 through 270 and available guidance for land treatment facilities.

a. *Unsaturated zone monitoring.* Exxon annually collects five random soil core samples from below the treatment zone (BTZ) and analyzes them for the PHCs identified above. BTZ samples are collected from the bottom of the treatment zone plus 15 cm (i.e., immediately below the unit boundary). Soil samples are also collected from the zone of incorporation (ZOI) of each management sector on a monthly basis during the active season. They are analyzed for oil and grease, percent solids, and percent moisture. Annual composite ZOI samples are analyzed for pH, nutrients, and the following metals: Antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, nickel, selenium, vanadium and zinc.

Soil-pore liquids are monitored with pan lysimeters installed at a depth of 1.2 meters from the ground surface. Two lysimeters are in the NSLTU and one is located in a background area adjacent to the unit per the Montana Hazardous Waste Permit. All lysimeters are checked monthly and following significant waste application. Exxon analyzes, per the permit, two samples per year for the PHCs listed above. In the event that there is insufficient volume for a complete analysis, volatile organics are analyzed first, followed by metals, pH and specific conductance and semi-volatile organics.

The Agency recognizes that facilities located in areas which receive substantially more rainfall than Billings, Montana, typically have a greater number of lysimeters to collect soil-pore liquids. (See Hazardous Waste Land Treatment, U.S. EPA, Cincinnati, OH, PB 89-179014, April 1983, pages 538-539, available in the RCRA regulatory docket for today's notice.) The Agency considered requiring additional lysimeters at the NSLTU, but rejected the idea after reviewing the benefit of additional monitoring data, compared to the potential risk of contamination to the BTZ (below treatment zone area) resulting from excavation and the placement of additional lysimeters in this active land treatment unit. Contaminated soils from the treatment zone could potentially fall into any excavation created to install the pan lysimeter, connecting tubing and access way for the collection bottle. EPA believes that the combination of the regularly scheduled soil-core monitoring and soil-pore liquid monitoring at the Exxon facility is sufficient to detect migration of hazardous constituents at the earliest practicable time, given the uniformity of the soils and operating conditions at the NSLTU. Each sector is essentially the same, that is, the treatment zone soils are naturally occurring and have similar textures; the same wastes are evenly applied to all sectors based on the waste application rates; and the sectors are tilled as one unit (no barriers divided the sectors). Contaminant movement is no more likely to occur in one area of the unit than another, i.e., it is as likely to be detected by a soil-pore and soil core sampling point located in one part of the unit as in another. Data from these monitoring programs show no hazardous constituents above HBLs in the soil cores, soil-pore water or ground water. Monitoring data are available in the petition, located in the RCRA regulatory docket for today's notice. (Note also that the permit was available for pubic review and comment before it was issued in 1988 and it requires only two lysimeters at this unit.) For these reasons, EPA believes it is not necessary to require additional monitoring devices at this time.

b. *Ground-water monitoring.* Exxon has a ground-water monitoring system consisting of five wells, all located at the unit boundary, to yield samples that represent the ground water passing the point of compliance. Ground water at the NSLTU generally flows in a northwest direction. Three wells are located downgradient from the unit on the northwest and north sides of the NSLTU. Two background wells are in place on the east side and at the southeast corner of the NSLTU. Each well is screened in the gravel zone of the alluvial aquifer. Well and screen location is per the Montana Hazardous Waste permit. Semiannual samples are analyzed for the PHCs listed above. Ground-water elevation determinations are made semiannually and ground water flow rates and direction are made on an annual basis.

c. No-Migration Demonstration

The bases for EPA's proposed decision that Exxon has demonstrated to a reasonable degree of certainty that no hazardous constituents will migrate from the NSLTU for as long as the wastes remain hazardous are discussed in this section. The supporting monitoring and modeling data and other discussions referred to in this section are available in the RCRA regulatory docket for today's notice.

1. Monitoring Results

Exxon has been operating the New South Land Treatment Unit (NSLTU) since 1980. Initially, the environmental media at the facility were monitored for basic indicator parameters. Once the Montana Hazardous Waste Permit was issued, a more specific monitoring program was instituted as described above. This section reviews the results of this monitoring.

a. Ground water. Exxon monitors the ground water at the NSLTU at two upgradient monitoring wells and three downgradient monitoring wells. Between 1980 and 1986, when Exxon first began applying wastes to the NSLTU, Exxon was required to monitor the ground water for four indicator parameters: pH, specific conductance, total organic carbon, and total organic halogen. In accordance with its Montana Hazardous Waste Permit, Exxon started collecting semi-annual ground-water monitoring data in 1986, including analysis for the PHCs. Exxon provided these monitoring data to support its claim that hazardous constituents have not migrated through the treatment zone and into the underlying ground water. The Agency reviewed Exxon's ground-water monitoring data on the PHCs and determined that none of the constituents have ever been detected above their respective health-based level. The Agency, therefore, concludes that the ground-water monitoring data collected by Exxon support its demonstraton that there has been no migration of hazardous constituents into the ground water.

b. *Soils.* In order to determine whether constituents have migrated beyond the unit boundary, Exxon, in accordance with its Montana Hazardous Waste Permit, collected five separate random core samples from beneath the treatment zone (BTZ) and analyzed them for the PHCs on an annual basis. Exxon collected and analyzed BTZ soil-cores starting in 1986 and then again in 1988, 1989, and 1990.

The Agency reviewed Exxon's BTZ soil-core monitoring data on the organic PHCs and determined that none of the constituents were detected above their respective health based levels. The Agency, therefore, concludes that these BTZ soil-core monitoring data demonstrate that there has been no migration of organic hazardous constituents into soil below the treatment zone.

In the case of the inorganic PHCs, that is, chromium and lead, Exxon's monitoring data from BTZ samples show that both metals have been consistently detected at concentrations similar to the established background levels. For example, during 1989 and 1990, detected chromium concentrations ranged from 12 mg/kg to 22.7 mg/kg and lead concentrations ranged from non-detect (<5.0 mg/kg) to 11 mg/kg. The background (naturally occurring) concentration for chromium is 22 mg/kg and for lead is 11.4 mg/kg. Since the monitoring data are so similar to the background levels, EPA concludes these inorganics did not result from the application of waste to the land treatment unit. In addition, the detected levels are far below the health-based

[4] See "Evaluation of Constituents Detected in Listed Petroleum Wastes and Discussion Regarding the Petroleum List," March 1992. Draft. Prepared for the Office of Solid Waste. Available in the RCRA regulatory docket for today's notice.

level for chromium, 1,000 mg/kg, and the interim soil cleanup level for total lead, 500 to 1,000 mg/kg. The Agency, therefore, concludes that the BTZ soil-core monitoring data collected by Exxon support its demonstration that there has been no migration of inorganic hazardous constituents below the unit boundary.

c. *Soil-pore liquids.* In order to determine whether constituents have migrated below the unit boundary, Exxon, in accordance with the Montana Hazardous Waste Permit, collects soil-pore liquids on a semi-annual basis from pan lysimeters installed just beneath the treatment zone. The soil-pore liquids are analyzed for the PHCs.

The Agency reviewed Exxon's soil-pore monitoring data on the PHCs and determined that, with the exception of one data point, no hazardous constituents have been detected above their respective health-based levels. On that one occasion, during the June 1989 monitoring event, benzene was detected at a concentration (0.02 mg/L), which is slightly above the health-based level (0.005 mg/L). Exxon, in accordance with its permit, resampled this lysimeter within 30 days of receipt of the laboratory results and did not detect benzene.

Exxon attributes the one-time detection of benzene to an incident that occurred during collection of the previous soil-pore liquid sample in November 1988. According to Exxon, waste was accidentally sprayed onto the cover of the 2.6-meter-deep access to the sample bottle. This bottle is connected by a stainless steel tube to the pan lysimeter located two meters away at the base of the treatment zone. Waste fell from the cover when opened and onto the bottle and the gravel at the base of the access when the cover was opened. The contaminated collection bottle was sealed with the cap from the new sample collection bottle to be put onto the system. Exxon's log book for the June 1989 event shows that the liquid from this lysimeter contained sediment (an unusual characteristic for soil-pore liquids). Exxon believes that sediment contaminated with benzene may have been accidently knocked into this second bottle during the switch over. Since then Exxon has reported that the contaminated material was removed from the access space and the workers who spray waste have been instructed not to apply waste so closely to the access covers and contamination has not reoccurred.

The Agency consequently believes that this single monitoring result does not provide evidence of migration. If it were actually migration, one would expect to find residual contamination in either soil cores or subsequent monitoring of the soil-pore liquid. During the nine years of operation before this anomaly, benzene had never been detected in the soil-pore liquid, nor has it been detected in any of the four monitoring events since June 1989 or in the soil cores or underlying ground water. Thus, the Agency believes that the single detection event in 1989 does not demonstrate migration.

The Agency, therefore, concludes that the soil-pore liquids monitoring data support Exxon's demonstration that there has been no migration of hazardous constituents below the treatment zone into soil pore liquids.

2. Organics Mobility

In order to address the potential migration of organic constituents through the treatment zone in the future, Exxon is relying on: (1) Computer simulations; (2) soil-core and soil-pore monitoring data collected since 1986; and (3) maintenance of proper management conditions.

a. *VIP Modeling.* Exxon used the Agency's Vadose Zone Interactive Processes (VIP) model to access the long-term migration potential of the organic consitutents of concern in simulation of four specific unsaturated treatment zone scenarios. The four scenarios studied by Exxon were: (1) One-year's operation of the NSLTU; [**] (2) a long-term simulation (≧50 years) using literature-derived degradation kinetics and partitioning information with site-specific waste properties and operational factors as model inputs; [5] (3) a reasonable-worst case simulation using low degradation rates and partitioning coefficients over five years of operation; and (4) sensitivity analyses to determine which input parameters could strongly influence the simulation results, and therefore, be subject to further evaluation.[6] Exxon evaluated the following nine organic constituents: toluene, anthracene, benzo(a)anthracene, benzo(a)pyrene, chrysene, naphthalene, phenanthrene, phenol, and pyrene.

Exxon, whenever possible, used site-specific input values; however, if none were available, Exxon used conservative literature-derived values or derived values using standard calculations (e.g., Clapp and Hornberger [7]). The modeled waste properties were based on a composite waste sample consisting of Slop Oil Emulsion Solids, API Separator Sludges, and Toxicity Characteristic (TC) wastes (i.e., tank bottoms and oil contaminated soils). The weighted average constituent concentrations were calculated using historic waste loading data and waste specific constituent concentrations.

Actual climatic data, operational parameters, such as waste application rates and application frequencies, and first order degradation rates were also used. Exxon calculated the oil and grease degradation rate by using actual monthly ZOI sampling data and waste loading records. Lastly, Exxon calculated constituent specific distribution coefficients using site-specific soils data and constituent specific organic carbon partition coefficients and used literature-obtained values for the oil/water partition coefficients.

The result of Exxon's simulation of one-year land treatment operations showed no constituents migrating below the zone of incorporation (i.e., all of the constitutents were completely degraded within the zone of incorporation). The results of Exxon's long-term simulation of land treatment operations again showed that all of the constituents were completely degraded within the zone of incorporation. Specifically, anthracene, benzo(a)anthracene, benzo(a)pyrene, chrysene, naphthalene, phenanthrene, phenol, pyrene, and toluene were degraded to concentrations below health-based levels within the 50-year period (24 active years plus 35 closure/post closure years).

Exxon's simulation of the worst-case scenario showed that the waste concentrations in the zone of incorporation under the "worst-case" scenario exceeded the zone of incorporation concentrations found in the one-year simulation concentrations by factors ranging from 1.02 for phenol to 9.23 for benzo(a)pyrene. However, in all instances the constituents were completely degraded within the zone of incorporation, except for toluene. The maximum estimated soil-pore liquid concentration of tolune was 0.042 mg/L at a depth of 1.1 meters (the health-based level for toluene is 1.0 mg/L).

Exxon's sensitivity analyses were performed on phenanthrene and toluene, which are representative of the two classes of constituents of concern (volatile and semi-volatile organics). For phenanthrene, Exxon discovered that soil temperature, temperature factor, biodegradation rates, partitioning coefficients, oil degradation rates and constituent concentration were all important inputs; however, in no case did phenanthrene migrate below the treatment zone. For toluene, Exxon discovered that the only significant input was toleune concentration and in no case did toluene migrate below the treatment zone.

The Agency reviewed Exxon's modeling work and was able to duplicate the work. In additon, the Agency reviewed all of the input values and concluded that the input parameters used by Exxon are acceptable, as they were either site-specific or conservatively derived from standard reference materials. As a result, EPA believes that Exxon's modeling supports the conclusion that the organic constituents will be completely degraded to non-hazardous levels within the treatment zone. (For a complete description of Exxon's VIP unsaturated zone modeling, see Exxon's "Response to Technical Evaluation," Attachment 12, located in the RCRA Regulatory Docket for today's notice.)

The results of the soil-core and soil-pore liquids monitoring data corroborate the VIP output; therefore, EPA believes that Exxon has complied with 40 CFR 268.6(b)(3) which requires petitioners to verify computers simulation models for accuracy by comparison with actual measurements.

b. *Operational data.* As mentioned above, the soil-core and soil-pore monitoring data collected to date indicate that organic constituents have not migrated from the unit in the past. As required in § 268.6(c), Exxon will continue to sample and analyze soil-core and soil-pore liquid samples as part of the monitoring program. These requirements are imposed through the Montana Hazardous Waste Permit and as a condition to day's proposed variance.

Based on the VIP Modeling results, Exxon's adherence to proper operational control,[8] and Exxon's successful operation of the NSLTU over the last eleven years, the Agency believes that Exxon has demonstrated, to a reasonable degree of certainty, that the organic constituents will be completely degraded within the treatment zone and will not migrate. (Note that the airborne dispersion of the organic constituents is addressed below in section 4. Air Modeling and Monitoring.)

3. Metals Mobility

Inorganic constituents, such as chromium and lead, will not degrade, and therefore will remain at in situ levels virtually indefinitely—certainly far beyond the predictive capabilities of any established models. Therefore, to demonstrate that the inorganic constitutents would not migrate beyond the unit boundary at hazardous concentrations and/or are immobilized, Exxon provided an analysis of theoretical chemical transformation or fate coupled with operational practices designed to reduce metals mobility.

For the theoretical approach, Exxon's petition discussed the impact on metals of several immobilization, transformation and attenuation mechanisms: Oxidation/reduction potential, solubility, hydrolysis, adsorptivity, and the cation exchange capacity (CEC) of the NSLTU soils. Many of these physical processes are dependent on soil conditions that are controlled by Exxon, such as pH. EPA notes the NSLTU soils contain materials (beyond lime) which can prevent inorganics from becoming more mobile. For instance, both the soils and the wastes contain organic carbon and several functional groups such as carboxylic acids, alcohols, and phenols which are known to reduce the mobile Cr(VI) species to the immobile CR(III) species. EPA concluded that these discussions adequately characterized the low potential for mobility of metals at the NSLTU.

In addition, Exxon demonstrated, based on the total metals loadings to the NSLTU, that the final metals concentrations in the zone of incorporation (ZOI) soils were low enough to preclude potential migration of any specific inorganic constituent (i.e., assuming in the worst-case that a specific inorganic constituent moved from the ZOI through the treatment zone and below the unit at the concentration found in the ZOI, this concentration would be less than the Agency's proposed definition of migration). Exxon calculated that the ZOI metal concentrations of all the inorganic constituents would be well below the health-based levels assuming direct ingestion of soil.

Exxon has in the past and will continue in the future to follow practices designed to minimize metals mobility, that is, to prevent the oxidation states of the inorganic constituents from changing into the more mobile species. These practices include the addition of lime (to exert control over metal solubilities), moisture control (to prevent soils from becoming anaerobic), and the use of computer-controlled application rates (to prevent overloading and formation of hot spots). EPA agrees that the success of this program is evidenced by soil-core and soil-pore monitoring data collected since 1986, which demonstrate that the inorganic constituents have not migrated and are not likely to migrate in the future. Last, Exxon will continue to conduct the soil-core and soil-pore liquids monitoring as required by its Montana Hazardous Waste Permit. The Agency believes that Exxon will be able to prevent future migration of the inorganic constituents through the treatment zone by adherence to these operational controls.

The Agency, therefore, concludes that Exxon has demonstrated, to a reasonable degree of certainty, that the inorganic constituents will not migrate at hazardous concentrations beyond the unit boundary. This is evidenced by Exxon's successul operation of the NSLTU over the last eleven years, monitoring results that show that no inorganics have been detected above health-based levels, the discussion on metals attenuation and the estimated ZOI concentrations (where one would expect high levels), which are predicted to be below health-based levels.

4. Air Pathway Assessment

a. *Air modeling.* Exxon addressed the potential migration of both the organic and inorganic constituents via the air pathway by utilizing an air emissions model and an air dispersion model, both applicable to land treatment facilities, to predict annual average to land treatment facilities, to predict annual average concentrations at the NSLTU unit boundary. The air emissions model (CHEMDAT7) and the dispersion models (Industrial Source Code Long Term (ISCLT) and Short Term (ISCST)) were developed by EPA's Office of Air Quality Planning and Standards (OAQPS) and are available from NTIS (U.S. Department of Commerce, National Technical Information Service).

[**] Exxon notes that the results of this simulation were compared to those obtained from Exxon's Land Treatment Demonstration; the comparison validated the VIP (version 2.0) model's ability to accurately predict the environmental fate of waste constituents in the unsaturated zone.

[5] Exxon selected 50 years as the base case long-term simulation since this time period would represent 24 years of future waste application plus 35 years of closure and post-closure care with monitoring and no waste application. When necessary, however, Exxon simulated a longer closure/post closure period in order to show that there would be complete degradation and no migration of the specific hazardous constituent.

[6] Exxon performed sensitivity analyses for the following parameters: soil moisture coefficient, soil porosity, bulk density, temperature factor, soil temperature, degradation rates, oil/water partition coefficient, soil/water partition coefficient, oil and grease degradation rate, and constituent concentrations.

[7] Clapp, R.B. and G. Hornberger. 1978. Empirical equations for some soil hydraulic properties. Water Resources Research 14:601-604.

[8] Exxon's petition states that it will impose specific operational practices to enhance the degradation and volatilization of the organic constituents, including periodic disking/tilling, the addition of fertilizer, moisture control, and computer controlled applications. Failure to follow these practices would constitute a violation of the variance.

Specifically, Exxon performed the following studies: (1) A season-based engineering calculation of particulate emissions from five potential source activities/processes; (2) a season-based emissions modeling of volatile and semi-volatile gaseous constituents using CHEMDAT7; and (3) a seasonal-based dispersion modeling using ISCLT. For a complete description of Exxon's air emissions and air dispersion modeling, see Exxon's "Response to Technical Evaluation," Attachments 14 and 30, located in the RCRA regulatory docket for today's notice.

First, Exxon calculated the annual fraction of total suspended particulate (TSP) emissions of ≤10 microns in diameter (PM_{10}) [9] emitted by waste transport vehicles (58 kg), waste dumping (0.02 kg), waste application (86 Kg), waste incorporation and tilling (443 kg), and wind erosion (2,062 kg). Exxon's analyses did not incorporate emissions resulting from vehicle trackout because Exxon has committed (and would be required under a final grant of this petition) to install a vehicle decontamination unit as a condition of the variance (see Section IV. Condition of Variance). The total average annual PM_{10} emissions is 2,650 kilograms.

Exxon then calculated the gaseous emissions of the volatile and semi-volatile constitutents using the land treatment and wast pile modules of the CHEMDAT7 emissions model. Exxon's emissions modeling consisted of a three-step approach for each waste type and each quarter of the year. (Waste is applied during only part of the year, generally April through October.) Specifically, Exxon used the land treatment model to:

- Simulate emissions from a unit waste pile for a 24-hour period for each waste type during the time period between waste dumping and waste application;
- Simulate emissions from a five-centimeter thick wast layer covering an area of 150.6 square meters over the two-hour time period beteen waste application and waste incorporation; and
- Calculate the emissions from the 150.6 square-meter sector occurring over all four quarters (90 days) using a standard tilling depth of 23 centimeters.

The "unit waste pile" modeling approach reflects the actual waste application and management practices and the actual concentrations of hazardous constituents present in the wastes managed at the NSLTU. A summary of total annual emissions calculated by Exxon is presented in Table 2.

TABLE 2.—SUMMARY OF TOTAL ANNUAL EMISSIONS—MASS EMITTED

Constituent	Total emissions (g/s−m²)
Benzene	5.85×10^{-13}
Benzo (a) anthracene	7.33×10^{-13}
Benzo (a) pyrene	3.70×10^{-10}
Naphthalene	8.07×10^{-11}
Phenanthrene	6.40×10^{-12}
Toluene	1.86×10^{-10}
Xylenes (total)	1.02×10^{-9}
Arsenic	4.21×10^{-13}
Chromium	3.31×10^{-11}
Lead	2.50×10^{-11}
Cadmium	1.09×10^{-12}

Exxon then conducted a sensitivity analysis on the slop oil emulsion solids (K049) waste pile, waste application, and waste tilling simulations to determine the importance of the simulation time, total porosity, air porosity, wind speed, soil temperature, and oil loading inputs. The results of Exxon's sensitivity analysis showed that the modeled predictions are relatively insensitive to reasonable variation in the input parameter values (i.e., the maximum predicted increase in emissions fractions for any given simulation was less than five percent).

Exxon then used the ISCLT model to estimate the downwind concentrations of the hazardous constituents emitted from the NSLTU. Specifically, Exxon performed three sequential sets of simulations, with each successive simulation becoming more refined, in order to locate the area source closest to the point where the maximum constituent concentrations were predicted to occur. The ISCLT simulations were performed using site-specific information, local meteorological data collected between 1988 and 1990, and the model's regulatory default values for wind profile exponents, vertical potential temperature gradients, final plume rise, stack tip downwash, and bouyancy-induced dispersion (the latter three parameters generally are more applicable to point source emissions than area source emissions).

Exxon then calculated the seasonal-based maximum average annual air concentrations at the unit boundary using the constituent-specific emissions rates. The maximum average-annual constituent concentrations were calculated by computing the arithmetic mean of the four quarterly concentrations. The maximum average-annual concentrations and the health-based levels used in no-migration petition decision-making are presented in Table 3.

TABLE 3.—PREDICTED ANNUAL AVERAGE DOWNWIND CONCENTRATIONS (μg/m³)

Constituents	Annual average downwind concentrations	Health-based limits *
Benzene	8.64×10^{-2}	1×10^{-1}
Toluene	1.37×10^{-1}	2×10^{-3}
Xylenes	4×10^{-1}	3×10^{-2}
Arsenic	6.82×10^{-5}	2×10^{-4}
Chromium	1.04×10^{-5}	6×10^{-5}
Lead	8.88×10^{-4}	1.5
Cadmium	4.61×10^{-5}	6×10^{-4}

* See "Health-Based Levels Used in No-Migration Petition Decision-Making," February, 1992, located in the RCRA regulatory docket for today's notice.

The Agency proposes to interpret migration via the air medium as exceeding the health-based level for a hazardous constituent on an annnual average concentration, not on a single event. This approach is protective, since air health-based levels are based upon long-term assumptions (i.e., 70-year exposures), and are far below risk levels in an acute air exposure scenario. Furthermore, the approach is appropriate because movement of constitutents in air is rapid and concentrations are transient. To have any meaning, in terms of migration or risk, air emissions can be measured only as releases over a period of time, whereas measurements of constituents in ground water and soil media reflect concentrations in a relatively stable medium (i.e., dispersive and temporal factors are less significant).

As shown above in Table 3, the maximum annual average concentration of each of the constituents at the unit boundary is less than its respective health-based limits. The Agency, therefore, believes that Exxon's modeling supports its demonstration that there will be no migration of hazardous constituents at hazardous concentrations via the air pathway.

b. *Air monitoring.* EPA's regulations do not require air monitoring at land treatment units, and Exxon has not conducted such monitoring in the past. Indeed, the value of routine ambient monitoring in determining releases at the unit boundary of a land treatment unit can be questioned. As an alternative, EPA is proposing that Exxon conduct a one-time ambient air monitoring program, under reasonable worst-case conditions, to confirm modeling estimates. (Air monitoring under reasonable worst-case conditions is proposed, because it would facilitate detection of hazardous constituents, which may be at low concentrations near detection limits.) This confirmatory monitoring of the air pathway would be required specifically for the no-migration demonstration and not for the Montana Hazardous Waste Permit. In addition, the Agency proposes that Exxon regularly sample the wastestreams disposed of at the NSLTU and the ZOI soils to assure that the modeled annual quantity of a hazardous constituent is not exceeded. The results of this routine monitoring should be sent to EPA on the same schedule they are provided to the State of Montana under the facility's permit (see Section IV. Conditions of Proposed Variance). The Agency believes that this approach is preferable to routine ambient air monitoring, which can involve too many uncertainties and variability for reliably detecting migration.

Exxon did not conduct air monitoring prior to the effective date of the Land Disposal Restrictions (November 8, 1990) and cannot do so until such time as a variance is granted, because those hazardous wastes restricted from land disposal (K049 and K051) must be applied to the land treatment unit in order to perform the monitoring. The Agency is proposing as a condition of this variance, that Exxon complete a specific air monitoring program within 15 months of variance issuance (see Section IV. Conditions of the Proposed Variance). This time period was chosen because (1) the monitoring must be performed under worst-case conditions, which are expected to occur in July and August, (2) a reasonable amount of time is needed to prepare for the actual field monitoring program, and (3) it is uncertain when the final variance will be issued in relation to the worst-case conditions.

In response to EPA's request, Exxon submitted a proposed monitoring program with its petition. Exxon's proposed air monitoring plan consists of sampling and analysis of the ambient air at the unit boundary for inorganics, volatile organics and semi-volatile organics. Exxon determined the location of sampling monitors by emission and dispersion modeling, using worst case conditions specific to the NSLTU as input parameters. After carful review of the plan, EPA has concluded that it will be sufficient to confirm the modeling. For more information, see Volume 2 of "Response to September 9, 1991 Technical Evaluation," located in the RCRA docket for today's notice. If the results of the air monitoring program do not confirm EPA's conclusion of no-migration, Exxon would be required to stop disposing of the restricted hazardous wastes and the variance would be revoked.

5. Evaluation of Other Possible Pathways of Migration

Review of Exxon's petition included an evaluation of other possible pathways of migration in addition to the ground water, soil, and air media. EPA reviewed the closure plan, the run-on and run-off control system in place at the unit and the proposal to install a vehicle decontamination facility. The Agency concluded that there are no other significant means for hazardous constituents to migrate at hazardous levels from the unit boundary of the NSLTU.

Exxon maintains a run-on control system capable of preventing flow onto the treatment zone and a run-off control system which is designed to contain the volume of water falling on the NSLTU during a 24-hour, 25-year storm. The same dikes that control run-on also control run-off. The two- to five-foot high dikes are constructed of compacted clay-rich soils obtained from the immediate area and are topped with gravel. This system effectively controls the surface water medium such that it is not a pathway for migration.

EPA is concerned, however, that track-out of constituents on vehicles is a possibility. Therefore, the Agency is proposing to require, as a condition to the variance, that Exxon install a vehicle decontamination facility at the NSLTU prior to application of any restricted wastes (K049 and K051). The facility, as designed in a plan proposed by Exxon, will restrict access to and from the land treatment unit and prevent trackout of hazardous constituents on vehicles. A copy of the plan can be found in "Response to Technical Evaluation" Attachment 2, and is available in the RCRA regulatory docket for today's notice. (See Section IV. Conditions of Proposed Variance.) EPA is also proposing to require Exxon to notify it upon completion of installation of the vehicle decontamination facility. This requirement will simplify enforcement of the condition.

In order to assure that the no-migration standard will continue to be met after the conclusion of the operating period, EPA reviewed Exxon's closure/post-closure plan as described in the Montana Hazardous Waste Permit and Exxon's estimates of concentrations of hazardous constituents remaining in ZOI soils at closure. The predicted concentrations of both the organic and inorganic constituents are less than their respective health-based levels for ingestion of soils at the end of post-closure care.

The closure/post-closure plan requires Exxon to continue all operations in the permit necesary to maximize degradation, transformation, or immobilization of hazardous constituents within the treatment zone. Exxon must add 15 cm of top soil and establish a vegetative cover. Monitoring of the environmental media as necessary will also continue per the permit. (See the Montana Hazardous Waste Permit for more details, located in the RCRA regulatory docket for today's notice.)

6. Conclusion

Exxon petitioned the Agency seeking to continue the land disposal of EPA Hazardous Waste Nos. K049 and K051 at its New South Land Treatment Unit located in Billings, Montana. For the reasons described earlier, EPA has also considered the petition to cover TC-hazardous contaminated soils (Hazardous Waste No. D018). The Agency believes that Exxon has successfully demonstrated, to a reasonable degree of certainty, that there will be no migration of hazardous constituents beyond the unit boundary at hazardous concentrations for as long as the waste remains hazardous at this facility. EPA has tentatively concluded that the petiton, with several supplemental documents, demonstrates that this land treatment unit is capable of transforming, degrading or immobilizing the hazardous constituents in the applied waste. The Agency, therefore, is proposing to grant to the Exxon Billings Refinery a variance from the Land Disposal Restrictions, with certain conditions, for its New South Land Treatment Unit.

III. Implementation and Enforcement of the Variance

If made final, the no-migration variance will only apply to the New South Land Treatment Unit (NSLTU) and the wastes and waste volumes covered by the demonstration. The proposed variance for land disposal of restricted wastes is applicable to only Slop Oil Emulsion Solids (K049), API Separator Sludge (K051), and TC Contaminated Soils (when the land disposal restrictions are promulgated for this waste) generated at the Exxon Refinery in Billings, Montana (40 CFR 268.6(i)).

Exxon would be required to amend this variance before applying other restricted hazaradous wastes to the land treatment unit. Of course, Exxon may continue to apply non-hazardous wastes

[9] Emission particles of ≤ 10 microns in diameter represent the fraction of material presenting risk via the airborne pathway (i.e., respirable particles).

or unrestricted hazardous wastes, regardless of the terms of the proposed decision.

EPA's proposd decision is based on specific informtion provided by Exxon in its petition, and it assumes Exxon's compliance with its Hazardous Waste Permit, issued by the State of Montana. Therefore, Exxon's petition and its State permit define the scope of permissible activities under the variance.[10] Any substantial departures from the terms of the petition or the permit that might affect migration from the unit (e.g., acceptance of new restricted wastes not listed in the petition, or major changes in operational practices) would require amendment of the variance. If Exxon made such changes without first seeking an amendment, and if it continued to apply restricted wastes at the unit, it would be in violation of the RCRA land disposal restricitons and would potentially be subject to enforcement action.

EPA notes that the current RCRA regulations spell out procedures that govern changes at facilities subject to no-migration variances. Specifically, in accordance with 40 CFR 268.6(e), Exxon must report any changes in conditions at the NSLTU and/or the environment around the unit that significantly depart from the conditions described in the petition and affect the potential for migration of hazardous constituents from the unit. If Exxon plans to make changes to the design, construction, or operation of the NSLTU, or any other changes that may affect the potential for migration of hazardous constituents, such a change must be proposed in writing to EPA at least 30 days prior to making the change. EPA will determine whether the proposed change invalidates the terms of the variance and will determine the appropriate response. Any significant change must be approved before it is made. If Exxon discovers that a condition at the site, which was modeled or predicted in the petition, does not occur as predicted, this change must be reported, in writing, to the Administrator within 10 days of discovering the change. EPA will determine whether the reported change from the terms of the petition requires further action, which may include termination of waste acceptance, revocation of the variance or other responses.

[10] Exxon must also demonstrate that it is in compliance with certain organic air emission standards, proposed as 40 CFR 264 subpart CC, once these regulations become effective. The Subpart CC regulations would be imposed pursuant to RCRA section 3004(n) as well as sections 3004 (d), (e) and (f).

In addiiton, in accordance with 40 CFR 268.6(f), of Exxon determines that there is migration of a hazardous constituent(s) from the NSLTU, Exxon must immediately suspend receipt of restricted waste at the NSLTU, and notify the Agency in writing, within 10 days of the determination that a release has occurred. Within 60 days of receiving notification, EPA will determine whether Exxon can continue to receive restricted waste in the NSLTU or whether the variance is to be revoked. (EPA notes that decisions on on-migration determinations, other than for underground injections wells, have been delegated to the Office of Solid Waste and Emergency Response (OSWER). Notices required under § 268.6(e) and (f), therefore, should be submitted to the Chief, Assistance Branch, Office of Solid Waste (OS-343), U.S. Environmental Protection Agency, 401 M Stret SW., Washington, DC 20460.0

In addition, today's proposed decision would impose a series of specific conditions on Exxon's operations designed to ensure that migration did not occur, and that the no-migration variance could be effectively enforced. These proposed conditions are spelled out in section IV. of today's notice and are discussed in detail in earlier sections. These conditions would be directly enforceable and a violation of a condition would constitute a violation of the RCRA land disposal restrictions. EPA's Region VIII will have primary responsibility for ensuring compliance.

In accordance with 40 CFR 268.6(k), the proposed variance will be valid for up to ten years, but no longer than the term of the facility's Montana Hazardous Waste Permit; therefore, Exxon's variance for the NSLTU would expire on October 18, 1998 (the date on which Exxon's Montana Hazardous Waste Permit expires), unless the permit is renewed or reissued.

IV. Conditions of Proposed Variance

As a condition of this proposed no-migration variance, EPA proposes that Exxon comply with the following terms:

(1) Exxon must comply with Montana State permit conditions with regard to characterization of wastes disposed of at the NSLTU, and monitoring of ground water, soil and soil-pore liquids at that unit. Exxon must provide the results of this characterization and monitoring to the EPA Region VIII Montana Operations Office, Federal Building, 301 South Park, Helena, MT 59626, on the same schedule as they are provided to the State of Montana Department of Health and Environmental Sciences (DHES) under the facility's permit.

(2) Exxon must collect samples of the TC-hazardous Tank Bottoms and the non-hazardous wastestreams (Boiler House Lime Sludge; Cooling Tower Sludge; and DEA Sludge) and analyze them for all of the constituents on the list of "Petroleum Constituents of Concern." A copy of this list is provided in today's RCRA regulatory docket. Exxon must analyze four representative samples of these wastestreams, or where a waste is infrequently generated, a sample each time the waste is generated for a period of two years from variance issuance. The results of the analyses must be provided in a written report, to the EPA Region VIII Montana Operations Office, Federal Building, 301 South Park, Helena, MT 59626, within 60 days of the last application of these wastes in each operating season.

(3) Exxon must conduct confirmatory air quality monitoring at the NSLTU within 15 months of variance issuance to evaluate the accuracy of the modeling estimates. The monitoring must meet the standards described in the approved plan found in "Response to Technical Evaluation" Attachment 22, a copy of which is provided in the RCRA regulatory docket for today's notice. The results of the monitoring should be compared to short term modeling for the same source and dispersion conditions that occurred during the monitoring period. This comparison will be used to confirm the average annual modeling air release estimates. Exxon shall provide the written results of the air monitoring program, including any revisions to the modeling estimates, to the EPA Region VIII Montana Operations Office, Federal Building, 301 South Park, Helena, MT 59626, within 90 days of air monitoring sample collection.

(4) Exxon must install the vehicle decontamination facility at the NSLTU proposed in "Response to Technical Evaluation" Attachment 2, (located in the RCRA regulatory docket for today's notice), or one that provides no less adequate protection, prior to application of any restricted wastes, and must decontaminate all vehicles before they leave the unit. The decontamination facility must be constructed so as to restricted access to and from the land treatment unit and prevent trackout of hazardous constitutents on vehicles. Notification of installation of this facility shall be sent to the EPA Region VIII Montana Operations Office, Federal Building, 301 South Park, Helena, MT 59626, within 30 days of installation.

Dated: March 19, 1992.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

Availability of Fish Contamination Program Document

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that a public information document relating to the fish contamination program is available to the public. There is no new policy or guidance in this document.

Copies of the document identified in this notice may be obtained by making written request to the U.S. Environmental Protection Agency (EPA) at the address provided below.

FOR FURTHER INFORMATION CONTACT: U.S. Environmental Protection Agency Fish Contamination Section (WH-585), 401 M Street, SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following document may be obtained free of charge from the EPA:

Consumption Surveys for Fish and Shellfish, A Review and Analysis of Survey Methods. US Environmental Protection Agency. EPA 822/R-92-001 February, 1992. 55 Pages.

This document contains a critical analysis of survey methods used to determine fish consumption rates for recreational and subsistence fishermen; these groups have the greatest potential for exposure to contaminants in fish tissues. The survey methods may also be used in determining appropriate consumption rates for use in State adoption of water quality standards for the protection of human health. The document summarizes the advantages and disadvantages of five survey approaches: Recall-Telephone Survey; Recall-Mail Survey; Recall-Personal Interview; Diary; and Creel Census. It also highlights important methodological considerations such as survey design, selection of respondents, information sought, quality assurance, and statistical analyses. In addition, the document provides information on relative costs and approximate levels of effort as well as a bibliography.

When requesting this publication, identify the document by title and specify the quantities desired.

Tudor F. Davies,

Director, Office of Science and Technology, Office of Water.

BILLING CODE 6560-50-M

[OPPTS-59303A; FRL-4054-5]

Certain Chemicals Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (tsca) and 40 CFR 720.38. EPA has designated this application as TME-92-3. The test marketing conditions are described below.

EFFECTIVE DATES: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Rick Keigwin, New Chemicals Branch, Chemical Control Division (TS-794), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-611, 401 M St. SW., Washington, DC 20460, (202) 260-2440

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

EPA hereby approves TME-92-3. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present an unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-92-3. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

TME-92-3

Date of Receipt: February 12, 1992.

Notice of Receipt: March 2, 1992 (57 FR 7388).

Applicant: Safety-Kleen Corporation.

Chemical: (S) Lubricating oils, used, residues.

Use: (S) Asphalt Extender.

Production Volume: 20 million kilograms.

Number of Customers: (Confidential).

Test Marketing Period: 7 months, commencing on first day of manufacture.

Risk Assessment: EPA identified no significant health or environmental concerns for the test market substance. Therefore, the test market activities will not present an unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should an new information that comes to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.

Dated: March 17, 1992.

John W. Melone,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

FEDERAL DEPOSIT INSURANCE CORPORATION

Coastal Barrier Improvement Act; Property Availability: Brodie Tract, Austin, TX

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that the property known as the "Brodie Tract" located near Austin, Texas is affected by section 10 of the Coastal Barrier Improvement Act of 1990, as specified below.

DATES: Written Notices of Serious Interest to purchase or effect other transfer of the property may be mailed or faxed to the Federal Deposit Insurance Corporation until June 24, 1992.

ADDRESSES: Copies of detailed descriptions of the property can be obtained by contacting the following Person: Tom Goodson, AMRESCO Management, Inc., 1201 Main Street, 11th Floor, Dallas, Texas 75202, telephone (214) 508–4433, Fax (214) 508–4439.

SUPPLEMENTARY INFORMATION: The 91.61 acre tract is located in the northwest corner of Loop 360 and Highway 290, one-half mile south of Barton Creek Mall, Austin, Texas. The property is primarily undeveloped, and is surrounded by Loop 360, a shopping center and a residential development. The property abuts the City of Austin owned Barton Creek greenbelt on the western boundary of the property. The property is located within the municipality of Austin, Texas, is zoned for multifamily, general office and some retail uses, and is not platted. There is an unconfirmed suspicion that endangered or protected species, including, without limitation, the Golden Cheek Warbler and Black Capped Vireo or their habitats exist in the area.

Written notice of serious interest to purchase the property must be received on or before June 24, 1992 by Tom Goodson at the above address.

Those entities eligible to submit written notices of serious interest are: 1. Agencies or entities of the federal government,

2. Agencies or entities of state or local government, and

3. "Qualified organizations" pursuant to section 170(h) of the Internal Revenue Code of 1986 (26 U.S.C. 170(h)(s)).

Form of Notice

Notices of serious interest should be in the following form:

Notice of Serious Interest re:

Brodie Tract Land

Austin, Texas

1. Name of eligible entity.
2. Declaration of eligibility to submit notice under criteria set forth in Public Law 101–591, section 10(b)(2).
3. Brief description of proposed terms of purchase or other offer (e.g. price and method of financing).
4. Declaration by entity that it intends to use the property primarily for wildlife refuge, sanctuary, open space, recreational, historical, cultural or natural resource conservation purposes.

Dated: March 20, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL MARITIME COMMISSION

[Docket No. 92–12]

Save on Shipping, Inc. v. Puerto Rico Maritime Shipping Authority; Filing of Complaint and Assignment

Notice is given that a complaint filed by Save On Shipping, Inc. ("Complainant") against Puerto Rico Maritime Shipping Authority ("Respondent") was served March 20, 1992. Complainant alleges that Respondent has violated sections 17 and 18(a) of the Shipping Act, 1916, 46 U.S.C. app. 816 and 817(a), and section 2 of the Intercoastal Shipping Act of 1933, 46 U.S.C. app. 844, by attempting to collect unfiled rates and charges and by prosecuting claims for costs, undefined expenses and attorneys fees.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 22, 1993, and the final decision of the Commission shall be issued by July 20, 1993.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

County Bancshares, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 20, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. County Bancshares, Inc., Troy, Alabama; to establish Pike County Federal Savings Bank, Troy, Alabama, pursuant to § 225.25(b)(9) of the Board's Regulation Y to facilitate the acquisition of the Troy, Alabama branch office of First Federal Bank, F.S.B., Tuscaloosa, Alabama.

Board of Governors of the Federal Reserve System, March 20, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Dauphin Deposit Corporation, et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 20, 1992.

A. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. Dauphin Deposit Corporation, Harrisburg, Pennsylvania; to merge with FB&T Corporation, Hanover, Pennsylvania, and thereby indirectly acquire Farmers Bank and Trust Company of Hanover, Hanover Pennsylvania.

In connection with this application, Applicant also proposes to acquire Farmers Bank, FSB, Baltimore, Maryland, and thereby engage in savings association activities of deposit taking and lending, and other activities pursuant to § 225.25(b)(9); Farmers Mortgage Corporation, Hanover, Pennsylvania, and thereby engage in making and originating residential mortgage loans pursuant to § 225.25(b)(1)(iii); Reliance Consumer Discount Company, Hanover, Pennsylvania, and thereby engage in acting as a consumer finance company pursuant to § 225.25(b)(1)(i); and Center Square Life Insurance Company Hanover, Pennsylvania, and thereby engage in acting as principal for insurance that is directly related to extensions of credit by its affiliates pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

B. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Midland Financial Co., Oklahoma City, Oklahoma, and its subsidiary, MidFirst Bank, State Savings Bank, Oklahoma City, Oklahoma; to become bank holding companies by acquiring 100 percent of the voting shares of MidLand Capital Co., Oklahoma City, Oklahoma, and thereby indirectly acquire Northwest Bank, Oklahoma City, Oklahoma; and ONB Bancorp, Inc., Oklahoma City, Oklahoma, and thereby indirectly acquire Oklahoma National Bank and Trust Co., Chickasha, Oklahoma.

In connection with this application, Applicant also proposes to indirectly acquire ONB Insurance Agency, Inc., Chickasha, Oklahoma, a nonbanking subsidiary of ONB Bancorp, and thereby indirectly acquire engage in the sale of credit related insurance pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

Comments on this application must be received by April 14, 1992.

Board of Governors of the Federal Reserve System, March 20, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

State Bank of Lake Elmo Employee Stock Ownership Plan; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 20, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Lake Elmo Bank Profit Sharing Plan and the Lake Elmo Bank Profit Sharing Trust, Lake Elmo, Minnesota; formerly the State Bank of Lake Elmo Employee Stock Ownership Plan, Lake Elmo, Minnesota; to acquire 6.52 percent of the voting shares of Lake Elmo Bancorp, Inc., Lake Elmo, Minnesota, and thereby indirectly acquire Lake Elmo Bank, Lake Elmo, Minnesota.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Northwest Bancorporation, Inc., Houston, Texas; to acquire 100 percent

of the voting shares of South Main Bank, Houston, Texas.

Board of Governors of the Federal Reserve System, March 20, 1992.

Norwest Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 21, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Norwest Corp., Minneapolis, Minnesota ("Norwest"), to acquire through its mortgage subsidiary, Norwest Mortgage, Inc., Des Moines, Iowa ("Norwest Mortgage"), U.S. Recognition, Inc., Ringwood, New Jersey ("Company"), and thereby provide, pursuant to § 225.25(b)(7) of the Board's Regulation Y (12 CFR 225.25(b)(7)), the services currently offered by Company. Company provides data processing and data transmission services, facilities and data bases to local boards of realty and their members. The information transmitted consists of price, tax, utility, financing and other information regarding real property currently listed or sold within the last two years.

Board of Governors of the Federal Reserve System, March 20, 1992.

BILLING CODE 6210-01-F

GENERAL SERVICES ADMINISTRATION

Performance Review Boards for Small Client Agencies Serviced by the General Services Administration, Name of Members

Section 4314(C)(1) through (5) of title 5, U.S., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more Performance Review Boards. The board shall review and evaluate the initial appraisal by the supervisor of a senior executive's performance, along with any recommendations to the appointing authority relative to the performance of the senior executive. The Performance Review Board also shall make recommendations as to whether the career senior executive should be recertified, conditionally recertified, or not recertified.

As provided under section 601 of the Economy Act of 1932, amended 31 U.S.C. 1525, the General Services Administration through its External Services Staff, Personnel Division, provides various personnel management services to a number of diverse Presidential commissions, committees, boards, and other agencies through reimbursable administrative support agreements. This notice is processed on behalf of the client agencies, and it supersedes all other notices in the **Federal Register** on this subject.

Because of their small size, a Performance Review Board register has been established in which SES members from the client agencies participate. The Board is composed of SES members from various agencies. From this register of names, the head of each client agency will appoint executives to a specific board to serve a particular client agency.

The members whose names appear on the Performance Review Board standing roster to serve client agencies are:

Administrative Conference of the U.S.

William J. Olmstead, Executive Director
Gary J. Edles, General Counsel
Jeffrey S. Lubbers, Research Director

Barry M. Goldwater Scholarship and Excellence in Education Foundation

Gerald J. Smith, Executive Secretary

Board of International Broadcasting

Mark G. Pomar, Executive Director
Bruce D. Porter, Deputy Executive Director
John A. Lindburg, General Counsel
Patricia H. Schlueter, Director of Financial and Congressional Affairs

Committee for Purchase from Blind and Other Severely Handicapped

Beverly L. Milkman, Executive Director

Defense Nuclear Facilities Safety Board

Kenneth M. Pusateri, General Manager
Joseph R. Neubeiser, Deputy General Manager
Robert M. Anderson, General Counsel
Richard A. Azzaro, Deputy General Counsel for Policy and Litigation
George W. Cunningham, Technical Director
Joyce P. Davis, Chief, Health Physics Branch

Harry S. Truman Scholarship Foundation

Louis H. Blair, Executive Secretary
C. Westbrook Murphy, General Counsel

Japan-United States Friendship Commission

Eric J. Gangloff, Executive Director

Office of Navajo and Hopi Indian Relocation

Christopher J. Bavasi, Executive Director
Michael J. McAlister, Deputy Executive Director

United States Arctic Research Commission

Philip L. Johnson, Executive Director

FOR FURTHER INFORMATION CONTACT: Robert A. Miller, Chief, External Services Staff (202-708-5370); General Services Administration, National Capital Region (WCPX), Washington, DC, 20407.

Dated: March 10, 1992.

Beverly St. Clair,

Regional Personnel Officer.

GOVERNMENT PRINTING OFFICE

Depository Library Council to the Public Printer; Meeting

The Depository Library Council to the Public Printer (DLC) will hold its Spring 1992 meeting on Tuesday, April 28, 1992, at the U.S. Government Printing Office (GPO). The meeting will begin at 8:30 a.m. and will conclude at 3 p.m. It will be held in the Carl Hayden Room, GPO, 732 North Capitol Street NW., Washington, DC 20401. The purpose of this meeting is to discuss the Federal Depository Library Program. The meeting is open to the public.

Anyone who wishes to attend the meeting must notify Josephine Williams, U.S. Government Printing Office (SL), Washington, DC 20401. Telephone: (202) 512-1114. A limited number of hotel rooms have been reserved at the Rosslyn Westpark Hotel, 1900 N. Fort Myer Drive, Arlington, VA 22209, for anyone needing hotel accommodations. Telephone: (703) 527-4614. Room cost per night is $90.00.

DLC members will spend Monday, April 27, 1992, at GPO preparing for the Spring 1992 meeting.

Robert W. Houk,

Public Printer.

BILLING CODE 4160-90-M

Centers for Disease Control

HIV Program Evaluation Meeting

The National Center for Prevention Services (NCPS) of the Centers for Disease Control (CDC) announces the following meeting:

Name: HIV Program Evaluation Meeting.

Time and Date: 8:30 a.m.-4:30 p.m., April 14, 1992.

Place: Swissotel Atlanta, 13391 Peachtree Road, NE., Atlanta, Georgia 30326.

Status: Open to the public, limited only by space available.

Purpose: Representatives from CDC program staff, state HIV/sexually transmitted diseases (STD) project directors, state HIV/STD evaluation specialists, quality assurance specialists, and social scientists with expertise in program evaluation will discuss program issues related to the evaluation of HIV prevention programs.

Matters To Be Discussed: The meeting will focus on a number of important public health questions, such as:

- What lessons have we learned about the methods used for HIV-prevention program evaluation?
- How can HIV program evaluations be structured so as to best serve the needs and constraints of state and local health departments?
- How can quality assurance methods be used to augment process evaluation methodologies?
- What forms of evaluation technical assistance are required by state and local health departments?

From these discussions, CDC may produce additional technical guidance for evaluators and program managers and may, in addition, refine its own technical assistance and training activities related to HIV prevention evaluation.

Contact Person for More Information: David Holtgrave, Ph.D., Behavioral Scientist, NCPS (HIV), CDC, Mailstop E07, 1600 Clifton Road, NE., Atlanta, Georgia 30333, telephone 404/639-1480 or FTS 236-1480.

Dated: March 20, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY-920-02-4120-18]

Availability of Preliminary Public Interest Determination and Notice of Public Hearings

AGENCY: Bureau of Land Management, Interior, Wyoming.

ACTION: Notice of availability of a preliminary public interest determination and notice of public hearings on the Belco/Hay Creek Coal Exchange (WYW0322794).

SUMMARY: In accordance with 43 CFR 3426.1-2(d), the Bureau of Land Management (BLM) is requesting comments on the findings and conclusion of a Preliminary Public Interest Determination regarding the Belco Petroleum Corporation's proposed exchange of its Federal Coal lease rights (bonus bid) on a lease tract east of Buffalo, Wyoming in Johnson County called the Belco tract, and a Federal lease trace north of Gillette, Wyoming in Campbell County, called the Hay Creek tract. Legal descriptions of both tracts can be found at the end of this notice. BLM's Preliminary Public Interest Determination concludes that the fair market value appraisals of the Belco and Hay Creek tracts are not similar in value. The preliminary determination also did not identify any national public resources or social values which the exchange would preserve. The coal quality and potential of the Belco tract justifies no value for exchange. On the other hand, the Hay Creek tract does not have a large bonus value per ton, but the size of the reserves results in a substantial total value.

DATES: In accordance with 43 CFR 3435.3-5, two public hearings are scheduled to acquire public comments on the Preliminary Public Interest Determination for the proposed exchange. The public hearings are set for May 6, 1992, 7 p.m. m.d.t., in the basement meeting room of the Buffalo Federal Savings and Loan, located at 104 Fort Street, Buffalo, Wyoming; and for May 7, 1992, 7 p.m., m.d.t., in the Holiday Inn, located at 2009 South Douglas Highway, Gillette, Wyoming. Written comments on the public interest determination will be accepted by BLM until May 22, 1992, and should be submitted to the Casper District Office listed elsewhere in this notice.

ADDRESSES: Copies of the Summary of the Preliminary Public Interest Determination are available upon request either by calling the Casper District Office at (307) 261–7600, or by writing to the District Manager, Casper District Office, 1701 East "E" Street, Casper, Wyoming 82601.

FOR FURTHER INFORMATION CONTACT: For more information or to obtain a copy of the document contact either Mike Karbs or Glen Nebeker at the address above or by calling (307) 261–7600.

SUPPLEMENTARY INFORMATION: The Belco/Hay Creek exchange is proposed under Public Law 95–554, which gave the Secretary of the Interior limited authority to exchange coal lease rights for leases over which Interstate Highway I–90 passes. In March 1982, Belco Petroleum Corporation, the Bureau of Land Management, and Geological Survey (USGS), signed a Memorandum of Understanding (MOU), agreeing to study Belco's proposed exchange to determine whether it was in the public interest.

The agreement provided for a study of the relative economic values of the Belco tract and an unleased Federal coal parcel known as the Hay Creek Tract. The agreement also contained Provisions that provided Belco with the opportunity to review and comment on a preliminary estimate of value for the coal estates in the offered (Belco) and selected (Hay Creek) tracts. BLM issued a decision in 1985 based on non-economic factors rejecting the exchange proposal. This decision was appealed to the Interior Board of Land Appeals (IBLA). IBLA remanded the case back to BLM in 1987 for completion of a required public interest determination, including the economic studies set forth in the 1982 MOU. BLM submitted a preliminary economic evaluation to Belco, as per the agreement, in July 1990, for review and comment. The Belco comments received in October 1990, have been considered in the preparation of the final valuation report for the Belco and Hay Creek Tracts. Should BLM's final determination conclude that the exchange is in the public interest, the next step in the process would be the scheduling of an environmental analysis.

Legal Descriptions of the Tracts Are:

Belco: (Offered Lands)

Salt Lake District; Required Special Recreation Permits

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice that groups of 75 or more are required to attain a Special Recreation Permit for all recreation events on public land.

SUMMARY: Notice is hereby given that Special Recreation Permits are required for organized groups of 75 or more people recreating on BLM public lands within the Salt Lake District in accordance with 43 CFR 8372.07(a)(1).

In the past large groups of 100 to 300 people have camped on BLM public land without obtaining permission or notifying the BLM Salt Lake District. These groups have caused significant problems including destruction of vegetation, improper disposal of human waste and conflicts with other BLM visitors. By requiring a Special Recreation Permit the BLM Salt Lake District will be able to ensure these large groups provide adequate self-contained toilet facilities, designate camping locations which can accommodate heavy use and avoid visitor conflicts with other recreationist.

For more information, contact: Howard Hedrick, Bureau of Land Management, Pony Express Resource Area Manager, 2370 South 2300 West, Salt Lake City, Utah 84119, (801) 977–4300.

Deane H. Zeller,
District Manager.

[AZ–020–00–4212–13; A–25295]

Resource Management Plan Amendment, Maricopa County, Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Category I Amendment to the Lower Gila South Resource Management Plan.

SUPPLEMENTARY INFORMATION: In accordance with CFR 1610.2(c), and 1610.3–1(d), notice is hereby given of intent to prepare a planning amendment document. This notice also constitutes the scoping required by regulation for the National Environmental Policy Act (40 CFR 1507.7).

(1) Description of the proposed planning action: The proposed action is to amend the Lower Gila South Resource Management Plan (RMP) completed in June 1988. The Category I planning amendment will be based upon existing statutory requirements and policies and will carry out requirements of the Federal Land Policy and Management Act of 1976 (FLPMA). The RMP amendment and Environmental Assessment (EA) to be prepared will provide the basis for modifying the Land Tenure section of the Resource Management Plan in response to a land exchange proposal submitted by Maricopa County. Maricopa County's intended use of the public land would be to be construct and operate a regional landfill.

(2) Identification of the geographic area involved: Location of the proposed planning amendment of the Lower Gila South Resource Management Plan is within a portion of southwestern Maricopa County, approximately 5 miles southwest of Buckeye, Arizona.

(3) General types of issues anticipated: The proposed amendment addresses a change in the Land Tenure section of the Lower Gila South Resource Management Plan to consider a land exchange proposal submitted by Maricopa County. If the land exchange is consummated, Maricopa County will use the land for a regional landfill. Scoping, in which identification of issues and public concerns pertaining to the proposed action, is underway.

(4) Disciplines to be represented and used to prepare the RMP amendment and Environmental Assessment will be the following: Lands, wildlife, botany, soils, archaeology, geology, range and hydrology.

(5) The kind and extent of public participation opportunities to be provided: Public participation will be accepted during a 30 day comment period commencing with publication in the Federal Register.

(6) During the 30 day public comment period, a field trip to the proposed land exchange location will be scheduled. Notices will be published in local newspapers providing specific information concerning the field trip. All public input will be handled through written comments.

(7) The name, title, address and telephone number of the Bureau of Land Management official who may be contacted for further information: John R. Christensen, Area Manager, 2015 W. Deer Valley Rd., Phoenix, Arizona 85027, Phone: (602) 863–4464.

(8) The location and availability of documents relevant to the planning amendment and land exchange process will be available for public review at the Phoenix District Office, 2015 W. Deer Valley Road, Phoenix, Arizona.

Dated: March 19, 1992.

Henri R. Bisson,
District Manager.

BILLING CODE 4310–32–M

[ID–943–4214–11; IDI–15705]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes that a 7,685.62 acre withdrawal for Powersite Classification No. 255 continue for an additional 20 years. The land is still needed for waterpower purposes. This land will remain closed to surface entry, but has been and would remain open to mineral leasing and mining.

DATES: Comments should be received on or before June 24, 1992.

FOR FURTHER INFORMATION CONTACT: Larry Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208–384–3166.

The Bureau of Land Management proposes that the existing land withdrawal made by the Secretarial Order dated June 11, 1930, for Powersite Classification No. 255, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following described land:

Boise Meridian

T. 4 N., R 7 E.,
Sec. 4, lots 1 to 10 inclusive;
Sec. 5, lots 1 and 5 to 7 inclusive, E½SW¼ and NW¼SE¼;
Sec. 7, lots 2 to 8 inclusive, 10 and 11, N½NE¼, SE¼NW¼ and SE¼SE¼;
Sec. 8, lots 1 to 8 inclusive, SE¼NE¼ and SW¼SW¼;
Sec. 17, W½NW¼, SE¼NW¼ and SW¼NE¼;
Sec. 18, lots 1 to 5 inclusive NE¼NE¼;
T. 5 N., R. 7 E.,
Sec. 1, lots 13 to 20 inclusive;
Sec. 2, lots 9 to 19 inclusive;
Sec. 3, lots 13 to 14;
Sec. 10, lots 1 to 9 inclusive;
Sec. 15, lots 1 to 6 inclusive;
Sec. 16, lots 1 to 4 inclusive and SE¼SE¼;
Sec. 21, lots 1 to 9 inclusive;
Sec. 23, lots 1 to 4 inclusive;
Sec. 24, lots 1 to 10 inclusive and NW¼NE¼;
Sec. 25, lots 1 to 3 inclusive;
Sec. 26, lots 1 to 8 inclusive;
Sec. 28, lots 2 to 9 inclusive and SW¼NW¼;
Sec. 33, lots 1 to 11 inclusive;
Sec. 34, lots 1 to 12 inclusive and SE¼SE¼;
Sec. 35, lots 1 to 4 inclusive and W½SW¼.
T. 5 N., R. 8 E.,
Sec. 5, lots 3 to 5 inclusive;
Sec. 6, lots 1, 2, 6, 7, 8, 10 and 11, S½NE¼, SE¼NW¼, E½SW¼ and W½SE¼;
Sec. 8, lots 1 to 3 inclusive, SE¼SW¼ and NW¼SE¼;
Sec. 9, lots 3 and 4 and SW¼SW¼;
Sec. 16, lots 1 to 3 inclusive;
Sec. 17, lots 1 to 9 inclusive and NW¼SW¼;
Sec. 18, lots 3 to 10 inclusive and SE¼SE¼;
Sec. 19, lots 1 to 4 inclusive and NW¼NE¼.

The areas described aggregate 7,685.62 acres in Elmore and Boise Counties.

The withdrawal is essential for protection of waterpower potential development. The existing withdrawal closes the described land to surface entry but not to mineral leasing and mining. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the Federal Resigter. The existing withdrawal will continue until such final determination is made.

Dated: March 17, 1992.

William E. Ireland,
Chief, Realty Operations Section.

BILLING CODE 4310–GG–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 701-TA-312 (Final)]

Softwood Lumber From Canada

AGENCY: United States International Trade Commission

ACTION: Institution and scheduling of a final countervailing duty investigation.

SUMMARY: The Commission hereby gives notice of the institution of final countervailing duty investigation No. 701–TA–312 (Final) under section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Canada of softwood lumber, [1] provided for in subheadings 4407.10.00, 4409.10.10, 4409.10.20, and 4409.10.90 of the Harmonized Tariff Schedule of the United States (HTS).

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

EFFECTIVE DATE: March 6, 1992.

FOR FURTHER INFORMATION CONTACT: Jim McClure (202–205–3191), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background: This invesitgation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in Canada of softwood lumber. The investigation was self-initiated on October 31, 1991, by the U.S. Department of Commerce.

Participation in the investigation and Public service list: Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, not later than twenty-one (21) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list: Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this final investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report: The prehearing staff report in this investigation will be placed in the nonpublic record on May 11, 1992, and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rules.

Hearing: The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on May 28, 1992, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before May 15, 1992. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on May 20, 1992, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by §§ 201.6(b)(2), 201.13(f), and 207.23(b) of the Commission's rules.

Written submissions: Each party is encouraged to submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.22 of the Commission's rules; the deadline for filing is May 21, 1992. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.23(b) of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.24 of the Commission's rules. The deadline for filing posthearing briefs in June 5, 1992; witness testimony must be filed no later than three (3) days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before June 5, 1992. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules.

By order of the Commission.

Issued: March 20, 1992.

Stephen McLaughlin,

Acting Secretary.

[FR Doc. 92–6945 Filed 3–25–92; 8:45 am]

BILLING CODE 7020–02–M

[1] For purposes of this investigation, "softwood lumber" means coniferous wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness exceeding 6 mm, provided for in subheading 4407.10.00 of the HTS; and coniferous wood siding, flooring and other goods (except coniferous wood moldings and wood dowel rods; but including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rebated [rabbeted], chamfered, V-jointed, beaded, molded, rounded or the like) along any of its edges or faces, whether or not planed, sanded or finger-jointed, provided for in HTS subheadings 4409.10.10, 4409.10.20 and 4409.10.90.

[Investigation No. 332-317]

Economy-Wide Modeling of the Economic Implications of a FTA With Mexico and a NAFTA With Canada and Mexico; Hearing

AGENCY: United States International Trade Commission.

ACTION: Cancellation of hearing.

SUMMARY: On October 28, 1991, following receipt of a request from the U.S. Trade Representative (USTR), the Commission instituted Investigation No. 332–317, under section 332(g) of the Tariff Act of 1930. On February 4, 1992, the Commission scheduled a public hearing in connection therewith for March 26, 1992. On March 17, 1992, the Commission received notice of withdrawal from the only scheduled witness for the hearing scheduled for March 26, 1992. Therefore, the public hearing in connection with this investigation (scheduled to be held beginning at 9:30 a.m. on March 26, 1992, at the U.S. International Trade Commission Building, 500 E Street, SW., Washington DC), is cancelled.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Edward Carroll (202–205–1819), Office of Public Affairs, U.S. International Trade Commission. Hearing impaired persons can obtain information on this study by contacting the Commission's TDD terminal on (202–205–1810).

By order of the Commission.

Dated: March 24, 1992.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32016]

Sioux & Western Railroad Co.—Construction Exemption—Charles County, Mo; Notice

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Interstate Commerce Commission conditionally exempts from the prior approval requirements of 49 U.S.C. 10901 the construction by the Sioux & Western Railroad Company of approximately 2 miles of rail line between the Sioux Plant and a Union Pacific Railroad Company line in Charles County, MO.

DATES: The exemption will not become effective until the environmental process is completed. At that time, the Commission will issue a further decision addressing the environmental matters and establishing an effective date for the exemption, if appropriate. Petitions to reopen must be filed by April 15, 1992.

ADDRESSES: Send pleadings referring to Finance Docket No. 32016 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioner's representative: John R. Molm, Esquire, Troutman, Sanders, Lockerman and Ashmore, 1400 Candler Building, 127 Peachtree Street, NE., Atlanta, GA 30303.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660, (TDD for hearing impaired: (202) 927–5712.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 927–5721.)

Decided: March 11, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92–7017 Filed 3–25–92; 8:45 am]

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 86–22]

Marijuana Scheduling Petition; Denial of Petition; Remand

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final order.

SUMMARY: This is a final order of the Administrator of the Drug Enforcement Administration (DEA) concluding the plant material marijuana has no currently accepted medical use and denying the petition of the National Organization for Reform of Marijuana Laws (NORML) to reschedule marijuana from Schedule I to Schedule II of the Controlled Substances Act.

EFFECTIVE DATE: March 26, 1992.

FOR FURTHER INFORMATION CONTACT: Office of Congressional and Public Affairs, 202–307–7363.

SUPPLEMENTARY INFORMATION:

Background

On December 21, 1989, the former Administrator of DEA, following rulemaking on the record, which included a hearing before an administrative law judge, issued a final order concluding the plant material marijuana has no currently accepted medical use, and denying the petition of NORML to reschedule marijuana from Schedule I to Schedule II of the Controlled Substances Act. 54 FR 63767. On April 26, 1991, the United States Court of Appeals for the District of Columbia Circuit remanded the matter to the Administrator for clarification of DEA's interpretation of the term "currently accepted medical use in treatment in the United States." *Alliance for Cannabis Therapeutics* v. *DEA*, 930 F.2d 936.

Following a review of the entire record in this matter, and a comprehensive re-examination of the relevant statutory standard, I conclude that marijuana has no currently accepted medical use and must remain in Schedule I. Further hearings are unnecessary since the record is extraordinarily complete, all parties had ample opportunity and wide latitude to present evidence and to brief all relevant issues, and the narrow question on remand centers exclusively on this Agency's legal interpretation of a statutorily-created standard.

Summary of the Decision

Does the marijuana plant have any currently accepted medical use in treatment in the United States, within the meaning of the Federal Controlled Substances Act, 21 U.S.C. 801, *et seq.*? Put simply, is marijuana good medicine for illnesses we all fear, such as multiple sclerosis (MS), glaucoma and cancer?

The answer might seem obvious based simply on common sense. Smoking causes lung cancer and other deadly diseases. Americans take their medicines in pills, solutions, sprays, shots, drops, creams and sometimes in suppositories, but never by smoking. No medicine prescribed for us today is smoked.

With a little homework, one can learn that marijuana has been rejected as medicine by the American Medical Association, the National Multiple Sclerosis Society, the American Glaucoma Society, the American Academy of Ophthalmology the American Cancer Society. Not one American health association accepts marijuana as medicine.

For the last half century, drug evaluation experts at the United States Food and Drug Administration (FDA) have been responsible for protecting Americans from unsafe and ineffective new medicines. Relying on the same scientific standards used to judge all other drugs, FDA experts repeatedly have rejected marijuana for medical use.

Yet claims persist that marijuana has medical value. Are these claims true, What are the facts?

Between 1987 and 1988, DEA and NORML, under the guidance of an administrative law judge, collected all relevant information on this subject. Stacked together it stands nearly five feet high. Is there reliable scientific evidence that marijuana is medically

effective. If it has medical value, do its benefits outweight its risks? What do America's top medical and scientific experts say? Would they prescribe it for their patients, their families, their friends?

As the current Administrator of Drug Enforcement, and as a former United States District Judge, I have made a detailed review of the evidence in this record to find the anawers.

There are significant short-term side effects and long-term risks linked to smoking marijuana. Marijuana is likely to be more cancer-causing than tobacco; damages brain cells; causes lung problems, such as bronchitis and emphysema; may weaken the body's antibacterial defenses in the lungs; lowers overall blood pressure, which could adversely affect the supply of blood to the head; causes sudden drops in blood pressure (orthostatic hypotension), rapid heart beat (tachycardia), and heart palpitations; suppresses luteinizing hormone secretion in women, which affects the production of progesterone, an important female hormone; causes anxiety and panic in some users because of its mind-altering effects; produces dizziness, trouble with thinking, trougle with concentrating, fatigue, and sleepiness; and impairs motor skills.

As a plant, marijuana can contain bacteria capable of causing serious infections in humans, such as salmonella enteritidis, Klebsiella pneumoniae, group D Streptococcus and pathogenic aspergillus.

Several of these risk stand out. The immune systems of cancer patients are weakened by radiation and chemotherapy, leaving them susceptible to infection. If they experiment with marijuana to control nausea, they risk weakening their immune systems further and exposing themselves to the infection-causing bacteria in the plant. It is estimated, for example, that at Memorial Sloan-Kettering Cancer Center 60 patients die each year from pathogenic aspergillus infections.

Glaucoma patients face possible blindness caused by very high fluid pressures within their eyes. If they experiment with marijuana to lower their eye fluid pressure, it can cause dramatic drops in their blood pressure and reduce the blood supply to their heads. Glaucoma experts testified this reduced the blood supply to the optic nerves and could speed up, rather than slow down, their loss of eyesight.

MS, glaucoma and cancer patients who have undiagnosed heart problems risk heart palpitations, very rapid heart beats and sudden dramatic drops in blood pressure if they experiment with marijuana. For MS and glaucoma patients who must take medications for the rest of their lives, experimenting with marijuana poses the additional risks of lung cancer, emphysema, bladder cancer and leukemia.

Many risks remain unknown. Marijuana contains over 400 separately identified chemicals. No one knows all the effects of burning these chemicals together and inhaling the burnt mix. Are these risks outweighed by medical benefits?

There are scientific studies showing pure THC (Delta-9-Tetrahydrocannabinol), one of the many chemicals found in marijuana, has some effect in controlling nausea and vomiting. Pure THC is pharmaceutically made in a clean capsule form, called Marinol, and is available for use by the medical community. More information on Marinol can be found in the "Physicians' Desk Reference," available in most libraries.

Since marijuana contains THC, you might think marijuana also would be effective. However, the effect of taking a drug in combination with other chemicals is seldom the same as taking just the pure drug. As already noted, marijuana contains over 400 other chemicals, not just THC. There are no reliable scientific studies that show marijuana to be significantly effective in controlling nausea and vomiting. People refer to the Sallan study as proving marijuana's effectiveness. They are mistaken. The Sallan study involved pure THC, not marijuana. People refer to the Chang study to support marijuana's effectiveness. They also are mistaken. Doctor Chang tested the combination of pure THC and marijuana to treat nausea and vomiting. The preliminary results he got were probably due to the THC, not the marijuana. Because he tested the combination, we cannot tell just what effects can be attributed to marijuana alone. People cite a third study, done by Doctor Levitt, as proof marijuana is effective. They are mistaken. Doctor Levitt compared marijuana to THC in controlling nausea and vomiting, and he concluded that THC was the more effective drug.

A librarian can help locate copies of thes studies should you want to see them for yourself. Sallan, et al., "Antiemetic Effect of Delta-9-Tetrahydrocannibinol in Patients Receiving Cancer Chemotherapy," 293 New England Journal of Medicine 795–797 (1975); Chang, et al., "Delta-9-Tetrahydrocannabinol as an Antiemetic in Cancer Patients Receiving High-Dose Methotrexate," 91 Annals of Internal Medicine 819–824 (1979); Levitt, et al., "Randomized Double Blind Comparison of Delta-9-Tetrahydrocannabinol (THC) and Marijuana As Chemotherapy Antiemetics," (Meeting Abstract) 3 Proceedings of the Annual Meeting of the American Society of Clinical Oncology 91 (1984).

During the 1970's and 1980's, a number of states set up research programs to give marijuana to cancer and glaucoma patients, on the chance it might help. Some people point to these programs as proof of marijuana's usefulness. Unfortunately, all research is not necessarily good scientific research. These state programs failed to follow responsible scientific methods. Patients took marijuana together with their regular medicines, so it is impossible to say whether marijuana helped them. Observations or results were not scientifically measured. Procedures were so poor that much critical research data were lost or never recorded. Although these programs were well-intentioned, they are not scientific proof of anything.

Some people refer to a study by Doctor Thomas Ungerleider as proof marijuana reduced nausea in bone marrow transplant patients. Unfortunately, Doctor Ungerleider neglected to follow responsible scientific methods in his study. Like the state programs, it proves nothing. Doctor Ungerleider chose not to publish his study evidently because of its serious weaknesses. He admitted as much when questioned under oath.

Those who say there are reliable scientific studies showing marijuana is an effective drug for teating nausea and vomiting are wrong. No such studies exist.

Our nation's top cancer experts reject marijuana for medical use. Doctor David S. Ettinger, a professor of oncology at the Johns Hopkins University School of Medicine, an author of over 100 scholarly articles on cancer treatment, and a nationally respected cancer expert, testified:

> There is no indication that marijuana is effective in treating nausea and vomiting resulting from radiation treatment or other causes. No legitimate studies have been conducted which make such conclusions.

Doctor Richard J. Gralla, a professor of medicine at Cornell University Medical College, an associate attending physician at the Memorial Sloan-Kettering Cancer Center, and an expert in cancer research, testified:

> Most experts would say, and our studies support, that the cannabinoids in general are not very effective against the major causes of nausea and vomiting.

Doctor Gralla added:

> I have found that because of the negative side effects and problems associated with marijuana * * *, most medical oncologists and researchers have little interest in marijuana for the treatment of nausea and vomiting in their patients.

Doctor John Laszlo, Vice President of Research for the American Cancer Society, an expert who has spent 37 years researching cancer treatments, and who has written a leading textbook on the subject, "Antiemetics and Cancer Chemotherapy," testified there is not enough scientific evidence to justify using marijuana to treat nausea and vomiting. Not one nationally-recognized cancer expert could be found to testify on marijuana's behalf.

To be an effective treatment for glaucoma, a drug must: (i) Lower the pressure within the eye (intraocular pressure), (ii) for prolonged periods of time, and (iii) actually preserve sight (visual fields). Five scientific studies are cited as evidence marijuana is an effective glaucoma treatment. Those who cite these studies are mistaken. These studies tested pure THC, not marijuana. W.D. Purnell and J.M. Gregg, "Delta-9-Tetrahydorcannabinol, Euphoria and Intraocular Pressure in Man," 7 Annals of Ophthalmology 921–923 (1975); M. Perez-Reyes, D. Wagner, M.E. Wall, and K.H. Davis, "Intravenous Administration of Cannabinoids on Intraocular Pressure," The Pharmacology of Marijuana 829–832 (M.C. Braude and S. Szara eds. 1976); J.C. Merritt, S.M. McKinnon, J.R. Armstrong, G. Hatem, and L.A. Reid, "Oral Delta-9-Tetrahydrocannabinol in Hyperogeneous Glaucomas," 12 Annals of Ophthalmology 947 (1980); K. Green and M. Roth, "Ocular Effects of Topical Administration of Delta-9-Tetrahydrocannabinol in Man," 100 Archives of Ophthalmology 265–267 (1982); and W.M. Jay and K. Green, "Multiple-Drop Study of Topically Applied 1% Delta-9-Tetrahydrocannabinol in Human Eyes," 101 Archives of Ophthalmology 591–593 (1983).

Threee studies show very heavy doses of marijuana, taken for short periods of time, can reduce eye pressure. R.S. Hepler, I.M. Frank, and T.J. Ungerleider, "Pupillary Constriction After Marijuana Smoking," 74 American Journal of Ophthalmology 1185–1190 (1972); R.S. Hepler, I.M. Frank, and R. Petrus, "Ocular Effects of Marijuana Smoking," The Pharmacology of Marijuana 815–824 (1976); and J.C. Merritt, W.J. Crawford, P.C. Alexander, A.L. Anduze and S.S. Gelbart, "Effect of Marijuana on Intraocular and Blood Pressure in Glaucoma," 87 Ophthalmology 222–228 (1980)

Unusally large doses or marijuana were needed in these three studies to achieve the desired effect. Heavy marijuana use produces dizziness, trouble with thinking, impaired motor skills, fatigue and sleepiness. The 1976 study by Doctors Hepler, Frank and Petrus emphasized "Our subjects were sometimes too sleepy to permit measurement of intraocular pressures * * * 3 hours after intoxication." If a glaucoma patient were to smoke marijuana 8 to 10 times every day for the rest of his life, would he be alert and energetic enough to live a relatively normal life? Would he develop other diseases? No scientific studies exist to answer these questions. Robert Randall claims to have saved his sight by smoking 8 to 10 marijuana cigarettes every day. Under oath he admits he stays at home most days, follows no daily schedule or routine, and has not held a regular job in over 15 years. He also has avoided having a comprehensive medical examination since 1975.

No scientific studies have shown marijuana can reduce eye pressure over long periods of time.

No scientific studies have shown marijuana can save eyesight.

America's top glaucoma experts reject marijuana as medicine. Doctor Keith Green is a professor of Ophthalmology who serves, or has served, on the editorial boards of eight prestigious eye journals (Ophthalmic Research, Oftalmo Abstracto, Current Eye Research, Experimental Eye Research, Investigative Opthalmology, American Journal of Ophthalmology, Archives of Ophthalmology, and Survey of Ophthalmology). Doctor Green has conducted extensive basic and clinical research using marijuana and THC to treat glaucoma patients. He has authored over 200 books or research articles in ophthalmology and is a highly respected expert on this subject. Doctor Green testified:

> There is no scientific evidence * * * that indicates that marijuana is effective in regulating the progression of symptoms associated with glaucoma. * * * It is clear that there is no evidence that marijuana use prevents the progression of visual loss in glaucoma. * * * The quantities of the drug required to reduce intraocular pressure in glaucoma sufferers are large, and would require the inhalation of at least six marijuana cigarettes each day. * * * Smoking is not a desirable form of treatment for many reasons * * * [M]arijuana . . . has little potential future as a glaucoma medication.

Doctor George Spaeth is the Director of the Glaucoma Service at Wills Eye Hospital in Philadelphia, the largest service in the United States devoted to researching and treating glaucoma and to teaching other doctors about this disease. Doctor Spaeth is President of the American Glaucoma Society. He is a professor of ophthalmology, the editor of a scholarly eye journal (Ophthalmic Surgery), and the author of over 200 research articles on glaucoma. He testified:

> I have not found any documentary evidence which indicates that a single patient has had his or her natural history of the disease altered by smoking marijuana.

Amputees and victims of MS can suffer from extreme muscle spasms. It is claimed marijuana is useful in treating spasticity. Three unusually small, inconclusive studies have tried using pure THC, not marijuana, to treat spasticity. D.J. Petro and C. Ellenberger, "Treatment of Human Spasticity with Delta-9-Tetrahydro-cannabinol," 21 Journal of Clinical Pharmacology 413S–416S (1981) (included only nine patients). Two of the studies are mere abstracts, or short digests, without much detail. Hanigan, Destee & Troung Abstr. B45, Clin. Pharmacol. Ther. 198 (1986) (included only five patients), and Sandyk, Cannoe, Stern and Snider Abstr. PP 331, 36 Neurology 342 (1986) (included only three patients).

No scientific studies exist which test marijuana to relieve spasticity.

National experts on MS reject marijuana as medicine. Doctor Kenneth P. Johnson is Chariman of the Department of Neurology at the University of Maryland School of Medicine. He manages that Maryland Center for MS, one of the most active MS research and treatment centers in the United States. He sits on the editorial boards of noted medical journals related to MS (Neurology and Journal of Neuroimmunology). He is the author of over 100 scientific and medical articles on MS. Doctor Johnson has spent most of his long career researching MS and has diagnosed and treated more than 6,000 patients with MS. Doctor Johnson testified:

> At this time, I am not aware of * * * any legitimate medical research in which marijuana was used to treat the symptoms of multiple sclerosis. * * * To conclude that marijuana is therapeutically effective without conducting rigorous testing would be professionally irresponsible.

Doctor Stephen Reingold is Assistant Vice President of Research for the National Multiple Sclerosis Society, which spends over $7 million each year

on MS research. Only the Federal Government spends more. Doctor Reingold testified:

> I could find no actual published research which has used marijuana * * * In the existing research using THC, the results were inconclusive * * * In the absence of any well-designed, well-controlled research * * *, the National Multiple Sclerosis Society * * * does not endorse or advocate its use * * *.

Doctor Donald H. Silberberg is Chairman of the Department of Neurology at the University of Pennsylvania School of Medicine and Chief of the Neurology Service at the Hospital of Pennsylvania. Doctor Silberberg is on the editorial board of Annals of Neurology and is President of the National Medical Advisory Board for the National Multiple Sclerosis Society. He has been actively researching and treating MS for most of his career, has written over 130 medical articles on MS and is Co-Director of a large MS research center at the University of Pennsylvania. Doctor Silberberg testified:

> I have not found any legitimate medical or scientific works which show that marijuana * * * is medically effective in treating multiple sclerosis or spasticity. * * * The long-term treatment of the symptoms of multiple sclerosis through the use of marijuana could be devastating. * * * [T]he use of (marijuana), especially for long-term treatment * * * would be worse than the original disease itself.

The only favorable evidence that could be found by NORML and DEA consists of stories by marijuana users who claim to have been helped by the drug. Scientists call these stories anecdotes. They do not accept them as reliable proofs. The FDA's regulations, for example, provide that in deciding whether a new drug is a safe and effective medicine, "isolated case reports * * * will not be considered." 21 CFR 314.126(e). Why do scientists consider stories from patients and their doctors to be unreliable?

First, sick people are not objective scientific observers, especially when it comes to their own health. We all have heard of the placebo effect. Patients have a tendency to respond to drugs as they believe is expected of them. Imagine how magnified this placebo effect can be when a suffering person experiments on himself, praying for some relief. Many stories no doubt are due to the placebo effect, not to any real medical effects of marijuana.

Second, most of the stories come from people who took marijuana at the same time they took prescription drugs for their symptoms. For example, Robert Randall claims marijuana has saved his sight, yet he has taken standard glaucoma drugs continuously since 1972. There is no objective way to tell from these stories whether it is marijuana that is helpful, or the proven, traditional medicines. Even these users can never know for sure.

Third, any mind-altering drug that produces euphoria can make a sick person think he feels better. Stories from patients who claim marijuana helps them may be the result of the mind-altering effects of the drug, not the results of improvements in their conditions.

Fourth, long-time abusers of marijuana are not immune to illness. Many eventually get cancer, glaucoma, MS and other diseases. People who become dependent on mind-altering drugs tend to rationalize their behavior. They invent excuses, which they can come to believe, to justify their drug dependence. Stories of marijuana's benefits from sick people with a prior history of marijuana abuse may be based on rationalizations caused by drug dependence, not on any medical benefits caused by the drug. Robert Randall, for example, admits under oath to becoming a regular user in 1966, four years before he showed the first signs of, and was diagnosed as having, glaucoma. Since then he has smoked marijuana 8 to 10 times every day.

A century ago many Americans relied on stories to pick their medicines, especially from snake oil salesmen. Thanks to scientific advances and to the passage of the Federal Food, Drug and Cosmetic Act (FDCA) in 1906, 21 U.S.C. 301 *et seq.*, we now rely on rigorous scientific proof to assure the safety and effectiveness of new drugs. Mere stories are not considered an acceptable way to judge whether dangerous drugs should be used as medicines.

There are doctors willing to testify that marijuana has medical uses. NORML found over a dozen to testify in this case. We have a natural tendency to believe doctors. We assume their opinions are entitled to respect. But what if a doctor is giving an opinion beyond his professional competence? Evaluating the safety and effectiveness of drugs is a specialized area. Does the doctor have this specialized expertise? Is he familiar with all the published scientific studies? Or is he improperly basing his opinion on mere stories or anecdotal evidence? Does he really know what he is talking about? Does he have a personal motive to exaggerate or lie? Questions like these led the United States Supreme Court, in 1973, to warn about the opinions of doctors concerning the value of drugs as medicine, when not supported by rigorous scientific testing, *Weinberger* v. *Hynson, Etc.*, 412 U.S. 609, 639:

> [I]mpressions or beliefs of physicians, no matter how fervently held, are treacherous.

Nearly half the doctors who testified for NORML are psychiatrists. They do not specialize in treating or researching cancer, glaucoma or MS. One is a general practitioner who works as a wellness counselor at a health spa. Under oath he admits to using every illegal, mind-altering drug he has ever studied, and he prides himself on recommending drugs that would never be recommended by medical schools or reputable physicians. Another is a general practitioner who quit practicing in 1974. He admits he has not kept up on new medical and scientific information about marijuana for 18 years.

Only one of the doctors called by NORML is a nationally-recognized expert. Doctor John C. Merritt is a board-certified ophthalmologist and researcher who has authored articles on the use of marijuana and cannabinoids to reduce eye pressure. He is in private practice and sees mostly children who suffer from glaucoma. Doctor Merritt testified, "[M]arijuana is a highly effective IOP-lowering drug which may be of critical value to some glaucoma patients who, without marijuana, would progressively go blind." The last scientific study using marijuana in glaucoma patients, published by Doctor Merritt in 1979, concluded:

> It is because of the frequency and severity with which the untoward events occurred that marijuana inhalation is not an ideal therapeutic modality for glaucoma patients.

One year later, in 1980, Doctor Merritt gave the following testimony, under oath, before the United States Congress, House Select Committee on Narcotics Abuse and Control:

> For me to sit here and say that the lowering pressure effects occurred repeatedly, day in, and day out, I have no data, and neither does anyone else, and that is the real crux of the matter. When we are talking about treating a disease like glaucoma, which is a chronic disease, the real issue is, does the marijuana repeatedly lower the intraocular pressure? I have shown you no * * * studies, and to my knowledge there is no data to that effect.

Doctor Merritt was unable to explain, under oath, the contradictory positions he has taken on this subject.

Each of NORML's doctors testified his opinion is based on the published scientific studies. With one exception, none of them could identify under oath the scientific studies they swore they relied on. Only one had enough knowledge to discuss the scientific technicalities involved. Eventually, each one admitted he was basing his opinion on anecdotal evidence, on stories he heard from patients, and on his impressions about the drug.

Sadly, Doctor Ivan Silverberg, an oncologist from San Francisco, exaggerated while on the witness stand. At first he swore "there is voluminous medical research which shows marijuana is effective in easing nausea and vomiting." Pushed on cross-examination to identify this voluminous research, Doctor Silverberg replied, "Well * * *, I'm going to have to back off a little bit from that." How far would Doctor Silverberg back off? Was he aware, at least, of the approximate number of scientific studies that have been done using marijuana to treat nausea? Under oath, he replied, "I would doubt very few. But, no, I'm not."

Beyond doubt, the claims that marijuana is medicine are false, dangerous and cruel.

Sick men, women and children can be fooled by these claims and experiment with the drug. Instead of being helped, they risk serious side effects. If they neglect their regular medicines while trying marijuana, the damage could be irreversible. It is a cruel hoax to offer false hope to desperately ill people.

Those who insist marijuana has medical uses would serve society better by promoting or sponsoring more legitimate scientific research, rather than throwing their time, money and rhetoric into lobbying, public relations campaigns and perennial litigation.

Clarification of Currently Accepted Medical Use

The Controlled Substances Act of 1970 divides the universe of all durgs of abuse into five sets or schedules. Drugs in Schedule I are subject to the most severe controls, because they have a high potential for abuse and no currently accepted medical use in treatment in the United States. 21 U.S.C. 812 (b)(1). Drugs of abuse which have currently accepted medical use in treatment in the United States are placed in Schedules II, III, IV and V. Regrettably, the Controlled Substances Act does not speak directly to what is meant by "currently accepted medical use."

A century before the Controlled Substances Act was enacted, the determination of what drugs to accept as medicine was totally democratic and totally standardless. Each patient and each physician was free to decide for himself, often based on no more than anecdotal evidence. This state of affairs became unsatisfactory to a majority of the American people. In 1906, Congress intervened with the passage of the Food, Drug and Cosmetic Act (FDCA). A shift began away from anecdotal evidence to objectively conducted scientific research, away from uninformed opinions of lay persons and local doctors to expert opinions of specialists trained to evaluate the safety and effectiveness of drugs, and away from totally democratic decision-making to oversight by the Federal Government.

By 1969, Congress had developed detailed Federal statutory criteria under the FDCA to determine whether drugs are acceptable for medical use. Those deemed acceptable can be marketed nationally. Those deemed unacceptable are subject to Federal seizure if marketed interstate. The FDCA is a very complex regulatory scheme not easily summarized. However, it is fair to say that drugs falling into one of four FDCA categories were accepted by Congress for medical use.

First, Congress accepted new drugs which have been approved by FDA's experts as safe and effective for use in treatment, based on substantial scientific evidence. 21 U.S.C. 321(p) and 355 (so-called "NDA-approved drugs").

Second, Congress accepted those drugs "generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective," based on substantial scientific evidence. 21 U.S.C. 321(p) and 355; *Weinberger* v. *Bentex Pharmaceuticals, Inc.*, 412 U.S. 645 (1973). An acronym for this category is "human GRASE drugs" (Generally Recognized As Safe and Effective). These drugs achieve acceptance through rigorous scientific proof, through a past history of widespread use in treatment in the United States, and through recognition by a consensus of drug experts outside the FDA.

Third, Congress accepted for use in veterinary medicine those drugs "generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of animal drugs, as safe and effective," based on substantial scientific evidence. 21 U.S.C. 321(w) and 355. An acronym for these is "animal GRASE drugs." They achieve acceptance through rigorous scientific evidence and through recognition by a consensus of drug experts outside the FDA. Unlike human GRASE drugs, animal GRASE drugs need not have a past history of widespread use.

Finally, Congress accepted those drugs marketed prior to 1938 which had been subject to the 1906 provisions of the FDCA, provided these very old drugs retain their exact formulations and are never promoted for new uses. 21 U.S.C. 321(p) and (w). These are politically "grandfathered" drugs. They need not meet modern standards for safety and effectiveness.

A fifth group of drugs was accepted for research use only, not for use in treatment of patients. 21 U.S.C. 355(i) (so-called "IND or approved investigational new drugs").

Drugs intended for medical use and shipped interstate are subject to Federal seizure under the FDCA if they do not fit within one of the above accepted sets or groupings. It seems fair to say that seizable drugs were rejected by Congress for medical uses.

In enacting the Controlled Substances Act in 1970, could Congress have intended to create a totally new Federal standard for determining whether drugs have accepted medical uses? Or did Congress intend to rely on standards it had developed over the prior 64 years under the FDCA? There is nothing in the Controlled Substances Act, its legislative history, or its purposes that would indicate Congress intended to depart radically from existing Federal law.

Indeed, it seems likely that the core standards developed under the FDCA represent a long-term consensus of expert medical and scientific opinion concerning when a drug should be accepted by anyone as safe and effective for medical use.

Fortunately, there is a way to corroborate what Congress intended. Congress did more than just announce criteria for scheduling drugs of abuse under the Controlled Substances Act; Congress applied those criteria to an initial listing of drugs that it placed into the original five schedules of the Act.

NDA-approved drugs were placed by Congress into Schedules II, III, IV and V of the Act. For example, pethidine (also known as meperidine) received New Drug Application (NDA) approval in 1942. Congress put it into Schedule II(b)(14). Methamphetamine had an approved NDA. Congress put it into Schedule III(a)(3). I am not aware of any drug with an approved NDA that Congress originally put into Schedule I.

Drugs with medical uses, but without approved NDA's also were placed by Congress into Schedules II, III, IV and V. For example, cocaine was put into Schedule II(a)(4). Codeine combinations were put into Schedules III(d)(1) and V. Morphine combinations were put into Schedule III(d)(8). Phenobarbital was put into Schedule IV(11). Barbiturates were put into Schedule III(b)(1). Amphetamines were put into Schedule III(a)(1).

The Court of Appeals for the First Circuit was correct when it decided in

Grinspoon v. *DEA*, 828 F.2d 881 (1987) that NDA approval is not the only method by which drugs can achieve Federal recognition as having medical uses. Congress put both GRASE drugs and pre-1938-grandfathered drugs into Schedules II, III, IV and V of the CSA.

Drugs recognized under the FDCA for research use only, not for use in treatment, such as alphacetylmethadol and marijuana, were placed by Congress into Schedule I.

Unfortunately, Federal records are not complete enough to do a comprehensive mathematical mapping, tracing every drug in the initial Controlled Substances Act schedules back to its legal status under the FDCA. Nevertheless, determining legislative intent does not require mathematical certainty. Probability based on circumstantial evidence, on samplings, and on inductive reasoning can suffice, especially when there is nowhere else to turn.

The pattern of initial scheduling of drugs in the Controlled Substance Act, viewed in light of the prior legal status of these drugs under the FDCA, convinces me that Congress equated the term "currently accepted medical use in treatment in the United States" as used in the Controlled Substances Act with the core FDCA standards for acceptance of drugs for medical use.

This is not to say that every FDCA requirement for GRASE status, or for NDA approval, is pertinent to scheduling determinations under the Controlled Substances Act. There are differences. But the core FDCA criteria appear to have guided the Congress in the decisions it made concerning the initial scheduling of drugs in the Act.

These same core FDCA criteria served as the basis for an eight-point test used by my predecessor as Administrator to describe drugs with currently accepted medical uses. 54 FR 53783 (December 29, 1989):

1. Scientifically determined and accepted knowledge of its chemistry;
2. The toxicology and pharmacology of the substance in animals;
3. Establishment of its effectiveness in humans through scientifically designed clinical trials;
4. General availability of the substance and information regarding the substance and its use;
5. Recognition of its clinical use in generally accepted pharmacopeia, medical references, jounals or textbooks;
6. Specific indications for the treatment of recognized disorders;
7. Recognition of the use of the substance by organizations or associations of physicians; and
8. Recognition and use of the substance by a substantial segment of the medical practitioners in the United States.

Some uncertainty remains over the precise meaning and application of parts of this test. Therefore, the Court of Appeals for the District of Columbia Circuit remanded these proceedings for a further explanation. In addition to addressing those parts of the test that concerned the Court of Appeals, it would be useful to clarify the entire test, pinpoint its origins, and identify which elements are both necessary and sufficient to establish a prima facie case of currently accepted medical use. This is not an effort to change the substantive law. The statutory meaning of currently accepted medical use remains the same as enacted by Congress in 1970. My purpose simply is to clarify this Agency's understanding of the law.

A. The Drug's Chemistry Must Be Known and Reproducible

The ability to recreate a drug in standardized dosages is fundamental to testing that drug and to using it as a medicine. Knowing the composition, properties, methods of production, and methods of analysis of a drug is essential to reproducing it in standardized dosages. To be GRASE or to receive NDA approval, a drug's chemistry must be known and reproducible. See *e.g.*, 21 CFR 314.50(d)(1) and 314.126(b)(7)(d); *Dorovic* v. *Richardson*, 749 F.2d 242, 251 (7th Cir. 1973). The listing of a drug in a current edition of one of the official compendia normally satisfies this requirement. 21 U.S.C. 321(j); 21 CFR 314.50(d)(1).

The first element of our eight-point test, namely, "scientifically determined and acccepted knowledge of its chemistry," should be clarified to read:

The substance's chemistry must be scientifically established to permit it to be reproduced into dosages which can be standardized. The listing of the substance in a current edition of one of the official compendia, as defined by section 201(j) of the Food, Drug and Cosmetic Act, 21 U.S.C. 321(j), is sufficient generally to meet this requirement.

Acceptance of this knowledge will be discussed elsewhere.

B. There Must Be Adequate Safety Studies

No drug can be considered safe in the abstract. Safety has meaning only when judged against the intended use of the drug, its known effectiveness, its known and potential risks, the severity of the illness to be treated, and the availability of alternative therapies. *Hess & Clark Division of Rhodia, Inc.* v. *FDA*, 495 F.2d 975, 993 (D.C. Cir. 1974). To know the risks, there must be adequate studies, by all methods reasonably applicable, to show the pharmacological and toxicological effects of the drug. 21 CFR 314.125(b)(2). This includes animal studies and clinical trials in large numbers of humans. 21 CFR 312.21. The studies need not be well-controlled, but they must be adequate. *Edison Pharmaceuticals Co.* v. *FDA*, 600 F.2d 831 (D.C. Cir. 1979). Short term (acute) studies of a drug intended to treat long-term (chronic) illnesses, such as glaucoma or MS, are clearly inadequate. *United States* v. Naremco, Inc., 553 F.2d 1138, 1143 (8th Cir. 1977). The second element of our eight-point test, namely, "the toxicology and pharmacology of the substance in animals," should be clarified as follows:

There must be adequate pharmacological and toxicological studies, done by all methods reasonably applicable, on the basis of which it could fairly and responsibly be concluded, by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, that the substance is safe for treating a specific, recognized disorder.

It must be emphasized that while the existence of adequate safety tests is a separate analytical question, the ultimate determination of whether a drug is safe for a specific use is not a distinct issue. Safety and effectiveness are inextricably linked in a risks-benefits calculation. A determination that a drug is ineffective is tantamount to a determination that it is unsafe. *United States* v. *Rutherford*, 442 U.S. 544 (1970).

The scheduling criteria of the Controlled Substances Act appear to treat the lack of medical use and lack of safety as separate considerations. Prior rulings of this Agency purported to treat safety as a distinct factor. 53 FR 5156 (February 22, 1988). In retrospect, this is inconsistent with scientific reality. Safety cannot be treated as a separate analytical question.

C. There Must Be Adequate and Well-Controlled Studies Proving Efficacy

Since 1962, Congress has prohibited the FDA to approve an NDA unless the applicant submits adequate, well-contolled, well-designed, well-conducted, and well-documented studies, performed by qualified investigators, which prove the efficacy of a drug for its intended use. 21 U.S.C. 355(d); 21 CFR 314.126. Similarly, a drug cannot be considered GRASE unless it is supported by this same quantity and quality of scienfitic proof. 21 CFR 314.200(e)(i); *Weinberger* v. *Hynson, Etc.*, 412 U.S. 609, 629 (1973).

Studies involving related, but not identical, drugs are irrelevant. *United States* v. *Articles of Food & Drug*, 518 F.2d 743, 747 (5th Cir. 1975). Studies involving the same drug combined with other drugs are irrelevant. *United States* v. *Articles of Drug * * * Promise Toothpaste, 828 F.2d 584, 570 (7th Cir. 1987). Incomplete studies are insufficient. United States* v. *Articles of Food & Drug, supra.* Uncontrolled studies are insufficient. 21 U.S.C. 355(d); *Cooper Labs* v. *FDA*, 501 F.2d 772, 778 (D.C. Cir. 1974). Statistically insignificant studies are insufficient. 21 CFR 312.21, 314.50(d)(6) and 314.126(b)(7). Poorly designed studies are insufficient. 21 CFR 314.126(b)(2). Poorly conducted studies are insufficient. 21 CFR part 58—Good Laboratory Practices. Poorly documented studies are insufficient. 21 CFR 312.58 and 314.200(e)(4). Studies by investigators who are not qualified, both to conduct and to evaluate them are insufficient. 21 U.S.C. 355(d). Moreover, since scientific reliability requires a double examination with similar results, one valid study is insufficient. There must be two or more valid studies which corroborate each other. See 1 J. O'Reilley "Food and Drug Administration" 13–55 n.12 (1985).

Lay testimonials, impressions of physicians, isolated case studies, random clinical experience, reports so lacking in details they cannot be scientifically evaluated, and all other forms of anecdotal proof are entirely irrelevant. 21 CFR 314.126(e); *Weingerger* v. *Hynson, Etc.*, 412 U.S. 609, 630 (1973).

Element three of our eight-point test, namely, "establishment of its effectiveness in humans through scientifically designed clinical trials," should be restated as:

There must be adequate, well-controlled, well-designed, well-conducted and well-documented studies, including clinical investigations, by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, on the basis of which it could fairly and responsibly be concluded by such experts that the substance will have the intended effect in treating a specific, recognized disorder.

D. Acceptance by Qualified Experts Is Required

The opinions of lay persons are totally irrelevant to whether a drug is GRASE or meets NDA requirements. The observations and opinions of medical practioners who are not experts in evaluating drugs also are irrelevant to whether a drug is GRASE or meets NDA requirements. *Weinberger* v. *Hynson, Etc.*, 412 U.S. 609, 619 (1973). By explicit requirements in the FDCA since 1938, the only body of opinion that counts is that of experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs. 21 U.S.C. 321 (p) and (w).

From this, one would conclude that expert acceptance of a drug as safe and effective for its intended use is essential to a drug having a currently accepted medical use under the CSA. How widespread must this expert acceptance be?

To be GRASE, a drug must be "generally recognized" among experts as safe and effective for its intended use. The drug must be known or familiar to the national community of relevant experts. *United States* v. *Articles of Drug* * * *Furestrol Vaginal Suppositories*, 294 F. Supp. 1307, 1309 (N.D. Ga. 1968) *aff'd*, 415 F.2d 390 (5th Cir. 1969). To determine if a drug is known to the community of experts, courts have looked to whether there is widely available scientific literature about the drug, *Premo Pharmaceutical Laboratories, Inc.* v. *United States*, 629 F.2d 795, 803 (2d Cir. 1980), whether it is widely taught in medical schools, *Lemmon Pharmaceuticals Co.* v. *Richardson*, 319 F. Sup. 375, 378 (E.D. Pa. 1970), and whether it is widely discussed by experts. *United States* v. *Bentex Ulcerine*, 469 F. 2d 875, 880 (5th Cir. 1972).

The recognition of a drug as GRASE need not be universal. General recognition is sufficient. *United States* v. *41 Cartons* * * *Ferro-Lac*, 420 F.2d 1126, 1132 (5th Cir. 1970). The Supreme Court has interpreted this to mean a consensus of experts is familiar with and accepts a drug as safe and effective. *Weinberger* v. *Hynson, Etc.*, 412 U.S. 609, 629 (1973). However, if there is a serious dispute among the experts, a drug cannot be considered GRASE. *United States* v. *An Article of Food* * * *Coco Rico*, 752 F.2d 11, 15 (1st Cir. 1985); *Merrit Corp.* v. *Folsom*, 165 F. Supp. 418, 421 (D.D.C. 1958).

During the NDA process, the FDA may reach out to the expert community for its views. 21 CFR 314.103(c)(3). The FDA need not determine that a drug is generally known and accepted by the expert community. Nor must the FDA develop a consensus of opinion among outside experts. The FDA has both the experts and the statutory mandate to resolve conflicts over the safety and efficacy of new drugs. *Weinberger* v. *Bentex Pharmaceuticals, Inc.*, 412 U.S.C 638, 653 (1973).

In drafting the Controlled Substances Act, Congress appears to have accommodated, rather than chosen from these different FDCA standards. Clearly, the Controlled Substances Act does not authorize the Attorney General, nor by delegation the DEA Administrator, to make the ultimate medical and policy decision as to whether a drug should be used as medicine. Instead, he is limited to determing whether others accept a drug for medical use. Any other construction would have the efect of reading the word "accepted" out of the statutory standard. Since Congress recognized NDA-approved drugs as having currently accepted medical uses, without any need for a national consensus of experts, FDA acceptance of a drug through the NDA process would seem to satisfy the Controlled Substances Act. And, since Congress recognized GRASE drugs as having currently accepted medical uses, without the need for NDA approval, acceptance of a drug by a national consensus of experts also would seem to satisfy the Act.

When a drug lacks NDA approval and is not accepted by a consensus of experts outside FDA, it cannot be found by the Attorney General or his delegate to have a currently accepted medical use. To do so would require the Attorney Genral to resolve complex scientific and medical disputes among experts, to decide the ultimate medical policy question, rather than merely determine whether the drug is accepted by others.

Because the recognition of a drug by non-experts is irrelevant to GRASE status, to NDA approval, and to currently accepted medical use under the Controlled Substances Act, points seven and eight of our eight-point test should be combined and restated as follows:

The drug has a New Drug Application (NDA) approved by the Food and Drug Administration pursuant to the Food, Drug and Cosmetic Act, 21 U.S.C. 355. Or, a consensus of the national community of experts, qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, accepts the safety and effectiveness of the substance for use in treating a specific, recognized disorder. A material conflict of opinion among experts precludes a finding of consensus.

This restatement also incorporates the component of part one of our eight-point test concerning "accepted knowledge of its chemistry."

E. The Scientific Evidence Must Be Widely Available

Nothing in the FDCA, nor in FDA's regulations, requires that scientific evidence supporting an NDA be published. This stems from the fact that a consensus of experts outside FDA is

not required for NDA approval. In contrast, most courts have held that a drug cannot be considered GRASE unless the supporting scientific evidence appears in the published scientific and medical literature. Without published studies, it would be difficult for the community of experts outside FDA to develop an informed acceptance of a drug for medical use. *Cooper Labs Inc. v. FDA*, 501 F.2d 772, 786 (D.C. Cir. 1974).

Point four of the eight-point test focuses, in part, on the "general availability of information regarding the substance and its use." This should be clarified to read:

> In the absence of NDA approval, information concerning the chemistry, pharmacology, toxicology and effectiveness of the substance must be reported, published, or otherwise widely available, in sufficient detail to permit experts, qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, to fairly and responsibly conclude the substance is safe and effective for use in treating a specific, recognized disorder.

F. General Availability of a Drug Is Irrelevant

The second component of point four of the eight--point test involves the "general availability of the substance" for use in treatment. The second component of point eight focuses on "use of the substance by a substantial segment of the medical practitioners in the United States." These elements justifiably concerned the Court of Appeals, leading to the remand in this case.

Under the FDCA, a human GRASE drug must have a material history of past use in treatment in the United States. 21 U.S.C. 321(p)(2) (which has * * *, otherwise than in such investigations, been used to a material extent or a material time); *Weinberger v. Hynson, Etc.*, 412 U.S. 609, 631 (1973). Rigorous scientific proofs and current unanimous acceptance by the medical and scientific community are not enough for a human drug to be GRASE. *Tri-Bio Labs, Inc. v. United States*, 836 F.2d 135, 142 n.8 (3d Cir. 1987). The general availability of a drug for use in treatment is a factor courts have considered to determine if a human drug is GRASE.

In contrast, a drug can achieve current acceptance for human medical use through the NDA process without a past history of use in treatment. Also, animal drugs can become accepted as GRASE without any past history of medical use. Given this conflict in FDCA standards, which did Congress choose when drafting the CSA?

As the Court of Appeals points out, requiring a material history of past use in treatment before recognizing a drug as having a currently accepted medical use, would permanently freeze all Schedule I drugs into Schedule I. 930 F.2d at 940. Clearly, Congress did not intend this result. Moreover, the use of the word "currently" before the term "accepted medical use" would indicate Congress rejected the human GRASE requirement of past material use in treatment. I conclude that the general availability of a drug is irrelevant to whether it has a currently accepted medical use in treatment within the meaning of the Controlled Substances Act.

G. Recognition in Generally Accepted Texts Is Irrelevant

Point five of the eight-point test deals with "recognition of its clinical use in generally accepted pharmacopeia, medical references, journals or textbooks." The listing of a drug in an official compendium is sufficient to show its chemistry is scientifically established. This appears in my clarification to point one. The requirement that information concerning the chemistry, pharmacology, toxicology and effectiveness of the substance be reported, published or otherwise widely available, is explained adequately in revised point four. To the extent the scheduling of a drug directly influences its recognition in publications, this element is subject to the same criticism identified by the Court of Appeals concerning point four. Therefore, this should not be treated as a distinct requirement.

H. Specific, Recognized Disorders Are the Referent

It is impossible to judge the safety and effectiveness of a drug except in relation to a specific intended use. A drug cannot obtain NDA approval or GRASE status except in relation to the treatment of a specific, recognized disorder. This is an essential aspect of whether a drug has currently accepted medical use. Rather than standing alone, this requirement will be more clearly understood by incorporating it into the other critical elements.

To summarize, the five necessary elements of a drug with currently accepted medical use in treatment in the United States are:

(i) The Drug's Chemistry Must Be Known and Reproducible

The substance's chemistry must be scientifically established to permit it to be reproduced into dosages which can be standardized. The listing of the substance in a current edition of one of the official compendia, as defined by section 201(j) of the Food, Drug and Cosmetic Act, 21 U.S.C. 321(j), is sufficient generally to meet this requirement.

(ii) There Must Be Adequate Safety Studies

There must be adequate pharmacological and toxicological studies done by all methods reasonably applicable on the basis of which it could fairly and responsibly be concluded, by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, that the substance is safe for treating a specific, recognized disorder.

(iii) There Must Be Adequate and Well-Controlled Studies Proving Efficacy

There must be adequate, well-controlled, well-designed, well-conducted and well-documented studies, including clinical investigations, by experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs on the basis of which it could fairly and responsibly be concluded by such experts, that the substance will have its intended effect in treating a specific, recognized disorder.

(iv) The Drug Must Be Accepted by Qualified Experts

The drug must have a New Drug Application (NDA) approved by the Food and Drug Administration, pursuant to the Food, Drug and Cosmetic Act, 21 U.S.C. 355. Or, a consensus of the national community of experts, qualified by scientific training and experience to evaluate the safety and effectivenss of drugs, must accept the safety and effectiveness of the substance of use in treating a specific, recognized disorder. A material conflict of opinion among experts precludes a finding of consensus.

(v) The Scientific Evidence Must Be Widely Available

In the absence of NDA approval, information concerning the chemistry, pharmacology, toxicology and effectiveness of the substance must be reported, published, or otherwise widely available in sufficient detail to permit experts, qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, to fairly and responsibly conclude the substance is safe and effective for use in treating a specific, recognized disorder.

Together these five elements constitute prima facie evidence that a drug has currently accepted medical use in treatment in the United States. In the interest of total clarity, let me emphasize those proofs that are irrelevant to the determination of currently accepted medical use, and that will not be considered by the Administrator:

(i) Isolated case reports;
(ii) Clinical impressions of practitioners;
(iii) Opinions of persons not qualified by scientific training and experience to evaluate the safety and effectiveness of the substance at issue;
(iv) Studies or reports so lacking in detail as to preclude responsible scientific evaluation;
(v) Studies or reports involving drug substances other than the precise substance at issue;
(vi) Studies or reports involving the substance at issue combined with other drug substances;
(vii) Studies conducted by persons not qualified by scientific training and experience to evaluate the safety and effectivness of the substance at issue;
(viii) Opinions of experts based entirely on unrevealed or unspecified information;
(ix) Opinions of experts based entirely on theoretical evaluations of safety or effectiveness.

Bad Medicine By Any Standard

My predecessor as DEA Adminstrator developed and relied upon an eight-point test to determine whether marijuana has accepted medical uses. 54 FR 53783 (December 29, 1989):

1. Scientifically determined and accepted knowledge of its chemistry;
2. the toxicology and pharmacology of the substance in animals;
3. Establishment of its effectiveness in humans through scientifically designed clinical trials;
4. General availability of the substance and information regarding the substance and its use;
5. Recognition of its clincial use in generally accepted pharmacopeia, medical references, journals or textbooks;
6. Specific indications for the treatment of recognized disorders;
7. Recognition of the use of the substance by organizations or associations of physicians; and
8. Recognition and use of the substance by a substantial segment of the medical practitioners in the United States.

The Court of Appeals remanded the decision of my predecessor for clarification of what role factors (4), (5) and (8) of the initial eight-point test played in his reasoning. For ease of discussion, these factors can be divided as follows:

(4)(a) General availability of the substance * * *;
(4)(b) General availability of * * * information regarding the substance and its use;
(5) Recognition of its clinical use in generally accepted pharmacopeia, medical references, journals or textbooks;
(8)(a) Recognition * * * of the substance by a substantial segment of the medical practitioners in the United States; and
(8)(b) [U]use of the substance by a substantial segment of the medical practitioners in the United States.

I have found no evidence indicating initial factors (4)(a) or (8)(b) played any role in my predecessor's decision. In light of my understanding of the legal standard involved, these factors are irrelevant to whether marijuana has a currently accepted medical use.

My predecessor emphasized the lack of scientific evidence of marijuana's effectiveness, and the limited data available on its risks, as reflected in the published scientific studies. He also emphasized the importance of this data to the conclusions reached by experts concerning the drug. 54 FR 53783. I take this to mean that, under initial factor (4)(b), he believed the information available to experts is insufficient for them responsibly and fairly to conclude the marijuana is safe and effective for use as medicine.

Marijuana is not recognized as medicine in generally accepted pharmacopeia, medical references and textbooks, as noted by my predecessor. 54 FR 53784. I take this to mean, under initial factor (5), that he determined that marijuana's chemistry is neither known, nor reproducible, as evidenced by its absence from the official pharmacopeia. Finally, my predecessor concluded, under initial factor (8)(a), that the vast majority of physicians does not accept marijuana as having medical use. 54 FR 53784. Along the way, he found that highly respected oncologists and antiemetic researchers reject marijuana for use in controlling nausea and vomiting, 54 FR 53777, that experts experienced in researching glaucoma medications reject marijuana for use in treating glaucoma, 54 FR 53779, and that noted neurologists who specialize in treating and conducting research in spasticity reject marijuana for use by MS patients, 54 FR 53780. I take this to mean my predecessor found no national consensus of qualified experts accepts marijuana's value as medicine.

Certainly I cannot know my predecessor's unstated reasoning. However, I have reviewed the entire record *de novo*, and I am convinced that his application of the initial eight-point test to this record correctly resulted in the conclusion that marijuana has no currently accepted medical use in treatment in the United States. Therefore, I adopt in their entirety the findings of facts and conclusions of law reached by the former Administrator in his final order of December 21, 1989, 54 FR 53767.

Pursuant to the remand of the Court of Appeals, I have condensed and clarified the initial standard into a five-point test. My application of the refined, five-point test to this record is set out briefly below.

First, marijuana's chemistry is neither fully known, nor reproducible. Thus far, over 400 different chemicals have been identified in the plant. The proportions and concentrations differ from plant to plant, depending on growing conditions, age of the plant, harvesting and storage factors. THC levels can vary from less than 0.2% to over 10%. It is not known how smoking or burning the plant material affects the composition of all these chemicals. It is not possible to reproduce the drug in dosages which can be considered standardized by any currently accepted scientific criteria. Marijuana is not recognized in any current edition of the official compendia. 21 U.S.C. 321(j).

Second, adequate safety studies have not been done. All reasonably applicable pharmacological and toxicological studies have not been carried out. Most of the chronic animal studies have been conducted with oral or intravenous THC, not with marijuana. Pharmacological data on marijuana's bioavailability, metabolic pathways and pharmacokinetics in inadequate. Studies in humans are too small and too few. Sophisticated epidemiological studies of marijuana use in large populations are required, similar to those done for tobacco use. Far too many questions remain unknown for experts fairly and responsibly to conclude marijuana is safe for any use.

Third, there are no adequate, well-controlled scientific studies proving marijuana is effective for anything.

Fourth, marijuana is not accepted for medical use in treatment by even a respectable minority, much less a consenus, of experts trained to evaluate drugs. The FDA's expert drug evaluators have rejected marijuana for medical use. No NDA has been approved by FDA for marijuana. The testimony of nationally recognized experts overwhelmingly rejects marijuana as medicine, compared to the scientifically empty testimony of the psychiatrists, a wellness counselor and general practitioners presented by NORML.

Fifth, given my conclusions on points one, two and three, it follows that the published scientific evidence is not adequate to permit experts to fairly and responsibly conclude that marijuana is safe and effective for use in humans.

A failure to meet just one of the five points precludes a drug from having a currently accepted medical use. Marijuana fails all five points of the test.

NORML has argued, unsuccessfully, that the legal standard for currently accepted medical use should be whether a respectable minority of physicians accepts the drug. The key to this medical malpractice defense is that the minority opinion must be recognized as respectable, as competent, by members of the profession.

In the absence of reliable evidence adequately establishing marijuana's chemistry, pharmacology, toxicology and effectiveness, no responsible physician could conclude that marijuana

is safe and effective for medical use. To quote Doctor Kenneth P. Johnson, Chairman of the Department of Neurology at the University of Maryland, and the author of over 100 scientific and medical articles on MS: "To conclude that marijuana is therapeutically effective without conducting rigorous testing would be professionally irresponsible."

By any modern scientific standard, marijuana is no medicine.

Under the authority vested in the Attorney General by section 201(a) of the Controlled Substances Act, 21 U.S.C. 811(a), and delegated to the Administrator of the Drug Enforcement Administration by regulations of the Department of Justice, 28 CFR 0.100(b), the Administrator hereby orders that marijuana remain in Schedule I as listed in 21 CFR 1308.11(d)(14).

Dated: March 18, 1992.

Robert C. Bonner,

Administrator.

BILLING CODE 4410-09-M

NUCLEAR REGULATORY COMMISSION

ENVIRONMENTAL PROTECTION AGENCY

Proposed Guidance Document on the Testing of Mixed Radioactive and Hazardous Waste

AGENCIES: Nuclear Regulatory Commission, Environmental Protection Agency.

ACTION: Notice of availability and request for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) and the Environmental Protection Agency (EPA) are jointly issuing a proposed guidance document on the testing of mixed radioactive and hazardous waste (mixed waste). This guidance document was developed to assist mixed waste generators in identifying and performing the testing required under the Federal regulations that implement the Resource Conservation and Recovery Act Subtitle C hazardous waste program and to ensure that employee radiation exposures are maintained As Low As Reasonably Achievable (ALARA). The agencies are soliciting comments from interested members of the regulated community, the States, and the public.

Interested individuals may provide the agencies with their comments on the proposed guidance document by forwarding their written comments to the NRC at the address listed in the "**ADDRESSES**" section. Interested parties may also participate in a public meeting being held to solicit oral comments on the proposed guidance document. Interested individuals will be given an opportunity to speak for fifteen minutes at this meeting. This time allowance may be extended, on request for good cause, if the schedule of speakers permits this extension.

DATES: The agencies will accept written comments until May 26, 1992. Individuals submitting comments after this date cannot be assured that the agencies will be able to afford their comments full consideration in any revisions that may be made to the proposed guidance document.

The public meeting to solicit oral comments on the proposed guidance document will be held on April 14, 1992, from 8:30 a.m. until 4:30 p.m. at the Mayflower/Stouffer Hotel, New York Room 1127 Connecticut Avenue NW., Washington, DC 20036, telephone (202) 347-3000.

ADDRESSES: Copies of the proposed guidance document may be obtained by contacting Dominick A. Orlando, NRC Mixed Waste Project Manager, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 504-2566.

Written comments on the proposed guidance document should be directed to David L. Meyer, Chief, Regulatory Publications Branch, Division of Freedom of Information and Publications Service, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555 or hand delivered to the Commission's offices at 7920 Norfolk Avenue, Bethesda, MD between the hours of 7:45 a.m. and 4:14 p.m. on Federal workdays.

Requests to speak at the public meeting should be submitted, in writing, to EPA. The written request should be addressed to Reid Rosnick, Mixed Waste Coordinator, Permits and State Programs Branch, Office of Solid Waste (OS-342), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Interested speakers should include in the written request a statement identifying the topics to be addressed in their presentations, the names and affiliations of the individual(s) that will speak, and the amount of time the speaker(s) will require. A transcript of the oral proceedings will be included in the record for this action.

FOR FURTHER INFORMATION CONTACT: Dominick A. Orlando, Mixed Waste Project Manager, Division of Low-Level Waste Management and Decommissioning, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 504-2566 or; Reid Rosnick, Mixed Waste Coordinator, Permits and State Programs Division, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, telephone (202) 260-4755.

Dated at Rockville, MD this 19th day of March, 1992.

For the U.S. Nuclear Regulatory Commission.

Robert M. Bernero,

Director, Office of Nuclear Material Safety and Safeguards.

For the U.S. Environmental Protection Agency.

Sylvia K. Lowrance,

Director, Office of Solid Waste.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Circular No. A-76: Performance of Commercial Activities; Amendment

AGENCY: Office of Management and Budget.

ACTION: Issuance of Transmittal Memorandum No. 11, amending OMB Circular No. A-76, "Performance of Commercial Activities."

SUMMARY: This notice contains Transmittal No. 11, dated February _____, 1992, to OMB Circular No. A-76, "Performance of Commercial Activities."

This Transmittal Memorandum updates the Federal pay raise assumptions and inflation factors used for computing the Government's in-house personnel and non-pay cost increases for Fiscal Years 1992 through 1997. The Federal pay raise assumptions and the non-pay category rates are contained in the President's Budget for Fiscal Year 1993. The factors contained in OMB Circular No. A-76, Transmittal Memorandum No. 10, dated February 28, 1991, are outdated.

The revision does not require any agency to (1) create or maintain a duplicate control/monitoring/reporting system or (2) adopt any additional controls, not presently in compliance with Federal Acquisition Regulations (FAR).

FOR FURTHER INFORMATION CONTACT: Mr. David Childs, Federal Services Branch, General Management Division, Office of Management and Budget, (202) 395-5090.

Attached to this notice is the material for inclusion in the **Federal Register** Transmittal Memorandum No. 11. The notice is signed by the office head.

Sincerely,

Frank Hodsoll,

Deputy Director for Management.

Attachment

Executive Office of the President,
Office of Management and Budget,
Washington, DC 20503
March 19, 1992.

Deputy Director for Management

Circular No. A-76 Revised
Transmittal Memorandum No. 11

To the Heads of Executive Departments and Agencies

Subject: Performance of Commercial Activities.

This Transmittal Memorandum updates the Federal pay raise assumptions and inflation factors used for computing the Government's in-house personnel and non-pay cost increases, as provided in the President's Budget for Fiscal Year 1993.

The following factors should be applied per paragraph C pages IV-6 and IV-7 of the OMB Circular A-76 Supplemental Cost Comparison Handbook.

Federal pay raise assumptions, effective date	Inflation factors, military and civilian
January 1992	4.2
April 1993	3.7
January 1994	4.7
January 1995	4.7
January 1996	4.5
January 1997	3.5

Non-Pay Categories (Supplies and Equipment, etc.)

FY 1992 3.1
FY 1993 3.3
FY 1994 3.3
FY 1995 3.3
FY 1996 3.2
FY 1997 3.2

The above personnel pay raise factors shall be applied after consideration is given to the Interim Geographic Adjustments provided by section 302 of the Federal Employees Pay Comparability Act of 1990 (Pub. L. 101-509).

These revisions are effective as follows: All changes in the Transmittal Memorandum are effective upon the date this memorandum is signed and shall apply to all cost comparisons in process where the Government's in-house cost estimate has not been revealed before this date.

Sincerely,

Frank Hodsoll,

Deputy Director for Management.

[FR Doc. 92-6992 Filed 3-25-92; 8:45 am]

BILLING CODE 3110-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Salary Council; Meeting

AGENCY: United States Office of Personnel Management.

ACTION: Notice of meeting.

SUMMARY: The Federal Salary Council agenda for these meetings continues to be the discussion of issues relating to the new locality-based comparability payments authorized by the Federal Employees Pay Comparability Act of 1990 (FEPCA). The meetings will be open.

DATES: April 20, 1992, May 5, 1992, and May 13, 1992, beginning at 10 a.m.

ADDRESSES: Room 7B09 for the April 20th and May 13th meetings, and room 1350 for the May 5th meeting, Office of Personnel Management, 1900 E Street NW., Washington, DC 20415-0001.

FOR FURTHER INFORMATION CONTACT: Ms. Ruth O'Donnell, Chief of Salary Systems Division, room 6H31, Office of Personnel Management, 1900 E Street NW., Washington, DC 20415-0001. Telephone number: (202) 606-2838.

For the President's Pay Agent:

Constance Berry Newman,

Director.

[FR Doc. 92-6946 Filed 3-25-92; 8:45 am]

BILLING CODE 6325-01-M

POSTAL SERVICE

Temporary Humanitarian Airlift Service to Estonia, Latvia, Lithuania, and the Republics of the Former Soviet Union

AGENCY: Postal Service.

ACTION: Extension of service duration.

SUMMARY: Pursuant to its authority under 39 U.S.C 407, the Postal Service is extending the duration of Humanitarian Airlift service through June 30, 1992. The temporary service was scheduled to terminate on March 31, 1992.

DATES: April 1, 1992, through June 30, 1992.

ADDRESSES: Director, Office of Classification and Rates Administration, Marketing and Customer Service Group, U.S. Postal Service, Washington, DC 20260-5903. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in room 8430, 475 L'Enfant Plaza, West, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Walter J. Grandjean (202) 268-5180.

SUPPLEMENTARY INFORMATION: On October 31, 1991, (56 FR 56107), the Postal Service announced that it was establishing Humanitarian Airlift service, on a temporary basis through March 31, 1992, to provide persons in the United States with a means of sending humanitarian aid to individuals and families in Estonia, Latvia, Lithuania, and the Republics of the former Soviet Union (Armenia, Azerbaijan, Byelarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russian Federation (Russia), Tajikistan, Turkmenistan, Ukraine, and Uzbekistan). The service is faster than regular surface mail, at a cost lower than airmail service. Humanitarian Airlift parcels receive surface transportation to the dispatching U.S. international exchange office, and are then transported by air to the destination country. Airmail parcels receive priority over Humanitarian Airlift parcels in dispatch. Humanitarian Airlift service is available to the above-mentioned countries for the regular surface parcel post rate plus $1 per pound.

The Postal Service established Humanitarian Airlift service without advance notice in order to expedite its availability. The October 31 **Federal Register** notice announcing the service invited public comment to help the Postal Service monitor the effectiveness of the service. Although no written comments were received, the Postal Service's internal evaluation of Humanitarian Airlift Service's internal evaluation of Humanitarian Airlift service indicates that mailers have found the service to be very useful. Consequently, the Postal Service is extending the duration of Humanitarian Airlift service through June 30, 1992. The conditions of service enumerated in the October 31 **Federal Register** notice are not changed.

Although 39 U.S.C. 407 does not require advance notice and opportunity for submission of comments, and the Postal Service is exempted by 30 U.S.C. 410(a) from the advance notice requirements of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553), the Postal Service invites interested persons to submit written comments to help it monitor the effectiveness of Humanitarian Airlift service.

Authority: 39 U.S.C. 407, 410.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30496; File No. SR-DTC-91-20]

Self-Regulatory Organizations; The Depository Trust Company; Order Approving a Proposed Rule Change Implementing the Inter-Broker Option in the Institutional Delivery and International Institutional Delivery Systems

March 19, 1992.

On August 5, 1991, The Depository Trust Company ("DTC") filed a proposed rule change (File No. SR-DTC-91-20) with the Securities and Exchange Commission ("Commission") under section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] The proposed rule change implements the inter-broker option in the Institutional Delivery ("ID") and International Institutional Delivery ("IID") systems. The Commission published notice of this proposed rule change in the **Federal Register** on September 18, 1991.[2] No public comments have been received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description

The proposed rule change will enable ID and IID broker-dealers to exchange trade data for transactions that will settle outside the automated settlement systems ("ex-clearing transactions").[3] Under the proposed enhancement to the ID and IID Systems, each participating broker-dealer will submit trade data to DTC and will receive a confirmation from DTC with the trade data submitted by the other broker-dealer. These confirmations will replace trade comparisons currently exchanged between broker-dealers by mail, messenger, telecopier, or telex. Transactions reflected in the two confirmations will not be affirmed or settled in the ID or IID systems. Moreover, DTC will not issue advisories if there is a variance in the trade data. This option will be used primarily for trades involving certificates of deposit or securities such as mortgage-backed securities (*e.g.*, GINNIE MAEs and FREDDIE MACs) that are not eligible for settlement through the Government Securities Clearing Corporation.[4] Although the enhancement may be used to remedy failed deliveries, the primary purpose of the change is to facilitate broker-to-broker communications with regard to the exchange of trade data for ex-clearing transactions.[5]

II. Discussion

The Commission believes the proposed rule change is consistent with the Act and especially with section 17A of the Act.[6] Sections 17A(b)(3) (A) and (F) of the Act require that a clearing agency be organized and that its rules be designed to enable it to facilitate the prompt and accurate clearance and settlement of securities transactions for which it is responsible.[7] By enabling DTC participants to exchange trade data for ex-clearing transactions through the ID and IID Systems rather than through mail or facsimile as is now the case, the proposal should improve communications between brokers. The Commission believes that broker-to-broker communication through the ID and IID systems will be quicker and more efficient than it is through methods currently employed. The change, therefore, should promote the prompt and efficient clearance and settlement of securities transactions.

Furthermore, section 17A(a)(1)(C) of the Act sets forth Congress' finding that "[n]ew data processing and communications techniques create the opportunity for more efficient, effective, and safe procedures for clearance and settlement."[8] In section 17(a)(2), Congress directed the Commission to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions in accordance with the findings of section 17A(a)(1). The Commission believes the proposal furthers the development of such a national system.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act, in particular with section 17A of the Act, and with the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[9] that the proposed rule change (File No. SR-DTC-91-20) be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-30498; International Series Release No. 375; File No. SR-NSCC-92-1]

Self Regulatory Organizations; the National Securities Clearing Corporation; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Regarding a Revision to Its Fee Schedule

March 19, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 27, 1992, NSCC filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change is to amend NSCC's fee structure to reflect the DTC-sponsored members are responsible for 100% of DTC's membership cost and to modify the fees for foreign security comparison and netting.

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and statutory basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] Securities Exchange Act Release No. 29074 (September 11, 1991), 56 FR 47258.

[3] For a description of DTC's ID system, refer to DTC Participant Operating Procedures, Section M. For a description of DTC's IID system, refer to Securities Exchange Act Release No. 27545 (December 18, 1989), 54 FR 53017.

[5] Telephone conversation between Carl H. Urist, Deputy General Counsel and Vice President, DTC, and Jonathan Kallman, Associate Director, Jerry W. Carpenter, Branch Chief, and Richard C. Strasser, Attorney, Division, Commission (December 5, 1991).

[6] 15 U.S.C. 78q-1 (1988).

[7] 15 U.S.C. 78q-1(b)(3) (A) and (F) (1988).

[8] 15 U.S.C. 78q-1(a)(1)(C) (1988).

[9] U.S.C. 78s(b)(2) (1988).

[10] 17 CFR 200.30-3(a)(12) (1991).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

One purpose of the proposed rule change is to modify the fees NSCC charges for foreign securities comparison and netting. The proposal also includes a technical change to NSCC's fee schedule to reflect that NSCC passes DTC's actual monthly membership fees through to DTC-sponsored members.

In 1989, NSCC proposed a revised fee schedule which was implemented in January of 1990. The revisions were permanently approved by the Commission on June 1, 1990.[1] In its filing, NSCC indicated that sponsored members would become responsible for the DTC membership costs on a phased-in basis. Accordingly, NSCC is modifying the wording of the fee schedule to reflect that DTC-sponsored members are responsible for 100% of the membership fee charged by DTC.[2]

The proposal also modifies the fees NSCC charges for foreign security comparison and netting.[3] NSCC believes these charges fairly allocate NSCC's costs for the services performed. These revised fees became effective March 1, 1992, for billing in April.

NSCC believes that, because the fees will provide for the equitable allocation of fees among members, the proposed rule change is consistent with the Act and in particular with section 17A(b)(3)(D) thereunder.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments have neither been solicited nor received. NSCC will notify the Commission of any written comments it receives.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective, pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of rule 19b-4 thereunder because it establishes a fee imposed by the self-regulatory organization. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filings will also be available for inspection and copying at the principal office of NSCC. All submissions should refer to File No. SR-NSCC-92-1 and should be submitted by April 16, 1992. For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-6964 Filed 3-25-92; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-30499; File No. SR-NYSE-92-05]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by New York Stock Exchange, Inc., Relating to Rule 452—Giving Proxies by Member Organization

March 19, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 4, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends an Exchange interpretation of rule 452 (Giving Proxies by Member Organization).[1] Rule 452 includes a provision providing that a member organization may give a proxy to vote stock, provided, among other things, that the beneficial owner of the shares has not exercised his right to vote the stock and that the action being voted upon does not include authorization for a merger, consolidation or any other matter which may affect substantially the rights or privileges of such stock.

The Exchange routinely reviews proxy materials and determines whether an action to be taken at a meeting "may affect substantially the rights or privileges of such stock." If the Exchange determines that the action may substantially affect shareholders, a member organization may not give a proxy to vote the stock after the beneficial owner fails to respond. By way of example, Supplementary Material .11 to rule 452 lists 18 actions in respect of which member organizations may not so give a proxy to vote.

In addition to the 18 specific items listed in the Supplementary Material to rule 452, the Exchange has interpreted the rule to preclude member organizations from voting without customer instructions in certain other situations, including a shareholder vote on the initial approval of an investment advisory contract. The proposed rule change modifies that interpretation so as to allow member organizations to give a proxy to vote on initial approval of an investment advisory contract, subject to the other conditions of rule 452.

Consistent with Exchange policy in similar contexts, if the member organization is affiliated with the investment advisor, the member organization would be required to cast the votes of beneficial owners who fail to respond to the proxy solicitation

[1] *See* Securities Exchange Act Release No. 28005 (June 1, 1990), 55 FR 23495.

[2] DTC's membership fee is currently $650. Telephone conversation between Karen Saperstein, Associate General Counsel, NSCC, and Richard C. Strasser, Attorney Division of Market Regulation, Commission (March 16, 1992).

[3] The fee for each side of a compared trade in foreign securities is lowered from $2.00 to $0.75. NSCC Rule I(A)(3). The fee for foreign securities transactions netted is $.50 per item in addition to the fee for security orders generated, which is currently $.25 per item. NSCC Rules II(H) and II(L).

[4] 17 CFR 200.30-3(a)(12).

[1] The proposed rule change does not amend the text of rule 452 or its Supplementary Material.

"proportionately". The Exchange interprets "proportionately" to require the member organization to vote in the same "yes" and "no" proportion as that represented by the votes received from all other record holders of stock.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Heretofore, the Exchange has considered the initial approval of investment advisory contracts and any material amendments to any such contract as non-routine matters that are of a type that a member organization cannot vote on without specific client instruction. On the other hand, the Exchange has considered such issues as a one-year extension of the term of any such contract or a non-material amendment of any such contract to constitute routine matters in respect of which member organizations may give a proxy.

The Exchange proposes to amend its interpretation of Rule 452 to allow member organizations to give a proxy on the initial approval of an investment advisory contract if the beneficial holder does not exercise his right to vote.[2] The Exchange believes that such treatment is appropriate since the initial investment advisory contract is described in the prospectus the investor receives when making a decision to invest in these securities. However, since this is not the case with respect to material amendments to such contracts, the Exchange will continue to preclude member organizations from giving proxies without specific client instructions.

In addition, the Exchange believes this proposed rule change should make it easier for companies to obtain shareholder approval of an investment advisory contract as required by the Investment Company Act of 1940 (the "1940 Act").

Pursuant to section 2(a)(42) of the 1940 Act, approval of an investment advisory contract requires approval by the holders of the lesser of (i) 50 percent of the outstanding shares of the company or (ii) 67 percent of the votes cast at a meeting at which at least 50 percent of the outstanding shares are present or represented by proxy. As a practical matter, it is often necessary to rely upon the latter of these alternative methods of meeting the requirement. When a member organization is able to vote shares on which no instructions have been received from the beneficial owner (on "routine" items), the results is to increase the number of shares present at the meeting. This results in a corresponding increase in the number of votes necessary to meet the 67 percent approval requirement for the contract. However, since member organizations cannot vote on the investment advisory contract in this case, the effect is to increase the difficulty of achieving the vote necessary under the 1940 Act. Therefore, the mere presence at the meeting of shares for which no instructions have been received is the equivalent of having those shares voted against the contract. A shareholder who has recently purchased shares and has not taken the trouble to return a proxy card to the member organization is probably unaware that his inaction is the equivalent of voting against the very investment advisory contracts that were described in the prospectus and were presumably a key factor in his investment decision.

The basis under the Act for this proposed rule change is section 6(b)(5), which requires that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were neither solicited nor received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to File No. SR-NYSE-9-05 and should be submitted by April 16, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

[FR Doc. 92-7015 Filed 3-25-92; 8:45 am]

BILLING CODE 8010-01-M

[2] The Exchange recognizes that when the investment advisor and the member organization are affiliated there is a potential conflict of interest if the member organization has full discretion on how to vote shares for which no instructions are received. Accordingly, consistent with its proxy voting policy in other situations involving potential conflicts, the Exchange proposes in such situations to require that the member organization vote in the same proportion as represented by the votes received from all other record holders.

[Release No. 34-30500; International Series Release No. 374; File No. SR-OCC-92-01]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving a Proposed Rule Change Relating to Amendments to Canadian Depository Receipts

March 19, 1992.

On January 8, 1991, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR-OCC-92-01) that would revise the Canadian Clearing Fund Depository Receipt and Security Agreement and the Canadian Margin Depository Receipt and Security Agreement to provide for facsimile transmission. Notice of the proposed rule change was published in the **Federal Register** on February 4, 1992.[2] No comments were received. This order approves the proposal.

I. Description

OCC clearing members may pledge securities issued or guaranteed by the government of Canada ("Canadian government securities") and held at OCC's Canadian clearing agent bank [3] to satisfy their clearing fund and margin requirements.[4] OCC has established procedures whereby it will accept pledges of Canadian government securities through the use of Canadian depository receipts. Canadian depository receipts are escrow depository receipts and the underlying agreements that are issued by OCC's Canadian clearing bank. They are issued to acknowledge that the bank holds Canadian government securities for OCC's benefit and that it will not release the securities without OCC's written consent. OCC's consent to release shall be in the form of either a written order (in the case of the suspension of the clearing member) or an Endorsement for Release (in the case of a request by the clearing member to withdraw the securities).[5] Upon receipt of a Canadian depository receipt, OCC credits the value of the pledged securities represented by the Canadian depository receipt towards either the clearing member's margin or clearing fund requirement.

The proposed rule change will amend the Canadian depository receipts to provide that the issuing clearing agent bank agrees to accept as an original any written order or Endorsement for Release transmitted by electronic means that produces a facsimile copy of the document being transmitted provided the document is executed by an authorized signatory of OCC. The filing also provides that OCC may accept such a facsimile transmission from an issuing bank.[6]

II. Discussion

The Commission believes the proposal is consistent with sections 17A(b)(3) (A) and (F) of the Act.[7] Those sections require that a clearing agency be organized and that the rules of the clearing agency be designed to facilitate the prompt and accurate clearance and settlement of securities transactions for which it is responsible and to facilitate the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which the clearing agency is responsible. Further, the Commission believes OCC's proposal is consistent with the Congressional finding as stated in section 17A(a)(1)(C) that "new data processing and communications techniques create the opportunity for more efficient, effective, and safe procedures for clearance and settlement." [8]

It is expected that OCC's proposed rule change will provide significant benefits to OCC's clearing members. The proposal should enable the Canadian clearing agent bank to provide earlier notice to OCC that a hearing member's Canadian government securities are being held on OCC's behalf and should allow OCC to credit the deposit toward satisfying the clearing member's margin or clearing fund requirement sooner than under the current method. In addition, should the clearing member request to withdraw the collateral, the electronic transmission of an Endorsement for Release will help avoid delays and allow the clearing member to take advantage of other investment opportunities. Further, the proposal will provide a more efficient method for OCC to notify its clearing agent bank when OCC must act quickly to liquidate the clearing member's account. For the reasons, the Commission believes that OCC's proposal facilitates the prompt and accurate clearance and settlement of securities transactions consistent with the Act.

OCC's proposal is designed to capitalize on the efficiencies of electronic communications systems. OCC currently allows pledges of securities through the EDP Pledge System operated by DTC.[9] This method of pledging securities has proven to be an efficient and safe alternative to the physical issuance of depository receipts. The Commission believes that the current proposal also represents a safe and efficient method of initiating and terminating pledge arrangements with OCC's Canadian clearing agent bank.

Furthermore, consistent with OCC's current procedures, OCC will continue to have a first security lien on the pledged securities and neither the clearing member nor the clearing agent bank will be permitted to release the pledged securities without OCC's prior written consent. In this regard, the Commission believes OCC's proposal facilitates the safeguarding of securities and funds in OCC's custody or under OCC's control.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[10] that the

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] Securities Exchange Act Release No. 30297 (January 27, 1992), 57 FR 4231.

[3] OCC currently has one Canadian clearing agent bank, Bank of Montreal.

[4] In 1988, the Commission approved a proposed rule change permitting OCC clearing members to pledge Canadian government securities in the form of depository receipts for margin and clearing fund purposes. Securities Exchange Act Release No. 25610 (April 22, 1988), 53 FR 15323.

In 1989, OCC filed a proposed rule change, that pursuant to section 19(b)(3)(A) of the Act was effective upon filing, to enhance OCC's lien on securities deposited in accordance with the Canadian depository receipts. Securities Exchange Act Release No. 27128 (August 11, 1989), 54 FR 34279.

[5] OCC rules contain procedures for the release or liquidation of securities pledged to OCC through the use of escrow receipts. Among others, these rules include: OCC rules 608 (withdrawals of margin), 1004 (withdrawal of clearing fund collateral), 613(j) (release or withdrawal of an escrow receipt), and 1104 (creation of Liquidating settlement account).

[6] On March 5, 1992, OCC submitted a letter to clarify that it was OCC's intent that the proposed rule change not only amend the Canadian depository receipts to provide that the issuing bank agrees to accept a facsimile transmission of any written order or endorsement for release from OCC but also provide that OCC will accept facsimile transmission of Canadian depository releases from the issuing bank. Letter from Jean M. Cawley, Staff Counsel, OCC, to Jerry W. Carpenter, Branch Chief, Division of Market Regulation, Commission (February 26, 1992).

[Rel. No. IC–18618; 811–820]

American Investment Trust; Application for Deregistration

March 19, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: American Investment Trust (the "Trust").

RELEVANT 1940 ACT SECTIONS: Section 8(f) and rule 8f–1 thereunder.

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATES: The application was filed on December 18, 1989 and amended on November 16, 1990, June 19, 1991, and March 11, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving the Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 13, 1992, and should be accompanied by proof of service on the Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 400 Benedict Avenue, Tarrytown, New York 10591.

FOR FURTHER INFORMATION CONTACT: Marc Duffy, Staff Attorney, (202) 272–2511, or Max Berueffy, Branch Chief, (202) 272–3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

APPLICANT'S REPRESENTATIONS:

1. The Trust is a unit investment trust organized under the laws of the State of New York. On June 26, 1958 the Trust registered under the Act by filing a Notification of Registration on Form N–8A pursuant to section 8(a) and a registration statement on Form N–8B–2 pursuant to section 8(b) of the Act. On July 3, 1958 the Trust registered its securities under the Securities Exchange Act of 1933 by filing a registration statement on Form S–6, which became effective on January 14, 1959. The Trust registered periodic payment plan certificates, in the form of systematic and single payment plans (the "Plans"), for the accumulation of shares of Axe-Houghton Stock Fund, Inc. (the "Fund").

2. Each Plan was created pursuant to a plan certificate which formed the agreement between the sponsor, Axe Securities Corporation (the "Sponsor"), the custodian, Irving Trust Company, and the holder of the Plan (the "Planholder"), and was issued pursuant to a Planholders Agreement between Irving Trust Company and the Sponsor. As of the date of this application, there are no plans outstanding.

3. On October 19, 1988 the Sponsor wrote to Planholders offering them the opportunity to become direct shareholders of the Fund by converting their Plans to direct investments in the Fund. A copy of the letter is attached as an exhibit to the application. During the period December 1, 1988 to June 12, 1989, all outstanding Plans were terminated in accordance with their terms and converted to direct investments in shares of the Fund. Each Planholder received the same number of full and fractional shares of the Fund as he held in the converted Plan account.

4. As a result of the conversion, no Planholder paid a sales load in excess of that permitted under section 27 of the Act or provided for under the terms of the Plan. As of December 1, 1988, shares of the Fund were being sold to the pubic without imposition of any sales load. Accordingly, by converting their Plans to direct investments in Fund shares, Planholders were able to avoid payment of Plan custodial fees and the additional sales loads applicable to further purchases of Fund shares under a Plan.

5. As a December 1, 1988 there were 292 Plans outstanding representing 370,720.988 shares having a net asset value of $5.43 per share and an aggregate net asset value of $2,013,014.96.

6. All expenses, including legal, accounting, and other general and administrative expenses, relating to the Trust's liquidation and the winding up of its affairs are being borne by the Sponsor and its successors.

7. As of the time of filing of this application, the Trust had no shareholders, assets, or liabilities. The Trust is not a party to any litigation or administrative proceeding. The Trust is not presently engaged in, nor does it purpose to engage in, any business activities other than those necessary for the winding up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

ACTION: Notice of reporting requirements submitted for review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATES: Comments should be submitted by April 27, 1992. If you intent to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

FOR FURTHER INFORMATION CONTACT: Request for clearance (S.F. 83), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Submit comments to the Agency Clearance Officer and the OMB Reviewer.

Agency clearance officer: Cleo Verbillis, Small Business Administration, 409 3RD Street, SW., 5th Floor, Washington, DC 20416, Telephone: (202) 205–6629.

OMB reviewer: Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Interest Rates

The interest rate on section 7(a) Small Business Administration direct loans (as amended by Public Law 97–35) and the SBA share of immediate participation loans is 8¼ percent for the fiscal quarter beginning April 1, 1992.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 122.8–4 (d)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the April-June quarter of FY 92, this rate will be 7½ percent.

[Declaration of Disaster Loan Area #2545; Amendment #5]

Declaration of Disaster Loan Area; Texas

The above-numbered Declaration is hereby amended in accordance with an amendment dated March 11, 1992, to the President's major disaster declaration of December 26, 1991, to include the counties of Aransas, Mason, Refugio, Shackelford, Throckmorton, Young, and Zavala in the State of Texas as a disaster area as a result of damages caused by severe thunderstorms and flooding beginning on December 20, 1991 and continuing through January 14, 1992.

In addition, applications for economic injury loans from small businesses located in the contiguous counties of Archer, Baylor, Bee, Dimmit, Frio, Kenney, Knox, LaSalle, Maverick, Medina, Menard, San Patricio, and Uvalde in the State of Texas may be filed until the specified date at the previously designated location.

Because the termination date for filing applications for physical damage closed on February 24, 1992, prior to the Notice of Amendment cited above, applications for physical damage for victims located in the above-named counties will be accepted until the close of business on April 10, 1992, 30 days from the date of amendment. The termination date for filing applications for economic injury remains the close of business on September 28, 1992.

DEPARTMENT OF STATE

[Public Notice 1588]

Bureau of Diplomatic Security; Public Information Collection Requirement Submitted to OMB for Review

AGENCY: Department of State.

ACTION: The Department of State has resubmitted the following public information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35.

SUMMARY: Section 134 of Public Law 101-649 of November 29, 1990, allows for the issuance of 1,000 immigrant visas to qualified displaced Tibetans in India and Nepal. The implementing regulation (22 CFR 47) requires the information collection on Optional Form 222 to establish qualification and eligiblity of the Tibetan applicants. The following summarizes the information collection proposal submitted to OMB:

Type of request—Reinstatement.
Originating office—Bureau of Consular Affairs.
Title of information collection—Preliminary Questionnaire to Determine Immigrant Status.
Frequency—On occasion.
Form No.—OF-222.
Respondents—Displaced Tibetans in India and Nepal.
Estimated number of respondents—2,000.
Average hours per response—30 minutes.
Total estimated burden hours—1,000.

Section 3504(h) of Public Law 96-511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 647-3538. Comments and questions should be directed to (OMB) Lin Liu (202) 395-7340.

Dated: March 16, 1992.

BILLING CODE 4710-43-M

[Public Notice 1589]

Bureau of Diplomatic Security; Public Information Collection Requirement Submitted to OMB for Review

AGENCY: Department of State.

ACTION: The Department of State has submitted the following public information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35.

SUMMARY: Section 2(b)(9) of the Export Import Bank Act of 1945, as amended (Pub. L. 99-440; 100 Stat. 1096) provides that the Export Import Bank may not support any export to private purchasers in South Africa unless the Secretary of State certifies that the purchaser has endorsed and proceeded toward the implementation of certain fair employment principles. The proposed information collection will enable the Department of State to make a meaningful judgment as to whether the South African purchaser meets the legal requirements for certification to the Export Import Bank. The following summarizes the information collection proposal submitted to OMB:

Type of request —New.
Originating office —Bureau of African Affairs.
Title of information collection —Questionnaire for purchasers in the Republic of South Africa applying for support from the Export-Import Bank or Bank-supported programs of the Foreign Credit Insurance Corporation.
Frequency —On occasion.
Form No. —DSP-118
Respondents —South African purchasers applying for support from the Export-Import Bank of the United States.
Estimated number of respondents —10.
Average hours per response —8 hours.
Total estimated burden hours —800.

Section 3504(h) of Public Law 96-511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 6747-3538. Comments and questions should be directed to (OMB) Lin Liu (202) 395-7340.

Dated: March 16, 1992.

BILLING CODE 4710-43-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representatitve" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, sec. 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J. W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W. M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 8120-02-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Petition for Exemption From the Vehicle Theft Prevention Standard; General Motors Corporation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Grant in part of petition for exemption.

SUMMARY: This notice grants in part the petition by General Motors Corporation (GM) for exemption from the parts marking requirements of the vehicle theft prevention standard for the Oldsmobile 88 Royale (88 Royale) and Buick LeSabre car lines for Model Year (MY) 1993, pursuant to 49 CFR part 543, *Exemption From Vehicle Theft Prevention Standard*, for MY 1993 and beyond. GM is required to mark only the engines and transmissions of the exempted car lines.

DATES: The exemption granted by this notice is effective beginning with the 1993 model year.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara A. Gray, Office of Market Incentives, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Gray's telephone number is (202) 366-4808.

SUPPLEMENTARY INFORMATION: On November 22, 1991, the agency received a submission from GM requesting an exemption from the theft prevention standard for its 88 Royale and LeSabre car lines, pursuant to 49 CFR part 543, *Exemption From Vehicle Theft Prevention Standard*, for MY 1993 and beyond.

The information submitted by GM constitutes a complete petition, as required by 49 CFR part 543.7, in that it meets the general requirements contained in § 543.5 and the specific content requirements of § 543.6. Accordingly, November 22, 1991 is the date on which the statutory 120 day period for processing GM's petition began.

In its petition for the 88 Royale and LeSabre car lines, GM requests an exemption from parts marking based on the inclusion of the "PASS-Key II" theft deterrent system as standard equipment for these car lines. "PASS-Key II" is a modification of the "PASS-Key II" theft deterrent system. Since August 1989, the agency has determined that the "PASS-Key" system, installed as standard equipment, will likely be as effective reducing and deterring motor vehicle theft as compliance with the requirements of the theft prevention standard (see 54 *FR* 33655, August 15, 1989). In a February 7, 1992 letter to GM, the agency determined that the changes in "PASS-Key II" constituted a *de minimis* change in the "PASS-Key" system that was the basis for the agency's previous granting of a theft exemption for a car line that had, as standard equipment, the "PASS-Key" system.

The "PASS-Key II" theft deterrent system utilizes an ignition key, an ignition lock cylinder and a decoder module. The conventional mechanical code permits the key to release the steering wheel and transmission shift level locks. Before the vehicle can be started, the electrical resistance of a pellet embedded in the shank of the key must be sensed by elements in the lock cylinder and its value compared to a fixed resistance in the decoder module located in the instrument panel in the passenger compartment. If the key pellet has the proper resistance, the starter enable relay is energized and a discrete signal is transmitted to the engine control module. Recognition of the signal by the engine control module allows fuel injector pulses to begin. If a key other than the one with proper resistance for that vehicle is inserted, the decoder module will shut down for a period of three minutes plus or minus 18 seconds. GM states that this period of time is controlled by a timer within the decoder module, and is not a programmable feature. Unlike "PASS-Key," in "PASS-Key II," the timer for the decoder module does not reset back to zero if further resistance comparisons are made while the decoder module is shut down. GM has stated that despite this difference, a similar level of performance will continue since the module, while shut down, will ignore any further attempts to start the vehicle by means of a key with an improper pellet resistance. GM claims that any process of trial and error using various keys with different resistance pellets, after the initial three minute shut down period, will result in the module shutting down again.

The components are located in the passenger compartment behind the instrument panel, with the exception of the starter solenoid/starter motor combination which is located in the engine compartment. GM states that unlike many other theft deterrent systems, removing and subsequently reapplying vehicle power does not alter "PASS-Key II" performance.

GM states that "PASS-Key II" is passive in that the system becomes fully functional once the ignition is turned off and the key is removed. No further operator action is required for activation. GM states that because "PASS-Key II" is fully operational once the engine has been turned off and the key removed, it has not provided specific visual or audio warnings, beyond the key warning buzzer, that unauthorized attempts have been made to enter or move the vehicles. However, the "PASS-Key II" system includes a starter interrupt function which, when activated, makes the vehicle inoperable.

In order to draw attention to improper use of a key to start the vehicle, GM has installed a yellow "Security" light inside the passenger compartment of the 88 Royale and the LeSabre. This light is designed to activate if the proper key with a dirty or contaminated resistor pellet is used and the vehicle does not start. If this happens, it is necessary to clean the key and delay a further attempt to start the engine until the "PASS-Key II" timer has run its course. The "Security" light is designed to illuminate also if a key with the proper mechanical but improper electrical code is used to try and start the vehicle.

GM states that a premise for the design of any theft deterrent system in its products has been that a failure in such a system would not affect a running vehicle. Although it may not be possible to restart a vehicle after such a failure, that failure would not stop an engine that has been started. That criterion has been met in "PASS-Key II." Once an "Engine Running" signal has been identified by the engine control module, a "PASS-Key II" failure will not cause the engine to stop.

GM's analysis of the failure mode effects of the "PASS-Key II" system indicated that the component with the highest probability for failure was the ignition lock cylinder with its key, wiring, contacts, and rotational motion. A 52,000 cycle automated bench test of the key, ignition lock cylinder, wiring, and "PASS-Key II" electronics module was conducted over a temperature range of approximately −40 degrees Fahrenheit to +212 degrees Fahrenheit. GM stated that each cycle consisted of inserting the key, rotating the cylinder to its "Start" position and then measuring the output from the electronics module to assure that the proper signals for the Starter Enable Relay and engine control module were present. The absence of either signal would terminate the test.

GM states that the "PASS-Key II" decoder module has undergone other durability tests to ensure that the component meets or exceeds specified performance requirements over an equivalent of approximately 10 years of vehicle life. These other tests were: a power and temperature cycling test; high temperature endurance test; humidity test; moisture susceptibility test, and random vibration durability tests. As part of the validation process for the "PASS-Key" system, GM subjected the starter enable relay to testing to ensure component reliability. GM states that the same component is used in "PASS-Key II."

GM also states that during 668,000 miles of durability testing on prototype vehicles equipped with "PASS-Key II," there were no system failures. An additional durability test conducted on a sample of production vehicles, before such vehicles were released for sale, resulted in one failure of a module. GM states that an engineering change was implemented to eliminate the cause of that failure and revised modules incorporating the change were installed in all production vehicles. GM states that since "PASS-Key II" system failures have the potential to affect owner satisfaction, it will continue to carefully monitor warranty data and make any necessary changes to improve system reliability.

Since the "PASS-Key II" system has been installed in GM vehicles as standard equipment only since the 1992 model year, GM states that directly relevant theft data are not yet available. GM asserts that since the "PASS-Key II" system has been designed to provide the same kind of protection as the "PASS-Key" system, theft data for "PASS-Key" equipped vehicles can be used to form the basis for GM's belief that the "PASS-Key II" system will be effective in reducing and deterring motor vehicle theft. The agency concurs that theft data for "PASS-Key" equipped vehicles is probative of the likelihood of success of the "PASS-Key II" system in reducing and deterring vehicle theft.

To substantiate its statements on the "PASS-Key" antitheft system's effectiveness, GM provided data on Chevrolet Camaro, Pontiac Firebird, and Cadillac DeVille/Fleetwood car line theft rates for MYs 1986 through 1990. "PASS-Key" was made standard equipment on the Camaro and Firebird car lines beginning with the 1989 model and in the DeVille/Fleetwood beginning with the 1990 model. The data provided by GM is reported by the Federal Bureau of Investigation's National Crime Information Center (NCIC), which is NHTSA's official source of theft data (See 50 FR 46666, November 12, 1985). The NCIC receives reports on all thefts.

The NCIC data reported by GM showed that Firebird, Camaro, and DeVille/Fleetwood theft rates (per thousand vehicles) by Model Year were: for 1986, 27.83 for the Firebird, 29.49 for the Camaro, 7.11 for the DeVille/Fleetwood; for 1987, 30.14 for the Firebird, 28.03 for the Camaro, 6.6 for the DeVille/Fleetwood; for 1988, 29.34 for the Firebird, 25.74 for the Camaro, 7.19 for the DeVille/Fleetwood; for 1989, 8.99 for the Firebird, 8.69 for the Camaro, 5.57 for the DeVille Fleetwood; and the 1990, 8.56 for the Firebird, 9.04 for the Camero, 3.81 for the Deville/Fleetwood.

GM stated a belief, based on the decreases in thefts of the Firebird and Camaro car lines during the 1989 model year, and DeVille/Fleetwood car line during the 1990 model year, which occurred with the implementation of "PASS-Key" as standard equipment, that the PASS-Key" system is "extremely effective in deterring motor vehicle theft." GM stated that based on the performance of "PASS-Key" on other models and its similarity of design and functionality to the "PASS-Key II" system, it believes that similar reductions will be achieved with the 88 Royale and LeSabre car lines when "PASS-Key II" becomes standard on those vehicles.

NHTSA believes that there is substantial evidence indicating that the antitheft system to be installed as standard equipment will likely be as effective in reducing and deterring motor vehicle theft as compliance with the requirements of the theft prevention standard (49 CFR part 541). This determination is based on the information GM submitted with its petition and on other available information. The agency believes that the device will provide all but one of the types of performance listed in § 543.6(a)(3): promoting activation; preventing defeat or circumventing of the device by unauthorized persons; preventing operation of the vehicle by unauthorized entrants; and ensuring the reliability and durability of the device. The single exception is that the device lacks an alarm which would attract attention to unauthorized entries.

As required by section 605(b) of the statute and 49 CFR 543.6(a)(4), the agency also finds that GM has provided adequate reasons for its belief that the antitheft device will reduce and deter theft. This conclusion is based on the information GM provided on its device. This information included a description of reliability and functional tests conducted by GM for the antitheft system and its components. GM presented extensive data on the life cycle test results of the "PASS-Key" ignition lock system.

For the foregoing reasons, the agency herby exempts the MY 1993 Oldsmobile 88 Royale and Buick LeSabre car lines in part from the requirements of 49 CFR part 541. GM will be required to mark only the engines and transmissions, and replacement engines and transmissions for these car lines. Those major parts were chosen since they are among the most interchangeable of the 14 parts for which labeling is required.

The reason for the partial grant is that the GM antitheft system for the Oldsmobile 88 Royale and Buick LeSabre includes neither an audio nor visual alarm function. As such, the GM system lacks an important feature that the agency has identified in its rulemaking on part 543 as one of several desirable attributes which contribute to the effectiveness of an antitheft system: Automatic activation of the device; an audible or visual signal that is connected to the hood, doors, and trunk and draws attention to vehicle tampering; and a disabling mechanism designed to prevent a thief from moving a vehicle under its own power without a key.

The agency acknowledges that, since Model Year 1989, the theft rates for the Pontiac/Camaro car lines have been reduced substantially. Although the theft rates for these car lines are lower than in previous years, the agency believes that more than two years of data are needed in order to accurately evaluate the effectiveness of an antitheft device.

If GM decides not to use the partial exemptions for the MY 1993 Royale and LeSabre car lines, it should formally notify the agency. If such a decision is made, these car lines must be fully marked according to the requirements under 49 CFR 541.5 and 541.6 (marking of major component parts and replacement parts).

The agency notes that the limited and apparently conflicting data on the effectiveness of the pre-standard parts making programs continue to make it difficult to compare the effectiveness of an antitheft device with the effectiveness of compliance with the theft prevention standard. The statute clearly invites such a comparison, which the agency has made on the basis of the limited data available.

NHTSA notes that if GM wishes in the future to modify the device on which this partial exemption is based, the company may have to submit a petition to modify the exemption. Part 543.7(d) states that a Part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, § 543.9(c)(2) provides for the submission of petitions "(t)o modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in the exemption."

The agency wishes to minimize the administrative burden which § 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting part 543 to require the submission of a modification petition for every change to the components or design of a antitheft device. The significance of many such changes could be *de minimis*. Therefore, NHTSA suggests that if G.M. contemplates making any changes the effects of which might be characterized as *de minimis* then the company should consult the agency before preparing and submitting a petition to modify.

Authority: 15 U.S.C. 2025; delegation of authority at 49 CFR 1.50.

Issued on: March 20, 1992.

Jerry Ralph Curry,

Administrator.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: March 18,1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submissions(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0314.

Form Number: IRS Forms 6466 and 6467.

Type of Review: Extension.

Title: Transmittal of Magnetic Media of Form W–4, Employee's Withholding Allowance Certificate (6466), Transmittal of Magnetic Media of Form W–4, Employee's Withholding Allowance Certificate (Continuation) (6467).

Description: Under Regulation 31.3402(f)(2)–1(g), employers are required to submit certain withholding certificates (W–4) to the IRS. Transmittal Form 6466, and the continuation sheet Form 6467, are submitted by an authorized agent of the employer who will be reporting submissions of Form W–4 on magnetic media. These forms ensure accuracy and completeness of the submission.

Respondents: State and local governments, Farms, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.

Estimated Number of Respondents: 100.

Estimated Burden Hours Per Respondent:

Form	Response time
Form 6466	20 minutes.
Form 6467	20 minutes.

Frequency of Response: Quarterly.

Estimated Total Reporting Burden: 133 hours.

OMB Number: 1545–0763.

Regulation ID Number: LR–200–76 Final.

Type of Review: Extension.

Title: Qualified Conversation Contributions.

Description: The information is necessary to comply with various substantive requirements of section 170(h) which describes situations in which a taxpayer is entitled to an income tax deduction for a charitable contribution for conversation purposes of a partial interest in real property.

Respondents: Individuals or households, State and local governments, Farms, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.

Estimated Number of Recordkeepers: 1,000.

Estimated Burden Hours Per Recordkeeper: 1 hour, 15 minutes.

Frequency of Recordkeeping: Quarterly.

Estimated Total Recordkeeping Burden: 1,250 hours.

Clearance Officer: Garrick Shear, (202) 535–4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4830–01–01–M

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 737]

Dollar Limitation for Display and Retail Advertising Specialties

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: General notice.

SUMMARY: This notice sets forth the annually updated dollar limitations prescribed for alcohol beverage industry members under the "Tied House" provisions of the Federal Alcohol Administration Act.

DATES: This notice shall be effective retroactive to January 1, 1992.

ADDRESSES: Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Ave., NW., Washington, DC 20226.

FOR FURTHER INFORMATION CONTACT: Karen Freelove, Market Compliance Branch, (202) 927–8130.

SUPPLEMENTARY INFORMATION: Based on data of the Bureau of Labor Statistics, the consumer price index was 3.1 percent higher in December 1991 than in December 1990. Therefore, effective January 1, 1992, the dollar limitation for "Product Displays" (27 CFR 6.83(c)) is increased from $155.00 to 160.00 per brand. Similarly, the "Retailer Advertising Specialties" (27 CFR 6.85(b)) is increased form $76.00 to $78.00 per brand. Also, the "Participation in Retailer Association Activities" (27 CFR

6.100(e)) is increased from $155.00 to $160.00 per year.

Industry members who wish to furnish, give, rent, loan or sell product displays or retailer advertising specialties to retailers are subject to dollar limitations (27 CFR 6.83 and 6.85). Industry members making payments for advertisements in programs or brochures issued by retailer associations at a convention or trade show are also subject to dollar limitations (27 CFR 6.100). The dollar limitations are updated annually by use of a "cost adjustment factor" in accordance with 27 CFR 6.82. The cost adjustment factor is defined as a percentage equal to the change in the Bureau of Labor Statistics' consumer price index. Adjusted dollar limitations are established each January using the consumer price index for the preceding December.

Dated: March 3, 1992.

Stephen E. Higgins,

Director.

Fiscal Service

[Dept. Circ. 570, 1991—Rev., Supp. No. 22]

Surety Companies Acceptable on Federal Bonds Suspension of Authority; Regency Insurance Co.

Notice is hereby given that the Certificate of Authority issued by the Treasury to Regency Insurance Company, of Hallandale, Florida, under the United States Code, title 31, sections 9304–9308, to qualify as an acceptable surety on Federal bonds is hereby suspended, effective this date. The suspension will remain in effect until further notice.

The Company was last listed as an acceptable surety on Federal bonds at 56 FR 30159, July 1, 1991. Federal bond-approving officers should annotate their reference copies of Treasury Circular 570 to reflect the suspension.

With respect to any bonds currently in force with Regency Insurance Company, bond-approving officers for the Government may let such bonds run to expiration and need not secure new bonds. However, no new bonds should be accepted from the Company. In addition, bonds that are continuous in nature should not be renewed.

Questions concerning this notice may be directed to the Department of the Treasury, Financial Management Service, Finance Division, Surety Bond Branch, Washington, DC 20227, telephone (202) 874–6507.

Dated: March 11, 1992.

BILLING CODE 4810-35-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301-88]

Request for Public Comment: People's Republic of China: Market Access Barriers

AGENCY: Office of the United States Trade Representative.

ACTION: Request for information concerning Chinese market access barriers.

SUMMARY: The United States Trade Representative (USTR) is seeking additional informaiton concerning market access barriers that U.S. companies have encountered in the People's Republic of China (China). Specific data regarding instances when individual or overlapping market access barriers have (1) prevented or delayed the entry of U.S. products into Chinese markets, (2) effectively priced U.S. products out of the Chinese market, or (3) have discriminated against U.S. exports in favor of domestic products or those of another country would assist USTR in pursuing its investigation of these barriers. USTR invites written comments from the public on these matters.

DATES: Written comments from the public are due on or before 12 noon, on Monday, April 20, 1992.

ADDRESSES: Office of the United States Trade Representative, 600 17th Street, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Lee Sands, Director, China and Mongolian Affairs (202) 395–5050, or Dorothy Balaban, Special Assistant to the section 301 Committee (202) 395–3432, for information concerning filing procedures.

SUPPLEMENTARY INFORMATION: On October 10, 1991, at the direction of the President, the USTR initiated an investigation under section 302(b) to determine whether specific market access barriers in China are unreasonable or discriminatory and burden or restrict U.S. commerce. The investigation includes the following practices:

(1) Lack of transparency: Failure to publish laws, regulations, judicial decisions, and administrative rulings of general application pertaining to customs requirements or to requirements, restrictions or prohibitions upon imports or affecting their sale or distribution in China;

(2) Import bans: Selected product-specific and sector-specific import prohibitions and quantitative restrictions;

(3) Import licensing requirement: Selected restrictions upon imports made effective through restrictive import licensing requirements;

(4) Technical barriers to trade, including standards, testing and certification requirements, and policies toward veterinary and phytosanitary standards that create unnecessary obstacles to trade.

In addition, we are consulting with China concerning that country's prohibitively high tariffs, import substitution requirements, and other issues.

Public Comment: Requirements for Submissions

Comments must be filed in accordance with the requirements set forth in 15 CFR 2006.8(b) (55 FR 20593) and are due by 12 noon, Monday, April 20, 1992. Comments must be in English and provided in twenty copies to: Dorothy Balaban, Special Assistant to the Section 301 Committee, Office of the General Counsel, room 223, USTR, 600 17th Street, NW., Washington, DC 20506.

Comments will be placed in a file (Docket 301–88) open to public inspection pursuant to 15 CFR 2006.13, except confidential business information exempt from public inspection in accordance with 15 CFR 2006.15. Confidential business information submitted in accordance with 15 CFR 2006.15 must be clearly marked "BUSINESS CONFIDENTIAL" in a contrasting color ink at the top of each page on each of 20 copies, and must be accompanied by a nonconfidential summary of the confidential information. The nonconfidential summary shall be placed in the file that is open to public inspection.

Jeanne E. Davidson,

Chairman, Section 301 Committee.

Sunshine Act Meetings

Federal Register

Vol. 57, No. 59

Thursday, March 26, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. § 552b), notice is hereby given of the following meeting of the Board:

TIME AND DATE: 9:00 a.m. April 10, 1992.

PLACE: Public Hearing Room, Suite 700, 625 Indiana Avenue, NW, Washington, DC 20004.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Board will discuss and deliberate upon safety issues related to the proposed restart of K–Reactor, Savannah River Site, South Carolina, including, but not limited to, consideration of tritiated water release from heat exchangers, safety rod latching mechanisms, and other operational readiness topics.

CONTACT PERSON FOR MORE INFORMATION: Kenneth M. Pusateri, General Manager, Defense Nuclear Facilities Safety Board, or Carole J. Council, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004, (202) 208–6400 (FTS 268–6400).

SUPPLEMENTARY INFORMATION: The Board specifically reserves its right to further schedule and otherwise regulate the course of the meeting, to recess, reconvene, postpone, or adjourn the meeting, and otherwise exercise its powers under the Atomic Energy Act of 1954, as amended.

Dated: March 24, 1992.

Kenneth M. Pusateri,

General Manager.

Department of Justice

Office of Juvenile Justice and Delinquency Prevention

Fiscal Year 1992 Competitive Discretionary Grant Programs and the Availability of the "Office of Juvenile Justice and Delinquency Prevention Fiscal Year 1992 Discretionary Program Announcement Application Kit"; Notice

DEPARTMENT OF JUSTICE

Office of Juvenile Justice and Delinquency Prevention

Fiscal Year 1992 Competitive Discretionary Grant Programs and the Availability of the "Office of Juvenile Justice and Delinquency Prevention Fiscal Year 1992 Discretionary Program Announcement Application Kit"

AGENCY: Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Public announcement of the Fiscal Year 1992 Competitive Discretionary Grant Programs and the availability of the "Office of Juvenile Justice and Delinquency Prevention Fiscal Year 1992 Discretionary Program Announcement Application Kit" (hereinafter OJJDP Application Kit).

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is publishing this Notice of Competitive Discretionary Grant Programs and announcing the availability of the OJJDP Application Kit (a separate publication available from the OJJDP Juvenile Justice Clearinghouse). Each program announcement that follows contains specific instructions on competitive program requirements, including eligibility requirements and selection criteria for each competitive program.

The OJJDP Application Kit contains the discretionary program announcements, general application and administrative requirements, an application form (Standard Form 424), the OJJDP Peer Review Guideline, OJJDP Competition and Peer Review Procedures, and other supplemental information relevant to the application process. To order an OJJDP Application Kit, please call the Juvenile Justice Clearinghouse, toll-free, 24 hours a day, at 1–800–638–8736.

DATES: Each program announcement specifies a due date for the receipt of applications. Applications postmarked after the due dates will not be considered.

ADDRESSES: Applications should be sent to the Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue, NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Program inquiries are to be addressed to the attention of the OJJDP staff contact person identified in each specific program announcement. For general information contact Marilyn Silver, Information Dissemination Unit, (202) 307–0751. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Pursuant to the provisions of section 204(b)(5)(A) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended (hereinafter JJDP Act), 42 U.S.C. 5614(b)(5)(A), the Administrator of OJJDP issued a Final Comprehensive Plan describing the funding activities which OJJDP intends to carry out during Fiscal Year 1992. Published at 56 FR 66536, December 23, 1991, the final plan includes activities specified in parts C and D of title II of the JJDP Act (42 U.S.C. 5651–5665a and 42 U.S.C. 5667–5667a).

The OJJDP program planning process for Fiscal Year 1992 is closely coordinated with the Assistant Attorney General and the Bureau components of the Office of Justice Programs (OJP).

OJP, through its program bureaus' discretionary grant program resources, will implement in Fiscal Year 1992 an initiative titled The Weed and Seed Program. The overall strategy is based on coordination and concentration of Federal, State and local resources, both public and private.

OJJDP supports the overall Weed and Seed strategy of coordinating Federal, State and local resources. To this end, OJJDP encourages applicants providing services in any of the proposed Weed and Seed sites to review this program announcement to determine competitive funding eligibility and to apply under those competitive programs that can be integrated into and contribute to local Weed and Seed Program goals.

The OJJDP discretionary competitive programs that follow in this announcement are listed below in accordance with overall OJP program priorities, where applicable. Applicants for Summer and Graduate Research Fellowships can address any of the OJP/OJJDP program priority areas even though these programs are listed under the Evaluations program area.

Gangs and Violent Offenders

Juvenile Justice System Handling of Sex Offenses and Offenders

Intermediate Sanctions and User Accountability

Juvenile Restitution

Drug Prevention

Professional Development for Youth Workers
Native American Alternative Community-Based Program
Field-Initiated Program

Evaluations

Effectiveness of Juvenile Offender Prevention and Treatment Programs: What Works Best and for Whom?

Intensive Prosecution and Adjudication

A Study to Examine the Delays in Juvenile Justice Sanctions
Juvenile Justice Personnel Improvement
Improvement in Correctional Education for Incarcerated Juvenile Offenders

Information Systems Support and Statistics

Telecommunications Technology for Training and Information Dissemination

OJJDP has made the following change to the "Final Comprehensive Program Plan for Fiscal Year 1992" as published at 56 FR 66536, December 23, 1991: Gang Prevention and Intervention—$800,000 (pg 66537).

This program will not be funded in Fiscal Year 1992. The amount for this program has been reduced by $400,000 to fund a congressionally earmarked program for "Teens Crime and the Community," that was identified in both the House and Senate Appropriations Committee Reports but inadvertently omitted from the Fiscal Year 1992 Appropriations Committee Conference Report. The remaining $400,000 will be reallocated to support the coordination and implementation of gang suppression and intervention programs currently funded by OJJDP. Awards will be made to current grantees and contractors.

Application Requirements: All applications must be submitted in accordance with the requirements set forth in the OJJDP application kit.

Due Date: Applicants are requested to submit the original, signed application (Standard Form 424) and four copies to OJJDP. Application forms and supplementary information will be provided upon request for the OJJDP Application Kit. Potential applicants should review the OJJDP Peer Review Guideline and the OJJDP Competition and Peer Review Procedures. These documents are provided in the OJJDP Application Kit. Delivered applications must be taken to the address indicated between the hours of 8 a.m. and 5 p.m., except Saturdays, Sundays or Federal holidays.

Gangs and Violent Offenders

Juvenile Justice System Handling of Sex Offenses and Offenders

Purpose

To develop a national profile of current juvenile justice system practices in the handling of juvenile sex offenders.

Background

Studies of adult sex offenders reveal that much of their offending behavior began when they were adolescents. According to a 1982 study by Groth, Logo, and McFaden, as many as 60–80 percent of adult offenders reported sexual offending as adolescents. Studies by Abel, Rouleau, and Cunningham-Rathner in 1986 reported an average of over 380 victims, whereas juveniles currently being evaluated report an average of less than seven victims (Preliminary Report from the National Task Force on Juvenile Sex Offending). Studies by Showers, Farber, Joseph, Oshins, and Johnson attribute 50 percent of the molestation of boys and 15–20 percent of the molestation of girls to adolescent offenders. From this it is evident that early intervention has great potential for reducing the victimization of sex offenses.

Goal

To assess how the juvenile justice system protects the community, individuals, and juveniles from the effects of juvenile sex offenses.

Objectives

- To identify effective practices in the juvenile justice system response to juvenile sex offending;
- To identify weaknesses in the juvenile justice system response to juvenile sex offending, which lead to further victimization; and
- To determine whether similar offending sexual behavior, described in a formal topology, is generally responded to in a consistent manner by the juvenile justice system, and, if not, to determine the factors, including offender characteristics, related to the inconsistent response.

Program Strategy

The design of this research builds upon the "Preliminary Report from the National Task Force on Juvenile Sex Offending, 1988," published by the National Council of Juvenile and Family Court Judges (NCJFCJ). The report presents basic assumptions supporting effective juvenile justice system practices in responding to juvenile sex offending. The strategy of this study is to assess how the juvenile justice system currently operates in the handling of sex offenders.

The research will identify strengths and weaknesses in these practices: Strengths that curtail sexual offending; weaknesses that permit offenses to go unreported or offenders to continue their illegal sexual behavior into adulthood. The study will address the question, "How well does the juvenile justice system protect society by apprehending offenders and making them legally accountable for their sexual offenses and by preventing further offenses?"
